have come forward to help in the erection of houses for the accommodation of students. Sir A. Croft writes as follows:—"As instances of liberality in this direction, may be mentioned the gift of a pucka house and of the land on which it stands, by Rai Jotindra Nath Chaudhuri, M.A., B.L., for the benefit of the Taki School in the Presidency Division, and the erection of a house at his own cost by Babu Gobinda Nath Saha Chaudhuri of Parsadanga, for the use of boarders attending the Pabna Zila School. The Maharaja of Sonbursa in the Bhagalpur Division is also stated to have attached a boarding-house to his unaided high school for Rajputs. The members of the Oxford Mission House established a hostel in the Chorbagan quarter of the town of Calcutta, in which the management is left with the students themselves so far as concerns their boarding, their conduct and behaviour being closely supervised by a member of the Mission. But the benefit to be derived from boarding-houses cannot be fully realised so long as all non-resident pupils, or all those who do not put up with their *bonâ fide* guardians, are not compelled to live in them." Government has been able to make, during the current year, an important step in this direction, by undertaking the construction of a boarding-house for the students of the Calcutta Madrasa and the enlargement of the Eden Hindu Hostel, so as to enable it to hold all the students of the Presidency College, who are otherwise unprovided for. This long desired object has been deferred till now by financial considerations, but the present prosperous state of the Provincial revenues has enabled the Lieutenant-Governor to carry it out, and when the building is completed, residence in it will be compulsory on all who do not live with their parents or guardians, or in such a well-regulated establishment as that of the Oxford Mission. Sir Charles Elliott hopes that the time may come when the University will refuse to affiliate any school or college which does not make similar provision for its students.

Physical training and athletic pursuits.

17. The subject of the advantages of physical training for students has been fully dealt with in previous years, and the Director again refers to it, and gives a summary (in paragraphs 56 and 82) of the more interesting particulars. Athletic sports continue to grow in popularity, and the greater interest taken in football of recent years has attracted much attention. The Lieutenant-Governor's acknowledgments are due to the collegiate and school authorities, Government officers, and private gentlemen who have given encouragement to students in the pursuit of manly games by personal example and the offer of prizes. Friendly matches played at cricket or football between the residents at a station and the school-boys are calculated to produce good-fellowship and good temper, a kindly regard for opponents, and respect for skill and pluck. The allotment by the District Board of Balasore of a sum of money for the appointment of a peripatetic gymnastic teacher, who is to teach physical exercises in middle and primary schools controlled by the Board, seems to be a step in the right direction. It is hoped that Marcus Square, in the centre of Calcutta, may soon be opened as a playground for the use of the large number of students and residents in the neighbourhood who have not the time or the means to repair to the *maidan* for wholesome exercise.

Primary education.

18. The numerical fluctuations in primary education for native boys during the past five years are shown in the following statement:—

	Upper Primary.		Lower Primary.	
	Number of schools.	Pupils.	Number of schools.	Pupils.
1	2	3	4	5
1890-91	3,537	128,537	43,997	942,211
1891-92	3,661	135,371	44,918	987,876
1892-93	3,697	139,726	43,828	983,204
1893-94	3,763	141,483	44,020	988,745
1894-95	3,901	150,878	45,897	1,055,253

The number of schools in both divisions has increased by 2,015 and their pupils by 75,903, or 6·7 per cent., so that the average strength of a pathsala has advanced from 23·6 to 24·2. Upper primaries and their pupils continue to exhibit a constant increase: the lower primaries, which have sometimes shown curious variations in numbers, have now taken a decided step in advance. These developments in numbers are shared by almost all the Divisions in the Province. The variations depend more specially on local causes, and it has been assumed that the agricultural prosperity of the country during the last cold-weather was favourable to the growth of schools.

Cost of primary schools to Government.

19. The expenditure incurred by the Department (including the Provincial expenditure in municipalities) and by District Boards, on account of primary education for native boys and girls, is shown in the following table to have exceeded that for 1893-94 by Rs. 86,566, which indicates a satisfactory development during the year:—

Description of schools and expenditure.	From Provincial revenues.		From district funds.		Total.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Stipendiary schools	1,03,701	1,06,269	1,56,003	1,70,079	2,59,704	2,76,348
Non-stipendiary	24,129	27,518	3,11,375	3,57,494	3,35,504	3,85,012
Subordinate inspecting agency ...	13,281	12,136	80,483	86,058	93,764	98,194
Primary scholarships	8,189	2,183	44,039	22,236	52,228	24,439
Examinations, prizes and rewards...		6,399		35,100		41,499
Buildings and furniture	5,598	5,722	1,956	2,337	7,554	8,059
Charges for abolished schools ...	4,335	3,028	9,216	11,346	13,551	14,374
Stipends to gurus under training ...	9,394	51	23,932	1,595	33,326	1,646
Miscellaneous		11,131		21,495		32,626
Total ...	1,68,627	1,74,487	6,27,004	7,07,700	7,95,631	8,82,197
Allotment	1,77,561	1,85,664	6,51,380	7,29,856	8,28,941	9,15,520
Savings	8,934	11,227	24,376	22,096	33,310	33,323

The ordinary departmental budget grant was swelled by the re-grant of a further sum of Rs. 31,000, being the amount of savings in the allotment for primary education in municipalities and cantonments for 1893-94. Another sum of Rs. 40,568, representing the unallotted balance of the grant for primary education in municipalities and non-Board districts for 1894-95, was also placed at the Director's disposal, with instructions to spend as much as possible of the amount on primary education in the mufassal during the year under report. He allotted Rs. 56,500 to 26 different District Boards, while the total of the Departmental grants on account of schools in non-Board districts, Government estates, and municipal areas in Board districts amounted to Rs. 1,85,664, and the expenditure therefrom to Rs. 1,74,437. Many of the Board districts failed to spend their additional grants, and their savings, amounted to Rs. 22,096, have been re-appropriated for primary education in the current year. The municipal expenditure on primary schools rose from Rs. 32,916 in 1892-93 to Rs. 51,630 in 1893-94 and to Rs. 58,672 in 1894-95. The Lieutenant-Governor trusts that the municipalities will continue to regard the promotion of primary education as one of the first calls on their income, until the standard of their duty in this respect, as explained in previous years, has been attained.

Systems of payment of grants to primary schools.

20. Of the three systems under which payments to primary schools are regulated, viz. (1) by stipends, (2) by rewards for pupils who pass in the fixed standards, (3) by a mixed system of small stipends supplemented by rewards, Government and the Director recommend the last as preferable to the two others, at least in the case of the Lower Primary schools, and discourage the adoption, except in Upper Primary schools and in special cases, of the plan of payment by stipends only. The subject has been treated at length in previous reports, and this year there is little to notice but the variations in the figures showing the payments made. The sum spent in rewards has risen from Rs. 3,49,634 to Rs. 4,05,199, while the expenditure on stipends has risen from Rs. 2,46,473 to Rs. 2,58,591. The increased expenditure on stipends is practically confined to the Burdwan and Rajshahi Divisions. The system of paying rewards in advance, that is, of

giving small stipends, the amount of which is eventually deducted from the reward which the school earns, is in partial though increasing operation in several districts, the payments under this system having advanced from Rs. 23,860 to Rs. 34,348. The advanced payments at the rate of Re. 1 or Re. 1-8 a month were originally intended to ensure the stability of the weaker schools, but the Director reports that, these being precisely the institutions which were the least likely to earn Rs. 12 or Rs. 18 a year in rewards, the Deputy Inspectors in many districts felt some hesitation in incurring expenditure, the adjustment of which at the end of the year might involve them in difficulty. The system has, however, made progress in the more advanced districts, and should be encouraged.

Comparison of cost of upper and lower primaries.

21. The expenditure on upper and lower primary schools, and the relative cost in these classes are shown in the following table, Division by Division:—

Primary Schools.

Division.	Allotment.	Expenditure.		Number of schools.		Number of pupils.		Cost per school.		Cost per pupil.	
		Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.	Upper.	Lower.
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.					Rs.	Rs.	Rs.	Rs.
Burdwan	1,29,968	34,443	70,935	749	8,237	27,808	205,961	45·9	9·7	19·8	6·2
Presidency	1,02,320	17,220	63,047	387	3,800	16,081	181,320	44·5	16·2	17·1	9·1
Calcutta	11,000	1,264	7,155	16	187	1,067	8,657	79·	38·2	18·9	18·2
Rajshahi	1,11,796	22,753	52,561	433	2,193	15,885	59,084	52·5	23·9	22·9	14·
Dacca	1,04,724	26,147	56,057	673	4,963	23,926	115,126	38·8	11·3	17·4	7·8
Chittagong	69,443	19,308	39,307	454	3,372	18,648	85,410	42·6	11·7	16·6	7·4
Patna	1,31,043	15,878	70,357	174	4,504	8,528	108,408	88·4	15·6	28·8	10·4
Bhagalpur	97,137	14,801	46,064	214	2,234	8,521	50,128	69·5	20·6	27·9	14·7
Orissa	68,954	11,540	29,865	222	3,381	6,543	52,989	51·9	8·8	28·2	9·
Chota Nagpur	72,582	7,767	48,471	120	1,935	5,604	51,153	61·6	25·	22·1	15·1
Total for 1894-95 ...	8,98,067	1,70,771	4,93,019	3,448	34,896	132,611	847,842	49·5	14·1	20·8	9·3
Total for 1893-94 ...	7,33,710	1,61,049	4,34,482	3.370	34,721	125,792	820,575	47·7	12·5	20·4	8·4

The average cost of the two classes throughout Bengal remains at about Rs. 4 a month for an upper, and Re. 1 a month for a lower primary school. The annual cost of each pupil in an upper primary school has advanced from Rs. 20·4 to Rs. 20·8, and in a lower primary school from Rs. 8·4 to Rs. 9·3. The wide variations in cost in the different Divisions show that there is room for the exercise of considerable economy.

Relative position of districts.

22. An elaborate statement is furnished by the Director in his paragraph 90 of the Report, to show the number of pupils in each district and Division in the different stages of primary education, and to compare the relative positions of the districts and Divisions. The principle of the table is that a merit-mark is given to each school by assigning values of 5, 3, and 1 respectively to pupils in the three stages—(1) upper primary, (2) lower primary reading printed books, (3) lower primary not reading printed books. The divisional figures showing the percentage of merit marks to the male population of a school-going age are reproduced in the margin. The order of the Divisions remains the same as last year, except that Dacca now shows better results than Orissa. The Burdwan Division, with its advantage of having had an indigenous system of education from early days, still occupies the first place, by showing the highest percentage of merit-marks on population of school-going age, Hooghly being the best district, and Howrah and Midnapore nearly as successful. As in last year, the results are least satisfactory in the Patna and Bhagalpur Divisions (which might have done better with their additional allotments), and particularly in the Muzaffarpur, Shahabad and Purnea districts. The percentage of primary pupils (boys) to the male population of school-going age has increased for the whole Province from 22·4 to 24. The total merit-marks for the Province show an advance, numerically measured, of 7 per cent., whereas in the previous biennial period the improvement was only 1·7 per cent.

Divisions.	Boys only.
Burdwan ...	128·4
Chittagong ...	102·3
Presidency ...	77·3
Dacca ...	77·3
Orissa ...	73·7
Rajshahi ...	49·3
Chota Nagpur ...	41·7
Patna ...	30·1
Bhagalpur ...	29·4

The Director has made some interesting calculations to show that increased allotments have invariably produced improved results, and, as he observes, it is highly satisfactory to find that the liberality of Government has already effected an educational advance that can be measured.

Combined post-masters and school-masters.

23. A description of the system of placing post-offices under village school-masters, with a small allowance for the additional work (to be done out of school hours), was given in last year's report. Various complaints have come to light during the year, and certain inconveniences arising from alleged incompatability of the dual duties has been reported. But, as the Director shows, the inconveniences can mostly be avoided by judicious management, and, so long as the postal duties are not performed during school hours, the expansion of the postal arrangements is undoubtedly a public good. The Lieutenant-Governor is of opinion that the plan should be persevered in and details settled with the Postmaster-General.

Training schools.

24. The number of training schools for masters and mistresses was practically stationary (26), though their pupils decreased from 1,125 to 1,006. The number of guru-training classes fell from 218 to 149, a large number having been closed. The expenditure from Provincial revenues on all these institutions decreased from Rs. 86,444 to Rs. 84,068, while the total expenditure rose from Rs. 1,17,803 to Rs. 1,19,572. The average cost to Government of the education of each pupil in a training school varied from Rs. 92 at Hooghly and Rs. 98 at Rangpur, to Rs. 177 at Calcutta, Rs. 169 at Dacca, Rs. 154 at Patna, and Rs. 152 at Cuttack. The results of the Vernacular Mastership Examination for pupils of first grade training schools, excluding private candidates (of whom 8 were successful), show 256 as having passed out of 424 candidates; in the previous year 276 (excluding 22 successful private candidates) passed out of 483. Seventy-six men as compared with 66, 110 and 142 in the three preceding years, have been granted first grade certificates after the three years' course. Drawing being compulsory for these examinees, all the 256 who passed the examination passed in that subject, but not a single examinee succeeded in obtaining a special certificate as a teacher of drawing.

Last year as many as 25 qualified in this way. Sir Alfred Croft writes:—

"A good deal may have been due to a difference of standard, the examiner in 1894 having been the head-master of the Dacca Survey School, and in 1895 the head-master of the Calcutta School of Art; but even though the standard may have been a bit lax to start with and is now being pulled up, it was to be hoped that the candidates would advance in correspondence with the standard. I have now drawn the attention of all Inspectors and head-masters of training schools to these results, pointing out the importance of the subject and the necessity of securing a due supply of qualified teachers to meet the anticipated demand, and requiring them to give more hours a week to drawing, so that these lamentable results may not recur."

It is essential that the examination in drawing should be common for the whole Province, and this should be arranged for the future.

Qualifications of Professors and teachers in different classes of schools.

25. The academical qualifications and certificates of previous training possessed by the 89 Professors in the Government Colleges, the 3,935 teachers in the 377 high English schools, and the 10,879 teachers employed in middle English, middle vernacular, and primary schools are exhibited statistically in paragraphs 55, 71, and 111 of the Report. Of the 89 Professors, all but 11 possess University degrees or titles conferred in the Sanskrit examination. Of the 3,935 teachers in high schools, 1,334 hold University degrees (including the F.A.) and 1,089 hold no certificates; the rest have passed qualifying examinations of different kinds. In 670 middle English schools, out of 2,841 teachers, 739 had passed the Entrance or some higher standard of the University, 644 the Vernacular Mastership Examination, 277 the middle English, and 400 the middle vernacular test. Out of 2,789 teachers in middle vernacular schools, 119 had passed the University Entrance or higher examination, 970 the vernacular mastership test, 1,076 the middle vernacular. In 3,840 upper primary schools there are 5,249 teachers, of whom 2,724 had passed the middle vernacular test and 1,222 had passed no test at all. These statistical tables should be continued from year to year, and should show a regular

advance in the numbers of those who possess University degrees or have passed examinations of a qualifying nature.

Other schools of special instruction.

26. The statistics of the numbers and cost of all institutions and departments of institutions teaching Law, Medicine, or Engineering, the Calcutta School of Art, industrial schools, and other schools of a special character, are exhibited in the following form:—

	Number of institutions.	Number of pupils on the rolls on the 31st March 1895.	Average monthly roll.	Expenditure. From public funds. From Provincial revenues.	Expenditure. From public funds. From district funds.	Expenditure. From public funds. From Municipal Funds.	Expenditure. From private funds. From fees and fines.	Expenditure. From private funds. From other sources.	Total.	Average annual cost of educating each pupil. Cost to public funds.	Average annual cost of educating each pupil. Total cost.

(a) Including the Special Departments attached to St. Joseph's College, Darjeeling.

The variations in the numbers of the students of the learned profession and others are of interest, as follows:—

YEAR.	Law.	Medicine.	Engineering.	Arts and Industry.	Other Special Schools.	Total.
1	2	3	4	5	6	7
1890-91 ...	1,025	1,184	703	753	550	4,215
1891-92 ...	563	1,290	661	853	559	3,926
1892-93 ...	488	1,545	764	915	447	4,159
1893-94 ...	509	1,747	933	1,034	586	4,809
1894-95 ...	642	1,784	922	1,065	701	5,114

The number of law students, that is, those reading for the B. L. examination, the pleadership and mukhtarship classes being excluded, has again increased from 509 to 642, after the marked and sudden diminution in numbers four years ago. The satisfactory increase in the number of students of Medicine, Engineering, Arts and Industry, is still maintained. In 1893-94, including the 35 candidates who passed at the supplementary examination held in July 1894, 98 out of 304 candidates passed the University Examination for the degree of Bachelor in Law; in November 1894 only 68 out of 296 passed, a smaller proportion than before. The extraordinary fluctuations in success in taking this degree have been illustrated in the diagram attached to paragraph 7 of this Resolution. The Director suggests that either the test is becoming more severe, or the candidates come up to the examination less well prepared than in former years.

Medical Schools.

27. The total number of students of all classes in the Medical Schools throughout the Province is higher than last year; but in some instances the numbers have fallen. The attendance was greater at the Medical College by 420 to 367, but on the 31st March the rolls showed 311 pupils in 1895, as compared with 317 in 1894: an exceptionally large number, 119, having brought their studies to a close in the session and left the College in despair of qualifying for a degree. In the interests of such unsuitable students, and to prevent the overcrowding of the class-rooms, it has been decided to hold at the end of each session a test examination, such as is held at other educational institutions; the standard fixed is so studiously moderate, that no student of the most ordinary assiduity and ability, need run any risk of failing to gain promotion. Those who fail to pass this examination will have to go through the year's course again, and if they fail a second time, will be removed from the College. They will pay full fees during the year of remand, for the fee-receipts of the Medical College are very low in comparison with the Provincial expenditure (about Rs. 25,000 against two lakhs), and a similar rule prevails in all Arts Colleges and in the Sibpur College.

The numbers attending the Temple Medical School at Patna were lower than last year, and two unaided Medical Schools in the Dacca Division came to an end, so that the returns show lower figures on this account. Last year a hope was expressed that arrangements would be made to open a female class at the Dacca Medical School; this has been sanctioned since the close of the year under report. There were 16 female students at the Medical College in receipt of scholarships of various amounts: and information is afforded of the present employment of 34 passed students of the College, so far as can be ascertained. The erection of a hostel for the female students of the Campbell Medical School, at a cost of Rs. 96,000, was sanctioned during the year. With regard to the Campbell Medical School, the Lieutenant-Governor regrets to hear that Government service continues to be unpopular, and that only one licentiate became a Civil Hospital Assistant. He understands that no more appointments were offered last year, and he is disposed to think that there should be a fixed number of such appointments to be competed for annually. He is informed that one appointment to Government service was made in 1893-94, three in 1892-93, and none in the two previous years. Six were taken from the school in each of the years 1888-89, 1889-90; none in 1887-88; and in the four previous years an average of 14 annually. It is clear that the numbers appointed from the Campbell Medical School have been diminishing greatly of late years. The Inspector-General of Civil Hospitals will be addressed on the subject. Sir Charles Elliott understands also that in 1894-95 only two candidates from the Dacca Medical School received appointments as Civil Hospital Assistants, one in Bengal and one in Assam, and that eight similar appointments were made from the Patna Medical School, viz. three for Rajputana, three for Assam, one for Burma, and one in Bengal.

Sibpur College.

28. The Sibpur College consists of three departments, viz., the Engineer Department affiliated to the University with 97 students, all Hindus, except two Europeans and three Muhammadans; the apprentice or Foreman Mechanic Department, with 207 students, of whom 165 are Hindus, 40 Europeans and two Muhammadans; and the artisan class, newly opened with nine students, eight being native

Christians and one an Eurasian. The total strength of the College on the 31st of March, excluding the artisan class, was thus 304 against 331 (116 engineers and 215 apprentices) of the previous year. The reduced numbers are due to the introduction of a new rule limiting the annual admissions, as the classes in both departments were becoming too crowded for efficient teaching. The demand for qualified apprentices still continues, and all have received employment. The practical training of the students was transferred during the year from the Public Works Department to the Principal; and with this object Rs. 50,000 were placed at his disposal for the erection of new sheds, the transfer of the machinery belonging to the College, and the conversion of half the existing workshops into class-rooms. The transfer has been carried out with economy and with entire success by Mr. Slater, who found excellent practice for his pupils in the work entailed by the change, and thus saved money for purchasing additional machines. Arrangements to teach mining and electrical engineering are also in progress. Mr. Slater was able to pay this year nine visits to the technical schools in the mufassal. The Director states that "experience has shown us that with proper encouragement the young native of good caste becomes a capital workman," but the tendency to substitute surveying for work in wood and iron must be resisted.

Survey Schools.

29. At the three Government survey schools at Dacca, Patna and Cuttack, the total cost for 616 pupils (average monthly roll number) is Rs. 17,912, of which Rs. 10,976 are recovered from fees and fines, so that each pupil only cost Rs. 29 on an average, of which Rs. 11 were debited to public funds. At Dacca the field work of the second-year class again covered an area of 90 square miles, a cadastral map of the whole tract having been made with the plane-table. The accuracy and value of their work in 1893-94 has been the subject of enquiry, and a final professional verdict on the methods and results has yet to be pronounced. The following proposals have been made for improving these survey schools: that the fee should be raised so as to make the schools more self-supporting: that a certain amount of English knowledge should be required from students more at Dacca, less at Patna and Cuttack: that the course for the first year should be so arranged that students passing through it should be qualified for Government service as amins: that the course be extended for all, or at option, by the addition of some manual work in wood and iron: that the survey schools should be more closely connected with the public offices: that all schools should annually make a cadastral survey. In accordance with these suggestions Government has already ordered the more direct attachment of the schools to the Government offices, so that the complaint may not be made that Collectors appoint untrained men and ignore those trained at the survey schools. The whole subject is receiving the attention of Sir Alfred Croft and of Colonel Sandeman, late Director of Bengal Surveys, and will soon come before Government for final orders.

School of Art.

30. The Art Gallery, attached to the School of Art, was removed during the year from Bowbazar Street to its present site in Chowringhi, between the School and the Indian Museum; all the pictures were carefully examined, cleaned and varnished, and the frames restored. The gallery was opened on the 29th January by Their Excellencies the Viceroy and the Countess of Elgin. The popularity of the school is maintained, the number of pupils varying only from 269 to 270: the total expenditure on the institution has risen from Rs. 31,058 to Rs. 31,785, of which Rs. 6,375 were defrayed by fees and fines: the average cost of each pupil was Rs. 127, of which Rs. 102 were paid from public funds. The character of the work done at the school is the same as last year. The Lieutenant-Governor heard with sincere regret of the death of Mr. W. H. Jobbins, Superintendent of the School, on his way to England in September last. His conscientious labours on behalf of his pupils, his capacity for management and artistic ability, were highly appreciated by Government.

Industrial Schools.

31. The number of industrial schools increased during the year from 26 to 29, and the total number of pupils from 765 to 795. The following quotation from the Director's Report deals with the only matter of recent importance and interest:—

"The only school that demands special notice is the Bihar Industrial School. Arrangements have now been completed for amalgamating the school with the Patna Survey School,

an object which has been long under consideration. The amalgamated school would thus teach a course combining the best elements of both; a fuller course in surveying for those whose work has hitherto been mostly in the carpenter's and blachsmith's shop, and the additional of manual training in wood and iron to the survey school course, together with the introduction of an elementary course in dynamics. It is believed that the pupils thus turned out from the school will be fitted for a much wider range of employment, while for those who show special aptitude, facilities will be provided for admission to the third-year class of the Sibpur college. It is proposed that the school should become a Government institution, the income of the Bihar Technical School Fund, amounting to about Rs. 8,000 a year, being contributed to Government in aid of its expenditure; and that the institution should be called the 'Bihar School of Engineering.' These proposals have now received the sanction of Government."

Other schools.

In connection with the work undertaken by large European schools in preparing pupils for the various departments of the public service, Sir Alfred Croft brings to notice the waste of power involved in the necessary maintenance of separate classes for all the different Government tests; and the Lieutenant Governor fully concurs with him that it would be an immense relief to educational institutions, as well as to Government officers who have to set papers and allot marks, if measures were taken to assimilate in some degree the examination for admission to different branches of the public service.

Female education.

32. The main statistics of female education, i.e., the attendance and expenditure in schools for native girls, are shown in the following table:—

Class of Schools.	Number of schools.	Number on the rolls on the 31st March 1895.	Average monthly roll number.	Average daily attendance.	Expenditure— From public funds. Provincial revenues.	Expenditure— From public funds. District funds.	Expenditure— From public funds. Municipal funds.	Expenditure— From private funds. Fees.	Expenditure— From private funds. Other sources.	Total.
1	2	3	4	5	6	7	8	9	10	11
					Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Managed by Government ..	2	253	242	163	23,603	......	120	6,813	302	30,838
Ditto by District or Municipal Boards.	3	137	139	79	......	......	776	4	......	780
Aided by Government or by District or Municipal Boards.	2,732	56,662	52,305	39,572	74,328	37,120	10,735	26,554	2,07,911	3,56,648
Unaided	479	7,515	6,917	5,264	......	......	......	1,534	15,673	17,212
Total for 1894-95 ...	3,216	64,567	59,603	45,098	97,931	37,120	11,631	34,905	2,23,891	4,05,478
						1,46,682		2,58,796		
Total for 1893-94 ...	2,999	61,034	56,047	41,748	96,706	31,628	11,452	36,363	2,10,340	3,86,489
						1,39,786		2,46,703		
Total for 1892-93 ...	2,921	53,579	......	......		1,35,708		2,16,027		3,51,735
Total for 1891-92 ...	2,708	54,199	......	......		1,31,093		2,24,976		3,56,069
Total for 1890-91 ...	2,238	46,443	......	......		1,26,520		2,24,567		3,51,087

In four years the number of girls' schools has increased from 2,238 to 3,216, and of pupils from 46,443 to 64,567, besides 37,553 girls in boys' schools. The net result of the year is a gain of 217 schools and 7,400 pupils. The total expenditure increased during the year from Rs. 3,86,489 to Rs. 4,05,478. The two Government schools are the Bethune Collegiate School in Calcutta and the Eden Female School at Dacca. The Bethune School sent up six candidates to the last Entrance examination, of whom three passed, one in the first division and two in the second; the first gained a first grade junior scholarship. At the Eden Female School three pupils prepared for the Entrance examination; one failed to attend, and the two others were unsuccessful. The Lieutenant-Governor trusts to the Director to make any suggestion that may in due course appear to him to be desirable for the improvement of this school. The system of administration of grants-in-aid to female schools in Calcutta and the neighbourhood was matured during the year, by making certain modifications to the advantage of the schools in the rules previously sanctioned, and by the adoption of a plan to prevent too sudden a reduction in the grants drawn by them. The grants for the present year have been calculated on the results of the examination in the revised standards held in December 1894, and at present

the scheme embraces all the girls' schools in Calcutta and those in the 24-Parganas and Howrah which are under missionary management. Mrs. Wheeler, the Inspectress of Girls' Schools, examined *in situ* in Calcutta 45 schools with 3,705 pupils, besides 36 in zananas, and 91 schools out of Calcutta with 3,485 pupils, besides 9 in zananas: total 136 schools with 7,235 pupils. Out of 3,338 pupils examined by her, 2,731 passed, or 82 per cent. Mrs. Wheeler deserves the special acknowledgments of Government for the thoroughness of her inspections. Sir Alfred Croft refers to the following important matter which awaits solution:—"The question of unifying the standards for girls' examinations over the whole Province, and the creation of a separate system of scholarships for those who pass these examinations, has to be taken up at an early date, as the present multiplicity of standards is a puzzle to all new workers in the field, and a source of difficulty to inspecting officers. The Calcutta standards would probably be the best for general adoption; but they require to be supported by a special system of scholarships." He will be desired to submit the subject, as soon as it has been matured, for the orders of Government.

Education of Europeans.

33. The statistics of European education show a break in the continuity of increase for the second time in ten years. The following table for the decennial period is of interest:—

YEAR.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.
1	2	3	4	5	6	7	8	9	10	11
Number of pupils	6,098	6,391	6,541	6,682	5,710	6,829	7,098	7,444	7,777	7,640

The number of schools has increased from 72 to 76, and the number of boys at school from 4,264 to 4,271, but the number of girls has sunk from 3,513 to 3,369. The decrease is accounted for by the outbreak of small-pox in Calcutta. The total cost of European education in Bengal fell from Rs. 11,14,962 to Rs. 10,34,478, of which Government paid Rs. 1,75,878 as compared with Rs. 1,82,906 last year. But the total figures are avowedly defective for want of the complete returns. There are 8 aided high schools (6 of those which were classed as high last year having now fallen to the status of middle schools because they sent up no pupils to the Entrance or High School examination) and 7 unaided high schools; of the total number, 4 are at Darjeeling and the rest in the plains. The numbers of the pupils at the schools included in the present return were 1,839 boys and 591 girls, against 1,812 boys and 620 girls in 1894. They sent up 34 candidates (14 boys and 20 girls) to the High School examination, of whom 17 passed (8 boys and 9 girls). In the University Entrance Examination (which is generally preferred by the boys as more likely to lead to appointments), the number of candidates increased from 113 to 117, of whom the successful increased from 73 to 79. The percentage of successful candidates from European schools was 67·5, whereas the percentage of candidates from all classes of schools was 47, showing the marked superiority of European candidates. The total number of middle schools has risen from 36 to 41 containing 1,940 boys and 2,283 girls, against 1,943 boys and 2,412 girls in 1894. The Government Boarding School at Kurseong for boys is to be converted into a girls' school as soon as a new building under construction to accommodate 200 boys is ready. Of the 41 schools, 35 are aided, 5 unaided, and 1 Government. For the Middle Scholarship Examination 30 schools competed, sending up 185 candidates, of whom 177, or 96·7 per cent., obtained passes: this result comparing favourably with that of 1894, when 72 per cent. were successful. There are 20 primary schools (16 aided and 4 unaided) with 396 boys and 495 girls, against 406 boys and 436 girls in the preceding year. For the primary scholarship examination 50 schools and 362 candidates competed, with a percentage of 91·6 passes, as compared with 40 schools and 330 candidates, with a percentage of 82·6 passes, in 1894. European education has therefore done better in every aspect.

Grant-in-aid Rules for European Schools.

34. The new system of grants-in-aid is that all the aided schools in Bengal should receive grants dependent upon the average attendance and the classification of scholars instead of upon examination results, and that frequent supervision by the Inspector

should supersede the annual examination. It was introduced partly in 1893-94, and its working is thus described by Mr. Bamford, the Inspector of European Schools, as quoted by Sir Alfred Croft:—

"The examination of individual scholars was abolished in May 1893 before the examination season for that year had begun. The grants current at that time were calculated upon the results of examinations held in 1892, except in the case of four or five schools examined in February and March 1893. The current grants were continued up to the end of March 1894, when the new rules came into force It was only to be expected that some schools would have advanced and others gone back between the school year 1891-92 (which really determined the grants current up to March 1894) and the calendar year 1893 (which was the period to which the new rules were applied, when calculating the grants for 1894-95); and the new grants therefore exhibited, when compared with the old, not only those variations which were inevitable in consequence of the change of system by which they were calculated, but also others which resulted from the growth or the dwindling of the schools. The latter cause accounted almost entirely for the cases in which there was a great increase or decrease in the amount of grant, when calculated according to the new rules: so much so, that, although every instance of any considerable decrease was carefully considered, it was not thought that there was any claim for a special grant to be given by way of compensation, and in no case was the diminution of the grant objected to or complained of. The introduction of the new system caused the grants-in-aid to be increased in the aggregate by 6·3 per cent. Of the 56 aided schools, 35 gained increased grants, 18 suffered a loss, and the grants of the remaining three were unchanged. In order to avoid any sudden great variation in the grants, the full introduction of the new system was deferred for a year, the grants for 1894-95 being made up of half the grant earned under the old system *plus* half the grant calculated according to the new."

The revision of the Code for European Schools in February 1895 by a strong Committee, should lead to considerable improvements.

Muhammadan education.

35. The total number of Muhammadan pupils has varied during the last five years as follows:—

	Number of Muhammadan pupils.
1890-91	415,428
1891-92	448,847
1892-93	447,485
1893-94	446,130
1894-95	489,333

There has thus been a gain of 43,203 pupils in the year, the most marked and satisfactory advance yet recorded. The ratio of Muhammadan pupils to the total number of youths under instruction has risen accordingly from 28·8 to 29·8. The cause of this exceptional increase is considered by Sir Alfred Croft to be perhaps mainly attributable to the general agricultural prosperity of the year: he says, "it would not be unreasonable to expect that, in the course of the next four or five years, the proportion of Muhammadan pupils would equal the proportion of Muhammadans in the population of the Lower Provinces, which according to the last census is close upon 33 per cent. But it has been found from experience that the majority of them being agriculturists, the increase or decrease of Muhammadan pupils at school depends chiefly upon the fluctuating state of the crops." The increase is distributed through all the Divisions and all the districts but two. Tippera again shows a decrease owing to climatic causes. The number of Muhammadan candidates successful at the University Examinations for the last five years is shown as follows:—

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
Entrance	110	85	172	134	153
First Arts	16	47	35	31	59
Bachelors of Arts ...	19	14	23	26	17
Masters of Arts	2	2	2	0	5

The total number of Muhammadans who passed any examination down to the lower primary rose by nearly one-third, from 4,854 to 6,466. In the

general results of the common examination of madrasas for the last two years (for which the papers were set by a Central Board) 169 out of 252 candidates passed this year, as compared with 162 out of 217 last year, *i.e.*, the results were worse, chiefly at the Dacca, Chittagong and Tippera madrasas. The increase in the number of candidates at Chittagong from 52 to 75 deserves special notice. The Chittagong Madrasa, with 624 pupils, of whom 324 learn English, is now the largest of the madrasas outside Calcutta. The 1,637 pupils at the seven madrasas under Government management (of which the three at Hooghly, Dacca and Chittagong are supported from the the Mohsin Fund, the rest from Provincial Revenues) cost Government Rs. 30,881, out of a total expenditure of Rs 62,772. At the Calcutta Madrasa the number of pupils in the Arabic Department rose from 360 to 373: but in the Anglo-Persian Department the numbers have fallen from 460 to 322. Owing to the failure in the Entrance Examination of 1894, the whole conduct of the Anglo-Persian Department was subjected to a thorough enquiry, and as it appeared that there had grown up much laxity in teaching and admitting pupils to this department, stringent measures were adopted to check these evils. The immediate consequence of these measures was a considerable number of withdrawals of unfit or doubtful pupils.

Education of aborigines.

36. The number of pupils of aboriginal races decreased by 488 from 35,572 to 35,084, the gain of 445 Christian pupils being more than counterbalanced by the loss of 933 non-Christians. Of these aborigines 20,214 are returned as under tuition in Chota Nagpur, 3,933 being Christians and 16,280 non-Christians. In the Bhagalpur Division there are 6,183, in Burdwan 3,540, and in Orissa Tributary Mahals 1,424 pupils of aboriginal races. The increase of 2,737 pupils in Singhbhum in 1893-94 is largely cancelled by the decrease of 1,831 pupils, chiefly Sonthals, in the same district this year; the partial failure of crops in Dalbhum is the explanation offered. The five missions in Chota Nagpur maintained 182 schools against 163 in 1893-94, with 4,903 pupils, as against 4,729. The total expenditure on these schools increased from Rs. 40,578 to Rs. 43,726, while the Government share of it fell from Rs. 9,338 to Rs. 9,029. The elementary schools for miners' children near Giridih numbered 33 against 32, but their pupils declined from 1,500 to 1,404. These schools are supervised by a Committee, of which Dr. Saise is President; Government bore about half their cost. Three aboriginal pupils passed the Entrance Examination, as against 2 in 1893-94, and 515 others passed the other departmental examinations in the year, as compared with 460 in the previous year.

Indigenous education.

37. There are a number of private institutions for education scattered throughout the country, which do not conform to any particular departmental standard, but adhere to the traditional indigenous modes of teaching. The figures for the last five years as follows:—

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
Schools ...	13,387	13,868	13,473	13,602	13,941
Pupils ..	132,057	139,564	134,989	135,530	140,360

The total shows an increase of 339 schools and of 4,830 pupils, so that now the numbers are nearly the same as they were in 1889-90. Many of the schools may be expected to disappear eventually from under the category of indigenous education, when they come under departmental standards and influences.

Sanskrit.

38. The Sanskrit tols decreased by 54 and the number of pupils by 26. Under the orders of Government, issued in 1893, for the encouragement of indigenous Sanskrit tols throughout the country, these institutions are now carefully looked for, and the annual grant of Rs. 12,240 has been sanctioned for the award of stipends to the teachers and pupils. The total outlay during the year from Provincial

Revenues for the encouragement of Sanskrit learning in tols, amounted to Rs. 17,998 in all, including the sum of Rs. 10,538 paid to tol pupils and their teachers as stipends. At the Sanskrit first examination, 350 passed in 1894 and 408 in 1895: at the second examination 129 passed in 1894 and 196 in 1895.

The Central Text-Book Committee.

39. The Central Text-Book Committee consists of 19 members with the Hon'ble Mr. Justice Guru Das Banerjee, M.A., B.L., as President, and the Inspector of Schools, Presidency Circle, as *ex-officio* Member and Secretary. Its chief duty is, on behalf of the Education Department, to make its selection out of the very large number of school-books prepared by private enterprise and offered for its acceptance. The Committee dealt with 260 books during the year, approving 122 and rejecting 109: 20 of the remainder awaited disposal at the end of the year, and the rest were beyond the scope of their functions. The authorized list of books for middle schools has passed through the Revision Committee, and is now being examined by the General Committee. It will then remain to prepare authorized lists of books for high and primary schools. Substantial work was also done by the Branch Committees for Bihar and Orissa during the year. The labours of these voluntary Committees are fully appreciated by Government.

Conclusion.

40. The Lieutenant-Governor desires again to place on record his great obligations to Sir Alferd Corft, K.C.I.E., for the ability and thoroughness of his work as Director of Public Instruction, the wisdom of his advice on all matters on which he is consulted by Government, and the close attention he pays to the administration of his great Department. His long tenure of office has not abated his zeal in the cause of education, while his accumulated experience is of the utmost value to Government. His report, though designedly not so full as last year, leaves nothing to be desired as a record of the year's working. The thanks of Government are due to the Principals, Professors, Inspectors, Assistant Inspectors, and other officers mentioned in the Report.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

LABOUR ENQUIRY COMMISSION.

No. 427*T.G.*—*The 2nd November* 1895.—The following papers are published for general information.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 2nd November 1895.

RESOLUTION—No. 421T.—G.

READ—

A letter from the Secretary to the Bengal Chamber of Commerce, No. 1237, dated the 16th October 1895, requesting Government to appoint a Labour Enquiry Commission.

The letter of the Chamber of Commerce sets forth with clear emphasis the increasing difficulty of obtaining labour for the working and development of the Bengal coal mines and the importance of devising methods for overcoming this difficulty in the interests of a great and growing industry. These questions have been long and anxiously considered by Government, and the Lieutenant-Governor has come to the conclusion that it will be right to accede to the representation of the Chamber and to appoint a Commission of a few gentlemen who possess such experience and practical knowledge that they may be expected to be able to throw some light on the subjects to be investigated.

2. The systems by which labour at present is conducted from the congested districts of Bengal and the North-Western Provinces and from the sparsely populated Division of Chota Nagpur to the districts where it is in demand are two: we have free emigration and we have emigration by recruitment. Free emigration (properly so called) is the system under which labourers leave their homes voluntarily in search of employment; they travel in great numbers to work on the rice and jute harvests of Eastern and Central Bengal, in the jute and cotton mills near Calcutta, on the roads in the lower part of Assam, and on the tea gardens in the Western Duars and the Darjeeling Terai. Many of them on their journeys pass close by the coal mines of Raniganj and Barakar, but they either do not know of the openings there, or are not attracted by them. Emigration by recruitment is the system adopted to supply the Colonies and the tea gardens of Assam, and, in the case of jute mills and perhaps of other forms of industry, it has been used as a precursor of free emigration, in order to start the stream of labour which afterwards flows readily in the channel thus opened. It comprises what is known to the law as "Free Emigration" in the case of the Assam supply, but the term is there used in a somewhat non-natural sense, to distinguish the recruit who is not put under contract till he reaches Assam, from the recruit who starts under a contract. It depends for its success upon a machinery created by law, of recruiters, sardars, local agents and contractors; it is a system open to much abuse, and full of temptations to the agents, who are carefully, though they cannot be effectually, watched and controlled by the executive; innumerable complaints are made against the agents, and numerous convictions for acts of fraud and violence have taken place; and yet the Lieutenant-Governor believes that it is possible to carry on the system fairly and honestly, to the good of the labourer and the employer alike.

3. The main object of the Mining Association and of all who are interested in the coal industry should be to establish a recruiting system in the congested districts, and perhaps also in Chota Nagpur, which shall be free from the abuses and complaints which have given a bad reputation to the recruitment for Assam tea gardens, and which shall gradually and insensibly merge into free emigration to the mining districts when the people of the supply districts learn that the demand for labour is permanent, the wages good, and the life tolerable.

4. In order to effect this object, the first steps are to appoint upright and respectable persons to be labour agents in the congested areas, to

enable them to get into direct communication with the labouring population' and to accredit them to the District Officers of those districts in such a way that the intending emigrants may be able to receive assurances from officials whom they know and trust, that the promises held out to them are màde *bonâ fide* and can be relied on.

5. It is essential that the recruiting agency should be altogether separate from Government, but it will be greatly to its advantage to be able to put forth a programme, supported by the report of a responsible body of men and issued under Government authority, showing where the demand is, what is the nature of the work, what the amount of the wages to be earned, and what the conditions of living. Such a report the Commission asked for by the Chamber of Commerce should be competent to draw up. They would enquire into the resources of the supply districts where the labour agents should be located, how they can best set to work to make known to the surplus population the openings which await them, and what methods employed by the agents for emigration to Assam or to the Colonies they should use and what avoid. They would similarly enquire into the wants and conditions of the mining districts, and would give their official *imprimatur* to a prospectus setting forth the nature and attractions of the proffered employment. This is the extent to which, in Sir Charles Elliott's opinion, it is proper and possible for Government to assist those who are interested in the development of the coal industry, by the appointment of a mixed Commission.

6. There is, however, another direction in which His Honour believes that this Commission may by their enquiries lay the foundation of a great and far-reaching reform. He has already indicated how keenly he feels the abuses which have grown up around the present system of recruiting for Assam tea gardens, the unpopularity which, arising thence, attaches itself to service in Assam, and the general failure which has followed the attempts of the Legislature to promote a system of really free emigration into Assam. At present it may be roughly said that every recruit imported into an Assam tea garden costs Rs. 100; the Chamber, in their letter before Government, estimate that the average recruitment of about 50,000 labourers yearly costs the tea industry about 45 lakhs of rupees. On the other hand, the really free emigrant into the Terai or the Duars is said to cost from Rs. 5 to Rs. 10; he sometimes comes from the same district as the Assam recruit, but he comes voluntarily and receives only a small advance which is often recovered from his wages. There is nothing to justify the immensely greater cost of recruitment for Assam. There is only one cause for it—the competition among the recruiting agency; and to this cause also are due the frauds and enticements, the wrongful confinement and violence used, the prison-like depôts, the costly apparatus of guards and establishment, and the frequent reclamations of emigrants who have been entrapped and deceived. It is this competition which has created the *arkati* or unlicensed recruiter, an "outside broker" who trades in coolies and whose interest it is to get the control, lawfully or unlawfully, over a body of labourers, and to run up the price of those labourers so as to secure large and illegitimate profits to himself. It has been repeatedly stated by District Officers, smarting under a sense of these abuses, that they will never be cured till Government takes the whole recruiting work into its hands. This suggestion is impossible, for Government would never consent to go so far outside its proper functions. But Sir Charles Elliott is convinced that an equally efficient remedy would be created if the tea industry could combine to take the whole recruiting work into its own hands. If all the contractors, local agents and recruiters scattered over the country, instead of competing with each other, stealing each other's coolies, and bargaining with different indenters for the highest price for their recruits, were the employés of a central authority, each working in his own defined area, carrying out orders as the employés of the Colonial Emigration Agents do, recruiting the required number and class of labourers at the required time, nearly all the abuses would be removed, and probably three-fourths of the cost of recruitment would be saved. To effect this is a problem of organisation, a difficult problem no doubt, but still one of a type with which the commercial world is familiar, and which ought to be as feasible in India as similar applications of the principle of combination

for a common object have proved to be in other parts of the world. Whether such a scheme is practicable depends largely on the state of feeling and the desire for combination among the members of the Tea Association in Calcutta, and on its influence over the industry generally, and this the proposed Commission will from its constitution be able to ascertain. It is conceivable that the suggested central agency might embrace the system of recruiting for coal mines also, but whether this is so or not, the recruitment for the labour required by the coal districts will not be successful unless it is carried on in the co-operative manner suggested, the local agents working together for the supply of all mines, and not against each other for the supply of individual applicants with adverse interests. If such a principle can be applied to the recruitment for tea gardens in Assam, a great reform will be effected, and the Lieutenant-Governor commends the examination into this suggestion to the careful attention of the Commission. They will understand that only a preliminary, and (so to speak) a superficial enquiry into the possibility of such an agency is expected from them; in order to investigate it completely, the Administration of Assam will have to be associated in the enquiry, and such a fuller investigation is beyond the scope of the Lieutenant-Governor's authority, and must be placed in the hands of the Government of India.

7. To sum up, the following are the duties with which His Honour considers that the Commission should be charged:—

(1) to ascertain the extent of the labour requirements of the coal-mining industry, and the reason why, up to the present time, the employers of labour have not succeeded in getting a sufficient supply of it;

(2) to ascertain the present condition of the districts (or parts of districts) in which the coal mines of Bengal are situated, as regards their healthiness, natural advantages, density of population, means of communication, and the general industries of the people;

(3) to ascertain the actual terms and conditions under which wages are earned and paid at the coal mines, as well as the collateral inducements offered by the coal industry to those who will work upon the coal fields, including travelling expenses to and from the mines, house accommodation, water-supply, the propinquity of bazars and post-offices, holidays and leave allowances, subsistence during sickness, the provision of medical comforts, hours of labour, and the provision for new labourers when learning their work;

(4) to propose the best means by which the advantages of the mining districts may be made known to the inhabitants of the congested districts of the North-Western Provinces and Bihar;

(5) to ascertain the best systems under which labourers may be induced to proceed to the mining districts and from what classes of the population such labourers should be drawn.

Lastly, and with special reference to what has been written in paragraph 6, to consider the question of the possibility of establishing one central agency through which alone all labourers, whether for coal-mining, tea-growing, or any other purpose, except colonial emigration, should be recruited, and, if this is possible, what the nature, constitution and powers of such an agency should be.

8. The Commission will consist of the following gentlemen:—

H. C. Williams, Esq., C.S.	*President.*
Surgeon-Lieutenant-Colonel D. W. D. Comins, Inspector-General of Jails	*Members.*
One gentleman to be named by the Bengal Chamber of Commerce, one by the Indian Mining Association, and one by the Tea Association	
One native gentleman experienced in questions relating to coal mining	

They will begin to sit early in December, as soon as Mr. Williams is relieved of the officiating charge of the Burdwan Commissionership.

9. The President of the Commission will settle the date of the meeting of the Committee in Calcutta, and be entrusted with the statistical work, and will lay it, when obtained, before the Commission.

Such documents as may be needed for reference will be laid before the Commission by the President.

10. Mr. H. C. Williams will be placed on special duty for the purpose, and will receive a deputation allowance of Rs. 10 a day under article 98(a) of the Civil Service Regulations, in addition to the salary which he would draw in the regular line and the travelling allowance admissible under the rules. The services of Surgeon-Lieutenant-Colonel Comins will be lent to the Commission in addition to his own duties, unless it is found that for a short time it is necessary to place him on special duty for purposes of inspection. The other members of the Commission will be allowed their actual travelling expenses. The cost of the Commission will be met from Provincial Revenues.

11. As the enquiries of the Commission into the points connected with the condition of the supply districts will extend into the Benares and Fyzabad Divisions, and possibly elsewhere, the North-Western Provinces and Oudh Government will be asked to allow the President to correspond direct with any District or Divisional authority in the united Provinces.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Secretary to the Bengal Chamber of Commerce for information, with the request that the Chamber will be good enough to nominate, in consultation with the Indian Mining and the Tea Associations, three gentlemen to represent them on the Commission.

Ordered also that a copy of the Resolution, and of the letter of the Bengal Chamber of Commerce, be forwarded for information to—

(1) H. C. Williams, Esq., C.S., Officiating Commissioner of the Burdwan Division.
(2) Surgeon-Lieutenant-Colonel D. W. D. Comins, Inspector-General of Jails, Lower Provinces.
(3) The Appointment Department of this office.
(4) The Financial Department of this office.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

No. 1237, dated Calcutta, the 16th October 1895.

From—S. E. J. CLARKE, ESQ., Secretary, Bengal Chamber of Commerce,
To—The Secretary to the Government of Bengal, Financial Department.

THE Committee of the Chamber of Commerce desire me to bring to the notice of His Honour the Lieutenant-Governor an important subject which has long had their close attention, and in which the commercial community would be glad to have the assistance and counsel of the Government. It is the supply of labour, not only to the tea districts, but also to the expanding coal industry. The Committee have set on foot certain enquiries, but the more closely they have studied this question, the more convinced they have become that it involves an investigation, as a result of which the Chamber would have of necessity to approach not only the Government of His Honour, but also other Local Governments. This last course could only be adopted by addressing those Governments through the Government of Bengal. It might also well happen that the Chamber, as a result of its investigations, might have to solicit the good offices of His Honour's Government to give administrative effect to such conclusions as might be arrived at, whether those conclusions affected the Province of Assam, or the supply of labour from the congested districts of Bihar and the North-Western Provinces. Under these circumstances, it has occured to the Committee that it would perhaps save time, and also advance the object the Chamber has in view, if the Committee at once suggested to His Honour the appointment of a Commission to consider the question of the supply of labour. Proceeding one step further, they would respectfully ask to be excused if they venture to suggest that, considering the practical acquaintance which Mr. H. C. Williams, C.S., has obtained of the labour question,

as an officer who has served in Assam as well as in Bengal, and who has recently been Chairman of the Mines Commission, His Honour might consider that that gentleman might usefully undertake the investigation now suggested by the Chamber, as President of a joint Commission of enquiry into the supply of labour.

The Committee think that, whilst they refrain from going at length into the questions that have come before them in connection with the supply of labour, they may yet indicate to His Honour the importance of the suggested enquiry and their reasons for soliciting that Government should assist to conduct it to a successful issue.

For many years the merchants in Calcutta interested in tea have formed amongst themselves labour supply agencies intended to control recruiters and to secure for tea gardens the labour they might need. In fact, in 1891 efforts were made to form a labour supply association working in connection with the Chamber of Commerce, but operating under its own rules, and intended to concentrate and control those agencies which now supply labour, and of which occasionally there are loud complaints. One of the objects of the association would have been to encourage to the utmost extent free emigration to Assam. Unfortunately, the scheme fell through. Since 1891 the coal industry has made large and increasing demands on the fields of labour hitherto chiefly resorted to by the tea industry. The growth of an export trade in coal, and the increased demand for mineral fuel owing to an increase of industrial works, has taxed the local resources to their maximum, leaving the coal mines of Bengal far short of their required labour force. The present supply of labour is below the requirements of the mines, and the labourers are in consequence too independent for steady work. Wages are so good that the mining population has no incentive to regular and steady employment: it shows a tendency to work by fits and starts—a tendency that can only be cured by the opening to coal-owners of a new source of labour supply equal to their demands for workpeople. At the same time, there is a large and constant demand for labour to be employed on tea gardens. The tea industry is also expanding, so that for many years it may be anticipated that the requirements in this direction are likely to increase rather than to exhibit a falling off.

But because competition for a scanty supply of labour of a particular class or kind is undesirable, the Committee are anxious to see the coal-fields supplied with a sufficiency of labour flowing to the mines without the intervention of a class of persons occupying the position of professional recruiters. One of the principal objects the Committee have in view in addressing His Honour on this subject is to prevent, as regards coal mines, a recurrence of what has taken place in connection with the supply of labour to tea gardens.

On going into the matter, the Committee discovered such an anomaly as the following, that whilst labourers from Bihar and the North-West are few in number at the Bengal collieries, men from Oudh and the North-West resort somewhat freely to the mines at Wardah in the Central Provinces. At the Bengal collieries this class of labourer exhibits several peculiarities which place them at a disadvantage as regards the Sonthalis. This there is no reason to suppose they will not overcome. And there can be no doubt that the North-Western Provinces do offer to those requiring labour a large and promising field of supply. The difficulty is how to tap this field, and it is here that the Committee consider the matter is one rather to be dealt with by Government than by an independent commercial agency.

As regards the coal-fields and their supply of labour, the Committee may perhaps usefully contrast the density of population in the districts near the mines with that of the more congested districts of Bengal and Upper India:—

Density of population per square mile.

Recruiting Districts.		Bengal and Bihar.		Upper India.	
Manbhum ...	288	Saran ...	950	Benares ...	912
Hazaribagh ...	166	Muzaffarpur	903	Jaunpore ...	810
Lohardaga ...	158	24-Parganas	898	Ballia ...	805
Singhbhum ...	145	Hooghly ...	880	Azamgarh ...	805
Palamau ...	122	Dacca ...	865	Lucknow ...	800
Sonthalia ...	321	Patna ...	852	Ghazipore ...	737
Birbhum ...	456	Darbhanga	840	Gorakhpore ...	654
Bankura ...	405	Faridpur	792	Bareilly ...	652

This table serves to show that the districts adjacent to the coal-fields are not capable of supplying the labour needed by the mines, whilst there are certain tracts in Bengal and Upper India where variety of employment, new sources of earnings, would be the greatest boon that could be conferred upon the people.

It is difficult to settle with precision the money wage of agricultural labourers. Where population is dense, wages are low, and the collateral advantages offered, such as a supply of cloth, concessions of grain, and so on, are few, if indeed they are not entirely absent.

Turning to the valuable and interesting tables issued by the Statistical Bureau of the Department of Finance and Commerce, the monthly money wage of an able-bodied agricultural labour in 1894 varied as under:—

Assam	Rs. 6 to Rs. 10.
North-Western Provinces	Rs. 4 to Rs. 6.
Oudh	Rs. 1-14 to Rs. 4.
Bengal	Rs. 3-12 to Rs. 7-8.

These figures illustrate the fact that, where population is densest, wages descend to starvation point. They show that an able-bodied agricultural labourer can, in Oudh, earn from one anna to two annas one pie, and in Bengal from two to four annas, per day.

In the mining district the fixed wage may be taken at about the higher wage given in Bengal, and such a wage may be earned by new and untried labourers. The work, however, is usually done by the piece or by contract, and the wage therefore cannot so easily be stated at a monthly sum. The information before the Committee shows that working by contract or by the piece, a miner, without greatly exerting himself, can earn eight annas a day, while, if he choose to work steadily and with fair perseverance, there is nothing to prevent his increasing his wage to twelve annas or even more daily. In like manner, piece work on a tea garden is highly remunerative to the labourer, though it is difficult to reduce it to a monthly standard of earning. Sufficient has been said to show that, expressed as a monthly wage, the earning of a tea garden cooly or a labourer in the Bengal mines is far in advance of the average earning of an able-bodied labourer in either the Bengal Provinces, the North-Western Provinces, or Oudh; and this without referring to those important collateral advantages enjoyed by workers on tea gardens and at the mines of free house accommodation, free tools, free medical attendance and medicines, purer water, cheap supplies of grain, or other facilities for purchasing necessaries and even small luxuries. This being so, it may seem strange at first sight that the people of the congested districts, even allowing for the attraction which the land has for all natives of India, should be content to subsist on so small a wage, whilst industries in the same or the neighbouring province should be crippled for want of labour. The only explanation which occurs to the Committee as being probably near the truth is that in the North-Western Provinces the existence of, say, the coal mines in Bengal and a comprehension of the rate of wage to be earned there, are practically unknown. In bringing this necessary information home to the people and to facilitate the movement of those of them who may desire to improve their condition, the officials of Government may lend most useful aid.

And here the Committee may remark that their experience bears out the testimony of Mr. Forbes, Commissioner of the Patna Division, as to the movement of petty cultivators and able-bodied labourers from Bihar to the eastern districts of Bengal, where they help to harvest the jute and rice crops. Harvesters are also drawn from Oudh and the North-Western Provinces. These men remit money to their homes and return in time for the winter and spring cultivation of their own villages. Such a movement has more than merely local importance. It deserves to be not only encouraged, but stimulated. Used judiciously, it may, in conjunction with improvements in the communications with the tea districts, lead ultimately, not only to the establishment of a valuable supply of season-labourers for tea gardens, but also to a steady influx of permanent settlers.

To turn to some minor points of the question, the Committee do not overlook that one result of a steady supply of labour to the coal districts would be a gain to the State from the larger mineral earnings of the East Indian

Railway. Again, with a larger and cheaper output of coal, the export trade of coal from Calcutta might be expanded to probably ten times its present proportions. An export of from three to five millions of tons of coal per annum would be a very practical and effective way of minimising the burdens now imposed upon the general trade of the port by the charges connected with, or arising from, wet docks at Kidderpore.

The Government of the North-Western Provinces is understood to be willing in the interests of the population of the congested districts of those provinces to lend its aid to encourage labourers to resort to the coal-fields of Bengal, where an income much in excess of that obtainable near their homes can be secured. But if this source of supply is to be worked at all, it should be worked upon a system approved by the Government of Bengal as well as by the Government of the North-Western Provinces, to ensure that the most economical and desirable methods are adopted in the interests alike of the labourers and the mines.

The Committee have shewn that there is an urgent need of an increased labour supply to the coal-fields. As regards Assam, the Census Report of the Province gives 39,000 per annum as the number of persons needed to keep up the rate of increase of residents born outside the Chief Commissionership. This statement, however, if accepted as a measure of the yearly reinforcement of the labour supply for the gardens, would give a wrong idea of the real proportions of the labour demand of the tea industry. The report on labour immigration into Assam gives the totals for Act adults (sardari and contractor's), non-Act adults, and children as under:—

1889	...	55,658	immigrants	into	Assam.
1890	...	36,080	"	"	"
1891	...	49,908	"	"	"
1892	...	56,050	"	"	"
1893	...	50,675	"	"	"
1884	...	42,519	"	"	"

This makes an average, for the six years, of 48,448.

When, however, it is remembered that Assam Proper is a province with an area of nearly 21,000 square miles, and a scanty population of about $2\frac{1}{4}$ millions, and that out of a total for all India of 138 million pounds of tea it produces $97\frac{1}{4}$ million pounds, it may be inferred that immigration is far below the requirements of the province. The majority of the great column of close upon 50,000 immigrants into Assam are imported therein at the expense of the tea industry. The estimate of this outlay approaches the serious total of Rs. 45 lakhs per annum, which again may be taken to be about ten per cent. on the cost of production. The mere statement of such a fact as this shews what an enormous tax the import of labour is upon Assam tea. At the same time, it discloses a state of things which, in the opinion of the Committee, makes the appointment of such a Labour Commission as they have suggested not only desirable, but a necessity. For this costlines, of imported labour is in a large degree due to the artificial difficulties placed by the system of recruitment in the way of securing labourers for the tea industry—difficulties which, the Committee would hope, a Labour Enquiry Commission might find means to remove.

Having thus placed the matter before His Honour the Lieutenant-Governor, the Committee of the Chamber of Commerce trust that His Honour will believe it is only a conviction of the urgency of the labour problem which has led them to solicit, as they now do, his sympathy and assistance.

BENGAL SANITARY DRAINAGE BILL.

No. 3791*S.*—*The* 5*th November* 1895.—The following correspondence is published for general information.

H. H. Risley,
Secy. to the Govt. of Bengal.

Dated Calcutta, the 8th August 1895.

From—Rai Rajkumar Sarvadhikari Bahadur, Secretary, British Indian Association,

To—The Secretary to the Government of India, Home Department.

By desire of the Committee of the British Indian Association, I have the honour to submit, for the consideration and orders of His Excellency the Viceroy and Governor-General, the following representation regarding the Sanitary Drainage Bill passed by the Council of His Honour the Lieutenant-Governor of Bengal for making Laws and Regulations on the 3rd instant.

From its very inception the measure was regarded by the public with anything but approbation. It was looked upon with disfavour by most of the public bodies, officers of Government and other gentlemen who were consulted about it, and several of the responsible officers of Government who could speak with authority on the subject condemned it in no equivocal terms. Mr. Cooke, Magistrate of Hooghly, who has the largest experience of drainage works by reason of most of such works having been executed in the district under his charge, said that—"Drainage works under Act VI are not altogether satisfactory precedents for Government interfering as public benefactors, and if alluded to, should be quoted rather as warnings than as examples." Instead of multiplying instances the Committee of the Association beg to quote what His Honour Sir Charles Elliott himself said in his public address at Dacca in July 1894:—"The present Bill was therefore drawn up and had been widely circulated for criticism amongst members of municipalities, Boards, officials and many others, whose opinions are likely to be of value. Many replies had been recorded and others are still coming in, and His Honour said he had to confess that most, if not all of them, where hostile to the Bill."

It is only a natural result of its character that the measure has not commanded public support. The science of sanitation is new even in the country of its origin. In Bengal the climate and the physical conditions of the country are factors which remove the province from the operation of conclusions derived from experiments in European countries. Then, again, the institutions, habits, and modes of living of the people of Bengal strengthen the differences arising from climatic and geographical conditions. It is reasonable therefore to doubt whether measures, recommended as useful in Europe, would prove beneficial to the inhabitants of Bengal. This doubt has been strongly fortified by what responsible officers of Government themselves have said about the causation of disease in Bengal. In reviewing the Report of the Drainage Obstruction Committee, Mr. A. Mackenzie (now Sir Alexander Mackenzie), Secretary to the Government of Bengal, said: "Dr. Lethbridge is unable to accept the view that the dampness of the sub-soil could be the sole and only cause of the fever, or that this dampness, which is general in Lower Bengal, had been brought about by roads, railways, &c." Another officer, Colonel Haig, stated: "I have seen villages situated on high ground from which the levels sloped away gradually in all directions for a mile or two, and within which there was not in the month of January, and plainly could not be at any other time of the year, a vestige of a swamp; yet this had all had the fever, all had a dismal tale of suffering to tell. It is vain therefore in my opinion to look for the origin of the fever solely in the swamps, great and small, scattered over the country."

The truth is that it is not obstructed drainage and the dampness of the country so much as the poverty of the people which should account for the high rate of mortality which is said to obtain in some districts in Bengal. The concensus of professional opinion should leave no doubt on the point.

In 1886 Dr. Coates, Sanitary Commissioner with the Government of Bengal, observed in his annnal report: "Outbreak of cholera in different districts throws no new light on the etiology of disease. It is owing to water-supply, impure and insufficient, inhabitants enfeebled by exposure, insufficient clothing, scanty and unwholesome food." Another eminent officer, Dr. Saunders, while Deputy Inspector-General of Hospitals, observed: "And now as to causation, Dr. Elliot has in his report given a very fair *resumé* of the views which have been held on the subject, and he has pointed out how sanitation, or the absence of it, defective drainage, supersaturation of the soil, &c., exist in many places where fever has not been markedly prevalent, and that where supposed causes are not apparent, yet that disease has been rife and excessively fatal." Dr. Saunders ascribes the lowering of the health of the people to "the total absence of all conservancy, the almost total want, at certain seasons, of proper clothing, the overcrowding in their dwellings, the almost invariable corruption of water-supply, the insufficiency of their food (looked at as nutriment), and all other conditions which I have alluded to on a former occasion."

It is therefore inevitable that the public, and the influential section of the public represented by the Association, should view with apprehension and anxiety such a measure as the Sanitary Drainage Bill. It involves the imposition of additional taxation for recovering the cost of works undertaken in compliance with its provisions. And it imposes an increase of burden upon the people of this province—a people suffering already from a failing stamina and inability to resist morbific influences, and upon whom any new burden must have a disastrous and injurious effect. The alarm is the more widespread, as there is no limit to the cost of such works and to the rate which may be levied for recovering such cost. The Committee of the Association beg to submit that in their present impoverished condition, both landholders and raiyats must feel the imposition of additional taxation upon them as an act of grievous oppression which, instead of benefiting them, must reduce their means of maintaining themselves, of providing themselves with proper food and clothing, and of paying for medical aid and medicines when necessary, and thus predispose them more to the attacks of the fever against which the drainage work is intended to be a protection.

Irrespective of all other considerations no justification for the measure exists even on the ground that it is necessary for the purpose of removing a defect in the Statute Book. There are already in the Bengal Code several Acts—the Road Cess Act (section 109), the Drainage Act, 1880, the Embankment Act (section 79), and the Local Self-Government Act (section 87)—which provide for the execution of drainage works for the purposes of sanitation and improvement of land.

But not the least objectionable feature of the Bill is its provisions for the recovery of the cost from persons interested in the land and for its apportionment on the basis of the road cess. It is not only persons that are in immediate possession of land either as proprietors or tenants, and whose benefit is intended by a sanitary drainage work, who would have to pay, but also all proprietors of superior grades living at distances from the scene of operation, and who would be quite unaffected by the work. Landlords, who have let out their estates in permanent tenures and have no direct connection with the land, would have to bear a share of the cost, while merchants, traders, manufacturers, artizans and others, who would be benefited in a sanitary point of view, would have to pay nothing at all. This would be a new imposition on land and an increase of the land revenue in opposition to the pledges given in 1793, and in a way which admits of no justification whatever. The Committee of the Association would respectfully submit that it has been held by such eminent lawyers as Lord Bramley, Sir Erskine Perry, and Sir Barnes Peacock that any imposition which reduces the profits of landholders in the permanently-settled provinces is a breach of the conditions on which the settlement was made, and they would humbly ask whether it is a wise and sound policy to enact a legislative measure which is unnecessary and of doubtful utility, which must seriously shake the confidence of the people in solemn pledges given by Government, make them brood over wrongs repeatedly done them by breaches of vested rights, and tend to create disaffection and a sense of helplessness.

Too much importance cannot also be attached to the way in which the Bill was passed. His Honour the Lieutenant-Governor said from his place in Council on the 20th ultimo that "another reason for deferring the final passing of the Bill is that we leave an opportunity for two mufassil Members of the Council who have not yet been elected to give us the benefit of their opinion in the matter." But although one of the Members has not yet been elected, and although motion was made to allow the Bill to stand over for three months, the motion for passing it was allowed and carried by a majority of three, even though all the elected hon'ble Members and one appointed hon'ble Member, strongly opposed the passing of the Bill.

For the above reasons among others, the Committee of the British Indian Association respectfully solicit that His Excellency the Viceroy and Governor-General may be graciously pleased to withhold his assent to the Sanitary Drainage Bill.

No. 280T.M., dated Darjeeling, the 31st August 1895.

From—H. H. RISLEY, ESQ., C.I.E., Secretary to the Government of Bengal, Municipal Department,

To—The Secretary to the Government of India, Home Department.

I AM directed to forward, for submission to His Excellency the Viceroy and Governor-General, a representation from the British Indian Association, praying that His Excellency may be moved to withhold his assent to the Bengal Sanitary Drainage Bill. I am at the same time to offer, for His Excellency's consideration, the following observations on the arguments put forward by the Association.

2. The Bill, as the Government of India are aware, was based upon a Resolution* adopted unanimously by the members of a Conference held at Belvedere on the 25th July 1892 to consider what legislative action should be taken in order to promote the improvement of water-supply and drainage in towns and rural tracts in Bengal. The Conference comprised 5 official and 9 non-official members, and the latter were representative men, having special experience of the subjects under consideration. In the course of the discussion of the Resolution, it was urged by Babu Surendranath Banerjee that the existing law had been found insufficient, and that it was essential that the initiative should rest with the Government. If this was not provided for by law, he was afraid that in the vast majority of cases, nothing would ever be done. He added that nearly all of the persons consulted by him in various parts of Bengal were in favour of compulsory legislation. Accordingly, in section 3 of the Bill, which was submitted to the Government of India with Mr. Bourdillon's letter No. 64T.M. of the 6th September 1893, the Local Government was empowered to take action either of its own motion, or on the representation of the Magistrate of the district, or on an application made to the Magistrate by the District Board. In view, however, of the opposition with which the Bill was received, the Lieutenant-Governor caused its provisions to be altered so that, in the measure recently passed by the Council, not only does the power of initiating and rejecting schemes reside solely in the District Board, but if a scheme is modified by the Government so as to increase its cost, it must be referred back to the District Board, which has the power of rejecting it. Further than this it was impossible to go without abandoning the Bill altogether, and with it all hope of taking any effective action against the prevalent malarial fever which for the last twenty-five years or more has been generally ascribed to obstructed drainage.

* "That when an application is made to Government on the part of the inhabitants of any tract where malarial fever prevails, or when it is notorious that there is a high rate of mortality due to the want of drainage, provision shall be made by law for ascertaining the wishes of the majority of the inhabitants or owners of the property concerned, as represented by the District Board, and if the majority support the scheme, the Government shall be empowered to carry out comprehensive schemes of drainage, and to raise from the area affected such funds as may be necessary for meeting the cost of such schemes."

3. The allegation made in the third paragraph of the Association's letter, that European experience can throw no light on the prevention of malaria in India, hardly deserves serious discussion. It is a matter of common knowledge that the causation and symptoms of malaria are the same all over the world, and if the removal of obstructions from drainage has been followed in Europe by the

agriculturists to 77·1 per cent. Even this, however, really understates the case, for the simple reason that people whose caste occupation is non-agricultural, but who also cultivate, are apt to be recorded as non-agriculturists. The records of the Muzaffarpur settlement and other settlements recently completed in these provinces show that virtually the entire population is more or less interested in land, and therefore, through the machinery of the road cess, will contribute to the cost of drainage schemes. The point was carefully considered by the Select Committee, and it was found impossible to devise any means of compelling non-agriculturists resident in rural areas to bear a share of the cost of drainage schemes without introducing a special machinery for assessment quite out of proportion to the end in view, which the figures referred to above, and more especially the settlement records, show to be one of merely nominal importance.

10. The time-worn argument that the Bill involves a breach of the Permanent Settlement may be dismissed in a few words. It amounts to a claim on the part of the landholders that their lands should be drained for them and that some one else should pay the cost. It ignores the fact that the drainage rate is in no sense a regular tax, but a charge which will be imposed, if imposed at all, on the motion of the people themselves as represented by the District Board, and that it will only be levied for a period of thirty years. And finally it leaves out of account the Duke of Argyll's despatch of 12th May 1870, which ruled once for all that the levying of rates upon the holders of land for local expenditure involves no breach of faith on the part of the Government.

* * * * * * * *

No. 1966, dated Simla, the 24th October 1895.

From—J. M. MACPHERSON, Esq., Officiating Secretary to the Government of India, Legislative Department,

To—The Secretary to the Government of Bengal, Municipal Department.

I AM directed to acknowledge the receipt of your letter No. 280T.M., dated the 31st August 1895, addressed to the Secretary to the Government of India, Home Department, forwarding a representation from the British Indian Association, Calcutta, dated the 8th idem, praying that His Excellency the Viceroy and Governor-General may be moved to withhold his assent to the Bengal Sanitary Drainage Bill, and to request that, with the permission of His Honour the Lieutenant-Governor of Bengal, the memorialists may be informed that His Excellency the Viceroy has considered their representation and has seen no reason to withhold his assent to the measure.

2. I am at the same time to state that memorials from the Associations noted on the margin have also been received, and to request that these Associations may be similarly informed.

From Secretary, People's Association, Faridpur, dated 19th September 1895.

From Secretary to the Barisal People's Association, dated 20th September 1895.

From Secretary to the Rajshahi Association, Bengal, dated 21st September 1895.

From Assistant Secretary to the Murshidabad Association, dated 29th September 1895.

REGULATIONS FOR 1896 OF THE FOREST SERVICE BRANCH IN COOPER'S HILL COLLEGE.

No. 4778For.

THE following is published for general information.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

REVENUE DEPT.,—*For.*,
The 4th November 1895.

Circular No. $\frac{18}{290-2}$F.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests), dated Simla, the 18th October 1895.

Read the following despatch from Her Majesty's Secretary of State, forwarding copies of the Regulations for 1896 of the Forest Service Branch in Cooper's Hill College:—

No. 98 (Revenue), dated London, the 5th September 1895.

From—The Right Hon'ble Lord George Hamilton, Her Majesty's Secretary of State for India,

To—The Right Honourable the Governor-General of India in Council.

I FORWARD herewith, for the information of Your Excellency's Government, ten copies of the Regulations for admission to the Forest Service Branch at Cooper's Hill College for the year 1896.

REGULATIONS FOR THE FOREST SERVICE BRANCH OF THE ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, FOR 1896.

[*Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.*]

STAFF OF THE COLLEGE.*

President, General Sir Alexander Taylor, G.C.B., R.E.
Secretary, Lieutenant-Colonel W. J. Boyes.
Bursar, J. P. Pasco, Esq., R.N., retired.
Chaplain, Rev. C. Croslegh, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. Heath, Esq., A.M.I.C.E.
Professor of Surveying, Major-General E. H. Courtney, R.E.
Instructor in Geometrical Drawing, Arthur Hicks, Esq.
Lecturer in Accounts, J. C. Hurst, Esq.
Instructor in Freehand Drawing, Russell Dowson, Esq.

Mathematical Branch.

Professor of Applied Mathematics, G. M. Minchin, Esq., M.A., F.R.S.
Professor of Pure Mathematics, A. Lodge, Esq., M.A., Fereday Fellow of St. John's College, Oxon.

Natural Science Branch.

Professor of Chemistry, Herbert McLeod, Esq., F.R.S.
Professor of Physics, W. N. Stocker, Esq., M.A., Fellow of Brasenose College, Oxon.
Lecturer in Geology and Mineralogy, Professor H. G. Seeley, F.R.S.

Forestry Branch.

Principal Professor of Forestry, W. Schlich, C.I.E., PH.D., late Inspector-General of Forests to the Government of India.
Assistant Professor of Forestry, W. R. Fisher, Esq., B.A., late Conservator of Forests, Northern India.
Professor of Botany, H. Marshall Ward, Esq., M.A., S.D., F.R.S., F.L.S., Fellow of Christ' College, Cambridge.

* The staff of the College is only given in so far as it concerns the Forest Branch.

Lecturer on Entomology, W. F. H. Blandford, Esq., M.A., Fellow of Christ's College, Cambridge.

Lecturer on Chemistry of Soils and Vegetation, A. H. Church, Esq., M.A., F.R.S.

Instructor in German, T. H. Dittel, Esq.

Lecturer on Forest Law, B. H. Baden-Powell, Esq., C.I.E., late of the Indian Civil Service.

Director of Practical Study in Forestry on the Continent, Sir Dietrich Brandis, K.C.I.E., PH. D., F.R.S, late Inspector-General of Forests to the Government of India.*

[The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.]

1. The Royal Indian Engineering College is primilarly maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. The examination, which is conducted by the Civil Service Commissioners, usually takes place towards the end of June; and candidates may undergo the written part of their examination in London, Edinburgh, or Dublin, or at any of the provincial centres at which the simultaneous examination of candidates for admission to the Royal Military College, Sandhurst, is to be held. A list of the probable centres may be obtained from the Civil Service Commissioners at any time after March 1896. The oral and practical parts of the examination will be held in London only.

A fee of £2 is required from candidates examined in London, but when the written examination is conducted elsewhere than in London the fee is £3. Candidates examined at a college or school will probably be required to pay a local fee in addition to the fee of £3 (in order to defray the expenses of superintendence), as to which they should obtain early information from the college or school authorities. The fee payable to the Civil Service Commissioners must be paid by means of stamps of the specified amount. Instructions on this point will be issued to candidates about 10 days before the examination.

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India; the figures as regards each particular year will be advertised from time to time. *In 1896 there will be six appointments offered for competition. It is possible that after 1896 recruits for the Indian Forest Service will be selected from Cooper's Hill College students at the end of their first year's course of study.*

4. Candidates for the Indian Forest Department are selected under the followng arrangements:—

(a) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching Indian, he will forfeit his appointment.

(b) An applicant must send† to the Revenue Department of the India Office, on or before the 15th day of May of the year in which he proposes to compete:—

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct, during the last four years.

(c) Applicants will have to appear before a Medical Board‡ at the India, Office, particular stress being laid upon good vision and hearing. A physical test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance.

---

* Sir D. Brandis is not on the staff of the College.

† There is no form of application; the documents specified in paragraph 4(b), clauses (1) and (2), should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office London.

‡ With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:—

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

(*d*) The applicants who have successfully passed the medical examination and the physical test will be required to undergo an examination before the Civil Service Commissioners in the following subjects* (Classes I to III), marks being assigned as follows:—

No.	Subject	Marks.	
	CLASS I.—OBLIGATORY SUBJECTS.†		
1.	Mathematics (lower), *viz.*, Algebra up to and including the Binomial Theorem; the theory and the use of logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the solution of Triangles and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2.	English composition	1,000	
3.	German (400 for colloquial)	2,000	
	CLASS II.—OPTIONAL SUBJECTS.		
4.	Mathematics (higher), including Analytical Geometry, Conic Sections, Statics, and Dynamics	2,000	A candidate may take any two, but not more than two, of the optional subjects. Under "Optional Subjects" Nos. 9, 10, 11, and 12 the examination will be partly practical.
5.	French (400 for colloquial)	2,000	
6.	Latin	2,000	
7.	Greek	2,000	
8.	English History. There will be set: one general paper; one paper limited to a fixed period, which will be from the year 1702 to the year 1788 for the examination of 1896 ...	2,000	
9.	Botany, *viz.*, the elementary parts of vegetable morphology, histology, and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on vegetable palæontology or on the geographical distribution of plants	2,000	
10.	Chemistry, viz., the elements of Inorganic Chemistry	2,000	
11.	Physics. Elementary properties of Electricity, Magnetism, Heat, Light, and Sound ...	2,000	
12.	Physical Geography and Geology, chiefly economic; including the recognition of the more familiar minerals and rocks, and their properties and uses	2,000	
	CLASS III.—ADDITIONAL SUBJECTS.		
13.	Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects.
14.	Geometrical Drawing	300	

(*e*) The Secretary of State will nominate as probationers such competitors as attain the highest aggregate of marks (provided they obtain the minimum in the obligatory subjects and satisfy the requisite conditions in other respects). These probationers will then enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about three years, divided into seven terms, and a period of study in foreign forests. During seven terms the candidates will prosecute their studies mainly at the College, and during the period of foreign study, which may last for five or six months, they will visit, under suitable supervision, such continental forests as may be selected for the purpose. Excursions may also be made for purposes of instruction, both during term time and during part of the vacations.

---

* Reprints of the papers set at previous examinations, together with tables of the marks assigned to the candidates, are published by the Civil Service Commissioners, and can be obtained through any bookseller. The price of each reprint is one shilling.

† Attention is invited to the appended Syllabus, giving further details regarding the extent and character of the examination.

6. Each annual session begins in September and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer, except at the end of the visit to the Continent when the vacation will be shorter.

7. A charge of £61 is made for each of the seven terms spent at the College; for the period of foreign study the charge is £150 for each student; the amount must be paid terminally in advance to the Bank of England for the first seven terms, and the amount due for the period of foreign study must be paid before the period begins. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians, shortly before the fees fall due. A student will not be allowed to come into residence or to start for his foreign study of the forests until his fee has been paid.

8. A deposit of £5 is required to be paid by each student on admission to the College as caution money to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion £65.

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging, with washing, up to a cost of 2*s.* a week, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the aggregate maximum expenditure under these heads being 10*s.* per diem), (2) travelling expenses, and (3) fees to local Forest officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study comprises the following subjects:—

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry.
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry*, theoretical and practical, in all its branches.

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required; failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the foreign study, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and should the result be unsatisfactory he cannot claim to be allowed to complete the course.

13 The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these mimina will receive the College diploma in foresty.

14. Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed, before leaving the College, to state their preference in respect to the Provinces to which they desire to be alloted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India after consulting the President of the College and the Principle Professor of Forestry. The distribution will be made on the understanding that officers are at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided

* For details see Royal Indian Engineering College Calendar.

with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of reporting arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month; and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the Service for the time being. The more favourable pension rules have recently been extended to Forest officers appointed from England, who are thus placed on an equality with Public Works officers appointed from Cooper's Hill College. Any Forest officer who has rendered not less than three years' approved service as head of his department, has also been made eligible for an extra pension of Rs. 1,000 per annum. A copy of the Regulations relative to this matter can be seen on application either at the Library or the Record Department of the India Office; the principal rules, however, are contained in the Abstract of the Civil Service Regulations, as given in the "India Office List" or the "India List," published respectively by Messrs. Harrison and Sons, 59, Pall Mall, and Messrs. W. H. Allen & Co., 13, Waterloo Place, S. W., either of which can be procured through any bookseller.

18. Every candidate before proceeding to India will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

General Rules.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College Diploma in Forestry, or special certificates showing in what subjects they have followed the instruction and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or ascertain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the India Forest Service. Candidate who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

INDIA OFFICE,
August 1895.

FOREST EXAMINATION.

SYLLABUS.

CLASS I.

Mathematics.—The extent of the Examination will be as follows:—

(*a*) Algebra, up to and including the binominal theorem, the theory and use of logarithms;
(*b*) Euclid, Books I to IV and IV;
(*c*) Plane Trigonometry up to and including solution of triangles and mensuration.

English Composition—The standard of positive merit will be looked for in logical, arrangement of thought, and in accuracy and propriety of expression, but large deductions of marks will be made for faults of writing and spelling.

Candidates are also warned that, for similar faults in the use of the English language similar deductions will be made from the marks obtained in the German papers in Class I.

German.—There will be translations of unseen passages from German into English, and from English into German; the passages for translation will be taken, mainly, from standard authors, and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest. The *vivâ voce* Examination will include Dictation.

CLASS II.

Any two Subjects may be maked up.

Higher Mathematics:—

*** In all the following subjects great importance will be attached to accuracy in numerical results.

Further questions and problems on the subjects of the Examination in Mathematics, Class I.

And in addition:—

Statics: The equilibrium of forces acting in one plane and of parallel forces, the centre of gravity, the mechanical powers, and friction. (The graphical or geometrical method of treating such problems should be studied as well as the analytical. No application of the differential calculus to Statics will be required.)

Dynamics: Uniform, uniformly accelerated, and uniform circular motion, falling bodies and projectiles *in vacuo*, collisions and work. (Analytical methods of solution, but not the use of the differential calculus, will be involved.)

Analytical Geometry: Problems on straight line and circle.

Conic Sections: Elementary properties, with easy problems both on the analytical and geometrical methods.

French.—The passages for translation will be taken mainly from standard authors, and in other respects the Examination will proceed on the same lines as in German.

Latin.—Passages selected from the authors usually read in schools will be set for translation into English. Passages from English authors will be given for translation into Latin prose and verse; but Candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the grammar of the language, and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the Examination will proceed on the same line as in Latin.

English History.—The General Paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the General Paper.

Botany, Chemistry, Physics, Physical Geography, and Geology.—The standard of Examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, &c. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the Examination.

Chemistry will be limited to elements of inorganic chemistry.

Physics will include elementary properties of electricity, magnetism, heat, light, and sound

Geology, chiefly economic, including the recognition of the more familiar minerals and rocks, and their properties and uses.

CLASS III.

Both subjects may be taken up.

Drawing, Freehand.

Drawing, Geometrical.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely 100 out of the maximum allotted to each subject, is assigned for handwriting.

ORDER—Ordered that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor-General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

Ordered, also, that these papers be published in the Supplement to the *Gazette of India*.

[True Extract.]

F. G. SLY,

Under-Secretary to the Govt. of India.

WEATHER AND CROP REPORT.

For the week ending the 4th November, 1895.

Burdwan.—Rainfall at Burdwan 2·51. Weather cooler. Rain fell generally on the 27th and 28th October. Prospects of winter rice slightly better. Condition of cattle good. Fodder sufficient. Common rice sells at an average price of 15½ seers per rupee.

Midnapore.—Rainfall at Sadar 1·01, Contai ·87, Tamluk ·46, and Ghatal 1·14. Weather cooler. The recent rain has ameliorated the prospects of the standing crops and added moisture for the *rabi*. Water and fodder plentiful. Prices of common rice:—

	Srs.	
Sadar	16	per rupee.
Contai	21	
Tamluk	16 to 19	
Ghatal	14 to 15	

24-Parganas.—Rainfall at Sadar ·38. Weather seasonable. Prospects of *aman* crops fair: those on high lands in the Basirhat subdivision reported to be drying up for want of sufficient rain. Rainfall of the 27th October has done some good to the *aman* crops in the Barasat subdivision. Sugarcane doing well. Sowing of *rabi* crops continues. Fodder and water sufficient. No cattle-disease. Rice sells at—

	Srs.	
Sadar	12 to 14	per rupee.
Barasat	15	
Basirhat	16	
Diamond Harbour	17	

Murshidabad.—Rainfall 1·43. Weather seasonable. The recent rain has done much good to *aman* rice all over the district and has saved a good deal. It has also enabled sowing of winter crops to go on everywhere. Sugarcane and mulberry doing well. Fodder for cattle sufficient. Common rice sells at 16 seers per rupee.

Khulna.—Rainfall at Khulna ·10, Bagerhat ·05, Satkhira ·23. Weather seasonable. Land is being prepared for *rabi* crops. *Aman* doing well. The rain has done good to the *aman* crop. Fodder and water sufficient. Prices of common rice:—

	Srs.	
Sadar	17 to 21	per rupee.
Bagerhat	18	
Satkhira	16	

Dinajpur.—Average rainfall ·11. Weather seasonable. Standing crops good. Price of common rice 15 to 16 seers a rupee. No cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall ·03. Weather seasonable: tolerably cool at night. Prospects of standing *aman* are good. Washing of jute and cultivation of land for winter crops going on. More rain is wanted. Price of common rice 12 to 14 seers a rupee. Fodder sufficient.

Pabna.—Rainfall nil. Weather hot in day time, but cool at night. Prospects of *aman* paddy good at Sadar, but indifferent at Sirajganj, where more rain is wanted. *Rabi* crops are being sown Common rice sells at Sadar 16 seers and Sirajganj 14 seers per rupee. Fodder sufficient.

Dacca.—Rainfall ·77. Weather seasonable. Recent rain has done good to the standing crops. Price of common rice 17 seers per rupee. No cattle-disease.

Chittagong.—Rainfall nil. Early *aman* is being harvested. Paddy on high lands suffering for want of rain. Water and fodder sufficient. Rice selling at 17 seers per rupee.

Patna.—Rainfall nil. Prospects of paddy fair. The absence of rain in October is, however, expected to affect the outturn. *Rabi* sowings in progress; those already sown are germinating. Fodder and water sufficient. Condition of cattle good. Common rice selling at 18½ seers per rupee.

Gaya.—Rainfall nil. Both winter rice and *rabi* suffering for want of rain. Pressing of sugarcane in progress. Price of common rice at Sadar 14 seers against an average of 16¼ seers per rupee. Water and fodder sufficient.

Champaran.—No rain. *Rabi* being sown. *Aghani* suffering for want of rain. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Upland paddy withering for want of rain. *Rabi* sowings in progress, but rain is much wanted. Fodder for cattle sufficient. Prices almost stationary.

Bhagalpur.—There has been slight rain (0·13) at Banka ; no rain in other parts of the district. Weather seasonable. Prospects of both paddy and *rabi* unfavourable. Yield of paddy estimated under 12 annas. Sugarcane doing well. Common rice continues to be sold at 17 seers 10 chitaks per rupee. Fodder and water sufficient. Cattle-disease reported from a few scattered villages.

Purnea.—No rain. *Rabi* sowings going on. Paddy on high lands wants rain throughout the district. No cattle-disease. Common rice sells at 20 seers per rupee.

Cuttack.—Rainfall 2·20. Weather cloudy. *Sarad* in ears and attaining maturity. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	23	5	per rupee.
Jajpur	28	12	
Kendrapara	31	8	
Banki	31	8	

Hazaribagh.—Rainfall at Giridi 1·80. The last rainfall has not been general, and prospects of rice crops are not as good as expected. Outturn will probably only average 10 annas. *Rabi* prospects good. Fodder and grazing plentiful. Common rice selling at 12 to 14 seers per rupee.

General Summary.—The rain, which fell generally over Lower Bengal, Orissa, and part of Chota Nagpur towards the end of October, is reported to have done much good to the *aman* crop and facilitated the sowing of the *rabi* crops. In Bihar the absence of rain in October has been harmful to the winter rice and has also affected the prospects of the *rabi* crops. In parts of North and East Bengal too the rice is said to have suffered owing to the early cessation of the rains. The price of common rice continues still steady. Cattle are generally in good condition.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 5th November, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 1[0]
mean of the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in q[uestion]
station in the district sending in return divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

or the week ending Saturday, the 2nd of November 1895.

					DISTRICT OBSERVATIONS.											
					Of week.				Rainfall.							
									Since 1st of month			Since 16th October 1895.				
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns [are] wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at le[ast] ·10 inch of rain has fallen.

CALCUTTA, *the 5th November* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 2ND OF NOVEMBER 1895.

AT the end of the previous week a cyclonic storm of considerable intensity passed across the south-west of the Bay, and died away very soon after it crossed the coast between Nellore and Masulipatan. It caused a current of moist air to flow northwards over the west of the Bay and into Lower Bengal and Chota Nagpur. General rainy weather was the consequence in these parts for the first two days of the present week, falls of more than 2 inches being not unfrequent in South-West Bengal, Orissa and Chota Nagpur. The rainfall was followed by a large fall in day temperatures and also to a smaller extent at night. As the large defect which then developed remained till almost the end of the week, the means for the whole week are much below the normal, the difference for the large divisions varying from 1·6° in Orissa to 4·2° in East Bengal

The continuance of the cloudy rainy weather in the north of the Bay, Orissa and Lower Bengal for quite a number of days after all trace of the disturbance from the south-west of the Bay had disappeared may be accounted for by a shallow depression which passed across the north of the Bay from the Burmah coast and into Bengal. While on the 27th pressure was rising slowly to moderately on the west coast and in Bengal, a slow fall prevailed in Burmah and the east of the Bay. This change extended north-westward on the 28th, and there was a brisk fall over the greater part of Lower Bengal. At that time the pressure distribution was very nearly normal, but there was a faint cyclonic circulation of winds in the central and western districts, and heavy rain fell as far north as Raniganj. Pressure continued to fall on the 29th, slowly everywhere, but rather more quickly in Burmah than in the north of the Bay. Gradients became more regular from north to south and the cloud began to clear away in Lower Bengal. Rainfall was much less general, and with the brisk rise of pressure on the 30th it entirely stopped, except in Orissa, where scattered showers fell almost till the end of the week. During the latter half of the week fine weather prevailed with rising temperature, the change being chiefly in day readings in consequence of the clear skies and brighter sunshine.

Pressure usually fell during the early part of the week and rose during the latter half. As these changes were small and readings never differed much from the normal, the means for the week are practically normal, the difference being only a few thousandths of an inch, except at some of the western stations, where there is defect of ·02 to ·03 inch.

Temperature has been much lower than is usual at the end of October because of the continued cloudy and rainy weather in the early part of the week. The average daily temperature in Chota Nagpur was 68°·6, in North Bengal 72° and in the other districts between 72° and 75°, except in Orissa, where it was over 77°. The greatest defect was in the eastern half of the province, especially in East Bengal, where for the whole week there is a mean defect of more than 4°. In South-West and North Bengal defect is 3°·2, in Bihar 2°·7, Chota Nagpur 2°·3 and Orissa 1°·6.

Rainfall.—The rather heavy rain of the early part of the week was confined to the southern districts. Very little fell in North Bengal and Bihar, which have received on an average ·15 and ·21 inch respectively. East Bengal received less than half an inch, but in South-West Bengal, Chota Nagpur and Orissa the falls were much above the normal of the week. In Orissa the average fall was 2·3 inches as compared with a normal fall of ·95 inch; in Chota Nagpur 1·7 inches, the normal being only ·23 inch; and in South-West Bengal 1·23 inches, which is more than three times the normal.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 2nd of November 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1895

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·57
The total fall from 1st January to 2nd November 1895	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·63

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; △, dew.

FINANCIAL RESOLUTION.

FINANCIAL DEPARTMENT—FINANCE.

Darjeeling, the 5th November 1895.

RESOLUTION—No. 5683F.

THE Lieutenant-Governor is now in a position to review the actual financial results of the year 1893-94, the revised estimates for the year 1894-95, and the budget estimates for 1895-96. The Accountant-General's memorandum on the accounts of the first year has been received, and although the accounts for 1894-95 have not yet been finally closed, the Appropriation Report affords sufficient materials for framing an approximate estimate of the financial position of the province at the close of that year. The figures of the revenue and expenditure of the first five months of the current year have been received from the Accountant-General, and these are sufficient to form the basis for a review of the budget estimates for 1895-96.

PART I.

ACCOUNTS OF 1893-94.

2. The approximate actuals adopted in the Financial Resolution No. 6433F., dated the 8th December 1894, are compared in the following table with the final actuals now reported by the Accountant-General in his memorandum on the accounts of 1893-94:—

Receipts.		Heads.	Outgoings.	
Approximate actuals adopted in December 1894.	Final actuals.		Approximate actuals adopted in December 1894.	Final actuals.
1	2	3	4	5
Rs.	Rs.		Rs.	Rs.

22,55,172	22,55,172	Opening balance	......	......
......	......	Closing balance	26,18,569	26,24,038
4,55,33,415	4,55,33,497	Grand Total ...	4,55,33,415	4,55,33,497
		Provincial Surplus ...	3,63,397	3,68,866

3. The approximate actuals adopted in December 1894 assumed that the year 1893-94 had opened with a credit balance of Rs. 22,55,172, and had closed with a balance of Rs. 26,18,569; that the total amount available for expenditure was Rs. 4,55,33,415, and that Rs. 4,29,14,846 had been spent. The actual result was more favourable than this by Rs. 5,469. The amount actually available for expenditure was Rs. 4,55,33,497, and the amount actually expended Rs. 4,29,09,459, leaving a closing balance of Rs. 26,24,038.

4. There was an increase of Rs. 82 only on the Receipt side, and a decrease of Rs. 5,387 on the Expenditure side. The fluctuations in expenditure were chiefly under General Administration (+ Rs. 1,154), Police (— Rs. 4,999), Marine (+ Rs. 1,886), Miscellaneous (— Rs. 1,433), and Contributions (— Rs. 1,536).

5. The transactions under the head of Provincial loans and advances, not included in the cash account, were as follows:—

HEADS.	Balance outstanding on the 1st April 1893.	Repayments.	Outgoings.	Balance outstanding on the 31st March 1894.
1	2	3	4	5
CLASS I.	Rs.	Rs.	Rs.	Rs.

Ampta drainage	1,203	......	183	1,386
Howrah ditto	4,17,064	......	98,810	5,15,874
Nadia-Mahesganj bil ...	17	......	......	17
Rajapur drainage ...	9,22,369	8,486	43,631	9,57,514
Dankuni ditto ...	(—)1,390	1,016	1,201	(—)1,205
Pratapkhali ditto ...	......	......	......	......
Total ...	14,67,575	71,187	3,34,874	17,31,263
CLASS III.				
Loans to Landholders ...	4,15,635	1,58,878	2,72,000	5,28,757
CLASS IV.				
Loans to Mufassal Municipalities	2,43,639	11,108	2,98,000	5,30,531
Ditto District and other Local Funds	3,98,555	30,418	59,000	4,27,136
Loans to the Chittagong Port Fund	2,00,000	25,000	......	1,75,000
Total ...	8,42,194	66,526	3,57,000	11,32,667
GRAND TOTAL ...	32,82,331	5,09,720	11,08,010	38,80,621

The increase of nearly six lakhs in the balance outstanding is due in almost equal proportions to the prosecution of agricultural drainage schemes and the construction and repair of embankments in the deltaic districts, and to the policy of encouraging mufassal municipalities to borrow money for the provision of filtered water and of improved drainage arrangements.

PART II.

Revised Estimate, 1894-95.

6. The following table shows the revised estimates as passed by the Government of India in March last and the estimates as now adopted by the Government of Bengal, with reference to the approximate actuals of the year:—

RECEIPTS.

7. *Land Revenue.*—The revised estimate of total land revenue receipts for 1894-95 was placed at Rs. 3,87,00,000, which included Rs. 50,000 for recoveries from landholders on account of survey charges which are

wholly Imperial. The actual collections, however, which included only Rs. 512 on account of such charges, amounted to Rs. 3,89,10,164. The 12 per cent. on collections from Government estates aggregated Rs. 4,84,156, against Rs. 4,75,000 adopted in the revised estimate of March last. The Provincial share of land revenue was therefore one-fourth of (Rs. 3,89,10,164—512—4,84,156) + 4,84,156 or 96,06,374 + 4,84,156 = 1,00,90,530. This amount has now been adopted as the final estimate of the Provincial share of land revenue (proper) for 1894-95. The adjustments between the Imperial and Provincial will probably result in a net deduction of Rs. 15,35,873, as shown below:—

	Revised estimate passed by the Government of India.	Approximate actuals now adopted.
	Rs.	Rs.
(*a*) Lump contribution under the Provincial contract	(—)14,39,000	(—)14,39,000
(*b*) Interest payable on advances received for the remodelling of the Hidjili Tidal Canal ...	(—)21,000	(—)20,817
(*c*) Special contribution to Imperial Funds ...	(—)3,00,000	(—)3,00,000
(*d*) Further advance for remodelling the Hidjili Tidal Canal	+1,06,000	+1,06,322
(*e*) Grant for expenditure on Imperial, Civil and Military Works transferred to local bodies	+14,000	+19,998
(*f*) Grant for loss sustained consequent on the reservation of the Western Duars for the Khedda Department	+11,000	+17,971
(*g*) Salary of Mr. Davies, the Probationary Gardener at Sibpur	+1,000	+1,534
(*h*) Grant for the additional establishment entertained in the Calcutta Custom House on the introduction of the new Tariff Act ...	+1,64,000	+68,060
(*i*) Contribution towards the cost of a prison van	+2,000	+2,234
(*k*) Assignment for the Gnatong guard ...	+2,000	+7,825
Total ...	(—)14,60,000	(—)15,35,873

8. (*e*) The Government of India, while passing orders on the budgets for 1895-96, allowed a credit of Rs. 14,000 in the revised estimates for 1894-95 on account of the maintenance of certain Imperial Military and Civil Works permanently transferred to local agencies, and also for the petty construction and repairs of certain other Imperial buildings entrusted to their charge during the year. The actual expenditure incurred by local bodies in 1894-95, including percentage charges for establishment, &c., as reported by the Public Works Department, amounted to Rs. 19,998, for which credit has been taken provisionally and subject to the final sanction of the Government of India.

(*f*) The Government of India, in Military Department letter No. 5873D., dated the 15th December 1893, sanctioned the payment of Rs. 17,971 a year as compensation for the loss entailed on Provincial revenues by the reservation of the Western Duars of Jalpaiguri for the Khedda Department. As the Duars were reserved from the 29th July 1893, and a profit of Rs. 7,165 had already been obtained by the Civil Department by the sale of elephants captured in the first four months of 1893-94, a credit for (Rs. 17,971—7,165) = Rs. 10,806 only was paid by the Khedda Department in that year. The full compensation of Rs. 17,971 will, however, be claimed for 1894-95.

(*g*) The Government of India promised to meet the salary of Mr. Davies as long as he was employed as a probationer in the Royal Botanic Gardens, but on the 21st November 1894 he was appointed to act for Mr. Lane, the Assistant Curator of the Gardens, who was deputed to Allahabad for 18 months. A credit for Rs. 1,534, being his pay for eight months and 20 days at Rs. 150 per mensem, and for Rs. 234 for exchange compensation allowance, has been taken in the revised estimates for 1894-95.

(*h*) Since the introduction of the new Tariff Acts a large additional establishment has been entertained in the Calcutta Custom House, and the Government of India, in the Finance and Commerce Department Resolution No. 1521Ex., dated 2nd April 1895, decided that the actual expenditure incurred

on this account would be met from an assignment from Imperial to Provincial revenues, and adjusted through the Land Revenue head. The charges amounted to Rs. 68,060, and credit for this amount has accordingly been taken in the revised estimates for 1894 95.

(*k*) The Government of India, in the Finance and Commerce Department letter No. 3879A., dated the 13th August 1895, sanctioned an assignment from Imperial to Provincial revenues of Rs. 7,825 on account of charges incurred by the Local Government in 1894-95 in connection with the maintenance of the Military Police at Gnatong, and this amount has accordingly been included under Adjustments.

9. *Salt.*—The original estimate under this head was Rs 80,000, but in view of the high receipts from rent of warehouses due to the very large stock of bonded salt in the golahs, the revised estimate was raised to Rs. 1,20,000. The actual realizations amounted to Rs. 1,41,291.

10. *Excise.*—The receipts under this head amounted to Rs. 1,25,62,350 against Rs. 1,25,50,000, the revised estimate passed by the Government of India. One-fourth of this sum, or Rs. 31,40,587, has been taken as the share of the Local Government.

11. *Provincial Rates.*—The budget estimate of total revenue from Provincial Rates for 1894-95 was originally passed for Rs. 46,60,000, but in the revised estimate this was reduced to Rs. 43,00,000. The decrease was chiefly nominal, and was due to the fact that owing to a change in the mode of adjusting the cost, no credit was taken in the Provincial accounts for "Recoveries of the proportionate cost of establishment for collecting road cess." The cost was debited, from 1st April 1894, direct to the District Funds in the Local Funds Budget, instead of being passed through both sides of the Provincial accounts. The actual receipts amounted to Rs. 43,09,150, as shown below:—

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Public works cess	42,00,000	41,60,000	41,78,695
Proportionate cost of collecting road cess	3,20,000	......	3,268
General rates for the management of private estates	1,40,000	1,40,000	1,27,187
Total	46,60,000	43,00,000	43,09,150

12. *Customs.*—The Provincial receipts under this head amounted to Rs. 73,380 against Rs. 65,000, the revised estimate passed by the Government of India, and Rs. 55,000, the budget estimate for the year. The landing charges for passengers' baggage, confiscations and penalties showed an increase owing to the imposition of import duties. A large number of articles were brought into the Custom House, and subjected to confiscation and penalties. There was also an increase in transhipment fees owing to the same cause.

13. *Assessed Taxes.*—The revised estimate under this head was placed at Rs. 45,00,000, but the actuals have amounted to Rs. 45,63,242. One-half of this sum, or Rs. 22,81,621, has accordingly been taken as the Provincial share of the receipts.

14. *Interest.*—The actuals amounted to Rs 1,99,471 against the revised estimate of Rs. 1,86,000, and their details are these:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Class I.—Interest on advances to cultivators ...	26,000	26,400
,, II.— Ditto under special laws	22,000	29,261
,, III.—Interest on loans to landholders and other notabilities	19,000	23,414
,, IV.—Interest on loans to Municipalities, District Boards and other Public Bodies	65,000	65,800
Interest on Government securities ...	13,000	14,257
Miscellaneous	41,000	40,339
Total ...	1,86,000	1,99,471

15. *Jails.*—The original estimate under this head for 1894-95 was passed by the Government of India for Rs. 9,55,000, with reference to the actuals of 1891-92 and 1892-93 amounting to Rs. 9,27,642 and Rs. 9,13,136, respectively. The receipts in the first nine months of 1894-95 showed a great failing off, and the revised estimate was placed at Rs. 7,80,000. The actual receipts amounted, however, to Rs. 8,52,001.

16. *Marine.*—The receipts under this head amounted to Rs. 9,32,653 against Rs. 9,45,000, the revised estimate passed by the Government of India. The decrease was chiefly under pilotage receipts.

17. *Scientific and other Minor Departments.*—The receipts from Cinchona Plantations amounted to Rs. 1,41,785 against Rs. 1,23,000, the revised estimate for the year, and owing to this increase the total receipts under Minor Departments amounted to Rs. 2,04,045 against Rs. 1,85,000, the revised estimate passed by the Government of India.

18. *Stationery and Printing.*—The receipts under this head amounted to Rs. 1,30,510 against Rs. 1,22,000, the revised estimate passed by the Government of India.

19. *Miscellaneous.*—The total receipts under this head amounted to Rs. 10,12,073 against Rs. 9,35,000, the revised estimate passed by the Government of India. The increase was wholly under "Unclaimed deposits," the approximate actuals of which amounted to Rs. 4,38,456, against Rs. 3,60,000 provided for in the revised estimate.

20. *Railways.*—The following statement compares the budget and revised estimates as passed by the Government of India with the actuals of the year:—

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Gross receipts	1,22,00,000	1,43,00,000	1,43,86,293
Working expenses	55,00,000	57,00,000	57,21,845
Net receipts	67,00,000	86,00,000	86,64,448
Provincial share	33,50,000	43,00,000	43,32,224

21. *Irrigation Major Works.*—The total receipts amounted to Rs. 15,24,040 against Rs. 14,60,000, the revised estimate, and Rs. 15,00,000, the budget estimate, for the year, as shown below:—

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Orissa Project	3,40,000	3,19,000	3,33,072
Midnapore Canal	2,70,000	2,52,000	2,94,682
Tidal Canal	55,000	65,000	58,525
Sone Project	8,35,000	8,24,000	8,37,761
Total ...	15,00,000	14,60,000	15,24,040

The actuals were Rs. 64,040 in excess of the revised estimate, owing to the recovery of outstanding balances and better toll receipts from the Midnapore Canal.

22. *Minor Works by Civil Department.*—The recoveries on account of zamindari embankments under the contract system amounted to Rs. 80,638, against Rs. 1,03,000 provided for in the revised estimate of the year, and the total collections under this head aggregated to Rs. 1,81,347 against Rs. 2,03,000, the revised estimate passed by the Government of India. The falling off was due to the non-realization of the full demand of the year in three districts.

23. *Buildings and Roads—Civil Works by Public Works Department.*—The total receipts amounted to Rs. 2,35,308, against Rs. 2,45,000 entered in the revised estimate. The difference was due to the fact that the distillery building at Manicktolla, from the sale of which Rs. 40,000 were expected to be realized, could not be sold during the year, while, on the other hand, a sum of Rs. 34,817 was credited in the accounts as the profits from the Calcutta Workshops.

24. *Summary of Receipts.*—The total Provincial receipts of the year, exclusive of the opening balance, amounted to Rs. 4,46,19,722, against Rs. 4,42,97,000 passed by the Government of India as the revised estimate, showing an increase of Rs. 3,22,722. Of this increase, Rs. 71,530 was under Land Revenue, Rs. 72,001 under Jails, Rs. 77,073 under Miscellaneous, and Rs. 64,040 under Irrigation Major Works.

EXPENDITURE.

25. *Refunds and Drawbacks.*—The total Provincial expenditure under this head amounted to Rs 1,64,780 against Rs. 1,51,000, the revised estimate passed by the Government of India. The increase was chiefly under "Stamps."

26. *Salt.*—The original estimate under this head, amounting to Rs. 33,000, was raised to Rs. 40,000 in the revised estimate, owing to the hiring of two sheds at the Kidderpore Docks for the storage of the unusually large importation of salt and for the temporary establishment entertained in connection therewith, and also for the erection of a kutcha shed and mat walls in the Sulkea Golah in order to increase the space for the storage of salt. The actual charges, however, amounted to Rs. 52,220 owing to the adjustment under this head of Rs. 11,106, being the cost of the deputation of Mr. F. Ashton, Assistant Commissioner, Northern India Salt Revenue Department, to enquire into the extent of illicit manufacture of salt on the sea-coast of Bengal.

27. *Stamps.*—The total charges of the Stamp Department amounted to Rs. 6,51,197 against Rs. 6,73,000, the revised estimate for the year. The Provincial share of the total charges was Rs. 4,88,398.

28. *Customs.*—The latest actuals reported by the Accountant-General amounted to Rs. 6,46,749 against Rs. 7,75,000, the revised estimate. The total charges for the additional establishment entertained in the Calcutta Custom House, consequent on the introduction of the new Tariff Act, amounted to Rs. 68,060, and a credit for this amount has been taken under Land Revenue as an assignment from the Imperial revenues to meet the additional charge.

29. *Law and Justice—Courts of Law.*—The total charges amounted to Rs. 89,09,460 against Rs. 88,95,000, the revised estimate. The increase was chiefly due to the payments on account of exchange compensation allowance, which amounted to Rs. 3,02,000, against Rs. 2,86,000 provided for in the revised estimate.

30. *Jails.*—There was exceptionally small outlay on purchase of raw materials, and the total charges amounted to Rs. 20,07,529 against Rs. 20,50,000, the revised estimate for the year.

31. *Police.*—The total charges amounted to Rs. 59,04,831 against Rs 59,12,000, the revised estimate for the year. The details are:—

	Revised estimate.	Approximate actuals.
	Rs.	Rs.
Presidency Police	7,50,000	7,39,735
Superintendence	1,70,000	1,74,138
District Executive Force	42,75,000	43,10,879
Municipal Police (Howrah Police) ...	37,000	35,840
Village "	30,000	28,773
Special "	5,35,000	4,94,085
Railway "	1,06,000	1,15,871
Cattle-pounds	6,000	5,038
Refunds	3,000	472
Total ...	59,12,000	59,04,831

The saving under "Special Police" was in the charges for rations for the Lushai Civil Police.

32. *Marine.*—The total expenditure under this head amounted to Rs. 8,93,080 against Rs. 8,81,000, the revised estimate accepted by the Government of India. The increase was partly under "Pilotage and pilot establishment," and partly under "Miscellaneous."

33. *Education.*—There has been an increase of expenditure under "Government Colleges, Professional," owing to increased charges for materials and tools, and the total charges amounted to Rs. 26,37,605 against Rs. 26,10,000, the revised estimate for the year.

34. *Medical.*—The expenditure under "Hospitals and Dispensaries" amounted to Rs. 4,40,816, against Rs. 4,27,000 provided for in the revised estimate, and the total charges of the Department amounted to Rs. 18,13,084 against Rs. 17,90,000, the revised estimate for the year. The increase occurred chiefly in the expenditure on the Campbell Hospital.

35. *Stationery and Printing.*—The cost of stationery supplied from Central Stores in 1894-95 amounted to Rs. 4,99,861, against Rs. 7,70,000 provided in the budget, and the total expenditure to Rs. 11,20,623 against Rs. 14,14,000, the revised estimate passed by the Government of India. The reduction in expenditure under Stationery was due to the steps taken by Government to prevent the introduction of new forms, unless when absolutely required, and to the substitution of country-made for imported articles.

36. *Miscellaneous.*—There was less expenditure under "Donations for charitable purposes" and "Rents, Rates and Taxes" than that provided for in the revised estimate, and the total charges amounted to Rs. 2,29,066 against Rs. 2,45,000, the revised estimate passed by the Government of India.

37. *Irrigation Major Works.*—The working expenses aggregated Rs. 13,72,972, against Rs. 14,67,000 provided in the revised estimate. The short outlay was due to over-estimation of the charges.

38. *Irrigation Minor Works.*—The actual outlay amounted to Rs. 14,57,828, or Rs. 92,172 less than the revised estimate. There were savings on all classes of works with the exception of those for which only revenue accounts are kept. The savings were principally under (1) charges for establishment, (2) in agricultural works, and (3) in the reduction of suspense balances.

39. *Buildings and Roads—Civil Works by Public Works Department.*—The expenditure during the year amounted to Rs. 24,90,918 against Rs. 24,44,000, the revised estimate passed by the Government of India. The revised estimate has thus been exceeded by Rs. 46,918, due principally to the increase in the suspense balances of the Calcutta Workshops.

40. *Summary of Expenditure.*—The total expenditure amounted to Rs. 4,29,20,640, against a revised estimate of Rs. 4,35,48,000, the reduction being Rs. 6,27,360. The expenditure was less than the receipts of the year by 17 lakhs.

41. *Closing balance.*—According to the approximate actuals now received, the closing balance stood at Rs. 43,23,120, against Rs. 33,73,000 anticipated by the Government of India when passing the estimate for the current year. The province is better than the revised estimate by about nine and-a-half lakhs. This unusually large difference between the revised estimate and the approximate actuals of the year is due on the Receipt side to an underestimate of the collections from Land Revenue, to an unexpected increase in the sale-proceeds of Jail manufactures, to a windfall in the form of a rise of unclaimed deposits under Miscellaneous, and to the realization of arrear balances and increased toll receipts under Irrigation Major Works. Under Expenditure, improved administration of the Stationery Department resulted in a reduction of nearly three lakhs; a lakh and-a qua[illegible] Customs establishment was not sanctioned within the yea[illegible] smaller purchases of raw material, and the balance occurred under the head of Irrigation.

PART III.

BUDGET ESTIMATE, 1895-96.

42. THE Lieutenant-Governor has already in separate Resolutions reviewed the estimates of receipts and charges for the current year. Later information, however, has led to a modification of these in some respects. The following

table shows the estimates as passed by the Government of India and the estimates which the Lieutenant-Governor has finally resolved to adopt:—

RECEIPTS.	Budget estimate.	Revised estimate now adopted
1	2	3
	Rs.	Rs.
Opening balance ...	33,73,000	43,23,000

RECEIPTS.

		Rs.
1890-91	...	3,88,19,000
1891-92	...	3,86,80,000
1892-93	...	3,84,96,000
1893-94	...	3,87,14,000
1894-95	...	3,89,10,000
Total for five years	...	19,36,19,000
Average per year	...	3,87,24,000

43. *Land Revenue.*—The total collections in 1894-95 amounted to Rs. 3,89,10,164, and the estimate for 1895-96 has been passed by the Government of India for Rs. 3,88,50,000, which includes Rs. 1,50,000 for recoveries on account of survey charges. The average receipts during the past five years have been Rs. 3,87,24,000. The collections during the first five months of the current year amounted to Rs. 69,49,000, against Rs. 72,97,000 obtained in the corresponding period of last year, showing a decrease of Rs. 3,48,000. Looking to the prospects of the season, it is very doubtful whether the total receipts will come up to the amount collected last year, but at present there is no reason to anticipate that the estimate passed by the Government of

India for the current year will not be reached, and it will accordingly be retained. The Provincial share will then stand at Rs. 1,00,33,000. The adjustments between Imperial and Provincial will probably result in a net transfer of Rs. 10,38,000 to Imperial, as shown below:—

	Budget estimate.	Revised estimate now adopted.
	Rs.	Rs.
From Imperial to Provincial—		
(a) Grant for the Hijili Canal	1,65,000	1,65,000
(b) Grant for transfer of Imperial Buildings under Local	10,000	19,000
(c) Assignment for Gnatong Police ...	16,000	16,000
(d) Grant for loss sustained consequent on the reservation of the Western Duars of Jalpaiguri for the future operations of the Khedda Department	18,000	......
(e) Grant to meet the cost of additional Customs establishment	2,64,000	2,32,000
	4,73,000	4,32,000
From Provincial to Imperial –		
(f) Lump contribution under the contract ...	14,39,000	14,39,000
(g) Interest on advances for the Hijili Canal ...	26,000	26,000
(h) Contribution towards the cost of a tower clock to be set up at the General Post Office	......	5,000
	14,65,000	14,70,000
Net transfers from Provincial to Imperial	9,92,000	10,38,000

(b) The Government of India, while passing orders on the budget estimates for 1895-96, allowed a credit of Rs. 10,385, or Rs. 10,000 in round numbers, on account of the transfer of certain Imperial Civil and Military works which have been permanently transferred to the management of local agencies. Since then the construction, maintenance and repairs of several other Imperial buildings have been entrusted to local bodies with an aggregate grant of Rs. 8,653. The total grant on this account therefore now stands at Rs. 19,038, or Rs. 19,000 in round numbers. (c) The Government of India, in the Foreign Department letter No. 1332E., dated the 8th July 1895, have already sanctioned an assignment of Rs. 15,650 to meet charges connected with the maintenance of the Military Police force required to garrison Gnatong in 1895-96. The credit for Rs. 16,000 in round numbers has been retained. (d) The Government of India, in the Military Department letter No. 3577D., dated the 24th July 1895, have sanctioned the retransfer of the Western Duars to the Civil Department from the 1st April 1895, so that the Khedda Department will be relieved of the annual compensation of Rs. 17,971, and this item will no longer appear in the Provincial accounts. (e) As explained in paragraph 60 below, a saving of Rs. 35,000 is anticipated under Customs, while an increase of Rs. 2,718 has been estimated under Customs Audit Department of the Board's office. The net saving may therefore be Rs. 32,000. A reduction of this amount will be made in the estimated assignment for Customs establishment. (h) The Lieutenant-Governor has promised a grant of half the cost of a clock to be set up on the General Post Office in Calcutta not exceeding Rs. 5,000, and a debit of this amount has accordingly been made against the Provincial share of Land Revenue.

44. *Salt.*—The provincial receipts under this head amounted to Rs. 84,536 in 1892-93 and Rs. 77,373 in 1893-94. The actuals in 1894-95 were Rs. 1,41,291, and were swollen by an unusually large importation of salt in the latter part of the year. The actual collections in the first five months of the current year amounted to Rs. 73,326, against Rs. 44,367 in the corresponding period of 1894-95 and Rs. 31,510 in 1893-94. The estimate for 1895-96 is Rs. 95,000; but in view of the actual realizations in the current year, the estimate will be raised to Rs. 1,20,000.

45. *Stamps.*—The total revenue for stamps has been estimated at Rs. 1,67,00,000. The Comptroller-General's latest statement shows that the

receipts during the first five months of the current year amounted to Rs. 77,08,000, against Rs. 74,22,000 obtained in the corresponding period of last year, showing an increase of Rs. 2,86,000. The actual receipts in 1894-95 amounted to Rs. 1,67,01,147, and the Lieutenant-Governor thinks that the estimate of 1895-96 may be safely raised to Rs. 1,70,00,000. The Provincial share will be Rs. 1,27,50,000.

46. *Excise.*—The estimate of total revenue under this head has been estimated at Rs. 1,27,00,000, being Rs. 1,38,000 more than the approximate actuals of 1894-95, which amounted to Rs. 1,25,62,000. The Comptroller-General's latest statement shows that the receipts during the first five months of 1895-96 have exceeded those of the corresponding period of last year by Rs. 4,31,000, and the results of the recent settlement of excise shops for the current year show an increase of Rs. 3,95,403 in license fees as compared with those of last year. In view of these figures, the estimate may be safely placed at Rs. 1,29,00,000. The Provincial share will stand at Rs. 32,25,000.

47. *Provincial Rates.*—The following statement compares the receipts under this head for three years:—

	Actuals, 1892-93.	Actuals, 1893-94.	Approximate actuals, 1894-95.	Budget estimate, 1895-96.	Revised estimate now adopted.
	Rs.	Rs.	Rs.	Rs.	Rs.
Public works cess	41,95,253	41,34,309	41,78,695	41,46,000	41,65,000
Proportionate cost of collecting road cess	3,44,125	3,47,201	3,268	......	....
General management of private estates	76,889	1,31,551	1,27,187	1,35,000	1,35,000
Total ...	46,16,267	46,13,061	43,09,150	42,81,000	43,00,000

The collections of the Public works cess in the first five months of the current year show a small decrease of nearly Rs. 9,000, but, looking to the actuals of 1894-95, there is no reason to anticipate that the collections at the end of the year will fall far short of last year. The total estimate under this head will be placed at Rs. 43,00,000.

48. *Customs.*—The Provincial receipts during the first five months of the current year amounted to Rs. 34,413, against Rs. 24,461 in the corresponding period of last year, showing an increase of Rs. 9,952. The total receipts in 1894-95 were Rs. 73,380, and the estimate for 1895-96 will be raised from Rs. 61,000 to Rs. 75,000.

49. *Assessed Taxes.*—Both the estimate for 1895-96 and the revised estimate for 1894-95 were passed by the Government of India for Rs. 45,00,000. The actual collections in last year amounted, however, to Rs. 45,63,242, and the arrear balance was reduced from Rs. 2,66,987 to Rs. 1,62,002. The collections during the first five months of the current year show an increase of Rs. 50,000, as compared with those of the corresponding period of last year. The estimate passed by the Government of India will be retained for the present.

50. *Law and Justice—Courts of Law.*—The total receipts under this head in the first five months of the current year show a decrease of Rs. 9,000 as compared with those of the corresponding period of last year. The approximate actuals in 1894-95 amounted Rs. 8,72,830, and the estimate for the current year will be reduced from Rs. 8.90,000 to Rs. 8,60,000.

51. *Police.*—The receipts during the first five months of the current year show a decrease of nearly Rs. 8,000 as compared with those of the corresponding period of last year. The latest actuals of 1894-95 were Rs. 2,36,645, and the estimate for 1895-96 will be reduced from Rs. 2,43,000 to Rs. 2,28,000.

52. *Medical.*—The total receipts amounted to Rs. 1,90,572 in 1893-94 and Rs. 2,05,158 in 1894-95. The receipts in the first five months of the current year show an increase of Rs. 5,000 over those of the corresponding period of last year. The estimate will be raised from Rs. 2,00,000 to Rs. 2,08,000.

53. *Scientific and other Minor Departments.*—The receipts under this head in 1894-95 amounted Rs. 2,04,045, and in the first five months of the current year show an increase of about Rs. 16,000 over those of the corresponding period of last year. The estimate will be raised from Rs. 1,99,000 to Rs. 2,10,000.

54. *Superannuations.*—The approximate actuals under this head for 1894-95 were Rs. 75,639, and the receipts in the first five months of the current year

show a small increase of about Rs. 2,000 over those obtained in the same period of last year. The estimate will be raised from Rs. 68,000 to Rs. 76,000.

55. *Railways.*—The following statement compares the estimates for 1895-96 with the actuals of the past two years:—

	Actuals, 1893-94.	Actuals, 1894-95.	Estimate, 1895-96.	Estimate, now adopted.
	Rs.	Rs.	Rs.	Rs.
Gross receipts ...	1,24,94,814	1,43,86,293	1,30,00,000	1,36,00,000
Working expenses ...	54,25,131	57,21,845	57,00,000	56,50,000
Net receipts ...	70,69,683	86,64,448	73,00,000	79,50,000
Provincial share	35,34,841	43,32,224	36,50,000	39,75,000

The approximate gross earnings of the Eastern Bengal State Railway system from the 1st April to 28th September 1895 amounted to Rs. 62,37,799, against Rs. 61,97,159 obtained from 1st April to 29th September 1894. If the average receipts of one day are added to this, the total increase in five months and 29 days will be about Rs. 91,000. The large receipts in 1894-95 were attributed to a favourable jute traffic, but as the earnings in the first six months of the current year show an increase over those of the corresponding period of the preceding year, the Lieutenant-Governor is of opinion that the estimate may fairly be placed at Rs. 1,36,00,000. This figure has been taken provisionally. The Provincial share of these receipts will stand at Rs. 39,75,000.

56. *Irrigation—Major Works.*—The Government of India placed the revised estimate for 1894-95 under this head at Rs. 14,60,000, and the estimate for the current year at Rs. 15,00,000. The returns of the Examiner of Public Works Accounts show that the receipts in first four months of the current year were Rs. 62,000 less than those of the corresponding period of last year. There has been a slight increase under Navigation and Miscellaneous, but a very marked falling off in water-rates. These are, however, expected to be made up later on in the year. The receipts in 1894-95 will have amounted to Rs. 15,24,040, and the average actuals of the past five years were Rs. 16,07,000. In view of the fluctuating character of these receipts, it will not perhaps be safe to anticipate that the average of the past five years will be obtained, but there is no reason to think that Rs. 15,00,000, the estimate passed by the Government of India, will not be attained.

	Rs.
1890-91	13,47,000
1891-92	16,03,000
1892-93	18,88,000
1893-94	16,73,000
1894-95	15,24,000
Total of five years ...	80,35,000
Average per year ...	16,07,000

57. *Civil Works by Public Works Department.*—The estimated receipts, amounting to Rs. 1,80,000, will be raised by Rs. 30,000, being the estimated sale-proceeds of the Maniktollah distillery buildings, and by Rs. 35,000, being the estimated profits of the Sibpur Workshops. The total estimate will stand at Rs. 2,45,000.

58. *Summary of Receipts.*—The total receipts of the province, which when the budget estimate was framed were placed at Rs. 4,41,97,000, will now stand in the revised estimate at Rs. 4,48,56,000, exclusive of the opening balance, an increase of 6½ lakhs.

EXPENDITURE.

59 *Land Revenue.*—The estimate under this head, amounting to Rs. 36,88,000, will be raised by Rs. 2,965 for the construction of a boat for the Collector of Cuttack; by Rs. 500 for the construction of a well in the compound of Collector's cutcherry, Monghyr; by Rs. 3,067 for enquiry into the mul-raiyati rights in the Deoghur subdivision in Sonthal Parganas; and by about Rs. 4,000 for temporary establishment for the completion of audit work of the

tauzi accounts of the Cuttack Collectorate and for rewriting tauzi rolls in the Muzaffarpur Collectorate and writing up the tauzi rolls and ledgers in the Saran Collectorate. The total grant will now stand at Rs 37,00,000.

60. *Customs.*—The total expenditure for the year 1895-96 was originally estimated by the Accountant-General at Rs. 5,86,000 against Rs. 5,79,000, the budget estimate for 1894-95. The estimate of the Accountant-General did not include any provision for the additional establishment, the necessity for which had arisen in consequence of the passing of Act XVI of 1894, nor had he provided for the additional establishment provisionally entertained upon the passing of Act VIII of 1894. The Accountant General's estimate of Rs. 4,80,514 for the Calcutta Custom House establishment was raised to Rs. 7,44,000, and the total grant was passed for Rs. 8,55,000, including an extra provision of Rs. 5,000 for exchange compensation allowance. The figure finally passed by the Government of India for the Custom House establishment amounts to Rs. 58,627-1-4 × 12 = Rs. 7,03,525, and for the Custom Audit Department of the Board's office Rs. 327-8 × 12 = Rs. 3,930. A saving of Rs. 7,44,000—Rs. 7,04,000 = Rs. 40,000 may therefore be expected under Custom House establishment, but some additional provision is necessary for contingencies and travelling allowances, &c., owing to the increase of establishment. A reduction of Rs. 35,000 will therefore be made under Customs, and the total grant will now stand at Rs. 8,20,000.

61. *General Administration.*—As stated above, a provision of Rs. 3,930 will be necessary for the Customs Audit Department of the office of the Board of Revenue, against Rs. 2,112 already included in the budget. An additional provision of Rs. 1,818, or Rs. 2,000 in round numbers, will be made on this account. The total charges in 1894-95 amounted, however, to Rs. 17,19,693, and the actuals of the first five months of the current year show an increase of Rs. 25,000 as compared with those of the corresponding period of last year. In view of these figures, the total grant will be raised from Rs. 17,08,000 to Rs. 17,40,000.

62. *Jails.*—The estimate under this head will be reduced by Rs. 929, which has been made over to the Public Works Department for effecting certain improvements in the drainage of the Presidency Jail. Against this reduction, some provision is necessary for the employment of female warders for female prisoners in certain jails sanctioned in August last at an additional monthly cost of Rs. 92. On the whole the grant will stand at Rs. 21,47,000, as originally sanctioned by the Government of India.

63. *Police.*—The estimate under this head has been raised by Rs. 18,000, to provide for the following charges sanctioned after the budget was passed:—

(1) The payment of Rs. [illegible],391-10-8 to the East Indian Railway Company on account of supervision charges of the Government Railway Police over the State lines in the Bengal Division of the East Indian Railway from the 1st October 1885 to the 31st March 1892.

(2) The payment of the sums of Rs. 2,798-0-8 and Rs. 1,293-15-5 on account of the $\frac{3}{10}$ths share due for the cost of watch and ward establishment and police guards employed in Bengal by the Bengal and North-Western Railway Company from the 1st April 1884 to the 30th June 1890.

(3) The payment of Rs. 1,416-13-2 on account of the $\frac{3}{10}$ths share payable by this Government of the cost of house accommodation provided by the Bengal and North-Western Railway Company for the police force employed in the Bengal section of the Bengal and North-Western and Tirhut Railways.

(4) The payment of Rs. 1,500 for Dome settlements in the Champaran district.

(5) Additional provision necessary for the Government share of River Police, Rs. 1,367.

(6) The appointment of an Inspector on Rs. 100 per mensem for the district of Saran to supervise the Dome settlements, Rs. 900.

The total grant will now stand at Rs. 60,36,000.

64. *Education.*—The estimate under this head, amounting to Rs. 26,72,000, has been reduced by Rs. 24,207 on account of the following charges transferred

to the Public Works Department and to District Boards on account of the following buildings:—

	Rs.
(a) Additions to and alterations in the Arrah Zilla School building	5,625
(b) Additional accommodation in the Boarding-house of the Government School at Baraset	3,148
(c) Construction of two wings and a gallery in the Chapra Zilla School	13,385
(d) Conversion of the south part of the compound of the Patna College into a cricket-ground	1,412
(e) Additional expenditure incurred in constructing two wings to the Pabna Zilla School building	283
(f) Raising the floor of the library-room in the Mymensingh School	354

Against these reductions, an additional grant of Rs. 11,055 has been made for primary schools in backward districts, and a provision of Rs. 12,000 for fitting up the chemical and physical laboratories and other changes in the Civil Engineering College, Sibpur. The Secretary of State has sanctioned an honorarium of Rs. 5,000 to Dr. Grunwedel for the completion of the Lepcha Grammar. The total grant will now stand at Rs. 26,76,000.

65. *Medical.*—An additional grant of Rs. 5,000 has been sanctioned for the purchase of certain articles for the Anatomical Museum, Medical College, Calcutta. The charges under "Hospitals and dispensaries" and "Sanitation and Vaccination" during the first five months of the current year show increases of nearly Rs. 10,000 and over Rs. 5,000, respectively, over those of the corresponding period of last year. In view of these increases, the total grant for the year will be placed at Rs. 18,40,000 against Rs. 18,13,084, the latest actuals of 1894-95.

66. *Scientific and other Minor Departments.*—The estimate under this head has been raised by Rs. 2,000 for a grant to the Secretary to the Buddhist Society for the publication of their text, and by Rs. 7,000 to meet other miscellaneous charges, such as special expenditure in connection with the casts of the Asoka inscriptions, charges for Inspector of Explosives, and Refunds. The total grant will now be raised to Rs. 4,70,000.

67. *Superannuation.*—The estimate under this head amounts to Rs. 18,05,000. The actual charges in past years were:—

		Increase.	
	Rs.	Rs.	Rs.
1890-91	15,13,000	......	
1891-92	16,00,000	87,000	
1892-93	17,03,000	1,03,000	
1893-94	17,40,000	37,000	
1894-95	17,80,000	40,000	2,67,000
Etsimate, 1895-96 ...	18,05,000	25,000	

The increase in the last four years amounted to Rs. 2,67,000, or an average of Rs. 67,000 a year. The actuals in the first five months of the current year show an increase of Rs. 35,000 over those of the corresponding period of last year, and justify the estimate being raised to Rs. 18,40,000

68. *Stationery and Printing.*—An additional grant of Rs. 4,540 has been sanctioned under the head "Contingencies" for municipal taxes on premises No. 3, Church Lane, and 11, Strand. The question of the revision of the establishment of the office of the Superintendent of Stationery is now under the consideration of the Board of Revenue, who have been asked to substitute fixed for incremental salaries, and to convert the existing departmental establishment into a graded one; but pending orders on the subject, no provision is necessary. The total grant under this head will now stand at Rs. 13,21,000.

69. *Miscellaneous.*—The estimate under this head will be raised by Rs. 3,000 granted to the Albert Victor Leper Asylum to meet the present liabilities of the Institution in addition to the annual maintenance allowance. The grant will now stand at Rs. 2,47,000.

70. *Irrigation—Minor Works and Navigation.*—The estimate under this head, as passed by the Government of India, amounts to Rs. 16,22,000. At the instance of the Public Works Department, some small grants have been made, aggregating Rs. 840, to the Local Funds by reduction under this head.

Against this reduction, an additional grant of Rs. 1,30,000 will, with the sanction of the Government of India, be made to the Public Works Department for the improvement of the Bhangor khal, a section of the Eastern Canal system. The total grant will therefore stand at Rs. 17,51,000.

71. *Civil Works in charge of the Public Works Department.*—The grant for Provincial Civil works for the current year was originally fixed at Rs. 26,96,000. It has been reduced to Rs. 25,77,242 as the net result of certain additions to and deductions from the original allotment sanctioned during the past six months. An additional grant of Rs. 3,919 will have to be made for percentage charges for establishment, tools and plant on Imperial works transferred to the management of local funds in 1894-95; and, subject to the sanction of the Government of India, the Lieutenant-Governor has issued orders to take early steps for the completion and execution of some of the urgent works which were kept back at the time the budget was first prepared, when, in consequence of the fluctuating character of the railway receipts, an accurate forecast of the Provincial share of these receipts could not be obtained. The cost of these additional works in the current year will probably amount to Rs. 5,55,208, as shown below, and the Government of India will be moved for early sanction to this excess expenditure:—

	Rs.
Eden Hostel	1,10,000
Calcutta Madrassa Boarding-house	27,424
Campbell lying-in-ward	31,375
Medical College Anatomical block	1,00,817
Kurseong Boys' School	84,000
Additional block for the Stamp and Stationery Office ...	89,748
Tollygunge Police Barrack	11,132
Bhowanipur Hospital	52,100
Bhagalpur Training School	4,900
Muzaffarpur Record-room	3,477
Treble Munsifi at Howrah	21,282
Darjeeling Police Barrack	7,873
Covered way to connect the nurses' quarters with the Medical College Hospital	1,988
Tirihana to Bagdogra road	8,092
Jalpaiguri Deputy Commissioner's residence	6,000
Total ...	5,55,208

The total grant will now stand at Rs. 31,36,000.

72. *Civil works in charge of Civil Officers.*—The Lieutenant-Governor has promised to make a grant to the Krishnagar Municipality of half the estimated cost of the drainage of the town up to Rs. 10,000. Against this addition a reduction of Rs. 6,229 will be made in the grant for the repairs of building in the South Lushai Hills, that being the amount already placed at the disposal of the District Board of Chittagong for the repairs of the Commissariat godown. The total grant will now stand at Rs. 1,40,000.

73. *Contributions.*—The grants made to the several District Boards to establish equilibrium between the receipts and charges transferred to their management amount to Rs. 4,76,885, and the special grants made to certain local bodies for the maintenance of roads transferred to their charge amount to Rs. 2,11,253. The annual grants to local bodies for the maintenance of Imperial and Provincial civil works, including establishment and allowances to Engineers, &c., amount to Rs. 1,52,649, and the annual grants to District Road Funds and District Road Accounts aggregate Rs. 53,056. The total comes up to Rs. 8,93,843. The following further grants have been sanctioned for the current year:—

	Rs.
(1) To Local Funds for Imperial works	8,653
(2) Ditto Provincial works	1,78,278
(3) Ditto Irrigation Minor Works	840
(4) Ditto Educational works	637
(5) To the District Board of Chittagong for repairs to the Commissariat godown	6,229
(6) To the Sonthal Parganas Road Account for improvements in Government estates	16,000
Total ...	2,10,637

These make a total of Rs. 11,04,480; and as some provision is necessary to meet unforeseen demands, the estimate under this head will be placed at Rs. 11,42,000.

74. *Summary of Expenditure.*—The total expenditure is thus estimated at Rs. 4,50,16,000, against a budget figure of Rs. 4,43,08,000, an increase of seven lakhs of rupees. It exceeds the estimated receipts by one and-a-half lakhs of rupees.

75. *Closing balance.*—According to the estimates passed by the Government of India, it was expected that the year would close with a balance of Rs. 32,62,000. According to the estimates now adopted, the closing balance will be Rs. 41,63,000, against an opening balance of Rs. 43,23,000. The total estimate of expenditure now adopted exceeds, however, the budget estimate by a net sum of Rs. 7,08,000, for which the sanction of the Supreme Government is necessary. This excess is made up of additional grant of Rs. 23,000 under Education, Rs. 1,30,000 under Irrigation—Minor Works, for the Bhangor khal, and Rs. 5,55,000 under Civil Buildings for urgent works which cannot be postponed.

76. *Brief retrospect of five years.*—This is a convenient place in which to record the financial history of the Province during the last five years. That history is contained in the following figures:—

	Actuals.			Approximate actuals, 1894-95.	Revised estimate, 1895-96.
	1891-92.	1892-93.	1893-94.		
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Opening balance	24,72,774	23,53,431	22,55,172	26,24,038	43,23,000
Receipts	5,78,01,984	4,24,45,566	4,32,78,325	4,46,19,722	4,48,56,000
Total ...	6,02,74,758	4,47,98,997	4,55,33,497	4,72,43,760	4,91,79,000
Expenditure	5,79,21,327	4,25,43,825	4,29,09,459	4,29,20,640	4,50,16,000
Closing balance	23,53,431	22,55,172	26,24,038	43,23,120	41,63,000

77. The opening balance of 1891-92 would have been much higher but for the special benevolence of 10 lakhs levied by the Government of India in 1890-91 in addition to the fixed contribution of Rs. 6,90,000 due under the Provincial contract commenced in 1887-88, which expired in April 1892. During 1891-92 the Provincial receipts amounted to Rs. 5,78,01,984, and the expenditure of the year slightly exceeded the receipts, and the closing balance was reduced to Rs. 23,53,431, or about three and-a-half lakhs above the prescribed minimum. The next year, 1892-93, was the first of the current contract framed for the five years April 1892 to March 1897. As compared with the receipts of 1891-92, the Provincial revenues of 1892-93 show a falling off of rather more than a crore and-a-half. Of this decline no less than 129 lakhs is accounted for by an important administrative change, carried out with Sir Charles Elliott's entire concurrence, under which the Nalhati and Tirhut State Railways were made Imperial, while the net receipts of the Eastern Bengal Railway system were divided equally between Imperial and Provincial revenues. At the same time it was decided that the executive control of all those railways should rest with the Government of India. There was also a fall of more than 27 lakhs under Land Revenue adjustments, caused by the rise in the fixed contribution from Provincial to Imperial to Rs. 14,39,000, and by the fact that certain large contributions made from Imperial revenues on account of special expenditure during 1891-92 did not recur in 1892-93. On the expenditure side, Bengal was relieved of charges amounting to 142 lakhs under the head of State Railways, including nearly 37 lakhs for interest on debt, while the cost of the survey and settlement operations was made Imperial. The result of these adjustments was that in the first year of the contract, the Province had a revenue of Rs. 4,24,45,566 against an expenditure of Rs. 4,25,43,825, and the balance at the close of the year was reduced to Rs. 22,55,172. In the following year, 1893-94, the revenue shows an increase of Rs. 8,32,759, owing to increased receipts under Stamps and Excise, and an improvement of over four lakhs under Railways, due to the increased prosperity of the Eastern Bengal State Railway. On the Expenditure side the charges increased by Rs. 3,65,634, owing mainly to the grant of exchange compensation allowance. The revenue, however, exceeded the expenditure by Rs. 3,68,866, and the year closed with a balance of Rs. 26,24,038. The revenue of 1894-95 increased

by nearly seventeen lakhs, of which nearly eight lakhs occurred under Railways, nearly five and-a-half lakhs under Stamps, and a lakh and-a-half under Miscellaneous, while Excise and Assessed Taxes show an increase of more than a lakh each. As, however, an extraordinary contribution of three lakhs was levied by the Government of India, and adjusted under Land Revenue, the actual rise in the Provincial revenues was only thirteen and-a-half lakhs. No material increase occurred in the expenditure, and the balance at the close of the year stood at Rs. 43,23,120. The figures now adopted for the current year show increases of two lakhs and-a-quarter under Stamps, three-quarters of a lakh under Excise, and five lakhs under Land Revenue Adjustments; while the estimated receipts from Railways have declined by three lakhs and-a-half, and from Miscellaneons by one lakh and-a-half, the net result being an increase of two lakhs and-a-half. On the other hand, the expenditure as now estimated has risen by nearly twenty-one lakhs distributed over a number of heads, the largest increase being under Irrigation and Roads and Buildings, which between them account for nearly half of the amount.

78. On a review of the entire period, it will be seen that, besides the extraordinary benevolence of ten lakhs levied at the commencement of the period, Bengal has contributed within the last five years no less than Rs. 67,46,000 to meet the necessities of the Empire, over and above the heads of receipts ordinarily classed as Imperial: and in addition to this there has been a steady growth in the receipts divided in varying proportions between Imperial and Provincial Revenues, which, while it swelled the Provincial revenues in the manner described above, yielded to the Supreme Government an increase of nearly fifty-one lakhs. Notwithstanding this drain upon the Provincial resources, the Lieutenant-Governor is glad to be able to look back upon a substantial array of administrative improvements which have been carried out within the period under review. Three new districts have been created, the number of Subordinate Judges and Munsifs has been increased, an additional Judge has appointed for the Eastern districts, the ministeral establishments of Judicial officers have been strengthened, and the number of Rural Sub-Registrars has been increased. The police has been reorganised mainly on the lines suggested by the Police Commission of 1890, at a total cost of more than five lakhs per annum; a school for the training of Police officers has been opened; barracks have been built and improved; special reserves of armed police have been created in every district to meet local emergencies; and the French system of identifying criminals by measurement has been introduced. The jails at Buxar and Bhagalpur have been enlarged; the Hazaribagh jail has been converted into a central jail; special committees have been formed for the purpose of conducting systematic inquiries into the condition of the less healthy jails; and the water-supply of all the jails has been examined and improved. A large block of buildings to be devoted to the study of anatomy has been added to the Medical College, and numerous minor improvements have been made in the buildings of that institution; surgical and midwifery wards and a dispensary have been constructed at the Campbell Hospital; a new hospital is under construction in the south of Calcutta; the Vaccination and Sanitary Department have been completely reorganized; a second vaccine depôt has been opened at Darjeeling, and is now extending its operations to Nepal; quinine has been brought through the Post Office within the reach of the poorest classes, and the supply has been increased by the purchase of a fresh plantation at Nimbong near Darjeeling. The system of weighing salt has been improved, and the salt warehouse at Sulkea has been connected with the East Indian Railway so as to facilitate the export of salt by rail. Under the head of Public Works the period has been one of considerable activity. In Calcutta a new Police Court, an office for the Presidency Commissioner, the Collector of Calcutta, and the Collector of Income-tax, and two new buildings for the Stamps and Stationery Department, have been built, a fresh wing has been added to the Indian Museum, and the Small Cause Court has been greatly enlarged. In the mufassal a large number of Government offices have been built and extended, and quarters have been provided for officials in several places where houses were not to be had. Feeder roads have been opened in connexion with several railways, and a definite scheme has been worked out for future operations in this direction. Material help has been afforded to the backward districts of Palamau and the Sonthal Parganas towards new and improved roads; the communications of the tea districts of the Duars and of Darjeeling have been improved, and a great number of bridges have ben constructed on Provincial roads. During the

current year a large project, the canalisation of the Bhangor khal, has been undertaken, which will improve the boat route to Backergunge and extend the facilities for traffic with Eastern Bengal generally. The Orissa system of canals has been extended; and the Hijili Tidal Canal remodelled. Particular attention has been given to the construction of distributaries, and the collection of irrigation rates has been improved. In the Education Department, Provincial money has been spent on improving the teaching at the Sibpur Engineering College and adding to it a class for mining engineers, and a new set of workshops has been constructed for the practical training of the students; a Veterinary School and Hospital has been created in Calcutta; primary and female education have been extended; an industrial school has been opened at Patna; a new school for European boys is being constructed at Kurseong; a chemical laboratory has been added to the Presidency College; a new building provided for the School of Art in Calcutta; and finally, large additions have been made to the Eden Hindu Hostel, and the Calcutta Madrasa boarding-house has been begun with the object of providing suitable accommodation for all, or a large proportion, of both Hindu and Muhammadan students.

79. The list is a long one, but were it twice as long, much would still have been left to do. Where the claims to assistance are so numerous and so pressing as they are in Bengal, it is clearly out of the question that all should be met. The utmost that the Government can hope to accomplish is to allot the limited resources at its disposal as far as possible in accordance with the relative urgency of the demands which are put forward. Sir Charles Elliott trusts that he has applied this principle as equitably as circumstances permitted. He leaves the Provincial finances in a condition of exceptional prosperity, and he rejoices to think that his successor will be able to utilise the large balance with which the present year will close, in carrying out some of the projects and improvements which he himself has been unable to complete.

ORDER.—Ordered, that a copy of this Resolution be submitted to the Government of India, Department of Finance and Commerce, for information.

Ordered also, that a copy of the above Resolution be forwarded to the Board of Revenue; to all Commissioners of Divisions; to the Accountant-General; to the Inspectors-General of Civil Hospitals, Police, Jails, and Registration; to the Directors of Public Instruction and Land Records and Agriculture; to the Conservator of Forests; to the Port Officer, Calcutta; to the Superintendent of the Royal Botanic Gardens, Calcutta; to the Manager of the Eastern Bengal State Railway, and to all Departments of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE CALCUTTA MUNICIPAL CORPORATION FOR THE YEAR 1894-95.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Darjeeling, the 8th November 1895.

RESOLUTION—No. 887T.—M.

READ—

The Administration Report of the Commissioners of Calcutta for the year 1894-95.

Read again—

The Report for the year 1893-94, and the Resolution recorded by Government thereon.

The Lieutenant-Governor regrets to observe that, notwithstanding the hope expressed in the Resolution on the previous year's report, that the delays which have occurred in past years in the submission of the Annual Report of the Commissioners to Government would be avoided, no efforts seem to have been made to secure the earlier submission of the present report, which was not received till six weeks after it was due, and then was accompanied by the remark that the Commissioners had been unable to consider the important part of it which is contained in the report of the Health Officer. With the means at their disposal the Commissioners ought to be able to complete their accounts and get the report printed within three months from the close of the financial year. They would then have a month to give to discussing the report, which would come before Government at the end of July as a well-considered expression of the views of the Commissioners on the work done by them in the course of the year. As it is the report bears throughout the stamp of haste and insufficiency. As a literary production it is unworthy of notice, and there are many discrepancies in the figures which require explanation. The collections of rates are rather worse than they have ever been before. Less has been done towards improvements. The drainage question as a whole, or even the part of it which affects the "added area," has not been grappled with. Great issues are at stake and important decisions have to be arrived at, but the time is consumed in endless discussions, and little practical advance is made. The settlement of the question regarding the statutory three lakhs to be expended annually on suburban improvements, and of the long pending acquisition case relating to 54, Clive Street, may be put on the opposite side, and are subjects for congratulation.

2. The post of Chairman was held by Mr. J. G. Ritchie throughout the year, while Mr. Harry Lee, the permanent incumbent, was absent on furlough. Since the close of the year, news of the death of Mr. Lee has been received, and the Lieutenant-Governor shares the regret which the Commissioners have felt at the loss of their late Chairman, who, while he held that office, performed his duties with characteristic zeal and ability. The year 1894-95 was the last of the administration of the Commissioners who came into office in April 1892, and a general election was held on the 16th March 1895. In 10 out of the 25 wards of the Municipality, the candidates who offered themselves for election were returned unopposed. In the 15 wards where contests took place, 70 per cent. of the voters recorded their votes, against 53 and 42 per cent. at the two previous elections. Of the 50 Commissioners elected, 36 were members of the last Corporation, and of the 14 new Commissioners, two had served on former occasions. The *personnel* of the Commissioners, both as regards race and profession, remains practically the same.

3. *Meetings and attendance of Commissioners.*—The Commissioners assembled in General meeting 27 times against 26 in the previous year. The General Committee appointed under section 63 of the Act met 53 times against 51, and the Standing and Special Committees appointed under section 65 met 48 and [illegible] times against 61 and 26 respectively in 1893-94. There were also 33 meetings of Sub-Committees against 35. The total number of meetings of all kinds [illegible] against 199 in the previous year. Seventeen Commissioners attended [illegible] 50 meetings, against 19 in the previous year. The Commissioners

help has bee.
Parganas tow

who attended the greatest number of meetings were the Hon'ble Rai Durgagutty Banerjee Bahadur, C.I.E., 117 meetings; Babu Lall Behary Bysack, 111; Babu Radha Churn Pal, 107; and Babu Prya Nath Malik, 104. There was a falling off in the attendance of elected Commissioners, the average precentage of attendence being 55 against 61 in the previous year. The average percentage of attendance among the nominated Commissioners was the same as last year, viz., 46, while the percentage of attendance of members representing the Port Commissioners, the Trades' Association, and the Bengal Chamber of Commerce combined, rose from 39 to 53.

4. *Proceedings of meetings.*—The principal questions dealt with by the Commissioners in general meeting were the drainage of the suburban area, the provision of a public recreation ground at Marcus Square, the establishment of a hospital at Bhowanipore, the acquisition of the 54, Clive Street, site, and the statutory obligation of the Corporation to spend three lakhs annually on suburban improvements. No advance was made during the year with the scheme for the drainage of the Suburban area, as the Commissioners were awaiting the opinion of Mr. Baldwin Latham on the subject. The want of a public recreation ground in the northern part of the Town has long been felt, and at the instance of Government the Commissioners set apart the site known as Marcus Square for this purpose; the tank which formerly stood on that site has been filled up, and an area comprising a little over 13 bighas of land has been taken up and converted into a public recreation ground. The cost, towards which Government has contributed a grant of Rs. 50,000, has to be met in part from public subscriptions, and the Lieutenant-Governor trust that so much of it as still remains to be collected will soon be realized. The need of a hospital for the southern Suburbs of Calcutta has also been recognised for a long time, and the matter has been under the consideration of the Commissioners since the year 1890-91. During the year under review an arrangement was come to by which the Municipality gave up as a site for the proposed hospital a plot of land south of the Bhowanipur reservoir, measuring 128 cottahs 13 chittacks and 44 square feet, valued at Rs. 64,366; consented to the merging in the new hospital of the present Sumbhoo Nath Pundit Dispensary, which is to be sold, the name being preserved for the outdoor department of the new hospital, and the sale-proceeds appropriated towards the construction of the new building; and agreed to make an annual contribution to the new institution of Rs. 5,000, inclusive of the sum now contributed to the Sumbhoo Nath Pundit Dispensary. At the same time, Government undertook to contribute the remaining sum necessary for the construction of a building for the new hospital, and to continue to provide year by year the cost of maintenance in excess of the contribution from the Municipality. The new hospital, when ready, will be managed by a Board of five Governors with the Inspector-General of Civil Hospitals as President in addition. Three of the Governors will be nominated by Government and two by the Municipality. The plans and estimates, amounting to Rs. 90,539, for the construction of the new hospital, have already been approved by Government, and the building is now well advanced. The long pending appeal case in connection with the acquisition by the Commissioners of 54, Clive Street, was settled during the year by the Commissioners entering into a compromise with the appellant and paying him two lakhs over and above the amount awarded by the Judge in the Lower Court, with arrears of interest at 6 per cent. The acquisition of this piece of land, 1½ bigahs in extent, with the buildings upon it, has cost the Corporation over 11 lakhs. With the settlement of this troublesome matter, the Harrison Road account has now been practically closed, and it appears that the entire undertaking, including the electric lighting, the working of which is at present defective, has cost the Corporation Rs. 27,37,000 after deducting the sums recovered from the sale of surplus land. The Commissioners have arrived at last at a settlement of the long pending question regarding the method of calculating the statutory three lakhs to be expended by them annually on improvements in the suburbans area. With the advice of counsel, who seem to have taken a broad and equitable view of the requirements of the law, the Commissioners have now determined the mode in which this account should be prepared, one of the chief items charged to it being the instalments of interest

and sinking fund payments on account of capital sums expended on the extension of the water-supply which was undertaken in anticipation of the amalgamation of the Suburbs with the Town. Details of the expenditure held to be debitable to this account since the year 1889-90, when the Suburbs were amalgamated with the Town, are given in Appendix I, Part II of the Report, of which the following is an abstract:—

	Rs.	A.	P.	Rs.	A.	P.
Expenditure during 1889-90—						
Interest and Sinking Fund on water-supply expenditure	78,390	0	0			
Improvements in Suburbs from revenue	28,853	8	10			
Cost of new lamps	10,055	0	0			
				1,17,298	8	10
During 1890-91—						
Interest and Sinking Fund on water-supply expenditure	1,36,026	0	0			
Improvements in Suburbs from revenue	89,104	15	11			
Cost of new lamps	17,975	0	0			
				2,43,105	15	11
During 1891-92—						
Interest and Sinking Fund on water-supply expenditure	1,68,304	0	0			
Ditto on expenditure on improvements incurred from capital, Rs. 1,00,289, at 5½ per cent. ...	5,516	8	0			
Improvements in Suburbs from revenue	2,08,401	2	0			
Cost of new lamps	2,520	0	0			
				3,84,741	10	0
During 1892-93—						
Interest and Sinking Fund on water-supply expenditure	1,74,239	0	0			
Ditto on expenditure on improvements incurred from capital, Rs. 2,71,727, at 5½ per cent. ...	14,943	8	0			
Improvements in Suburbs from revenue	52,762	0	9			
Cost of new lamps	15,115	0	0			
				2,57,059	8	9
During 1893-94—						
Interest and Sinking Fund on water-supply expenditure	1,83,735	0	0			
Ditto on expenditure on improvements incurred from capital, Rs. 3,05,545, at 5½ per cent. ...	16,802	8	0			
Improvements in Suburbs from revenue	1,31,943	11	4			
Cost of new lamps	7,357	8	0			
				3,39,838	11	4
During 1894-95—						
Interest and Sinking Fund on water-supply expenditure	1,86,147	0	0			
Ditto on expenditure on improvements incurred from capital, Rs. 2,47,551, at 5½ per cent. ...	13,615	0	0			
Improvements in Suburbs from revenue	1,22,170	0	4			
Cost of new lamps	21,379	7	9			
				3,43,311	8	1
Total				16,85,355	14	11

This account shows that in lieu of 18 lakhs which should have been expended on suburban improvements during the past six years, Rs. 16,85,355 have been so expended. The balance, Rs. 1,14,645, will, it is said, be adjusted

during the current year. The Commissioners will therefore have to spend Rs. 4,14,645, on suburban improvements during the current year in order to bring this account up to date. Having regard, however, to the intricate character of the question and the length of time over which the transactions extend, the Lieutenant-Governor thinks that the account prepared by the Commissioners should be submitted for audit to some independent authority, which should report whether the items included in it comply with the interpretation of the law adopted by the learned counsel whose advice was taken on the subject, and that this report should be submitted for the information of Government.

5. *Loans.*—The loan liability of the Corporation at the commencement of the year was as follows:—

	Rs.	A.	P.
Unpaid balance of 6 per cent. debenture loan of 1866	5,000	0	0
5 per cent. debenture loans	1,44,01,900	0	0
4½ ditto ditto	30,48,300	0	0
	1,74,55,200	0	0
Balance of consolidated loans from Government ...	51,11,493	7	7
Loan from Port Commissioners	2,00,000	0	0
Total ...	2,27,66,693	7	7

No new loans were raised during the year, and the Commissioners were able to pay off nearly 4½ lakhs of their debt. The loan of Rs. 2,00,000 from the Port Commissioners towards the Harrison Road Fund, was repaid from the proceeds of the sale of surplus land, and Rs. 2,49,700-7-3 of the consolidated loans from Government, were repaid from revenue, leaving a balance of Rs. 2,23,16,993-0-4 as the loan liability of the Corporation at the close of the year. Against this they had in their Reserve Funds and in the Special Fund for the repayment of the loan of 1866, a total sum of Rs. 13,19,719-3-9, or Rs. 2,37,525-5-6 more than the amount in reserve shown last year, but the Government securities and municipal debentures were entered only at their par value in the report for 1893-94, while in the present report they are entered in the market value, which accounts in great measure for the difference. Since the close of the year the Corporation have, with the sanction of the Government of India, raised a further loan of 18 lakhs at 4 per cent., repayable after 15 years.

6. *Income and expenditure.*—The following statement compares the receipts and expenditure of the Municipality for the past two years:—

Receipts.

	1893-94.	1894-95.
	Rs.	Rs.
General rate at 9¼ per cent.	16,55,787	16,93,235
Sewage rate at 2 „	3,48,395	3,56,618
Water rate at 6 „	10,45,207	10,69.443
Lighting rate at 2 „	3,48,403	3,56,483
Total of consolidated taxation at 19¼ per cent.	33,97,792	34,75,779
Taxes on trades and professions, carriages and animals, &c.	5,42,242	5,41,531
Municipal market receipts	1,32,311	1,30,823
Receipts from the sale of water	1,00,770	1,06,905
Conservancy receipts	64,430	65,003
Road Department receipts	78,585	35,621
Slaughter-house receipts	37,939	44,522
All other receipts	1,09,726	1,12,293
Total ...	44,63,795	45,12,477

	1893-94.	1894-95.
	Rs.	Rs.
Expenditure.		
Interest on loans	5,40,262	5,35,717
Contributions for repayment of loans ...	2,06,233	2,10,777
General establishment	3,86,046	3,82,427
General office expenditure	97,001	87,494
Road Department	3,66,133	4,36,533
Street watering	90,801	90,583
Ghowkhana	1,78,670	2,10,665
Conservancy	1,50,621	1,43,909
Bustee cleaning	1,02,431	97,978
Sewer cleaning and relaying charges ...	60,968	71,957
Hospital and vaccination charges ...	56,147	69,908
Suburban improvements	1,34,950	1,22,170
All other expenditure from the General Fund	2,31,662	2,58,257
Sewage rate charges	2,62,723	2 62,439
Water rate charges	10,68,586	10,63,845
Lighting rate charges	3,90,496	4,28,277
Total ...	43,24,030	44,72,936

There was an increase of Rs. 48,682 in the total revenue of the year as compared with that of the previous year. The income derived from each of the four rates levied in the Municipality shows an improvement which was due to enhancement of assessments on revaluation. The large falling off, Rs. 42,964, in the Road Department receipts is said to have been due chiefly to the remission granted to the Tramway Company, under the new agreement entered into with the Company. The total expenditure exceeded that of the previous year by Rs. 1,48,906. The increases are chiefly under Road Department Rs. 70,400, Gowkhana Rs. 31,995, and lighting charges Rs. 22,602. The cost of establishment and other charges were kept within the estimates of the year.

7. *Financial position.*—The year opened with net cash balances of Rs. 3,24,924 and Rs. 3,45,163 in the Revenue and Capital Funds respectively. During the year the total receipts of the Revenue Funds, as shown in paragraph 6 above, amounted to Rs. 45,12,477, and the expenditure to Rs. 44,72,936, leaving a net balance of Rs. 39,541 to be carried to account, while the receipts of the Capital Funds amounted to Rs. 2,65,937, and the expenditure to Rs. 6,52,822, leaving a considerable deficit, which was met in part by an advance of Rs. 1,10,159 from Revenue Funds. At the close of the year there was a net cash balance of Rs. 4,19,567 at credit of the Revenue Funds, while the Capital Funds showed a deficit of Rs. 63,248. This has since been replenished by the loan raised by the Corporation during the current year.

8. *Assessment and collection of the consolidated rate.*—During the year under report the revaluation of houses, lands and bustees in parts of the town, after the disposal of appeals filed under section 135 of the Calcutta Municipal Act, resulted in a net increase of Rs. 3,90,753. The assessed annual valuation of the town on 31st March 1895, therefore, stood at Rs. 1,98,41,008 against Rs. 1,94,50,255 on the same date in the previous year. Fair progress was made in the disposal of objections against assessments, notwithstanding the interruption of work in this department owing to the work imposed on it in connection with the general election of Commissioners, and the number of pending cases was reduced to 1,382 from 2,093 in the previous year.

The current demand of the consolidated rate was Rs. 37,61,513 against Rs. 36,80,274 in 1893-94, showing an increase of Rs. 81,239, but there was an outstanding balance of Rs. 5,06,066 remaining from the previous year, so that the gross demand for the year was Rs. 42,67,579. The gross collections amounted to Rs. 34,79,917, or a percentage of 81·5 on the gross demand, against a percentage of 82·07 in the previous year. The incidence of the consolidated rate per head of the population was Rs. 5-12-8 against Rs. 5-3-8 in the previous year, and that of the total municipal taxation Rs. 6-11-6 against Rs. 6-2-6.

9. The following statement, which is taken from paragraph 13 of the report, and to which column 11 has been added, shows the progress of demand and collections during the past five years:—

YEAR.	OUTSTANDING BALANCE OF CONSOLIDATED RATE ON 1st APRIL.				Total.	Current demand for the year.	Gross demand including balance.	Gross collection.	Percentage of collection on gross demand.	Arrears, i.e., column 8 —column 9.
	Collector.	Joint Collector.	Warrant.	Assessor.						
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.
1890-91 ...	80,645	42,209	1,51,968	67,488	3,42,310	33,85,145	37,27,455	30,97,.31	83·09	6,30,224
1891-92 ...	1,14,649	42,667	1,71,032	65,050	3,93,398	34,04,93 3	37,98,331	32,16,046	84·67	5,82,285
1892-93 ...	5·,701	38 270	2,52,971	73,345	4,21,287	35,44,144	39,65,431	33,12,021	83 52	6,53,410
1893-94 ...	66,175	15,238	2,78,880	99,504	4,59,797	36,80,276	41,40,072	33,97,891	82·07	7,42,181
1894-95 ...	82,745	24,496	3,26,320	75,360	5,08,921	37,61,51	42,70,434	34,80,534	81·50	7,89,900

Out of the total arrears shown in column 11, Rs. 1,98,817 were cancelled or remitted during the year, leaving uncollected a sum of Rs 5,91,083, the bills for which were distributed as follows:—

	Rs.		Rs.
Collector	1,08,607	Warrant Superintendent ...	3,66,492
Joint-Collector ...	28,476	Assessor	87,508

As the difference between the total arrear and the balance outstanding for recovery in each succeeding year is clearly due to remissions, it follows that, within the period covered by the statement, about 13 lakhs have been written off. Not only are no arrears recovered, but the gross collections never equal even the current demand in any single year. Of the total collections made in each department, 85·33 per cent. of the demand were received in the Collector's Department, 82·44 per cent. in the Joint-Collector's Department, and 32·5 per cent. in the Warrant Department, against 84·45, 83·06 and 40·1, the percentages of the previous year. There was an improvement in the work of the Collector's Department during the year, and a less amount transferred from that department to the Warrant Department, but the balance outstanding is still large, and has shown a steady increase for some years. The work of the Joint-Collector's Department, on the other hand, shows a falling off. The collections were much less than those of the two previous years, the amount being Rs. 6,09,413 against Rs. 6,82,811 in 1893-94, and Rs. 6,25,738 in 1892-93, while the percentage of the demand transferred to the Warrant Department for realization was 10·22 against 9·87 and 9·85 in the two preceding years. The falling off in the collections in this department is observed in all three classes of bills, viz., for owners' share of rates, occupiers' share, and bustee land. The work of the Warrant Department also shows a considerable falling off compared with the results of the previous year. There can be little doubt that the Commissioners lose heavily by not taking advantage of the powers which the law gives them to enforce prompt payment of municipal dues. All rates are payable at the beginning of the quarter to which they relate, and if proper arrangements were made for serving notices of demand, the bills ought to be in the hands of the Warrant Department before the close of the first month of the quarter.

10. *License and Registration Department.*—The following statement compares the gross receipts under the several heads in this Department during the past two years:—

	1893-94.			1894-95.		
	Rs.	A.	P.	Rs.	A.	P.
I.—Tax on trades and professions ...	3,46,839	7	3	3,44,183	14	9
II.—Tax on carriages and animals ...	1,43,338	12	6	1,44,004	4	1
III.—Cart registration fees	72,027	8	0	72,760	8	0
IV.—Fees for the removal of trade refuse	60,741	0	0	61,351	2	0
V.—License fees for cowsheds, &c.	37	0	0	53	0	0
VI.—Registration fees for hackney carriages, &c.	17,864	4	6	19,382	2	0
VII.—Miscellaneous receipts ...	719	14	0	688	14	0
VIII.—Fines under section 90 of the Calcutta Municipal Act	8,405	8	6	8,027	11	4
IX.—Fines under section 80 of the Calcutta Municipal Act	966	0	0	1,043	0	0
Total	6,50,939	6	9	6,51,494	8	2

There was a slight improvement in the total receipts in this department, though the receipts under the head of Trades and Professions showed a falling off to the extent of Rs. 2,655. The amount derived from the tax on carriages and animals is the largest yet collected, and reflects credit on the vigilance of the officers connected with this department. The reasons assigned for the falling off in the receipts under the head of Trades and Professions are (1) that a number of Joint Stock Companies which had paid the tax for 1893-94 withheld payment for 1894-95 pending the decision of the High Court, in a test case brought against the Standard Marine Insurance Company, Limited, which had disputed its liability to the tax; (2) that depôts of wood, straw, hay and other inflammable materials, which were formerly subject to a license fee at a uniform rate of Rs. 25, are now, under the Fire-Brigade Act of 1893, only liable to pay fees at varying rates which yield a smaller income; and (3) that the collection of the tax was retarded by the severe epidemic of small-pox which prevailed in the town during the last quarter of the year. The total number of licenses for trades and professions issued during the year was 25,098 against 25,983 in the previous year. The total number of carriages taxed during the year was 5,236 against 5,212 in 1893-94, and the number of horses and ponies taxed was 6,785 against 6,778. The number of hackney carriages registered rose from 3,452 to 3,594, the increase being shared by all three classes of these conveyances.

11. *Market, lighting, printing.*—The income from the municipal market rose from Rs. 1,28,311 to Rs. 1,31,033, and the profit to the Commissioners, after payment of all charges, was Rs. 1,11,933 against Rs. 1,07,815 in the previous year. The numbers of gas and oil lamps in Calcutta at the close of the year were 6,079 and 1,953 respectively. against 5,952 and 1,647, the numbers of the previous year, showing an increase of 127 in gas lamps and 306 in oil lamps. These figures, however, disagree with those given in the table in paragraph [illegible] of the Report, which shows an increase of 92 in gas lamps and 210 in oil lamps. This discrepancy should be explained. The actual cost of lighting was Rs. 3,86,159 against Rs. 3,58,967, showing an increase of Rs. 27,192, due to the increased number of lamps. The printing department appears to have worked satisfactorily, resulting in a net profit to the Corporation of Rs. 5,113.

12. *Survey.*—The work of laying down boundaries in connection with the resurvey of the town was completed, and a number of surveys were made in connexion with projects of improvement and boundary disputes. The Assessor and Surveyor disposed of 20,772 cases out of a total of 20,886, leaving 114 pending at the close of the year, against 139 in the previous year.

13. *Litigation.*—The number of fresh civil suits in which the Corporation appeared as plaintiff during the year was 122, the same number as in the previous year. Besides these they appeared as plaintiff in 30 pending cases of the previous year. Of the 122 new suits, 121 were for the recovery of rates and miscellaneous dues involving Rs. 34,045, and one for ejectment against Kanai Lal Pundit, who refused to vacate a part of 54, Clive Street, after it had been acquired by the Corporation, as he had an idol located there. The order of ejectment having been passed by the Court, it was duly carried out, and the building was dismantled by the Commissioners. Of the 121 suits instituted by the Corporation for the recovery of dues, 61 were decreed, 8 were compromised, and 52 remained pending at the close of the year. As in the previous year, no cases were dismissed by the Court. The large number of pending cases is said to have been due to many cases having been instituted in March 1895. Of the suits in which the Corporation appeared as defendant, the suit for trespass brought by Rajendra Dutt in 1889-90 remained unsettled, as the arbitrators made no award during the year. This case has been pending for a long time, and the arbitrators should be pressed to give their award. The acquisition case relating to 54, Clive Street, was, as already noticed in the earlier part of this review, successfully compromised. In another suit, which was decided after the close of the year, the Court passed a perpetual injunction on the Commissioners, forbidding them the use of the old trenching ground at Goragacha, and gave permission to the plaintiffs to file a similar suit in respect of the new ground recently opened at the same place. An important test suit was brought during the year against the Standard Marine Insurance Company,

to determine the disputed question whether Insurance Companies were liable to pay license tax under section 87 of the Calcutta Act. The Honorary Magistrate who tried the case decided that they were, but on appeal his judgment was reversed by the High Court, which held that a Company carrying on the business of insurance was not liable to assessment under section 87, as the business of insurance was not one of the occupations mentioned in schedule 2 of the Act. By this decision the Commissioners lose a revenue of nearly Rs. 10,000 a year. As there is no reason why these Companies should be exempted from taxation, and as it was not the intention of the Legislature that they should be exempted, steps will be taken to amend the law so as to render them and other Companies covered by the decision of the High Court liable to assessment in future. There were 14 appeals to the Small Cause Court under section 137 of the Act, against assessments of houses and lands, with the result that in three cases the assessment was reduced by the Court, five were amicably arranged out of Court, five were dismissed with costs, and one remained pending at the close of the year. The number of cases instituted by the Corporation in the Police Courts increased from 14,087 to 16,941, of which 9,607 were successful, 805 were unsuccessful, 4,230 were withdrawn or struck off, and 2,239 remained pending at the close of the year. The amount of fines imposed on the persons prosecuted in these cases amounted to Rs. 24,776-8 against Rs. 18,717-4 in the previous year. The largest number of prosecutions were, under sections 80 and 90 of the Act, instituted by the License Department, the number being 11,211 against 9,729 in the previous year. The prosecutions instituted under section 212 by the Road Department also increased from 783 to 1,398, which shows that the laxity in this Department, complained of in the previous year, has to a great extent been removed. The number of prosecutions instituted by the Health Department under the Vaccination Act was 562 against 631 in the previous year, and the fines imposed in these cases amounted to Rs. 106-8 against Rs. 72-12. The cost of the litigation undertaken by the Corporation during the year amounted to Rs. 33,202-10 against Rs. 25,064-9-1 in 1893-94.

14. *Education.*—Not a word is said in the report of the question of increasing the municipal contribution towards primary education in Calcutta, which has been pressed upon the Commissioners by this Government and the Government of India. It appears from the statement of General Fund expenditure given in Appendix F, Volume II, that a sum of Rs. 3,564 was expended during the year on general education, and that a grant of Rs. 900 was made to a school for the deaf and dumb. It is not stated how the former grant was distributed. As it is desirable that this information should be furnished, a statement similar to that given in paragraph 227 of the Report for 1893-94 should in future be included in the Annual Report of the Corporation. The Lieutenant-Governor observes with surprise the reluctance of the Commissioners to make the allotment of Rs. 10,000 which has been suggested as the smallest sum which the Commissioners can properly devote to a purpose which is universally recognised as holding a high place among the legitimate obligations of local authorities.

15. *Town and Bustee improvement.*—The total amount expended during the year on town and bustee improvements was Rs. 76,138 against Rs. 92,102, Rs. 1,41,730, and Rs. 1,61,334 in the three preceding years. The Capital Fund from which this expenditure is met opened the year with a balance in hand of Rs. 19,169. The receipts during the year, including a contribution from Government of Rs. 30,575 for improvement of the bustee in Hastings, amounted to Rs. 69,108, and the closing balance was Rs. 12,139. Of the total amount expended, Rs. 43,346 represents expenditure on town improvements, which consisted chiefly of the construction of new roads and the widening of existing thoroughfares, and Rs. 32,792 expenditure on bustee improvements, filling up of tanks in the Town and Suburbs, construction of squares, and construction of urinals. This is a small amount to spend considering the state of many of the bustees and the urgent need in which they stand of improvement. Only Rs. 7,634 was spent on the improvement of the Hastings bustee. The Lieutenant-Governor hopes that the full amount granted by Government for this purpose will be expended and early steps taken to complete the scheme for placing this area in a thoroughly sanitary condition.

16. *Engineers' Department.*—The new Worthington engine at Tallah, the largest pumping engine in India, has been erected and is working satisfactorily. Nearly 4·91 miles of pipe were added to the distribution system, making the entire length 307 miles, the number of premises connected being 25,286. The average daily supply of filtered water during the year was 20,248,268 gallons, which is the largest on record, giving a daily consumption per head of the population of 36·66 gallons in the Town proper and 19·94 gallons in the suburban area. In addition to this, an average daily supply of 112,007 gallons of filtered water was afforded to Barrackpore, and 29,334 gallons to the Manicktolla Municipality. The Dum-Dum Cantonment and the Cossipore-Chitpur Municipality have also been connected with the Calcutta supply, the former receiving 31,911 gallons a day, and the latter a minimum supply of 310,000 gallons a day. The daily supply of unfiltered water, which obtains in the Town proper only, was on an average 4,578,099 gallons, allowing 11·02 gallons per diem per head of the population. This system now comprises 76·63 miles of pipes, 2,885 ground hydrants for watering roads, 271 connections to sewer flushing chambers, 86 bathing platforms, 151 public latrines, and 966 connected premises, and further extensions are contemplated. The Lieutenant-Governor is glad to notice that three cast-iron cattle drinking-troughs were presented to the town during the year by private individuals. There are now 76 of these troughs in the town, all connected with the filtered water-supply.

17. *Health Department.*—The vital statistics of Calcutta for the year 1894 correspond in their essential features to those recorded for the entire Province during the same period. The number of births fell from 13,492 to 11,438, and the birth-rate per thousand of population from 19·7 to 16·8. A comparison of the figures with the mean of the previous five years shows the decline to have been highest in the months of March, August and September, and to have occurred mainly in the Town proper, the falling off in the Suburbs being comparatively slight. No comments on the figures are given in the Health Officer's report. The number of deaths rose from 20,113 to 22,441, and the death-rate per thousand from 29·5 to 32·9, the increase in the Town proper being 2·7 per thousand more than in the Suburbs. Of the total increase of 2,328 deaths, 872 were due to fever, 826 to cholera, and 374 to small-pox. The Health Officer attributes the increased mortality from fevers in Calcutta almost entirely to the defective condition of the sewers, which at certain states of the tide become blocked and leak into the surrounding soil. This state of things is no doubt highly insanitary; but the hypothesis that leakage from the sewers is the cause of the increased deaths from fevers does not seem as yet to have been established. The statement given in the margin compares the fever mortality in Calcutta and in the 24-Parganas for the last twenty years - a period selected with reference to the fact that the drainage of the southern portion of the Town was completed in 1874. It will be observed that the Calcutta death-rate shows considerable fluctuations, and that the mortality in the last year of the period is only ·1 per thousand in excess of that recorded twenty years ago, when the cause put forward by the Health Officer could not have begun to operate. Were that cause the true one, the water-logging and pollution of the soil in the neighbourhood of the sewers would have gone on increasing throughout the period, and the ratio of deaths from fever would have tended to keep pace with it. No such tendency can be traced in the recorded statistics; on the contrary, a marked fall in the mortality occurred in 1880, and lasted without any material increase and with occasional decreases until 1891, when the rate rose to 10·5 and

Fever Mortality.

Years.	Calcutta.		24-Parganas.	
	Number of deaths.	Ratio.	Number of deaths.	Ratio.

1870. Sewer outfall completed.
1874. South Calcutta drained.
1888. Whole of Calcutta drained.

continued substantially at that level until last year. On comparing the Calcutta statistics with those for the surrounding country, a certain degree of correspondence between the two sets of figures may be traced, and the conclusion which they seem to indicate is that the prevalence of fever in both areas is determined in the main by the general causes which produce fever everywhere in Bengal; but that the operation of these causes in Calcutta is counteracted to a varying extent by improved sanitary conditions, among which the reduction of subsoil moisture by drainage occupies a prominent place. There is, however, another aspect of the question upon which unfortunately neither these statistics nor the Health Officer's report throw any light. Assuming that at certain states of the tide percolation takes place from the Calcutta sewers into the adjacent soil, it seems *primâ facie* unlikely that this would produce saturation to an extent sufficient to bring about any marked increase in ordinary fever; but as the fluid which thus finds its way into the soil is largely composed of sewage, some increase of fevers of a typhoidal character might probably be looked for. That such fevers had in fact greatly increased was alleged on the authority of the Health Officer by the Chamber of Commerce, in their letter to Government of the 10th July, complaining of the Goragacha trenching-ground; and in communicating to the Corporation the reply of Government to that letter, the Chairman was particularly asked that "a full report, supported by the necessary statistics, might be called for from the Health Officer, on the allegation that typhoidal fevers are on the increase in Calcutta." It was obviously desirable that the grounds for so alarming a statement should be fully set forth and examined, and the Lieutenant-Governor expected that the Health Officer would be able to show from hospital statistics, and from records of cases treated by medical men, exactly what proportion of the increased mortality from fever consisted of cases which could reasonably be attributed to the action of sewage pollution, and would further be able to say in what parts of the town such cases had occurred, and what relation their distribution bore to the areas where leakage from the sewers is most prevalent. In reply to this request, Dr. Simpson reported that the number of deaths from typhoid fever during the last four years was as stated in the margin.

1891 ...	7	1893 ...	8
1892 ...	4	1894 ...	6

He also observed: "The general fever mortality of Calcutta has, however, within recent years increased, and from conversations I have had with medical men attending such cases, I gather that many of them assume a typhoidal aspect, and more especially of late years," and added that "this subject and the local causes at work in the production of Calcutta fevers" had been fully dealt with in his annual report. The report, however, contains no reference to typhoid, and deals merely with the increase in ordinary fevers which has been discussed above. It is a matter for much regret that after lending the weight of his authority to the statement that typhoidal fevers are largely increasing in Calcutta, the Health Officer should have neglected to comply with the request that the grounds of that opinion might be fully set forth. Owing to this omission it is impossible, as the matter now stands, to arrive at any certain or even probable conclusion on the important question whether the increase in fever mortality which has occurred during the last three years in Calcutta is due to purely local causes which admit of being diminished or removed, or to general causes affecting the whole surrounding country, which it would be vain to attempt to cope with. The position is a very unsatisfactory one, and illustrates the damage that may be done to sanitary progress by making vague general assertions and withholding the evidence upon which they are based.

Small-pox raged with some severity during the latter part of the year, the number of deaths from this cause being 405, of which 346 were in the Town proper and 59 in the Suburbs. During the epidemic every possible means of staying the progress of the disease was adopted, and vaccination was freely resorted to, with the result that 17,335 operations were performed against 14,377 in the previous year. Owing to the large number of small pox patients sent to the Campbell Hospital, the accommodation available at that institution was found to be insufficient, and temporary sheds for patients had to be erected in the compound of the hospital. The need of a permanent hospital for small-pox patients, to provide against an emergency such as that which arose during the late epidemic, was considered by the Commissioners,

who went so far as to offer a site and a grant of Rs. 5,000 for the construction of the necessary building; but the matter was dropped when the epidemic subsided, the Commissioners contenting themselves with making an increase of Rs. 5,000 to the annual grant made to the Campbell Hospital. Cholera did not appear in an epidemic form during the year, but the number of deaths recorded from this cause was 1,695, of which 1,118 were in the Town and 577 in the suburban area. Professor Haffkine's system of anti-choleraic inoculation was introduced by the Commissioners as a tentative measure for one year, and a grant of Rs. 7,500 was sanctioned by them to defray the cost of the trial. A full account of what was done is given in the Health Officer's report, and although the results are as yet inconclusive, the question is one of such surpassing interest that the Lieutenant-Governor would be glad to see the experiment continued.

18. *Drainage.*—The extension of the sewerage system to Entally was proceeded with during the year, and is approaching completion. In the Town proper 3,135 lineal feet of pipe sewers were laid, and the sewerage of the land along the Port Commissioners' railway between Sobha Bazar Street and Kumartoli Street was completed. In the canal fringe area improvements were effected in the drainage along the Bahir Mirzapore Road. The long-pending scheme for the drainage of the whole suburban area south and south-east of the Town proper was discussed during the year, and a report, drawn up by Mr. A. J. Hughes, in consultation with Mr. James Kimber, the Engineer to the Corporation, on the subject, was sent to Mr. Baldwin Latham for his opinion. This has since been received, and will no doubt be carefully considered by the Corporation as soon as the additional data required by Mr. Latham have been collected. The Lieutenant-Governor trusts that no delay will occur in carrying out these instructions, and that an early decision will be arrived at on a question which is of vital importance to the health and prosperity of Calcutta.

Since the close of the year the Commissioners have adopted the temporary scheme proposed by Mr. Baldwin Latham for discharging the night-soil of about three-fourths of the population of the Suburbs into the Circular Road sewer at an estimated cost of Rs. 1,08,200. The adoption of this scheme, which will, it is understood, be completed by the 1st of March, when the Corporation are bound to discontinue the trenching operations now being conducted, as a strictly temporary measure, in the neighbourhood of the Docks, will finally get rid of the serious difficulties which have arisen in connexion with the trenching grounds at Goragacha and other places in the suburban area, and the Lieutenant-Governor congratulates the Commissioners on the fact that they have at last bestirred themselves to action on this important subject. It is assumed that the question whether additional pumping machinery will be required at Palmer's Bridge has been or will be carefully considered.

19. For some years past the Health Officer has urged upon the Corporation the necessity of amending the building regulations now in force in Calcutta, so as to make provision for fixing the minimum width of public streets, limiting the height of houses in relation to the width of the streets, controlling the construction of brick buildings on bustee land, fixing the minimum sizes of court-yards within houses, and the minimum space to be left between the back of houses for the purpose of ventilation. These points are doubtless of great importance, and the Health Officer is right to lay stress on them; but the question of passing a special Building Act can hardly be dealt with in a Resolution reviewing the work of the Municipality during the year, and it is necessary, before such a step is taken, to examine the provisions of the existing law in order to see how far they are defective. The Commissioners have, it is said, recently appointed a Committee to report on the difficulties that have arisen in the interpretation and working of the building regulations contained in the Calcutta Municipal Act, and of the bye-laws passed by them. The report of this Committee will be awaited. Meanwhile it can only be said that when life and health are in question the owners of property cannot be permitted to assert, in so broad and absolute a manner as is involved in the claim put forward in paragraph 291 of the Report, that whatever land is required for the construction of roads should be taken up at the cost of the public, and that owners should under no circumstances be called upon to surrender any portion of their existing rights. The bent of modern opinion

in the more advanced countries is distinctly adverse to such uncompromising claims, and this view will sooner or later make itself felt in Calcutta, and will result in some equitable restrictions being imposed on the rights of property where the owners benefit largely by municipal improvements to which they contribute no more than any ordinary rate-payer.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

REORGANISATION OF DEHRA FOREST SCHOOL.

No. 4842For.

THE following is published for general information.

C. E. BUCKLAND,
Secretary to the Govt. of Bengal.

REVENUE DEPT.—*For.*,
CALCUTTA,
The 7th November 1895.

Circular No. $\frac{20}{272-2}$ F.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests), dated Simla, the 25th October 1895.

READ—

(i) Circular Resolution of this Department, No. 11-F., dated 28th June 1893, promulgating rules to regulate the constitution of, admission to, and studies and discipline at, the Imperial Forest School, Dehra Dun.

(ii) Circular of this Department, No. 9-F., dated 29th May 1895, forwarding copies of the resolutions passed by the Board of Control of the Imperial Forest School in March 1895.

(iii) Letter from the Inspector-General of Forests, No. 793, dated 9th September 1895, regarding the fourth and sixth of the resolutions passed by the Forest School Board of Control in March 1895.

RESOLUTION.

The Director of the Imperial Forest School and his staff having noticed the difficulty which the students experience in intelligently assimilating the lectures with which the School course commences, and which deal with technical subjects in their relation to the practice of forestry, proposed, following the example of the Forest Schools of Europe, that the students should join the School each year on the 15th April instead of on the 1st July, in order that they might commence their studies with practical work in the forests under an Instructor, and thus become to some extent familiar with the forests and the nature of the work to be done in them, as a preliminary to the study in the class-room of sylviculture and forest-mathematics.

Under this proposal, which has received the approval of the Government of India and to which effect will be given from the beginning of the year 1897, the School course will last 23½ instead of 21 months as at present; and it will be necessary to hold the examination for entrance into the School in January instead of in March. The additional expenditure entailed on each student by the change will be as follows:—

		Rs.
(*a*) For a European student of the Upper Class	... ...	112½
(*b*) „ Native „ „ „	... ...	87½
(*c*) „ „ „ „ Lower „	... ...	70

2. The Government of India have also approved of a recommendation by the Board of Control that Rule 15 of the Forest School Rules should be amended, so as to allow of candidates for the Lower Class, who are already in Government service, being admitted into the School, even though they may be 25 years of age or over, and may have been in the Subordinate Forest Service for less than three years. The conditions now imposed by Rule 13 (ii), (*a*) and (*c*), may therefore be waived by a special order of the Local Government or Administration in the case of any Government student whom it may be in future proposed to send to the Lower Class.

3. It has also been found desirable to make some other small corrections of minor importance in the rules. Appended to this Resolution is a copy of the Forest School Rules as new amended. The alterations effected in the rules noted in the margin* will not take effect till the 1st January 1897; but the amendments made in the remaining rules† will come into force on and after the 1st January 1896.

* 4, 5, 10, 12 (i) (e), (v) [except the addition to the fourth subject of examination], and (viii); 13 (last clause), 14, 15 (ii) and (iii); 18, 19, 20 and 21.

†12 (v) [addition to fourth subject of examination]; 13 (a), (b), and (ii); and 15 [new clause (iv)].

ORDER.—Ordered that a copy of this Resolution, with its appendix, be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

ORDERED, also, that a copy be forwarded to the Foreign Department for transmission to the Durbars of such Native States as have a Forest Department.

ORDERED, further, that the resolution, with its appendix, be published in the Supplement to the *Gazette of India.*

(True Extract.)

DENZIL IBBETSON,

Offg. Secretary to the Govt. of India.

APPENDIX.

RULES TO REGULATE THE CONSTITUTION OF, ADMISSION TO, AND STUDIES AND DISCIPLINE AT, THE IMPERIAL FOREST SCHOOL, DEHRA DUN.

Section I.—Constitution and Studies.

1. The School is under the administrative control of the Inspector-General of Forests, who is assisted by a Board consisting of—
   (1) the Inspector-General of Forests, *President,*
   (2) the Director of Public Instruction, North-Western Provinces and Oudh,
   (3) the Director of the School,
   (4) one Conservator from each province (not more than three serving in any given year),

with, as *Secretary,* the Assistant Inspector-General of Forests.

2. The Superior Staff of the School consists of—

(1) the Director,
(2) the Deputy Director,
(3) & (4) two Instructors,
(5) the Vernacular Instructor,

assisted by the Forest Officers of the School Circle, North-Western Provinces.

The Conservator of Forests, School Circle, North-Western Provinces, will ordinarily be Director of the School. The Deputy Director and two Instructors are officers of the Indian Forest Service on the Imperial List. The Vernacular Instructor is an officer of the Provincial Forest Service—also on the Imperial List.

3. The Director of the School is charged with (1) the general administration of the institution, including the regulation of the course of study under the arrangements prescribed by the Board of Control, subject to the sanction of the Government of India; (2) the supervision of the School buildings, quarters, and gardens; (3) the control of the accounts, and the conduct of correspondence.

4. *Courses.*—There are two courses: one in English, the other in the Hindustani language. Each course lasts 23½ months. The English course is that followed by the "Upper Class;" the Hindustani course, that followed by the "Lower Class." The first year's students are called "Juniors; the second year's students, "Seniors." In the English course, students are prepared for the certificate in Forestry by the "Higher Standard;" in the Hindustani course, for that by the "Lower Standard."

The subjects taught in these courses are the following, described in the School syllabuses:—

1. Forestry, including Sylviculture, Utilisation and Forest Working-Plans, both theoretical and practical.

2. Mathematics—elementary Arithmetic, Algebra, Trigonometry, and Mechanics, in their application to forest questions.
3. Physical Science, including Chemistry, Physics, Physiography, Geology, Mineralogy and Soils.
4. Botany, both theoretical and practical, including the collection and preservation of plants.
5. Zoology—the classification of animals and the study of useful and dangerous species, especially of insects, including the collection and preservation of specimens.
6. Drawing, Surveying and Estimating, as required for forest officers.
7. Forest Engineering, theoretical and practical.
8. Forest Law, the elements of Criminal Law, and departmental organisation.
9. Forest Accounts and Procedure.

5. *Terms.*—The terms of study are as follows :—

1st year—
- Preliminary term—April 15th to June 15th, in camp.
- Vacation—June 16th to June 30th.
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to March 31st, in camp.

2nd year—
- Hill tour term—April 1st to May 31st, in camp.
- Vacation—June 1st to 30th.
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to February 15th, in camp.
- Examinations, including survey test—February 16th to March 31st.

6. *Examinations.*—The School examinations are—

1. Monthly, to test progress and application.
2. Final.

The *Monthly examinations* are usually held on the last two working days of each month, as the Director may order. The marks obtained at these examinations are counted for one-fourth of the aggregate at the Final.

The *Final examinations* are held in March of the 2nd year, and the marks then obtained count for three-fourths of the aggregate.

7. *Certificates.*—There are two certificates obtainable in each class, after the final examinations: a "pass" certificate and an "honours" certificate. The former is granted to students who obtain over 50 per cent. of the aggregate marks allotted to all subjects, provided this includes 50 per cent. of the marks allowed for each of the subjects of Forestry, Botany, Surveying, and Engineering. The latter is granted to students who obtain over 75 per cent. of the aggregate marks allotted to all subjects, including over 50 per cent. in each individual subject. These certificates are only granted on the orders of the Board of Control, who have authority to exercise their discretion in doubtful cases.

8. *Prizes.*—The School medals are awarded by order of the Board of Control, but only if "honour" marks (75 per cent.) have been obtained. Other prizes, whether given by Government or other donors, are also awarded by the Board of Control.

9. Should any student, of the three categories enumerated in Rule 11, be unable (*a*) to appear at the final examinations, or, having appeared, (*b*) fail to pass those examinations, he will not be permitted to appear at any subsequent final examination, unless he follows a second time the whole course of instruction at the School, or, at the discretion of the Director, the second year's course.

Section II.—Admission Rules.

10. The total number of students of each class who can be admitted into the School each year will be limited to such number as the Board of Control may decide, from time to time, can be accommodated in the School. The number of studentships to be allotted each year to the respective Provinces, as well as the number of nominations to be made by the Director, will, with due regard to the total prescribed by the Board of Control, be decided by the Director of the School before the 1st of November, after consultation with the Provincial authorities as to their requirements, and communicated to the Local Governments concerned.

A.—Upper Class.

11. There are three catagories of students in the Upper Class—

(1) Private students.
(2) Students already in the Government service.
(3) Students deputed by Native States.

12. *Private students* comprise all those students who are at present without appointments in any Forest Service, and whose object it is, by becoming possessors of Forest School

certificates, to obtain employment either in the Forest Service of the Government of India or in that of a Native State, or some other owner of forest-property.

(i) Candidates for admission to the Forest School as private students must not be less than 18 or more than 25 years of age, and their applications must be sent to a Conservator of Forests* through a Divisional Forest Officer, of rank not below that of an Assistant Conservator of the 1st grade, or through a Collector or other district officer. Neither the Conservator, the Divisional Forest Officer, nor the Collector need belong to the forest circle or province in which the candidate seeks employment; but Divisional Forest Officers and Collectors may not forward to Conservators applications unsupported by the five certificates enumerated below, namely:—

(*a*) A certificate that the candidate is a "Native of India," within the meaning† assigned to those words by section 6 of 33 Vict., Cap. 3.

(*b*) A certificate of age.

(*c*) A health certificate in the form prescribed by article 61 of the Civil Service Regulations, signed by the Civil Surgeon of the district in which the said Divisional Forest Officer's or Collector's duties lie, and testifying to the candidate's sound constitution, good vision and hearing, and general physical fitness for a rough outdoor life in the Forest Department.

(*d*) A certificate of respectability and good moral character from two or more persons whose social or official position can be accepted as a guarantee of reliableness.

(*e*) A certificate from an officer of the Education Department, of a rank not less than that of a Deputy Inspector of Schools or the Head Master of a High School under public management, to the effect that the candidate's education appears sufficiently good to give hopes of his being able to pass the entrance examination.

The last three certificates must bear date not farther back than the 1st August of the year preceding that in which the candidate proposes to present himself at the entrance examination.

If any person, giving certificates as above under (*c*), (*d*), and (*e*), is in a position to mention anything more to the credit of the candidate than the certificates actually call for, he may do so.

* Conservator of Forests, Bengal Circle, at Darjeeling.
Conservator of Forests, Assam Circle, at Shillong.
Conservators of Forests, North-Western Provinces and Oudh—
School Circle, at Dehra Dun.
Central Circle, at Naini Tal.
Oudh Circle at Naini Tal.
Conservators of Forests, Central Provinces—
Southern Circle, at Nagpur.
Northern Circle, at Jabalpur.
Conservator of Forests, Berar Circle, at Amraoti.
Conservator of Forests, Punjab Circle, at Lahore.
Conservators of Forests, Upper Burma—
Eastern Circle, at Mandalay.
Western Circle, at Mandalay.
Conservators of Forests, Lower Burma—
Pegu Circle, at Rangoon.
Tennasserim Circle, at Rangoon.
Conservators of Forests, Madras Presidency—
Northern Circle, at Waltair.
Central Circle, at Madras.
Southern Circle, at Coimbatore.

(ii) Upon the receipt by the Conservator of any application in respect to which the preceding conditions shall have been observed, that officer may either accept or reject the application, without assigning any reason for so doing; or he may require the candidate to produce other or better certificates in person before him.

(iii) Conservators may, at their option, test the fitness of a candidate who desires to enter the service of Government by practical work in the forests.

(iv) Those candidates who have been approved by the Conservator will be permitted, under his recommendation, to appear at the next entrance examination for the Forest School held in his circle.

(v) The *Entrance examination* is held in the month of January each year, on such date as may be fixed by the Director, both at the Imperial Forest School and at such centres as may be fixed from time to time by Local Governments, and under such officers, Educational, Revenue, Forest, or other, as may be appointed: provided that the date shall be communicated by the Director to Local Governments and Conservators on or before 1st November. The subjects of examination are:—

		Minima pass marks. Per cent.
1.	English { Conversation ...	50
	English { Composition ...	33
2.	Arithmetic ...	40
3.	Algebra, up to and including quadratic equations ...	40
4.	Elements of Euclid, books I to IV and book VI, with examples	25
5.	Mensuration—lengths, areas and volumes, with examples ...	25

† "Native of India" means any person born and domiciled within the dominions of Her Majesty in India, or within the territories of Indian Princes tributary to or in alliance with Her Majesty, of parents habitually resident in India, and not established there for temporary purposes only. (Article 45, Civil Service Regulations.)

The examination papers on the above subjects will be forwarded by the Director in sealed covers to such officials as the Local Governments may direct in the month preceding the examination.

(vi) A Local Government may lay down rules under which the number of candidates allotted, under Rule 10, to the Province for admission into the School, shall be selected from the number of passed candidates. In such rules due regard must be had to the place taken in the examination, but the Local Government shall not be debarred from preferring, for good and sufficient reasons, a passed candidate who may have taken a lower place in the list to one higher on the list: provided that the Director may, after inspection of the papers of the selected candidates, place before the Local Government an objection to the admission of any of such candidates on the ground that he is below the required standard.

(vii) The Local Government may, if it thinks fit, exempt from the entrance examination any candidate who is a Bachelor of Arts, or who has obtained a degree or diploma of about the same standard at any university in India or in the United Kingdom or in a British Colony, or at any educational institution to which the Government of India may extend the privilege: provided that such degree or diploma shall not give such candidate a preferential claim over any candidates who have passed the entrance examination and who may appear more eligible for the Forest Service.

(viii) Prior to the admission of a student, his parents or guardians must satisfy the Director that they are willing and able to defray the expenses of the student at the School. These expenses are estimated to be not less than Rs. 822½ for each student living in native fashion, and Rs. 1,057½ in the case of those living in European fashion (*vide* Rule 21). Of these sums, parents or guardians must deposit with the Director, before the course commences, a sum of Rs. 141 in the case of native students and Rs. 188 in the case of European students, to meet the initial cost of uniform, books, instruments, stationery, and camp-equipage (*vide* Rule 18), and, in addition, Rs. 50 as caution-money.

(ix) Local Governments may, on the recommendation of a Conservator or of the Director, and in exceptional cases, allow selected private students who have passed the entrance examination a monthly stipend, not exceeding Rs. 50, to assist them through the School course: provided that such selected private students previously execute an agreement binding themselves to serve the Local Government concerned (in the event of their obtaining the School certificate) for a period of not less than five years (*vide* Rule 17). Such monthly stipend may, in case of misconduct or unsatisfactory progress at the School, be reduced or altogether withdrawn at the discretion of the Director.

(x) The names of those private students who succeed in obtaining the School certificate will be entered by the Director in a register to be kept for that purpose, and the Conservators of those circles, in which the non-stipendiary private students may severally desire or be willing to serve, will be addressed by him with the view of obtaining appointments for such students. The Conservators concerned will, for this purpose, be furnished with the original certificates already referred to in clause (i) of this rule, the School certificates, and such other useful information, more especially regarding the physical qualifications of the students, as the Director may be in a position to furnish.

(xi) A list of private students, who may not succeed in obtaining appointments, will be forwarded by the Director to the Inspector-General of Forests, who will circulate the list amongst Durbars, Conservators, and other persons likely to be in need of the services of trained forest officials.

(xii) The appointment to the service of Government of passed private students depends on the existence of vacancies in the various circles, and even a stipendiary student has no claim to such appointment.

13. *Candidates in the Government Service*, who may be deputed to the Upper Class, will ordinarily be either—

(*a*) Forest Rangers who desire to qualify themselves for further promotion in their own or to a higher class; or

(*b*) other members of the Subordinate Forest Service (Foresters and other subordinate officials) similarly desirous of qualifying for promotion.

(i) Forest Rangers may be deputed by Local Governments, provided the candidates are certified by the Conservator under whom they are serving to possess sufficient knowledge of English and general education and ability to enable them to profit by the course. Such officers may be above 25 years of age, and need not pass the entrance examination. While at the School they will draw the pay of their grade and the travelling allowances to which they may be entitled under the Civil Service Regulations.

(ii) Other officers of the Subordinate Service may be deputed by Local Governments, provided that—
  (a) they have been in that service for not less than three years;
  (b) they have passed the School entrance examination;
  (c) they are under 25 years of age;
  (d) they have executed the formal agreement referred to in Rule 17.

Such officers will, while at the School, draw the pay and travelling allowances of their grade in the service: provided that the total amount sanctioned to meet the cost of their training, inclusive of travelling expenses, shall not be less than Rs. 822½ in the case of students living in the native style, and Rs. 1,057½ in the case of students living in European fashion (*vide* Rule 21).

14. *Students deputed by Native States* may be admitted on the request of the State concerned: provided that—
  (a) they have passed the entrance examination of the School;
  (b) they have produced the certificates required for admission, specified in Rule 12 (i).

The Durbars of Native States sending students to the School shall, before the beginning of each term, or of each year if preferred, deposit with the Director a sum sufficient to meet the expenses of the students. This sum, for the whole course, must not be less than Rs. 822½ for students living in native fashion, and Rs. 1,057½ for those living in European fashion (*vide* Rule 21).

B.—Lower Class.

15. There are also three categories of students in the Lower Class—
  (a) Private students.
  (b) Students in Government service.
  (c) Students deputed by Native States.

The rules for admission to the Lower Class are the same as those detailed in Rules 12, 13, and 14, for admission to the Upper Class, with the following exceptions:—
  (i) Instead of the Entrance Examination, the candidate must furnish a certificate of having passed the Middle Class Examination in the North-Western Provinces and Oudh, or an equivalent standard in another province, as well as a certificate that he possesses a competent knowledge of Hindustani.
  (ii) The cost of training will not be less than Rs. 658 (*vide* Rule 21) for the whole course of 23½ months.
  (iii) The required deposit will be Rs. 94, and the caution-money Rs. 25.
  (iv) In the case of candidates who are already in the Subordinate Forest Service and below the rank of Ranger, the restrictions imposed by Rule 13 (ii) (a) and (c) may be specially relaxed under the orders of the Local Government.

C.—General.

16. No student of European or Eurasian extraction, not already in the permanent employment of Government or of a Native State, shall be admitted into the Forest School if he is married; nor shall any such student, whether in the permanent employment of Government or of a Native State, or not, marry whilst at the School or until he has joined a permanent appointment. A breach of this rule will render the student liable to dismissal from the School, or to forfeiture of any appointment in the Forest Service which may have been promised to him, or to which he may otherwise have a claim.

17. *Agreement and Security Bond.*—Officers of the Subordinate Service, deputed to the School by Local Governments under Rules 13 (ii) and 15, shall execute a formal agreement—the sureties for the fulfilment of which should be men of position and means—to continue in the Forest Service of the Local Government concerned for a period of not less than five years after passing out of the Forest School, and on such rates of pay as may be in accordance with the existing organisation of the Department. A breach of this condition will render the defaulter and his sureties liable for the refund of the entire cost of the student's education at the School. The agreement and security-bond shall be in the appended forms, and must be executed before the student is admitted to the School. The agreement will be signed by the student and, if he is a minor, by his father or guardian also; the bond by the student and two sureties. The amount of security to be taken will be—

		Rs.
For a Lower Class student	... ...	600
„ an Upper Class student	Native	750
	European	1,000

The agreement and security bond need not be stamped.

The same rule shall apply to private students who may be granted stipends under Rule 12 (ix), subject, however, to the proviso of Rule 12 (xii). Should any such student not be appointed to the Forest Service of Government at the end of his School course, his agreement and security-bond will be returned to him.

18. *Uniform, books, and camp allowances.*—The Director is authorized to make deductions from the pay of Forest Ranger students under Rule 13 (i), or of students of the Subordinate

Service under Rules 13 (ii) and 15, or from the stipends of private students under Rules 12 (ix) and 15, to the following amounts :—

			Rs.
Lower Class students	...	... 4 monthly, or	94 in all
Upper " "	Native ...	... 6 "	141 "
	European	... 8 "	188 "

in order to meet the following items of initial expenditure, viz.—

	Upper Class.		Lower class.
	Native.	European.	
1	2	3	4
	Rs.	Rs.	Rs.
Uniform and equipment	35	68	20
Books and instruments	60	60	34
Camp outfit	46	60	40
Total ...	141	188	94

The Director will charge off in his accounts such portions of the above as may be necessary from time to time to meet expenditure on the items mentioned, until the whole of the amounts are exhausted, after which the student will be required to pay in cash for articles supplied.

19. *Travelling allowances of private students in receipt of stipends.*—Students holding stipends from Local Governments under Rule 12 (ix) are not entitled to travelling allowance; but, as the tours entail greater expenditure in some months than in others, the Director is authorised to make a further monthly deduction from their stipends, of Rs. 5 from Upper Class Native students and Rs. 7 from Upper Class European students, and to disburse the amounts in the following manner :—

	Native students.	European students.
1	2	3
	Rs.	Rs.
Monthly travelling allowances ... { 15th April-15th June, November-March, } 1st year; { April-May, November-February, } 2nd "	4	8
Or for 13 months ...	52	104
Special additional allowances for hill tours	30	22
" " for Punjab tour	35½	38½
Total ...	117½	164½

20. Should the Conservator of a Circle from which any Government student of the Subordinate Service is deputed to the School, under Rule 13 (ii), prefer it, he can, subject to the orders of his Government, authorize the Director to pay travelling allowance to such student at the rates given in Rule 19, instead of at the rates allowed by the Civil Service Regulations. And in the case of Lower Class Government students, deputed to the School under Rule 15, he may similarly authorize the payment of travelling allowance at the following rates, instead of the rates permissible under the Civil Service Regulations :—

	Rs.
Monthly travelling allowance at Rs. 4	52
Special hill tour allowance	22
" Punjab tour allowance	20
Total ...	94

which rates are equivalent to a permanent travelling allowance of Rs. 4 per month for the whole course.

21. *Estimated expense of training.*—It has been calculated that, in addition to the amounts specified in Rule 18 for cost of uniform, books, &c., and camp-equipment, and in Rules 19 and 20 for travelling, the minimum monthly subsistence money for students comes to Rs. 20, Rs. 24, and Rs. 30, respectively, so that the minimum pay and travelling allowances of Government students under Rule 13 (ii), and the minimum stipends for stipendiary students under Rule 12 (ix), should not be less than Rs. 35 and Rs. 45, respectively, nor should the minimum pay and travelling allowances of Lower Class students (Rule 15) be less than Rs. 28. Thus, the minimum cost of training will be as follows :—

	Lower Class.	Upper Class.	
		Native.	European.
1	2	3	4
	Rs.	Rs.	Rs.
Subsistence money	20	24	30
Uniform, books, and camp outfit	4	6	8
Travelling allowance	4	5	7
Total per mensem ...	28	35	45
Or for the whole course of 23½ months	658	822½	1,057½

The same amounts should be taken as minima in calculating the allowances to be deposited on account of students from Native States under Rules 14 and 15, or provided by parents and guardians for the cost of training of private students.

Section III.—Disciplinary Rules.

22. *Quarters.*—The Director will allot to students, on their arrival in Dehra, such quarters as may be available in the School buildings or in the houses rented by him for students' accommodation. The School quarters are tenable during the whole period of the students' course, and the rent is Rs. 2 monthly for each student, or Rs. 4 for each room. Students for whom there is no accommodation in quarters or in houses rented by the Director, or who may prefer it, can, with the permission of the Director, reside in the town in lodgings selected by themselves; but in that case the Director will accept no responsibility for the rent.

All students living in quarters or in the rented houses are expected to abide by such orders as the Director may issue from time to time for the purpose of ensuring cleanliness and sanitation.

No dogs are allowed in quarters, nor may dogs or horses be brought inside the School grounds.

Breakages of furniture, &c., in the quarters or School buildings must be paid for by the students. Students are responsible for the acts of their servants.

23. *Uniform.*—All students must wear the School uniform, which consists of a suit of khaki drill with white-metal buttons, and a grey turban of prescribed pattern, for the hot weather, and of khaki serge with similar buttons for the cold weather and camp. Those students who become members of the Dehra Dun Mounted Rifles are, however, permitted to wear the undress uniform of the corps, which also consists of a suit of khaki drill, of pattern similar to that of the School. Students who are Volunteers will wear, as head-dress, a brown shikar hat while at the School, and the regular corps helmet when on parade. Native students may dispense with turbans, or wear other head-dress, only with the Director's special permission. Uniform must always be worn inside the School building. It must also be worn in the School grounds up to 5 P.M.

24. *Uniform and Camp Equipment.*—The uniform of members of the Dehra Dun Mounted Rifles may be obtained through the corps staff; that of other students through the Store-keeper of the School, on the Director's order. As camp equipment each student requires—

(1) A small tent, not larger than 10 feet × 8 feet.
(2) A camp bed.
(3) A small camp table.
(4) A camp chair or "morah."

These articles are made at the School and issued at cost-price to students.

25. *Books and Instruments.*—The list of books and instruments required by each student will be published by the Director from time to time. The articles must be purchased from

the Director, who endeavours to obtain them of the best quality procurable, consistent with cheapness. No article will, however, be issued by the Store-keeper, except (*a*) on order of the Director, or (*b*) on cash payment.

Copies of the Forest Acts and Forest Code, as also surveying instruments and herbarium presses, are issued on loan, and students using them will be responsible for their safe custody and return.

26. *Leave.*—During the course of instruction, no student may leave Dehra without the written order of the Director; nor may students, while in camp, leave the camp head-quarters without the written order of the Deputy Director or the Instructor in charge. Subsidiary rules regarding leave will be made by the Director from time to time.

27. *Holidays.*—During the rains term Saturday will usually be observed as a holiday or devoted to excursions. In camp it will ordinarily be a half-holiday. Such of the usual gazetted holidays as are allowed will be notified as such from time to time.

28. *Punishments.*—Students are liable to the following punishments:—

(1) Reprimand by the teacher in class.

(2) Reprimand by the Director or the Deputy Director at any time.

(3) Reprimand before a meeting, convened by the Director, of not less than three School officers, one of whom must be either the Director or the Deputy Director. The proceedings of the meeting will be reported to the Conservator or the Native State deputing the student, or to his parents or guardian, if he is a private student; and, if the meeting so decides, a note of them will be made on his final certificate.

(4) The Director, acting with the consensus of the meeting referred to under (3), has power to inflict, in addition, a fine to the extent of one-third of the salary or allowances of the student for a period not exceeding three months.

(5) The Director, acting with the consensus of a full meeting of the School officers presided over by himself, has power to dismiss any student for misconduct; and a student thus dismissed cannot be re-admitted to the School. The Director may remand any student who, in his opinion, is not sufficiently promising.

29. *Monthly Reports.*—A progress report on the work of each student will be issued monthly by the Director. It will record the number of marks obtained by the student at the last monthly examination, his application to his studies, and his conduct generally. It will be sent, for Government students or private students in receipt of stipends, to the Conservator of the Circle from which the student is deputed; for Native State students, to such person as the Durbar may direct; and for ordinary private students, to the parent or guardian concerned.

30. *Library.*—The books in the School Library are available for the use of students under such rules as the Director may make from time to time. Books of reference must be consulted in the library itself, and no books may be taken away except after application to the librarian and entry in a register.

31. *Museum.*—The Museum and Herbarium are also available for the use of students; but the objects in the Museum may not be handled or removed without the express permission of the Director or the Deputy Director. Permission to consult the Herbarium may be obtained from the Director or the Deputy Director, but the plants must be kept in their order as arranged, and no sheets removed or altered without permission.

32. *Athletic Sports.*—The gymnasium and the tennis courts will be available for the use of students during all recreation hours on week-days. Cricket and football may be played on the old parade ground. Students are recommended to join the School Athletic Club, the subscription to which is Rs. 4 yearly, and half-rates for those who do not play all the games.

Forms of Agreement and Bond to be executed by students already in the service of, or in receipt of stipends from, Government, previous to entry into the Forest School, Dehra Dun.

ARTICLES OF AGREEMENT made and entered into this day of 18 BETWEEN

of

of the first part

of

son of the said of the second part and the Secretary of State for India in Council hereinafter referred to as the Secretary of State of the third part. Whereby each of the parties hereto so far as the covenants and conditions on his own part are to be observed and performed covenants with the other of them as follows:—

1. The said hereby of his own free will and consent and with the approbation and consent of the said testified by the execution by him of these presents agrees with and to the Secretary of State his successors in office and assigns that he the said shall well and faithfully pursue his studies at the Government Forest School, Dehra Dun,

and qualify for the Forest Service of the Government of British India or of any Local Government.

2. The said shall after completing his studies at the said Forest School and if so required to do serve the Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department.

3. The Secretary of State his successors in office and assigns hereby engages to educate the said at the Dehra Dun Forest School in all matters relating to forest service forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said

4. The Secretary of State shall pay the said during the whole period of his stay at the said School at and after the rate of Rs. per month and thereafter while the said shall faithfully and diligently serve as an officer of the said Forest Department at and after the rate of not less than Rs. per month and the said shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time by the Rules and Regulations of the Department.

5. Lastly, it is hereby agreed and declared that the Secretary of State his successors in office or assigns shall be at liberty to rescind this agreement on account of the negligence failure to attend to duty idleness or any insubordination or misconduct on the part of the said and to dismiss him from the said Forest School or the service of the said Department and the said shall not be entitled to any of the privileges hereby imposed on him but the said or shall thereupon refund to the Secretary of State his successors in office and assigns the total cost including the monthly payments made to the said while at the said School incurred by the Secretary of State or his successors in office or assigns in respect of the education of the said at the said School. In witness whereof the said parties to these presents have hereunto set their respective hands and seals the day and year first above written.

KNOW all men by these presents that we of (principal obligor) of and of (sureties) are jointly and severally bound to the SECRETARY OF STATE FOR INDIA IN COUNCIL in the sum of Rs. to be paid to the said Secretary of State his successors in office or assigns or his or their certain attorney or attorneys for which payment well and truly to be made we bind ourselves our heirs executors and administrators and representatives and each of us binds himself his heirs executors administrators and representatives firmly by these presents sealed with our seals and dated this day of 18 .

Whereas the Secretary of State for India in Council for himself and his successors in office and assigns has engaged to educate the said at the Dehra Dun Forest School in all matters relating to forest science forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said and has also agreed to pay him during the whole period of his stay at the said School at and after the rate of rupees per month and whereas the cost per annum of such education without any such allowance being included is estimated to be Rs. which shall be taken to be the actual cost for the purpose of these presents and whereas in consideration of such education and pay to be given to the said as aforesaid by the said Secretary of State and his successors in office and assigns the said has agreed with the said Secretary of State his successors in office and assigns that he will after completing his studies at the said School and if required to do so serve in the Forest Department of the Government of British India for a period of not less than five years during the whole of which time he will diligently and efficiently do all acts and discharge all duties which may be required of him to be done in his capacity as an officer of the said Department. AND WHEREAS the said Secretary of State has also on his part agreed that the said shall be paid for such service at and after the rate of not less than rupees per month and shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time being by the Rules and Regulations of the Department. And whereas for the purpose of securing and indemnifying the said Secretary of State his successors in office and assigns against all loss and damage which he or they might or may in any way suffer by reason of the said leaving without permission the service of the said Secretary of State his successors in office or assigns in less than five years after the completion of his studies at the said School and for the purpose also of securing the refund to the said Secretary of State his successors in office and assigns of the total cost including the monthly payments made to the said while at the said School incurred by the said

Secretary of State or his successors in office or assigns in respect of the education of the said at the said School and in consideration of the payment and education so as aforesaid to be made and given to the said at the said School and as one of the conditions of the admission of the said to the said School it has also been agreed that the said and the said and as his sureties should execute the above-written bond subject to the condition hereinafter contained. Now the condition of the above-written bond or obligation is such that if the said shall well and faithfully and diligently pursue his studies at the said School and qualify for the said forest service and shall also after completing his studies at the said Forest School and if so required to do serve the said Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department and if the said and or either of them their or either of their heirs executors administrators and representatives shall well and truly indemnify the said Secretary of State his successors in office and assigns against all loss and damage which he or they might or may in any way suffer by reason of the said giving cause for dismissal either while at the said School or while in the service of Government thereafter or of his leaving the service of the said Secretary of State his successors in office or assigns without permission in less than five years after the completion of the studies of the said at the said School and if the said and or either of them their or either of their heirs executors administrators or representatives shall also pay to the said Secretary of State his successors in office or assigns all sum or sums in any way expended paid or incurred by the said Secretary of State his successors in office or assigns in respect of the education of the said at the said School then the above-written bond or obligation shall be void otherwise the same shall remain in full force and virtue. PROVIDED ALWAYS and it is hereby expressly agreed and declared that these presents shall be treated and considered as entered into under the orders of the Government of India for the performance by the said and and of a public duty and an act in which the public are interested within the meaning of section 74 of Act IX of 1872 of the Legislative Council of India.

IN WITNESS, &c.

Notification by the Government of India, Finance and Commerce Department, No. 4760-S.R., dated Calcutta, the 29th November 1892.

IN exercise of the powers conferred by section 8 of the Indian Stamp Act (I of 1879), the Governor-General in Council is pleased to remit the duties payable on the agreements and security-bonds required to be executed, under the Rules to regulate appointments and promotions in the Provincial Forest Service, by students and their sureties previous to entry into the Forest School, Dehra Dun.

DISTRICT ROAD FUND.

No. 5569R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 6th November 1895.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. $\frac{I.F.}{688}$, dated 26th October 1895, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1895.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 1st quarter of the year 1895-96 be published in the *Calcutta Gazette*, and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the—

Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions.

Superintending Engineers of the Northern and Western Circles.

Inspector of Works, Eastern Circle.

Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

G. E. MANISTY,

Offg. Accountant-General, Bengal.

WEATHER AND CROP REPORT.

For the week ending the 11th November, 1895.

Burdwan.—Rainfall nil. Weather hot. Prospects of *aman* rice crop continue bad. *Rabi* crops are being sown. Condition of cattle generally good. Fodder and water sufficient. Common rice sells at an average price of 15½ seers per rupee.

Midnapore.—Rainfall nil. Prospects of *aman* crop hopeful in Sadar and Contai. High land rice withering to some extent in Tamluk and suffering severely in Ghatal for want of rain. *Rabi* crops are being cultivated. Indigo is being sown. Sugarcane doing well. Fodder and water sufficient. Prices of common rice:—

	Srs.	
Sadar	16	per rupee.
Contai	22	
Tamluk	15	
Ghatal	14 to 15	

24-Parganas.—Rainfall nil. Weather seasonable. Prospects of *aman* crop fair. Paddy on high lands in the Basirhat subdivision reported to be withering for want of rain. Sugarcane doing well. Sowing of *rabi* crops continues. Fodder and water sufficient. No cattle-disease. Rice sells at—

	Srs.	
Sadar	12 to 14	per rupee.
Barasat	15	
Basirhat	16	
Diamond Harbour	16	

Murshidabad.—Rainfall nil. Weather seasonable. Condition of *kalai* good. Indigo and *rabi* crops are being sown. State of *aman* crop remains as before reported. Rain much wanted. Sugarcane and mulberry doing well. Fodder sufficient for cattle. Common rice sells at 16 seers per rupee.

Khulna.—Rainfall nil. Weather warm and close. Lands are being prepared for *rabi* crops. *Aman* doing well. Fodder and water sufficient. Prices of common rice:—

	Srs	
Sadar	17 to 21	per rupee.
Bagerhat	18	
Satkhira	16	

Dinajpur.—No rain. Weather seasonable. Prospects of standing crops good. Price of common rice 15 to 16 seers per rupee. No cattle-disease, nor any complaint for fodder or drinking water.

Rangpur.—Average rainfall ·03. Weather seasonable. Prospects of standing crops good. Washing of jute and cultivation of land for winter crops going on. Common rice selling at 13 seers per rupee. Fodder sufficient.

Pabna.—Rainfall nil. Weather hot at day but cool at night. Prospects of *aman* paddy good at Sadar, but indifferent at Sirajganj. Fodder sufficient. Common rice sells at Sadar 16 seers and Sirajganj 15 seers per rupee.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops fair. No cattle-disease. Fodder available. Price of common rice 18 seers per rupee.

Chittagong.—Rainfall ·04. Weather dry and occasionally cloudy. Harvesting of early *aman* in progress. Late winter rice suffering for want of rain. *Rabi* sowings commenced. Water and fodder sufficient. Common rice selling at 16 seers per rupee.

Patna.—No rain. Paddy has failed in some places in east of district and in Barh it is not progressing well for want of rain. *Rabi* and poppy being sown and said to be germinating well. Condition of cattle good. Fodder and water sufficient. Common rice selling from 16 to 21 seers per rupee.

Gaya.—No rain. Standing crops suffering. Sugarcane-pressing in progress. Price of common rice at Sadar 14 seers per rupee against an average of 16¼ seers. Water and fodder sufficient.

Champaran.—No rain. *Rabi* being sown. Prospects of *aghani* good, but rain is much needed. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Paddy on high land suffered severely for want of rain. *Rabi* sowings nearly completed, but rain badly wanted. Fodder for cattle sufficient. Prices rising.

Bhagalpur.—No rain. Weather rather warm for this time of the year. *Rabi* crops and paddy on high lands continue to suffer for want of rain. Outturn of sugarcane 16 annas. Indigo doing well. Fodder and water sufficient. Cattle-disease reported from thana Katauria in the Banka subdivision. Common rice sells at 17 seers 10 chitaks per rupee.

Purnea.—Rainfall ·20. *Rabi* crops doing well. More rain wanted for paddy. Cattle-disease reported from Tamajganj out-post. Fodder and water sufficient. Common rice sells at 18 to 21 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *laghu sarad* commenced. *Guru sarad* in ear. Condition of cattle good. Fodder sufficient. Common rice sells at—

				Srs.	c.	
Cuttack	...	...	...	23	10	per rupee.
Jajpur	...	...	...	28	12	
Kendrapara	...	...	...	31	8	
Banki	...	...	...	31	8	

Hazaribagh.—Rainfall nil. Weather seasonable. Prospects of rice crop are not as good as expected. *Rabi* prospects good. Fodder and water sufficient. Common rice selling at 12 to 14 seers per rupee.

General Summary.—With the exception of a light shower in Purnea, there was practically no rain in any of the reporting districts during the week. The prospects of the winter rice crop have suffered in many parts of the Province owing to the early cessation of the rains, and the general outturn is not expected to be so good as originally anticipated. The sowing of the spring crops is generally going on, but more rain is needed in parts of Bihar. Sugarcane is doing well. No cattle-disease is reported, except from parts of Bhagalpur and Purnea. The price of common rice generally continues steady, but shows a decided tendency to rise in several districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 12th November, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

STATISTICAL DEPARTMENT,

The 11th November, 1895.

C. E. BUCKLAND,

Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of October 1895.

	Inches.	Date.	Hour.
The mean pressure of the month	29·848		
The average pressure of October from 24 years' registers ...	29·832		
The highest pressure in the month	30·017	27th	10
The lowest pressure in the month	29·474	1st	16
The range of pressure	0·543		
	Hours.		
The total number of hours of bright sunshine during the month	221·7		
The maximum possible number of hours of sunshine ...	359·1		
	⊖		
The mean temperature of the month	79·3		
The average temperature of October from 24 years' registers ...	81·5		
The highest temperature in the month	91·3	6th	
The lowest temperature in the month	67·6	8th	
The range of temperature during the month	23·7		
The mean daily range of temperature	12·6		
The greatest range of temperature in one day	20·2	8th	
	Per cent.		
The mean humidity of the month	81		
The average humidity of October from 24 years' registers ...	79		
	Inches.		
The mean vapour tension of the month	0·801		
The average vapour tension of October from 9 years' registers...	0·854		
The mean cloud proportion of the month	3·59		
The average cloud proportion of October from 18 years' registers	4·01		
	Inches.		
The total rainfall of the month	2·79		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	2·60		
The average fall of October from 48 years' registers ...	5·61		
The greatest fall in 24 hours	1·44	2nd	
	Days.		
The number of rainy days in the month	7		
The average number of rainy days in October from 24 years' registers	10		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	138·7		
The mean difference of sun and air temperatures	52·8		
The greatest sun temperature	150·7	10th	
The greatest excess of sun over air temperature	63·7	10th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	68·5		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	7·2	18th	
	Miles.		
The mean movement of the wind per day	66·0		
The greatest movement of the wind in one day	378·0	2nd	
The greatest movement of the wind in one hour	22·0	1st, 10 to 11 p.m.	

The number of hours with winds from each of the 8 points—
N. 100, N.E. 80, E. 49, S.E. 62, S. 35, S.W. 77, W. 95, N.W. 52, Calm 194.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·8 ⊖ lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF OCTOBER 1895.

WEATHER during October, as throughout the monsoon season, has been distinguished by a comparative absence of rainfall. This deficient rainfall has been more marked in the northern half of the province, Bihar having received on an average only 16, and North Bengal 30 per cent. of the normal. In the other divisions the average fall has been between 80 and 90 per cent., except in East Bengal, where there has been a small excess of 7 per cent. Almost all the rain received in East Bengal fell during the first three days, when a severe cyclonic storm caused heavy rain.

Only two periods of rainy weather occurred during the month—the first at the beginning, when the storm just referred to passed from the north-west of the Bay across the Sunderbuns into East Bengal, and the second towards the end of the month, when a cyclonic storm in the south-west of the Bay caused a current of moist air to move northwards along the west coast. As the moist current advanced, heavy rain fell at all stations on the west coast, and cloudy rainy weather prevailed in Orissa, Chota Nagpur, and South-West Bengal for some days. The rainfall in these parts appears to have been maintained by a very shallow depression, which moved from the south of Burma over the north of the Bay and into Lower Bengal, arriving there about the same time as the moist current which had moved up the west of the Bay. The continuance of the rainfall in the south-western districts of the province of Bengal is difficult to account for, except on this supposition, because it was of daily occurrence for some time after all trace of the disturbance in the south-west of the Bay had disappeared.

Soon after the cyclonic storm in the early days of the month had disappeared, conditions became favourable for the withdrawal of the monsoon current from the north of the Bay. The large diffused low-pressure area characteristic of the change of seasons formed over the south of the Bay, and a moderate gradient developed from north to south. Following this rainfall became general on the Madras coast, and continued with but little interruption till near the end of the month.

At the same time fine settled weather prevailed in Bengal and over the north of the Bay, with comparatively low temperatures, especially at night, and an almost entire absence of rainfall. The two tables below show that the rainfall of the month occurred during the first few days and the last few days. They have already been published in the weekly reports, and are arranged as below for comparison.

Table showing in inches the average rainfall in the large divisions of the province as reported for the weeks ending 5th October and 2nd November :—

DIVISION.	Average rainfall of week ending 5th October.	Average rainfall of week ending 2nd November.	Total.
South-West Bengal	2·45	1·23	3·68
North Bengal	3·06	0·23	3·29
East Bengal	5·35	0·40	5·75
Bihar	0·90	0·13	1·03
Orissa	3·39	2·30	5 69
Chota Nagpur	0·66	1·70	2·36

Table showing the average rainfall in the large divisions as reported for the weeks ending October 12th, 19th, and 26th :—

DIVISION.	Average rainfall of week ending 12th October.	Average rainfall of week ending 19th October.	Average rainfall of week ending 26th October.	Total.
South-West Bengal ...	0·03	0·16	Nil.	0·19
North Bengal ...	0·05	0·11	0·01	0·17
East Bengal ...	0·25	Nil.	Nil.	0·25
Bihar ...	Nil.	Nil.	0·01	0·01
Orissa ...	0·40	0·02	0·60	1·02
Chota Nagpur ...	Nil.	0·25	Nil.	0·25

It will be seen from these tables that on neither of the two occasions of rainy weather did much rain fall in Bihar, and that on the latter occasion very little fell in North Bengal. On the other hand, the only amount of any importance shown in the second table was 0·0 inch in Orissa for the week ending 26th October. This was due to the moist current mentioned above having before the 26th caused moderately heavy rain in Orissa.

The north-east monsoon conditions were established over the province and the Bay about the 7th, and the fine weather which followed was accompanied by temperatures considerably lower than those which generally occur at that season of the year. There was, however, a rather important exception in the case of Chota Nagpur and Bihar, where mean temperature was frequently above the normal.

The higher temperatures in the western districts occurred during the day as shown in the following table, which gives the variation from the normal in mean maximum and minimum temperatures at representative stations:—

STATION.	Variation in mean maximum temperature.	Variation in mean minimum temperature.
Cuttack	—·7°	—0·3°
Arrah	+1·4	—2·1
Hazaribagh	+0·7	—0·8
Rangpur	—1·7	—1·9
Comilla	—2·2	—3·0
Silchar	—1·6	—3·6

The area over which the days were warmer than the normal coincides with the area where westerly winds prevailed. In the west of Bihar the general direction was south-westerly, in Chota Nagpur westerly, and in Orissa north-westerly. In the centre and east of the province the prevailing direction was north-easterly, but at times when the pressure distribution was more than usually uniform, there were only light variable airs.

The higher day temperatures as compared with those prevailing at night may be accounted for by the greater absence of cloud than is usually the case in October. The clear skies gave a more free exposure to direct rays of the sun, and permitted a more rapid radiation of heat at night.

The disturbance in the early part of the month has already been referred to in the report for the month of September. At the end of that month there was a well-defined depression in the west of the Bay, which at first appeared to be moving in a westerly direction towards the Madras Coast. But as not unfrequently happens at the end of the monsoon season, the centre of the depression followed a curved path tending towards the east. On the 30th of September pressure changes were small at all the coast stations except in the south of Burma, where there was a rapid rise.

Winds from being north-easterly in the Circars had become north-west, and the centre of the disturbance appeared likely to cross the coast somewhere between False Point and Vizagapatam. There was still no indication of the depth of the depression, as pressure readings were within ·04 inch of the normal all round the coast except in the south of Burma, where there was excess of about ·1 inch. On the 1st of October the centre was a little to the south-east of False Point, and it then appeared to be following a line curving to the east. As the depression approached the coast line, pressure fell rapidly—first at Gopalpur and False Point, and then over the whole of the north-west angle of the Bay and in Lower Bengal and Orissa. The rate of motion was much higher than usual, as the centre, from being to the south-east of False Point at 8 A.M. on the 1st, was near Saugor Island about 8 P.M. and Narayanganj on the following morning. The disturbance evidently developed after entering the north-west angle of the Bay, and also during the night of the 1st while passing over Lower Bengal. The fall of pressure at Narayanganj on the morning of the 2nd was more than half an inch, and the changes were large not only in South-West and East Bengal, but also in the north-east angle of the Bay as far south as Akyab.

Stormy weather accompanied the depression in its course over the Bay; and as the centre passed over the Sandheads, and very close to Saugor Island, the strength of the storm can readily be compared with what it was in East Bengal and the north-east angle of the Bay on the following morning. It may have been partly due to the curved path taken by the storm centre that the winds attained to the strength they had at the mouth of the Megna and inland as far as Narayanganj, but the depression appears also to have deepened, as the lowest pressure on the 1st was 29·443 inches at False Point, and at Narayanganj on the 2nd 29·264, while over an area extending from Mymensingh to Chittagong and from Jessore to Comilla the depth was as great as at False Point on the previous day.

As the depression was moving very rapidly to the east, it soon reached the hilly ground beyond East Bengal, and soon disappeared. On the morning of the 3rd the only trace of its

existence was a rather rapid fall of pressure at Sibsagar and in Bihar, and a large defect over the whole of the province. The rise of pressure which followed the disturbance continued steadily till the end of the week, and by that time readings were everywhere above the normal.

The reading of the barometer reported from Barisal on the morning of the 2nd was so much lower than those of any of the other stations that it could not be accepted till enquiry had been made as to whether the observer who was officiating for a short time, had taken the reading with due care. In answer to the enquiry he stated that he had noticed the unusual depression of the barometer; that not only had he verified it several times himself, but that he had sent for the permanent observer, who vouched for its accuracy. The reading was 28·869 inches, and the fall from 8 A.M. of the previous day ·924 inch. Instead, therefore, of passing over Narayanganj, as appeared to be the case, the storm centre must have been at no great distance from Barisal. As the centre could not have been far from Saugor Island, as it passed to the west of the light-ships at the mouth of the Hooghly, the depth of the depression and the strength of the storm must have increased very greatly after crossing the coast. It is unfortunate that no record has been made of the strength of the wind at Barisal: the observer was unable to reach the anemometer.

The depth of the depression, as reported from Barisal, was confirmed by a report received from Comilla, that the lowest reading of the barometer taken there during the forenoon of the 2nd was below 29 inches.

During the passage of the depression across Lower Bengal heavy rain fell; but as it moved quickly, and, as always happens when a storm goes eastward, the weather moderated very rapidly, the quantity of rain was small compared with the intensity of the storm. It was only in East Bengal, where general heavy rain fell. On the 2nd falls varied from 1 to 7 inches over the whole of East Bengal, and heavy falls were recorded in Tippera on the 3rd, the heaviest being 4 at Comilla and 6 inches at Agartala. Rainfall had almost entirely ceased in the western districts on the 3rd, and very little fell anywhere after the 3rd.

Pressure rose steadily for some days after the 3rd; and as it soon began to fall in the south of the Bay, readings became highest in the north-east of the province, and the north-east monsoon distribution was established. From about the 7th, therefore, till towards the end of the month, fine settled weather prevailed over Bengal and the north of the Bay, and rainfall set in on the Madras Coast. The changes during that period were of but slight importance with the exception of those in temperature, and they have been already referred to.

The second disturbance of the month was of very short duration. It may have developed quickly or over an area too far south to affect weather at any of the observatories on the Madras Coast.

Heavy rain began on the 22nd as far north as Madras, and continued on the 23rd, Cuddalore reporting nearly 8 inches on that day. Squally weather began on the 24th, but was not felt to the south of Madras, the severity of the storm being chiefly confined to the part of the coast between Nellore and Cocanada. Within little more than twenty-four hours after the squally weather began at Madras, the depression crossed the coast between Masulipatam and Nellore. On the morning of the 25th the centre appeared to be about due east of Madras and to be moving in a north-westerly direction. On that day heavy rain was reported from Nellore, and a moderate fall had occurred as far north as Masulipatam. On the 26th the centre was well inland, and weather was rapidly moderating. The heavy rainfall on the 26th was between Masulipatam and Gopalpur, and lighter amounts were reported from Puri and Cuttack.

There was a considerable increase in the strength of the wind in the north-west angle of the Bay and in South-West Bengal, but that was of little importance as compared with the heavy rain, which gradually advanced northwards and ultimately became fairly general in Orissa, Chota Nagpur, and South-West Bengal.

The continuance of the cloudy rainy weather in the north of the Bay, Orissa, and Lower Bengal for quite a number of days after all trace of the disturbance from the south-west of the Bay had disappeared may be accounted for by a shallow depression which passed across the north of the Bay from the Burmah coast and into Bengal. While on the 27th pressure was rising slowly to moderately on the west coast and in Bengal, a slow fall prevailed in Burmah and the east of the Bay. This change extended northwestward on the 28th, and there was a brisk fall over the greater part of Lower Bengal. At that time the pressure distribution was very nearly normal, but there was a faint cyclonic circulation of winds in the central and western districts, and heavy rain fell as far north as Raniganj. Pressure continued to fall on the 29th, slowly everywhere, but rather more quickly in Burmah than in the north of the Bay. Gradients became more regular from north to south, and the cloud began to clear away in Lower Bengal. Rainfall was much less general, and with the brisk rise of pressure on the 30th it entirely stopped, except in Orissa, where scattered showers fell almost till the end of the month.

Pressure for the month is very nearly normal, differences varying from defect of ·01 inch in the west of Bihar and part of East Bengal to excess of ·014 inch in South-West Bengal. Except when the depression was crossing the Sunderbuns and East Bengal on the 1st and 2nd, changes were never large, nor did readings differ much from the normal The

large changes during the existence of the storm have been already referred to, the fall on the approach of the centre being very little short of an inch. The small defect in pressure for the whole month in East Bengal is due to the very low readings reported on the 2nd by all stations in that part of the province.

Temperature.—During the two periods of disturbed weather at the beginning and end of the month, the cloudy weather caused a large fall in day temperatures. At other times maximum readings were usually above the normal. The nights were cooler than usual at the time of the year almost without interruption. As stated above, mean maximum temperature for the whole month is below the normal except in Chota Nagpur and the west of Bihar, and mean minimum temperature is below the normal everywhere. Mean daily temperature is below the normal in the large divisions by amounts varying from a third of a degree in Chota Nagpur to 2°·3 in Assam.

Rainfall.—Very little rain fell except during the first three days, and from the 26th to the end of the month. Owing to the heavy falls which then occurred in the southern districts, the mean difference from the normal is not large, but, as on the second occasion, very little fell in North Bengal and on neither occasion in Bihar. The falls in both these districts are much below the normal. The total fall in Bihar is only ·55 inch as compared with a normal fall of 3·44 inches; in North Bengal 1·32 as compared with 4·42 inches. Defect in Orissa is ·68, in South-West Bengal ·64, and in Chota Nagpur ·37 inch, while in East Bengal there is excess of ·36 inch.

Many of the Bihar stations have received not more than ·3 inch, and with the exception of a few stations in the Darjeeling hills, the falls are rarely more than 1 inch over the whole of the north of the province. Over a belt of country running east and west across the central districts from Chota Nagpur to East Bengal, the falls are between 1 and 3 inches. Further south they vary between 3 and 5 inches except in the southern half of East Bengal and on the Orissa coast, where the falls are between 5 and 10 inches.

Falls are in excess of the normal in the southern half of East Bengal, and over Orissa and the adjacent part of Chota Nagpur, excess ranging up to 2 inches in Orissa and to 5 inches in East Bengal. Over the rest of the province falls are deficient by amounts increasing towards the north, the greatest being a little over 4 inches in parts of the Dinajpur, Rangpur, Bogra, Mymensingh, Bhagalpur, and Saran districts. Over the whole of the northern half of the province defect varies from 2 to 4 inches.

The following table gives a comparison between the actual monthly and total rainfall and the normal rainfall of the province up to the end of October in the same form as has been employed in the previous monthly abstracts of the present year. The figures represent the ratio of the rainfall of each month of the present year to the normal rainfall expressed as a percentage. The table thus gives a condensed summary of the rainfall data of the year for each meteorological division. The first ten columns give the percentage amount of rainfall received in each month, and the last column the percentage rainfall of the whole period from the 1st of January to the end of October:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	Actual rainfall of first ten months of 1895 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	44	9	29	111	86	82	67	67	67	85	72
North Bengal ...	27	5	49	129	91	43	165	87	89	30	88
East Bengal ...	11	1	38	140	133	47	81	90	75	107	81
Bihar ...	71	88	34	129	70	72	120	102	77	16	89
Orissa ...	49	101	29	194	46	212	79	116	90	89	109
Chota Nagpur ...	66	52	71	418	70	109	98	67	78	88	87

The following table gives full data for the comparison of the actual and normal rainfall of the month of October in all districts of the province. The figures are obtained in the manner explained in previous monthly summaries. The first column gives the average district rainfall as determined from the rainfall observations of the past 15 years; the second column gives the actual district rainfall as determined from the actual weighted rainfall of the month at the reporting stations in the district; the third column expresses the ratio of

the actual district rainfall to the normal as a percentage, and the fourth the same information in a slightly different form :—

Percentage Table for October 1895.

Division	District	Normal district rainfall for October.	Actual district rainfall for October 1895.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10.
mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in ques
station in the district sending in return divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

e week ending Saturday, the 9th of November 1895.

Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1895. Mean for district.	Normal mean.	Variation.	District.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, FOR THE WEEK ENDING, 8 A.M., SATURDAY THE 9TH OF NOVEMBER 1895.

FINE settled weather has prevailed over the province throughout the week, and also in the west of the Bay, but in the east conditions have been less settled. A large diffused low pressure area has been lying over the Bay, and though pressure-changes at the coast stations have not been of much importance, strong winds sprang up at Diamond Island and continued for some days. Judging by the strength of the wind in that part of the Bay and the very rough sea, a depression of limited extent appears to have formed not far from Diamond Island, within the large diffused low pressure area shown by the coast observations. From some unknown cause it disappeared before its effects were felt on any other part of the coast, and whether it ever existed or not is purely hypothetical.

Pressure has been considerably higher than usual in the south of the Bay throughout the week, and over Bengal there has generally been a small excess. Changes were upwards in the early part of the week, at times with moderate rapidity, but excess was seldom more than ·1 inch. Towards the end, when the depression in the neighbourhood of Diamond Island became diffused, the barometer fell slowly everywhere. Besides the strong winds and the rough sea, a good deal of rain appears to have fallen in the part of the Bay where the squally weather developed. The only heavy fall, however, reported was about 2 inches at Tavoy.

The most important change has been the increase of temperature. For some weeks past mean daily temperature has been steadily below the normal, and on the first day of this week there was still considerable defect in all districts and over the north of the Bay. On the 4th it was rising rather quickly, the change appearing to come from the north of the Province, as on this day there was excess in North Bengal, Bihar and Assam, varying up to nearly 4° at Jalpaiguri, while in the southern districts there was still a moderate defect. On the 5th the area of relatively high temperature had extended over the whole province and the north of the Bay. At the same time there had been a considerable fall in Burma and Madras, and readings became low over the south of the Bay. The excess, which became general on the 5th, gradually increased towards the end of the week, when it was as much as 5° in parts of Lower Bengal and Bihar.

Though only a few scattered showers have fallen, weather was very cloudy in the north of the Bay and in Lower Bengal on the 8th and 9th. This was due to the small storm which had developed in the east of the Bay having diffused over a wide area. The slightly unsettled weather consequent on this change was of only short duration, and by the end of the week conditions were settled over the whole area.

Pressure fell on the first day of the week. It then rose till towards the end, when it fell every where except in Orissa. Mean pressure for the week is above the normal at all stations, but by only small amounts ranging up to ·03 inch in North Bengal.

Temperature.—From being 2° to 3° below the normal mean, temperature has increased to 5° above the normal in places. As there has been excess throughout the week, except near the beginning, means for the week are all in excess, the difference varying from 0°·7 in East Bengal to 2°·2 in Bihar.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 9th November 1895.

	Normal mean maximum temperature for the week ending 9th November.	Actual mean maximum temperature for the week ending 9th November 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 9th November.	Actual mean minimum temperature for the week ending 9th November 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 9th November.	Actual mean daily temperature for the week ending 9th November 1895.	Variation of actual mean from the normal.

	%
The mean relative humidity	80
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	74
	Inches.
The total fall of rain from 3rd to 9th November 1895	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·22
The total fall from 1st January to 9th November 1895	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	64·85

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, nd from Observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the hermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet bove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, ormerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in he Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ⌓, dew.

FLUSHING OF THE MOATS AND THE LALDIGHI IN THE TOWN OF NATOR BY THE INTRODUCTION OF WATER FROM THE RIVER GODAI.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 25th November 1895.

RESOLUTION—No. 4083M.

READ—

A memorandum, No. 600Mct., dated the 21st September 1895, from the Commissioner of the Rajshahi Division, forwarding a copy of a letter, No. 953J., dated the 12th September 1895, from the Magistrate of Rajshahi, reporting that the Hon'ble Maharaja Jagadindra Nath Roy and Kumar Jogendra Nath Roy of the Nator Raj have approved of the arrangement made for the supervision by the District Engineer of Rajshahi of the periodical flushing of the moats around their residence at Nator and of the big tank in the town, known as the Laldighi, and have agreed to bear the cost of the periodical flushing, which is estimated at Rs. 275 a year.

A memorandum No. 214M., dated the 30th September 1895, from the Commissioner of Rajshahi, intimating that the District Board of Rajshahi have agreed to the services of the District Engineer being utilised for this purpose when he visits Nator in connection with his own duties and to the payment of a small honorarium.

Read also—

The previous correspondence on the subject.

The town of Nator, in the district of Rajshahi, has long been notorious for its unhealthiness, which was reported to be due, among other causes, to the filthy

state of the tanks and the extensive moats around the residence of the Nator Raj family, on which nearly the whole population of the town depend for their supply of drinking water. The condition of the town has been condemned by successive Sanitary Commissioners; and, so far back as the year 1880, Dr. Lidderdale pointedly drew attention to the necessity for cleansing these moats, which were described to be "reservoirs of sewage" into which the surface drainage of the greater portion of the town and the sewage from many private latrines were allowed to be discharged.

2. From time to time attempts were made to improve the condition of the moats, and in 1881 the Subdivisional Officer of Nator applied to the representatives of both branches of the Raj family, for permission to flush them at the cost of the Municipality by letting in fresh water from the river Narad, which flows past the town—a project which was recommended by the District Engineer and the Divisional Superintendent of Works. While acknowledging the value of the scheme, the Raj family declined to give their consent to it from the apprehension that the silt deposited by the river water might, in course of time, block the moats, and thereby cause a scarcity of water. The District Magistrate, however, sanctioned the project, a cut was made, and a culvert constructed and communication between the river and the moats established on the 15th September 1881. Kumar Jogendra Nath Roy, on the 12th October 1881, presented a memorial to Government, complaining of the action of the local officers; but as it appeared on enquiry that the cut was not intended to be kept open, except occasionally for letting in fresh water, and that consequently there was no ground for apprehending that the moats would become blocked by silt, the Kumar was informed that he had no cause of complaint.

3. The Kumar subsequently brought a civil suit against the Municipality, and obtained a decree and an injunction restraining them from opening this cut. Although the decree was obtained in January 1884, the cut was actually kept open from 1881 to 1886, and fresh water let in during each of those years. In 1887 the Kumar closed the cut and built two huts on its site, thereby stopping all flow of fresh water from the river into the moats.

4. In March 1888, the Sanitary Commissioner brought to the notice of Government the evils resulting from the closing of the cut, and in July 1888 the Commissioner submitted a report from the Magistrate of Rajshahi on the same subject. The Inspector of Local Works and the Sanitary Commissioner were accordingly asked to visit the town, and to submit to Government their opinion in the matter.

5. The Inspector of Local Works recommended the original project of flushing the moats by water from the Narad, which had always received the strongest official support, but had been opposed by those representing local interests. The Sanitary Commissioner, on the other hand, condemned the Narad scheme on the ground that the water supplied would be unwholesome, and suggested that flushing should be effected by means of a cut from the river Godai. This latter proposal seemed to the Lieutenant-Governor to be the only one which was both practicable and likely to put a stop to further litigation and dispute; and in October 1889 His Honour gave it his general approval, and urged the local officers to attend to its execution.

6. In July 1890 the Commissioner of the Division reported that both branches of the Raj family had formally agreed to a rough scheme, prepared by the District Engineer, and estimated to cost Rs. 6,000, for flushing the moats and the Laldighi by water from the Godai, and that the Kumar had agreed to bear all the expenses connected with it. The scheme was approved by Government, and a sum of Rs. 300 required for the preparation of the detailed project was sanctioned from the Provincial revenues.

7. Later on, however, the Kumar withdrew his original offer, and declined to contribute more than half the estimated cost, and then only on condition that the other branch of the family should first deposit the remaining moiety. During the visit of the Lieutenant-Governor to Rampur Boalia in August 1891, the Maharaja expressed his willingness to bear his share of the cost, but nothing was done until in September 1893, after being required by the Municipality, under section 200 of the Bengal Municipal Act, 1884, to cleanse the moats, the proprietors paid to the District Magistrate the sum of Rs. 7,200 required for

the works. Detailed plans and estimates were then prepared by the District Engineer and approved by the Superintending Engineer, and the project was eventually taken up by the District Engineer under the orders of the Magistrate, Mr. J. C. Price. It was completed in November 1894, and the Inspector of Local Works reported that the scheme had been satisfactorily carried out, but that the works could not be maintained in good order without professional superintendence. It has, therefore, been arranged, with the consent of the District Board and of the Raj family, that the District Engineer shall supervise the maintenance of the works for a small honorarium of Rs. 100 a year, which sum, as well as the cost of the maintenance of the works, estimated at Rs. 175, will be paid by the Nator family.

8. The Lieutenant-Governor is gratified to find that this troublesome and delicate question, which has been under discussion for many years, has at last been brought to a satisfactory conclusion. Sir Charles Elliott congratulates the Raj family and all concerned in the matter upon the execution of an important sanitary project, which, if properly maintained, with due precautions against the pollution of the water by surface drainage, will, no doubt, greatly benefit the health of the residents of Nator.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that copies of it be communicated to both branches of the Nator Raj family, and to the Commissioner for information and communication to the Magistrate and the District Board.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 25th November, 1895.

Burdwan.—No rain. Weather cloudy. Prospect of the *aman* crop is very alarming. *Rabi* crops are being sown. Sugarcane pretty good. Fodder and water sufficient. Condition of cattle good. Common rice sells at an average price of 15½ seers a rupee.

Midnapore.—Rainfall nil. Paddy is being reaped; prospect good, except in Ghatal, where it is gloomy. Lands are being prepared for *rabi* crops. Indigo has been sown. Sugarcane doing well. Fodder and water sufficient. Prices of common rice:—

	Srs.	
Midnapore	16	per rupee.
Contai	22	
Tamluk	16	
Ghatal	14 and 15	

24-Parganas.—Rainfall nil. Weather seasonable. Prospect of *aman* unfavourable, except in low lands and in the south of the district. Harvesting of *aman* commenced. Sowing of *rabi* crops almost over. Sugarcane doing well. No cattle-disease. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	13	12	
Basirhat	15	3¾	
Diamond Harbour	16	0	

Murshidabad.—Rainfall nil. State of *kalai* good. Harvesting of *aman* commenced; estimated outturn 8 annas. Cutting of sugarcane going on. Sowing of *rabi* crops still continues. State of indigo and mulberry seems good. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Khulna.—Rainfall nil. Weather cold. Prospects of *aman* rice continue to be good. *Rabi* sowings still going on in the Sadar subdivision. Fodder and water sufficient. Common rice sells at—

	Srs.	
Sadar	17 to 21	per rupee.
Bagerhat	18	
Satkhira	16	

Dinajpur.—Rainfall nil. Weather rather warm during day. Prospects of standing crops continue good. Common rice selling from 12 to 16 seers per rupee. No cattle-disease reported. Fodder and water sufficient.

Rangpur.—Rainfall nil. Weather seasonable. Harvesting of *aman* commenced. Sowing of winter crops going on. Rain wanted. Prospects generally good. Common rice selling at 12 to 13 seers per rupee. Fodder sufficient. No cattle-disease.

Pabna.—Rainfall nil. Cold weather has begun very late. Prospects of *aman* rice good on the whole. Rain required.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy commenced; prospects fair. Fodder available. No cattle-disease. Price of common rice 17 seers per rupee.

Chittagong.—No rain. Weather hot and occasionally cloudy. Harvesting of early *aman* nearly finished. Prospects of winter rice indifferent. *Rabi* sowings continue. Fodder and water sufficient. Common rice sells at 16 seers per rupee.

Patna.—No rain. Paddy harvest commenced in places. Poppy and *rabi* sowings nearly finished. Common rice selling from 16 to 19 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—Still no rain. Winter rice crop will not be above nine annas. Harvesting begun. *Rabi* suffering for want of moisture. Poppy had to be resown in many places, but is doing fairly well. Price of common rice at Sadar 14½ seers against an average of 16¼ seers per rupee.

Champaran.—No rain. *Rabi* being sown. *Aghani* being harvested; 12 annas outturn estimated. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Winter rice nearly ripe and harvesting commenced in places. *Rabi* and poppy doing fairly well, but rain badly wanted. Common rice selling at 16 seers per rupee. Fodder sufficient.

Bhagalpur.—No rain. Weather seasonable. *Rabi* is being sown. Paddy is being cut. Sugarcane is being pressed. Common rice sells at 17 seers 10 chitaks per rupee at Sadar. No cattle-disease. Fodder and water sufficient.

Purnea.—No rain. Harvesting of *aghani* paddy commenced. *Rabi* sowings going on; prospects fair. Cattle-disease reported from Sadar thana. Fodder and water sufficient. Common rice selling from 16 to 21 seers a rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *laghu sarad* in progress. *Guru sarad* maturing. Condition of cattle good. Fodder sufficient. Common rice sells at—

				Srs.	c.	
Cuttack	...	...	...	23	10	per rupee.
Jajpur	...	...	...	29	14	
Kendrapara	...	...	...	31	8	
Banki	...	...	...	31	8	

Hazaribagh.—Rainfall nil. Weather much cooler and more seasonable. Paddy being harvested; outturn 8 to 12 annas. Prospects of *rabi* good, but rain wanted. Poppy sowings completed; outlook promising. Fodder and water sufficient. Price of common rice 12 to 16 seers per rupee.

General Summary.—There was no rain during the week. The harvesting of winter rice has begun. Owing to the early cessation of the rains the outturn will probably be below the average, except in Northern Bengal and Orissa. The sowing of the *rabi* crops is in progress, but complaints come from Gaya, Darbhanga, and Hazaribagh of a lack of moisture. Poppy is coming on well, though the recent heat in Bihar has necessitated resowings in places. Sugarcane is a good crop and is being harvested in some districts. No cattle-disease is reported except from the Sadar thana of Purnea. The price of common rice continues generally steady, but the slight upward tendency continues.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 26th November, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

I.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the by Rail, Road, River (Country-boat and Steamer) and Canal during the month of July, 1895.

* Mean for 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for th[illegible] The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. Th[illegible] mean at the numerical means of average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in questio[illegible] [illegible] divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

...e week ending Saturday, the 23rd of November 1895.

	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 23RD OF NOVEMBER 1895.

AT the commencement of the week fine weather generally prevailed over the province, but the conditions as to temperature were decidedly abnormal, and on Sunday, the 17th, the first day of the week under review, the maximum or day temperatures registered were usually from about 2° to 7° in excess of the normal, while in the night temperatures the excess was generally between 4° and nearly 9°. Pressure was also slightly to considerably above the normal, and either calms or very light and rather variable winds were reported over the province. Conditions over North-Western India, however, indicated a change in the weather, for a barometric depression which had appeared in the Southern Punjab on the 16th continued to exist, while a cold wave of air had commenced in Baluchistan, which appeared to be spreading eastwards. On the 18th the centre of the depression was situated near Meerut, and the feeble storm was breaking up against the Himalayas, giving snow and hail in the hills and rain in the adjacent plains, while the cold wave had advanced over the Punjab on the 18th, and on the 19th it was advancing over the North-Western Provinces. During this time the changes of temperature and pressure in Bengal were small and unimportant, but from the 20th the cold wave commenced to affect Bengal, and from the 19th to the 20th there had been a fall in the mean temperature of about 1°, and on the 21st of about 1° to 3°, while the fall was of a rather smaller amount on the 22nd. On this last date also pressure had decreased rather briskly and the distribution had become nearly normal. On the 22nd also the maximum temperatures reported were usually still from 1° to 3° in excess, though the night or minimum temperatures were nearly normal. On the 23rd temperature had again fallen at the majority of stations, and the mean temperature had become not very far from the normal, while the pressure changes were small and the distribution also fairly normal. The northerly winds characteristic of the cold season had become more strongly developed, and steady cool northerly winds of light to moderate force had established themselves over the whole province.

Pressure was at the commencement of the week very decidedly above the normal, while at its close it was practically normal. Hence the mean for the week has been in distinct, though small, excess, the usual variation being about 0·05″ to 0·06.″

Temperature.—The principal meteorological feature during the week has been the steady fall of temperature from about the 20th. On the last day of the week the mean for the province had become almost normal, but for the whole week the average mean temperature was 3·2° in excess, the largest excess having been registered in Chota Nagpur, where it has equalled 4·4°. The variation of the average temperature from the normal at certain selected stations in different districts of the province is shown in the following table:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 23rd November 1895.

	Normal mean maximum temperature for the week ending 23rd November.	Actual mean maximum temperature for the week ending 23rd November 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 23rd November.	Actual mean minimum temperature for the week ending 23rd November 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 23rd November.	Actual mean daily temperature for the week ending 23rd November 1895.	Variation of actual mean from the normal.

Rainfall.—Light local showers have been received at one or two stations in and near the hills of North Bengal, and also at two or three stations in Orissa, but with these exceptions the whole province has been practically rainless.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 23rd of November 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1895.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·01
The total fall from 1st January to 23rd November 1895	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

RESOLUTION REVIEWING THE REPORTS OF COMMISSIONERS OF DIVISIONS ON THE WORKING OF DISTRICT AND LOCAL BOARDS IN BENGAL DURING THE YEAR 1894-95.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERNMENT.

Calcutta, the 3rd December 1895.

RESOLUTION.

READ—

The Reports from the several Commissioners of Divisions on the Working of District Boards in Bengal during the year 1894-95.

Read again—

The Resolution reviewing the Divisional Reports on the Working of District Boards in Bengal during the year 1893-94.

ALL the reports were received on or about the prescribed date (31st July), with the exception of those from the Burdwan and Rajshahi Divisions, which did not reach Government till the 19th and 26th August, respectively.

2. The year under review was the ninth in which the Bengal Local Self-Government Act, III of 1885, was in operation. The number of District Boards remained unchanged during the year, but the number of Local Boards was increased from 102 to 103, owing to the establishment of a new Board at Thakurgaon, in the district of Dinajpur. The statistics furnished for the Rajshahi Division show a decline of 24 square miles in the area and of 41,349 in

the population subject to the control of District Boards, but the cause of this is not explained, nor is there a corresponding increase in the statistics of any other Division. Trifling variations in the area and population of the Hooghly and Howrah districts and of several Local Boards appear to have been caused by unimportant transfers from one subdivision to another.

3. *Constitution of District Boards.*—The number of members of District Boards was the same as in the previous year, viz. 794. Of this number, 172 held their seats *ex-officio*, against 171 in the previous year 293 were nominated, as compared with 314, and 329 were elected by Local Boards, against 309 in 1893-94. Classified on another principle, 247 members were officials and 547 non-officials, against 242 and 552 respectively in the previous year. The European and Eurasian members numbered 196 against 200, and the natives of the country 598 against 594. The variation in the number of nominated and elected members was due principally to the fact that in Saran, where in 1891 the District Board elections were held too late and the members thus informally elected were appointed by Government, 15 members were duly elected by the Local Boards during last year. In every instance the Magistrate of the district was re-appointed Chairman, under section 24 of the Act, on the expiry of his term of office.

4. The total number of meetings held by the District Boards was 571, or 51 less than in 1893-94. The District Board of Puri heads the list with 24 meetings; Muzaffarpur comes next with 22 meetings; and the District Boards of Mymensingh, Backergunge, and Gaya each held 20 meetings or more. In Khulna and Shahabad the Boards held less than one meeting a month. As compared with the figures of the previous year, the falling off in the number of meetings was considerable at Bhagalpur, Champaran, Dinajpur, Darbhanga, and Patna, while Monghyr, Bankura, and Midnapore show a satisfactory increase. In Khulna the decrease is said to have been due to lack of business to occupy the Boards—an excuse which the Commissioner is not disposed to accept. In the case of the other districts mentioned, no attempt has been made to explain why so few meetings were held. The Lieutenant-Governor's views as to the duties of District Boards in this matter were stated at length in the Resolution on last year's report, and he desires to impress upon the Chairmen of Boards that the rule of holding at least one meeting a month should only be departed from under very exceptional circumstances.

5. The number of meetings that had to be adjourned, together with those that were entirely abortive, owing to the absence of a quorum, amounted to 89, or 5 less than in the previous year. Although this shows some improvement on the record of the previous year, the number of these failures was still unduly high in the districts noted in the margin. In Muzaffarpur the adjournments are ascribed to the death of two of the European members, and also to the apathy of certain native members in attending meetings, while in Puri the increase in the total number of meetings is the cause assigned. As regards the other districts, no explanation has been offered. The Lieutenant-Governor again draws attention to this important matter, and trusts that both Chairmen and members of Boards will endeavour to manage better in future, and will bear in mind that every meeting that fails for want of a quorum causes annoyance and discouragement to the members who do take the trouble to attend.

District.	Number of abortive and adjourned meetings.
Dinajpur ...	10
Muzaffarpur ...	9
Puri ...	7
Mymensingh ...	7
Jalpaiguri ...	6

6. Taking all the Boards together, the average attendance of members at each meeting was the same as in the previous year, viz. 9·8, or less than half of the average strength of the Boards. It was best in Nadia, Saran, Bhagalpur, and Mymensingh, and worst in Malda, Dinajpur, and Jalpaiguri, where more than two-thirds of the members were usually absent. No explanation regarding the small attendance in Malda has been furnished. In regard to the small attendance of members in Dinajpur, the Chairman observes that "this is due more to apathy on the part of the members than any other cause." In Jalpaiguri the bad attendance is attributed to the difficulty of travelling during the rains and to want of interest in the work of the Board. In Champaran it is explained that some of the members had left the district for England, and had

not resigned their seats before leaving. The attendance of official members shows a slight advance, but there is still room for improvement.

7. *Constitution of Local Boards.*—The 103 Local Boards had a total strength of 1,231 members, or nine more than in the previous year. Of these, 47 were *ex-officio* members, 744 were nominated, and 440 elected. There were 156 officials and 1,075 non-officials on the Boards; and classified according to their nationality, 115 members were Europeans or Eurasians, the rest being natives of this country.

8. The Local Boards held 1,146 meetings, or 33 meetings more than in 1893-94. Of this number 227, as compared with 164 in the previous year, had to be adjourned or proved abortive owing to failure to form a quorum. Only 26 Local Boards, as against 33 in the previous year, held more than 12 meetings. The highest number (30) was attained by the Local Board of Jessore. The Sadar Board of the Howrah district comes next with 24 meetings, none of which were abortive or adjourned. No less than 63 Local Boards failed to meet once a month. The following statement, comparing the results of the last two years, shows a slight falling off in the attendance of non-official members:—

Year.	Average attendance.			Average percentage of attendance.
	Official.	Non-official.	Total.	
1	2	3	4	5
1893-94 ...	·9	4·6	5·5	45·9
1894-95 ...	·9	4·4	5·3	44·3

9. *Elections.*—No general elections were held in any district during the year. Three bye-elections took place in the Presidency Division—one in the Kushtia subdivision of Nadia, and two in the Magura and Narail subdivisions of Jessore. In Kushtia no candidate was even nominated, and the vacancy was filled up by appointment under section 10 of the Local Self-Government Act. The bye-elections in the other two subdivisions were not contested. In the Burdwan Division two out of four bye-elections failed for want of voters, and the vacancies had to be filled up by appointment. The bye-elections in the Rajshahi and Dacca Divisions were successful, and in the latter case the voters are said to have taken considerable interest in the proceedings.

10. *Occupation of members of District and Local Boards.*—The following table classifies the members of the several District and Local Boards according to their professions and occupations:—

	Government servants.		Zamindars, &c.		Pleaders and Muktears.		Planters.		Missionaries.		Government Pensioners.		Other Classes.		Total number of members.
	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
District Boards ...	243	30·60	239	30·10	177	22·29	62	7·80	9	1·13	16	2·01	48	6·04	794
Local do. ...	159	12·91	532	43·21	326	26·48	60	4·87	2	·16	15	1·21	137	11·12	1,231

There has been no material change in the composition of the Boards.

11. *Powers of Local Boards.*—Comparatively few changes have been made in the powers exercised by Local Boards, as summarised in paragraph 12 of the Resolution on last year's reports. With certain exceptions, they continue to administer the grants for village roads, pounds, ferries and primary education, while in some districts the supervision of dispensaries, village sanitation and district roads has also been entrusted to them.

Notwithstanding the remarks on this subject in last year's Resolution, the District Board of Burdwan decided to maintain the arrangement under which, while the control of secondary education rests with the District Board, the Local Boards undertake the payment of grants to the schools. Even this mechanical function, however, is stated to have been irregularly exercised, and the Commissioner has asked the District Board to reconsider their decision, which appears to have been arrived at in opposition to the advice of their Chairman. In Birbhum the management of pounds and of certain scheduled roads in the Rampur Hát subdivision was made over to the Local Board; and in Bankura pounds and ferries were similarly transferred. The control of primary education was entrusted as an experiment to the Local Board of Tamluk in Midnapore, and also to the Local Boards in the district of Howrah. The Magistrate of the latter district, however, who was on leave when the transfer was sanctioned, remarks that these bodies do their other work so badly that he has little expectation of their succeeding in the supervision of education. Mr. Grierson's opinion on this point is to some extent borne out by the statement of the Director of Public Instruction that the Howrah Local Boards rarely consulted the Deputy Inspector, and appear to have failed signally in conducting the examinations of lower primary schools. In Birbhum and Midnapore the Local Boards are said to have done fairly well; in Bankura and Hooghly they managed education and village roads in a satisfactory manner; but their administration of pounds was weak.

In the Presidency Division no change was made in the duties delegated to Local Boards, and the general character of their work is unfavourably reported on. The Diamond Harbour Local Board failed to spend their allotment for village roads, and resorted to the irregular expedient of drawing out the balance in a lump sum at the end of the year. None of the Boards managed the pounds under their charge efficiently, nor did they keep in good order the district unmetalled roads entrusted to them. In Nadia these bodies did not take the trouble to distribute their allotments for village roads in time for repairs to be done, and although their management of pounds and ferries showed a slight improvement, they took no interest in primary education, dispensaries or sanitation. The Murshidabad Local Boards are described as taking no interest in village roads and primary education, and the Chairman reports that it would be better if they were absorbed in the District Board. In Jessore the state of the village roads is said to be discreditable to the Local Boards, and in more than one instance heavy loss was sustained owing to their lax administration of pounds. A similar complaint is made from Khulna, where the District Magistrate reports that the incompetence of the Satkhira Local Board led to considerable embezzlements by their clerk.

In Rajshahi and Rangpur the Local Boards are said to have done fairly well; the only Local Board in Dinajpur was created during the year; at Sirajganj, in Pabna, the Local Board is said to have proved inefficient, and it was necessary to curtail its powers. The Commissioner remarks that when the Subdivisional Officer is not a member of the Local Board, much of the experience gained by him when on tour cannot be brought to bear directly on the Board's business, and recommends that in Sirajganj and elsewhere Subdivisional Officers should be made members of the Local Boards. This, however, is not desirable unless the Board apply to have the Subdivisional Officer appointed Chairman.

The Commissioner of Dacca reports that the Local Boards of that Division worked well "within their still very limited sphere." In Mymensingh their management of primary education has resulted in a considerable increase both of schools and pupils; and in Faridpur, Mr. Herald, the Magistrate, expresses a hope that the addition of primary education to their duties will result in a general improvement in their work. On the other hand, Mr. LeMesurier, the Magistrate of Backergunge, says that the Local Boards of his district "do not appear anxious to have their field extended, and are too apt to ask the District Board to take over from them any road or other work likely to need money or trouble to build or to keep up." Mr. LeMesurier thinks this is due in part to the difficulty of getting about during half the year.

The duties of Local Boards in the Chittagong Division were increased by giving them control of the grant for primary schools. The Commissioner remarks that dispensaries might properly be made over to them, but that the Civil Surgeon, who is a member of the District Board, and can easily get what he wants from that body, would find a difficulty in carrying on communication with Local Boards.

In Shahabad, an important change was introduced by the District Board in the system of allotments to the Local Boards for works. A lump grant was made, and the Local Boards were empowered to distribute it at their discretion under original works or repairs; at the same time, they were authorised to pass their own estimates up to a limit of Rs. 300 without reference to the District Board. The Saran District Board proposed to vest in the Local Boards the duty of carrying out petty repairs of bridges and ordinary repairs of all district roads. Neither of these proposals commend themselves to the Commissioner, who considers that the first can only succeed if the Subdivisional Officer is Chairman of the Local Board, and has asked the District Board to reconsider the second.

No changes were made in the powers of the Local Boards in the Bhagalpur Division.

The only change that occurred in Orissa was that the Local Board of Bhadrak, in Balasore, was relieved of the management of district roads. In Balasore and Cuttack the Local Boards are said to have worked well; but in Puri the Chairman of the District Board complains that the Khurda Local Board neglected the collection of receipts from pounds and ferries, and that the Puri Local Board never visited the village roads under their charge, and failed to spend their allotment.

12. *Union Committees.*—It was originally intended that the village union should be the working unit of local self-government in this Province, and the Bill which passed into law as Bengal Act III of 1885 was at first drafted on this principle. Later on, however, a change was made by which the District Board became the unit of administration with Local Boards under it, while the Union Committees were relegated to a position of such minor importance that it was not thought worth while to attempt to work the provisions of the law dealing with them. The Government of India, however, having expressed a desire that the system of village unions should be introduced experimentally into selected rural areas in Bengal, the Lieutenant-Governor decided to constitute Union Committees in those localities only where the experiment seemed likely to succeed. Accordingly, since the close of the year, sanction has been accorded to the formation of 24 unions in the Presidency Division, 15 in Burdwan, and 5 in the Tippera district of the Chittagong Division. The working of the Committees will be carefully watched with reference to the possibility of gradually extending the system.

13. The following statement compares the income and expenditure of the District Boards for 1893-94 and 1894-95:—

INCOME.

	1893-94.	1894-95.
	Rs.	Rs.

Total ...	67,10,295	66,77,267

14. *Credit balance.*—The year 1893-94 closed with a credit balance of Rs. 17,34,464 (corrected figure), which was reduced to Rs. 17,32,181 by the close of 1894-95. Out of this sum, however, more than three and-a-half lakhs consisted of deposits, which were not at the disposal of the Boards. The actual balance was Rs. 13,79,500, or an average of rather more than Rs. 36,000 per Board. The closing balances amounted to more than half of the year's income in Bogra, Tippera, Noakhali, and Malda, and to more than one-third in the three districts of the Chittagong Division, Gaya, and Bhagalpur. The district fund of Murshidabad closed with a deficit of Rs. 7,297, owing to the budget allotments for the year having been fully spent, while the actual receipts on account of cesses fell short of the estimate. The application for a loan of Rs. 15,000, made by the District Board to establish equilibrium between the receipts and expenditure, has since been sanctioned by Government, and the usual preliminary notification published in the *Calcutta Gazette*. In the cases of Gaya, Tippera and Noakhali, the large balances are adequately accounted for, but in Chittagong, Bhagalpur, and Malda there seems to have been no proper reason for not spending a large proportion of the balance during the year. The practice which prevails in some districts of District Engineers delaying their certificates of work done until so late in March that the contractors cannot be paid until after the close of the year should be put a stop to, as it falsifies and disarranges the budgets of both years, and involves the submission of revised budgets and reappropriation statements.

INCOME.

15. *Land Revenue.*—Agreeably to the instructions issued last year, the income previously shown under this head on account of sale-proceeds of trees, &c., recoveries of the cost of collecting road-cess arrears, and fees, fines, and forfeitures, has been transferred to head XXV—"Miscellaneous:" consequently the head of land revenue will in future disappear from the accounts.

16. *Provincial rates* (*Rs.* 35,60,402).—The amount shown under this head represents the receipts of the road-cess in each district, which are credited to the District Board, after deducting the cost of collection and revaluation. Compared with the figures for the previous year, the income derived from this source shows a decrease from Rs. 35,97,417 to Rs. 35,60,402; the decrease being largest in Champaran, where heavy arrears were collected in the previous year, and in Patna, where the cost of revaluation was deducted from the amount credited to the District Board.

17. *Interest.*—The increase under this head, from Rs. 674 in 1893-94 to Rs. 37,616 in 1894-95, is mainly due to the transfer of the interest on arrears of road cess from "Provincial rates" to this head, under the instructions issued by the Accountant-General, Bengal.

18. *Pounds.*—The number of pounds increased from 3,456 to 3,514. Of these, 3,401 were farmed and 113 managed direct. The receipts under this head amounted to Rs. 4,36,693, against Rs. 4,50,009, showing a net decrease of Rs. 13,316. This falling off is variously ascribed to bad seasons, to floods, to laxity in collecting, to the introduction of new pound forms and more stringent supervision, which tended to reduce competition and lowered auction-prices, to the fact that speculative bids were refused, and finally to the acceptance of bids which led to defaults and re-sales at much reduced rents. In these suggestions there is clearly a large element of guess-work, and all of them can hardly be correct. It seems, however, likely enough that the prospect of having to keep up more elaborate forms and to undergo more frequent supervision may have deterred some of the old farmers from coming forward to bid, and that their places have not yet been filled.

19. The system of farming pounds has been introduced everywhere, and only a few pounds are managed direct. In Champaran, where direct management had long been in force, the receipts have steadily declined, owing to the dishonesty of the pound-keepers, several of whom were prosecuted and convicted during the past year. The Board have now resolved to adopt the farming system. Attempts have been made throughout the province to improve the management of pounds by granting leases for three years to respectable men living in the neighbourhood of the pounds, and a fair measure of success has been attained, though in some districts it is said to be difficult to find suitable lessees.

20. The new pound forms prescribed in Government circular No. 3T.M., dated the 22nd May 1893, were introduced in almost all the districts. It is reported that this has been imperfectly done in the Howrah and Midnapore districts on account of the apathy and mismanagement of the Local Boards. Steps have, however, been taken by the Chairmen of the District Boards concerned to remedy the defect. In some of the districts complaints have been made that the forms are too elaborate for an illiterate pound-keeper, but, as was observed last year, pounds should not be let to illiterate men. In most districts, however, they appear to have worked well, and the farmers will no doubt soon get used to them. Any change of the kind is sure to be unpopular at first, but if the farming system is to be maintained, it is essential that effective control should be exercised, and this end can only be attained by means of well-devised receipts and forms, which render it possible to trace the individual cattle impounded.

21. The year under report shows an outstanding balance of Rs. 52,501, which indicates considerable mismanagement. If a deposit of a quarter's rent is taken and collections made regularly, there ought to be no difficulty in attaining as good results as in Monghyr and Birbhum, where the entire demand was collected, or in many other districts where only nominal balances remained outstanding. During the year regular inspections of pounds were made by officers of Government and of the District Boards. In Howrah these inspections disclosed serious neglect of rules, and the Chairman of the District Board has granted a couple of months' time to the Sadar Local Board to rectify these defects. In Rajshahi a member of the Board brought to notice the conduct of a pound-keeper in taking more than the authorized fines, and the offender was prosecuted and fined. Eight farmers of pounds in Dinajpur were prosecuted for neglect of duty during the year, and all of them were convicted. Some of the pound-keepers in Champaran were prosecuted to conviction for embezzling pound collections. The Chairman of the District Board of Saran finds that cattle-lifters in some cases use the pounds as a safe means of returning stolen cattle after black-mailing the owners. Some farmers of pounds in Puri were found to have entered false dates in their receipts, and were fined. One of them was prosecuted and was punished for having misappropriated impounded cattle.

22. *Education.*—The total receipts under this head increased from Rs. 45,561 to Rs. 54,953. To this increase all the District Boards have contributed except those of Hooghly, Jessore, Khulna, Bogra, Faridpur, Chittagong, Patna, Gaya, Shahabad, Saran, Muzaffarpur, Bhagalpur, Purnea, Malda, Cuttack, and Balasore. Compared with the previous year, the receipts in the Darbhanga, Champaran, Mymensingh, Dinajpur, Rangpur and Pabna districts show a considerable

increase, due to contributions from private persons and from Government, sale of manufactures turned out by the technical schools, and increased fees. A handsome subscription of Rs. 1,500 was paid by Raja Govinda Lal Bahadur to the Rangpur Technical School. The fluctuations in the other districts call for no remarks.

23. *Medical.*—Compared with the previous year, the total income under this head shows an increase, which occurred in all the divisions except Rajshahi. The decrease in the Rajshahi Division is due to the fact that the Shahazadpur dispensary remained closed throughout the year in consequence of the building occupied by it having been burnt down.

24. *Scientific and other Minor Departments.*—The income under this head was Rs. 5,425, against Rs. 4,689 in 1893-94. Receipts are reported from four districts only, viz., Birbhum, the 24-Parganas, Dacca, and Saran, and were on account of conservancy and sanitary arrangements made at various fairs in those districts.

25. *Miscellaneous.*—The income under this head amounted to Rs. 1,99,526, against Rs. 1,31,080 in the previous year. The increase, which occurred in every division except Rajshahi, is chiefly due to the inclusion for the first time under this head of the income previously shown under the head "Land Revenue" from sale-proceeds of trees, recoveries of cost of collecting road-cess arrears, and fees, fines and forfeitures. The decrease in Rangpur is considerable, and is due to the fact that Rs. 16,757, being the balance of the drainage fund formed by public subscription and lodged in the Postal Savings Bank, was credited to the district fund as miscellaneous receipts during the year 1893-94. There was a decrease of Rs. 1,729 in the receipts from staging bungalows, which was shared by all divisions except Dacca and Patna.

26. *Minor Works and Navigation.*—There was no income under this head in any division except the Presidency and Chittagong. In the former the receipts represent rents for a fishery in a drainage channel, and in the latter receipts hitherto shown under Land Revenue have, under the orders of the Accountant-General, Bengal, been transferred to this head.

27. *Civil Works, including Ferries.*—The income under this head amounted to Rs. 10,43,703, against Rs. 11,45,828 in 1893-94. The receipts are chiefly composed of tolls on ferries and contributions by Government or private individuals for the execution of particular works. These contributions amounted to Rs. 6,39,133, against Rs. 7,52,311 in the previous year. All sums granted for the execution of particular works to be carried out by local officers have been entered in column 36 of Statement II, column 67 being thus left to those contributions which are yearly allotted to balance receipts and expenditure. The receipts from ferries increased from Rs. 3,83,158 to Rs. 3,94,072. In the 24-Parganas the revenue from this source has fallen off continuously since 1890-91, although the number of ferries has increased. In anticipation of an increase in traffic, the Mymensingh District Board have taken up no less than 62 ferries, and the Commissioner suggests that, in order to bring all ferries in the district under the same management, they should also rent the ferries belonging to Government. In the Dacca and Chittagong Divisions attempts were made to lease ferries for longer periods than one year, but a difficulty was found in inducing suitable lessees to come forward. All the districts of the Patna Division show an increase except Patna itself, where the abolition of the Panapur ferry on the completion of the bridge and the adjustment of ferry deposits, wrongly credited as rent, produced a decrease of Rs. 9,483. In Muzaffarpur the causes which contributed to the improvement of revenue under this head were the establishment of eight new ferries, the transfer of a ferry from the charge of the Magistrate to that of the District Board, better settlements and more punctual collections.

28. In most districts attention has been paid to the instructions issued in last year's Resolution in regard to the inspection of ferries, the condition of boats, landing stages and approaches, and the conduct of farmers and their employés. The Commissioner of the Rajshahi Division has advocated the use, in ordinary rivers, of floating platforms on which a loaded cart can be driven, and in all parts of his division, except Rangpur, this system has been more or less adopted. The inspection of ferries in Dinajpur resulted in the prosecution

for neglect of duty of three farmers, all of whom were convicted. In Saran there was a complaint from one place that tolls were illegally levied from persons who forded the river without using the farmer's boat. The case, it is reported, is under investigation by the Magistrate. In Noakhali an Inspector of pounds and ferries was appointed, and abuses in connection with ferries have to a certain extent been checked thereby. The Lieutenant-Governor desires that in future every district officer will note how the system of unexpected inspection of ferries has worked.

29. *Contributions.*—The contributions to District Boards from Provincial revenues to maintain equilibrium between the receipts and expenditure of those bodies amounted to Rs. 5,02,999, against Rs. 4,79,149 in 1893-94. The increase was due to the special grants made for the promotion of primary education.

30. *Deposits and Advances.*—The sums deposited as security for payment of revenue by ferry farmers, contractors, and others, and the recoveries and adjustments on account of advances made from the District Fund, increased from Rs. 6,47,994 in 1893-94 to Rs. 7,20,264 in 1894-95. During the year under report the Dinajpur District Board drew the last instalment, Rs. 40,000, of the loan of two lakhs which they obtained from Government in 1890-91 for the construction of permanent bridges on the more important roads of the district. The sum of Rs. 30,000 shewn against Chittagong represents the loan taken by the District Board from the Court of Wards' Estates at 5 per cent. interest to meet the cost of the General Hospital to be constructed jointly by the Municipality, District Board, and the Port Trust.

EXPENDITURE.

31. *Administration.*—The expenditure under this head amounted to Rs. 2,94,974, against Rs. 2,98,493 in 1893-94. In the Presidency Division, the falling off is slight, and is mainly due to a decrease in the travelling allowance granted to the members of the Jessore District Board. In the Patna Division, where the decrease is largest, it occurred chiefly under audit and treasury establishments, and the charges on account of travelling allowances paid to District Board members, but it is also partly due to the saving in the salary of the Secretary to the District Board, Patna, and to the abolition of pound muharrirs in Saran. The rise in expenditure in the other divisions calls for no remarks, being mainly due to the grant of annual increments to employés, the payment of increased charges for establishment in offices of accounts, control and audit, and increased charges on account of travelling allowance to members of District Boards.

32. *Pension and Provident Fund Rules.*—As remarked in last year's Resolution, the rules for the management of a Provident Fund have been adopted by all District Boards. Pension rules for the benefit of those employés who have been transferred from Government service, or from service under the Road Cess Committees, have also been adopted in all districts, except in Bankura and Faridpur. The Lieutenant-Governor trusts that these two Boards will, without further delay, follow the example of the majority.

33. *Pounds.*—The expenditure on cattle pounds amounted to Rs. 27,215, being Rs. 260 less than in the previous year. The decrease is inconsiderable, except in Cuttack, where it fell from Rs. 4,961 in 1893-94 to Rs. 353, and was caused by the introduction of the farming system into the district. In the Patna Division there was a falling off of Rs. 1,783, which was due to reduction in charges for establishment in Saran, and also to the charges for the construction and repairs of pounds being less in several districts than in the previous year. In the Rajshahi Division the expenditure was Rs. 634 less than in the previous year, and was due to the abolition of the post of one of the two Inspectors of pounds and ferries in Rajshahi district. Dacca is the only Division where the expenditure on pounds shows a considerable increase over the figures for the previous year. Of this divisional increase of Rs. 5,490, the district of Mymensingh alone is responsible for Rs. 5,049, which was spent on erecting cattle pound sheds, and in providing the pounds with tariff boards. The fluctuations in the other districts do not call for special notice.

34. *Education.*—The expenditure on education amounted to Rs. 11,28,359, against Rs. 10,83,144 in the previous year, showing an increase of Rs. 45,215.

As in the last year, a considerable difference is noticeable in the district figures as given in Statement III and those given in the special Appendix B, the preparation of which was prescribed by the Lieutenant-Governor in 1893. The reasons for the difference are the same as those mentioned in last year's Resolution.

35. Examining the statistics in Statement III, it is found that there was an increase in the educational expenditure of all districts, except those named in the margin. The difference was inconsiderable in Saran and Purnea, and in Faridpur and Balasore is unexplained. The decrease in Hooghly was due to the non-payment of rewards for the lower primary scholarship and reward examinations held during the year, as the results of the examinations were only published just before the close of the year. The decrease in Tippera was caused by the transfer of the Elliott Artizan School with its grant to the control of the Artizan School Committee. In Noakhali it was due to the abolition of the technical school from 1st April 1894, as well as to reduced expenditure on the repairs of those model school-houses which had to be rebuilt after the cyclone of October 1893. Taking the expenditure on education by Divisions, it is noticed that there was an increase in all the Divisions, with the exception of Burdwan. In the Presidency Division the increase is marked in all districts except the 24-Parganas, and is chiefly due to the special grants made by Government during the year for the expansion of primary education in Nadia, Murshidabad, and Jessore, and in Khulna to the payment of the salary of inspecting pandits for the whole year, and not for a part of the year only, as in 1893-94, and to the payment of arrear bills of the grant-in-aid middle schools during the year. In the Bhagalpur Division it is said to be due to larger expenditure under the head of primary education. In the Orissa Division the slight increase in expenditure is the result of an increase in miscellaneous scholarships and primary schools.

District.		1893-94.	1894-95.
		Rs.	Rs.
Hooghly	...	37,004	27,711
Faridpur	...	28,742	27,518
Tippera	...	44,833	43,686
Noakhali	...	29,021	27,470
Saran	...	25,363	25,290
Purnea	...	24,645	24,640
Balasore	...	27,356	24,950

36. Taking, next, the figures of Appendix B, which give a more accurate record of the educational expenditure of the District Boards, the abstract in the margin shows for the past two years the expenditure under the various sub-heads given in that statement. From this it appears that out of the total expenditure, 47·7 per cent. was spent on primary schools, 22·04 per cent. on middle schools, and 21·1 on inspection. A comparison of the figures of the year under review with those of the previous year shows that there has been an increase under all the heads, with the exception of "High schools." The increase under "Inspection" is common to all the Divisions excepting Bhagalpur and Orissa. In the Burdwan Division the increase in inspection charges amounted to Rs. 1,535, and was due to the appointment of a new inspecting pandit in Birbhum, to grade increments earned by Sub-Inspectors, and to increased travelling allowance drawn by Sub-Inspectors and inspecting pandits. In Bankura it is due to the classification of the pension contribution of one of the Sub-Inspectors under this head. The increase in the expenditure on grants-in-aid to primary schools is

shared by all districts, except Birbhum, Midnapore, Hooghly, 24-Parganas, Dinajpur, Faridpur, Mymensingh, Darbhanga, Monghyr, Balasore, and Puri. The increase in Burdwan is reported to have been due chiefly to payments made on account of cheques amounting to Rs. 11,033 which were issued in the preceding year; but no explanation has been given in the case of the other districts referred to The increase under the sub-head "Miscellaneous" is due to the inclusion for the first time of Payments to abolished schools and Examination prizes and rewards under this head.

37. The following statement compares, for the past two years, the expenditure of each District Board on primary education and on education as a whole, and the percentage that the expenditure bears to the ordinary annual income:—

District Boards.	1893-94			Percentage of column 3 on column 2.	Percentage of column 4 on column 2.	1894-95.			Percentage of column 8 on column 7.	Percentage of column 9 on column 7.

The average expenditure on education incurred by the District Boards during the year was 21·5 per cent. of their ordinary income against 20·6 in 1893-94, and that on primary education 15·2 per cent. against 14·2. The highest place in respect of educational expenditure, as a whole, is taken by the District Board of Bankura, which spent 43·2 of its income on this purpose. Balasore, Pabna, Dacca, Cuttack, Howrah, and Puri devoted 30 per cent. or more of their income to this purpose, while nineteen other districts show an expenditure of 20 per cent. and over. In Gaya, Shahabad, Muzaffarpur, and Darbhanga the proportion was below 10 per cent of income. Turning to the proportion spent on primary education Bankura has a ratio of 30 per cent., while in seven districts the expenditure was 20 per cent. or more. In Gaya, Shahabad, Muzaffarpur, Darbhanga, and Bhagalpur it was below the prescribed minimum of 10 per cent., although the first four districts show a little advance when compared with the results of the previous year. In Bhagalpur, although the amount actually spent on primary education is larger, the proportion which it bears to total income is less than in 1893-94. The Lieutenant-Governor has now sanctioned a permanent increase, aggregating Rs. 31,000, to the grants of the most backward districts, which will place them in a position to do more for the advancement of primary education and which will be set apart for this purpose.

38. On the formation of District Boards in Bengal, the control over middle and primary education, which had hitherto been exercised by Government, was transferred to those bodies; and in order to secure the satisfactory performance of the duty thus imposed upon them, the services of 133 Sub-Inspectors of Schools of the Government establishment were placed at the disposal of the Boards, while at the same time grants sufficient to meet the charges on account of the pay and travelling allowances of those officers were allotted to the District Boards concerned. Schools within municipalities and cantonments were not affected by this order: the control of those institutions remained as before in the hands of the Education Department, and 25 Sub-Inspectors were retained in the Department for this work. Experience has now shown that the consequent separation of schools into two classes, and the maintenance of a double inspecting agency, which that separation entailed, led to waste of time, money, and power, as two different sets of officers have frequently to travel over the same ground. Moreover, the existence of this double agency has been found to militate against the successful working of the system of payment by results, now widely established in Bengal, for the complete success of which it is desirable that as large a number of schools as possible should compete for the available grants. The only possible solution of the difficulty was to bring the entire establishment of the Sub-Inspectors in the districts in which the Bengal Local Self-Government Act, 1885, is in force under one control, and it was obvious that this result could be secured in either of two ways—viz., (1) by the retransfer to the Education Department of the Sub-Inspectors of Schools transferred to the service of the District Boards, or (2) by the transfer to the District Boards of the remaining Departmental Sub-Inspectors. Having regard to the general consensus of opinion of the officers consulted, the Lieutenant-Governor came to the conclusion that the latter course was the more satisfactory one, and accordingly, the remaining Sub-Inspectors of Schools were transferred to the District Boards, with effect from the 1st April 1895, subject to the conditions (1) that the Boards must arrange for the inspection of schools within municipalities, cantonments, and Government estates by their Sub-Inspectors without further charge to the State, and (II) that the services of one Sub-Inspector should be lent to the Deputy Inspector in each district for a fortnight, or any longer period that might be necessary, after the 1st April in each year, to assist the latter in the compilation of his annual returns. Grants were also made to the District Boards concerned in order to enable them to meet the cost of salary and travelling allowances of the Sub-Inspectors of Schools thus transferred to their service.

39. There has been no change in the educational functions delegated to District Boards. The relations of the Boards with the Deputy Inspector of Schools have, on the whole, been cordial, and complaints against their action tend to decrease. It is, however, reported that the Howrah Board offered

"passive opposition" to placing a Sub-Inspector at the disposal of the Deputy Inspector for the preparation of the annual returns, and difficulties are said to have occurred in other districts. The Lieutenant-Governor trusts that no more will be heard of this, and that the District Boards will be careful to act up to the arrangement made when the services of the Government Sub-Inspectors were transferred to them. The Darbhanga, Cuttack and Puri Boards were late in submitting their reports. In Khulna there was delay in passing bills and in disposing of correspondence. The Burdwan Board is reported to keep no separate record of educational expenditure, which caused great difficulty in adjusting the accounts. The Director of Public Instruction will be asked to report more fully on this subject with a view to the amendment of the rules if necessary. Rule 91 of the education rules under the Local Self-Government requires the Boards to submit to the Inspector a quarterly statement of all educational expenditure, and it is obviously essential that they should keep whatever books and registers may be necessary to enable this statement to be punctually and accurately prepared. In Rajshahi objection was taken by Dr. Martin to the appointment of a Sub-Inspector on Rs. 40 on the ground that, before the passing of the Local Self-Government Act, the Department employed no Sub-Inspector on less than Rs. 50, and that this rule should be enforced even now, as the work of Sub-Inspectors requires experience and their pay should be sufficient to induce them to remain in their posts. Sir Alfred Croft observes that there is much force in these remarks and adds:—"It should be stated that two of the Sub-Inspectors under the Rajshahi Board used to get Rs. 100 and Rs. 75, respectively, and that their places are now being filled by two men on Rs. 50 and Rs. 40, so that the Board could have still effected a saving without reducing the initial pay to less than Rs. 50." The Lieutenant-Governor has directed the Board to carry out this suggestion. The Local Government cannot, under financial rules, create a new grade of appointment on Rs. 40 or any such figure without the sanction of the Government of India, and the same principle applies to the District Boards.

40. The details of the expenditure incurred by District Boards on primary education will be found in Appendix C. Taking the province as a whole, it will be seen that, out of the total of Rs 7,99,170 spent by District Boards on primary education in 1894-95, Rs. 5,12,294, or 64·10 of the whole, were paid direct to the schools; Rs. 1,19,517, or 14·95, were expended on the salaries of Sub-Inspectors, and Rs. 82,832, or 10·36 per cent., on the remuneration of the subordinate inspecting agency, while Rs. 33,716, or 4·21 per cent., were devoted to examinations, prizes, and rewards.

41. The Lieutenant-Governor regrets to have again to complain of discrepancies between the statistics contained in Statement B and those contained in the General Report on Public Instruction. The form given in Appendix B was devised for the special purpose of bringing the two sets of figures into accord. Although the Deputy Inspectors of Schools supply both sets of statistics, and elaborate instructions were issued by the Director with the object of rendering it impossible that any discrepancies should occur, these have failed to produce the desired effect, and the subject will have to be reconsidered in communication with the Director.

42. *Special schools.*—The Burdwan District Board continue to maintain a technical school at Burdwan, assisted by a contribution of Rs. 240 from the local municipality During the year under review a proposal was set on foot to re-open the industrial school formerly existing in Bankura. The District Board have guaranteed a subscription of Rs 600 per annum, and the municipality has been asked to contribute Rs. 400. The Rangpur technical school is said to be making fair progress, and the average number on the rolls rose from 73 to 90. The Board propose to have it affiliated to the Sibpur Engineering College. The District Board of Pābna maintain a technical school with a workshop attached to it, where practical instruction is given in carpentry and blacksmiths' work. At the Mymensingh school the numbers declined from 21 to 16 and the Chairman explains that the absence of any definite prospects for the boys after leaving the school has hindered pupils from joining. An application has accordingly been made to the Director of Public Instruction, through the Principal of the Sibpur Engineering

College, for the affiliation of the school to the artisan class of that College. The technical school at Barisal had 41 pupils on the roll. Sir Charles Elliott is glad to learn that the Committee have resolved to modify the rules with reference to his remark, when he visited the school, that it seemed to be losing its technical character and becoming a survey school. All the District Boards in the Patna Division, as well as those of Malda and Monghyr in the Bhagalpur Division, have offered scholarships tenable at the Bihar Industrial School. Five special schools were opened for the Kharwars on the Rhotas plateau, in the district of Shahabad. The District Board of the 24-Parganas maintain a model school for teaching carpentry at Sonarpur. The technical school at Purnea was, during the year under review, placed under the supervision of the District Engineer. The Elliott Artizan school at Comilla, which was formerly managed by the District Board, was transferred with its grants to the control of a separate Committee. The technical school in Noakhali was abolished from the 1st April 1894. The Balasore District Board contributed Rs. 120 to the Industrial School at Alipore. The District Boards of Howrah, Noakhali, Tippera, Backergunge and Puri granted scholarships for the education of students at the Sibpur College. The Midnapore Board offered a scholarship to the most proficient pupil of the Moisadal Raja's technical school who should join the Sibpur College after passing the Entrance Examination, but no one took advantage of the offer. The Noakhali Board has founded a scholarship tenable for two years at the Calcutta Arts School. The Cuttack District Board paid for three boys who are learning at the Jobra Workshops. On the whole, considerable progress seems to have been made towards imparting technical education to the masses. In districts where such schools have not yet been started, a beginning might be made on a small scale, keeping, however, always in view the principle that such institutions are intended for the boys of the artizan castes, and not for pupils from the ordinary educated classes, who are not likely to follow these trades when they grow up.

43. *Female Medical Education.*—Scholarships were granted to female medical students by the District Boards of the 24-Parganas, Birbhum, Mymensingh, Faridpur, Backergunge, Patna, Shahabad, Saran, Champaran, and Cuttack. In Jessore, Burdwan, Chittagong, and Puri scholarships were offered, but no candidates came forward. The Gaya District Board spent Rs. 491 on the training of *dais*. The Lieutenant-Governor accepts these arrangements as evidence that the Boards realise their obligations in the matter of female medical education.

44. *Medical.*—The total outlay under this head amounted to Rs. 1,51,912, being Rs. 22,001 more than in the previous year. The excess occurred chiefly under the head of hospitals and dispensaries, and was distributed over all districts, except Bankura, Midnapore, Murshidabad, Khulna, Dinajpur, Bogra, Pabna, Backergunge, Tippera, Patna, Shahabad, Malda, and the districts of the Orissa Division. In none of these, however, except Murshidabad, Pabna, Tippera, Patna, and Cuttack, was the reduction of expenditure material. The decrease in Murshidabad was due to the fact that the Board paid in 1893-94 arrears of salary due to the Assistant Surgeon attached to the Jangipur Dispensary, while in the year under report no such payment was made. In Pabna the falling off was due to the Shahzadpur Dispensary having remained closed throughout the year, as it was destroyed by fire in April 1894. The decline in expenditure in Tippera occurred under the head of repairs, as a large sum had to be spent on this account after the cyclone of October 1893. The decrease in Patna has not been explained, and that in Cuttack is said to be due partly to the abolition of the Jagatsingpur Dispensary and partly to delay in the supply of English medicines. All divisions, except the Presidency, Chittagong, and Orissa, show increased expenditure on hospitals and dispensaries. The proportionate increase is largest in the Burdwan Division, where the Hooghly District Board opened two new dispensaries, contributed Rs. 1,000 to the Branch Dufferin Hospital at Chinsura, and also helped to maintain the Mondlai Dispensary built from the bequest of the late Dr. Bholanath Basu. Two dispensaries were opened in the Howrah district, at Amragori and Syampur, and a donation of Rs. 200 was made to the Howrah General Hospital. The Lieutenant-Governor is glad to notice that Babu Iswar Chandra Hazra of

Amragori has contributed Rs. 12,000 for the maintenance of the dispensary at that place. In the Rajshahi Division five new dispensaries were opened by the District Board of Rajshahi, and two by the District Board of Bogra, which also constructed a new building for the Dispensary at Buriganj. In the Dacca Division new dispensaries were opened by the Boards of Mymensingh, Backerganj and Faridpur, but the Dacca Board spent only Rs. 477, or 39 per cent. of their income, on all medical purposes, which is by far the smallest sum expended by any Board in the province. No sufficient explanation is given of this neglect of an obvious duty, and the Lieutenant-Governor trusts that the Board will take steps to increase their contributions under this head. The Chittagong Board opened a new dispensary at Satkania, and contemplates establishing three more. A new dispensary was opened during the year by the Noakhali Board, and two others are under construction. Two new dispensaries were opened in the Monghyr district, and the Board took over the sole management of the indoor dispensary at Beguserai. During the year under report the District Board of Puri was relieved of its contribution to the Satpara Dispensary, which exists chefly for the benefit of the Salt Department, and the contribution paid by it was refunded by Government. The Board has since taken over the dispensary at Pipli. Altogether there were during the year 67 dispensaries maintained chiefly from District Funds at a cost of Rs. 55,194, without counting those institutions which are chiefly maintained from other sources, but which receive help from the District Funds.

45. The District Boards of Rangpur, Pabna, Gaya, Mymensingh, Noakhali and Chittagong retained the services of midwives in their districts, and the District Boards of Burdwan, Rajshahi, Jalpaiguri, Shahabad, and Faridpur contributed towards the pay of the midwives entertained by the local municipalities. In Tippera the District Board contributed Rs. 50 a month to the Faizunnissa Zenana Hospital for a lady-doctor; in Mymensingh, a lady-doctor, trained at the cost of the Board in the Campbell Medical School, was placed in charge of the Female Hospital at the head-quarters station; a lady-doctor on Rs. 40 and a house allowance of Rs. 15 was placed by the Shahabad District Board under the orders of the Civil Surgeon; Rajshahi gave a monthly allowance to a lady-doctor practising at Boalia, and Burdwan contributed half the pay of the lady-doctor attached to the Municipal Dispensary. The Bankura District Board paid Rs. 275 to the Bankura branch of the Countess of Dufferin's Fund for the maintenance of the zenana hospital at the head-quarters of the district, and the Hooghly Board also contributed Rs. 1,000 for the maintenance of the Branch Dufferin Hospital at Chinsura.

46. *Sanitation.*—The total expenditure on sanitation rose from Rs. 84,166 in 1893-94 to Rs. 86,585 in the year under report. The figures in the margin show how these amounts were apportioned among the various sub-heads of expenditure in both years.

	1893-94.	1894-95.
	Rs.	Rs.
Improvement of water-supply ...	43,177	63,768
Ditto village sites	870	2,598
Conservancy of towns and villages ...	751	457
Sanitation at fairs	7,192	7,560
Other sanitary expenditure	32,175	12,202

47. From these statistics it appears that a substantial advance has been made during the year under report towards the improvement of water-supply. The largest expenditure under this head has been incurred in the Presidency and the Patna Divisions, where the amounts allotted were more than double those of the previous year. Rajshahi is the only Division where there has been a decrease under this head. It is, however, reported that the Rajshahi Board provided Rs. 6,000 in the budget for sinking wells, and estimates for three wells were sanctioned, but the expenditure was small, as the works could not be completed during the year under report.

48. The figures of the Chittagong Division are misleading. In Statement IV only Rs. 27 has been shown as the amount spent by the Chittagong Board in the improvement of water-supply, although, as a matter of fact, Rs. 5,000 was actually spent during the year in forming reservoirs for drinking-water. This amount was not included in the accounts, as, under the advance system followed in the district, the sums expended had not then been adjusted. In point of fact excellent work has been done in the Chittagong Division in the way of improving the water-supply. In Chittagong itself the District Board have drawn up a comprehensive scheme for the construction of reservoirs

and wells, and this is being worked up to as funds are available. In Noakhali bodies known as village Sanitary Boards have been formed in the interior with the sole object of keeping particular tanks clean for drinking purposes. In many cases this is done free of cost, and the recorded outlay on water-supply is therefore no index of the amount of improvement effected. The example of Noakhali is one which may well be followed in other districts. The formation of voluntary Committees is probably the best means by which to bring home to the people the advantages of pure water and clean surroundings, and to prepare the way for a further extension of Union Committees. The main defect in the existing methods of providing for rural water-supply seems to be the great variations in the expenditure of different districts and of the same district in different years. Thus, during the past year, Bankura, Howrah, Jalpaiguri, Malda, and Puri spent absolutely nothing on this object, while the expenditure in Rajshahi, Dinajpur, Bogra, Tippera, Shahabad, and Balasore was less than Rs. 500. The Shahabad District Board, besides spending Rs. 425 on improvement of water-supply, contributed Rs. 4,000 towards the maintenance of the Arrah water-works. Under the special orders of Mr. Forbes, the Commissioner, Rs. 17,160 was spent by the Boards of the Patna Division in constructing 24 roadside wells, in repairing 362 similar wells, and in providing 50 wells with buckets, chains, and lifts for drawing water. Absolute uniformity in a matter of this kind is of course out of the question, and the Lieutenant-Governor equally recognises the impossibility of expecting District Boards to devote a large proportion of their incomes to this purpose. In order, however, to secure that something, however little, should be done every year, it seems to His Honour that every District Board might properly set apart at least the sum of Rs. 5,000 a year for the improvement of water-supply to be spent either in the digging or improvement of wells, or in the excavation or restoration of tanks to be reserved for drinking purposes only. The amount suggested is rather more than double the amount actually spent during the past year; but it is very small when compared with the urgency of the want and the extent of the area to be served. The Boards will doubtless find means of making the money go as far as possible by enlisting the aid of voluntary Committees, as is done in Noakhali, or by distributing their allotments in the form of small grants in aid of village funds, as is suggested by the Commissioner of the Presidency Division.

49. The expenditure incurred on other sanitary objects amounted to Rs. 12,201, against Rs. 32,175 in the previous year, when the Mymensingh District Board contributed Rs. 20,000 to the Rajeswari water-works at Nasirabad. The amount spent in the past year includes Rs. 1,992 laid out on drainage works in Rangpur, Rs. 928 for the clearance of the Santi nadi in the 24-Parganas, Rs. 1,209 for drainage in Dinajpur, and Rs. 2,284 paid as subsidy to the steamer services between Malda and Rajmahal and Rampur Boalia. The last item, though legitimate enough in itself, should not have been shown under the head of sanitation.

50. *Stationery and Printing.*—There was an increase of expenditure under this head, amounting to Rs. 5,186, which was largest in the districts of Shahabad, Purnea, and Cuttack. In the case of the first two, the increase was due to the introduction of the new pound forms, and in that of the latter to the receipt during the year of forms which were indented for in the previous year, which largely swelled the expenditure. The fluctuations in the other districts do not call for any special notice.

51. *Miscellaneous.*—The expenditure under this head fell from Rs. 63,644 to Rs. 53,319 in the year under report. The outlay on serais and dák bungalows decreased by Rs. 393, while Provident Fund contributions increased by Rs. 3,362. The decrease in the 24-Parganas is due to a change in the classification of charges for planting trees on the sides of district roads. In Bankura the decrease is marked, because expenditure incurred in 1893-94 on account of fees on processes issued from the revaluation office did not recur. In Burdwan the cost of acquiring a site for and constructing a dák bungalow at Asansol, led to extraordinary expenditure in 1893-94, which was not repeated in 1894-95. Similarly in Chittagong, the apparent saving of Rs. 7,063 is due to the payment of Rs. 9,000 the year before to a contractor under a decree, while no such charge was incurred during the year under report. The decrease

in Puri is said to be partly due to the fact of the Board's contributions to the Provident Fund for some of their employés having been in abeyance.

52. *Famine Relief.*—The expenditure on famine relief amounted to Rs. 26,621, of which Rs. 16,113 was spent under Public Works by the Darbhanga District Board. No particulars of this are given in the report, and the Commissioner says that no relief works were found necessary during the year; it is probably a charge on account of works executed in 1892 or 1893 and not brought to account at the right time. In Cuttack Rs. 5,179 was laid out on relief in the north-eastern part of the district on account of the high floods in July 1894. At first a food-kitchen was opened, but was soon closed, and gratuitous relief given in money and grain doles, work being also provided on certain roads. The District Board of Tippera distributed Rs. 3,553 to distressed persons during the late scarcity, and the Faridpur Board advanced Rs. 1,563 to certain philanthropic persons in the Madaripore subdivision for the relief of special cases of distress. It was mostly used for the employment of distressed women on *dhán* husking. Relief works were also undertaken in Monghyr on account of the flood of the river Ganges, which caused heavy loss, and scarcity was also felt in some parts of the Gogri and Sadar thanas of that district. Relief works were started on roads and charged to civil heads of the budget; the Collector gave out taccavi advances to the extent of Rs. 17,000; and Rs. 213 was spent on gratuitous relief.

53. *Civil Works.*—The following statement compares the expenditure under the head of civil works during the past two years :—

YEARS.	Ferry establishment, contingencies and refunds.	Original works.	Repairs.	Establishment and contingencies.	Tools and plant.	Water-supply and water-works.	Drainage works.	TOTAL.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1893-94	48,563	13,09,182	21,77,115	5,98,491	24,660	1,55,699	8,674	43,22,384
1894-95	38,608	12,23,763	22,09,255	6,27,780	25,144	40,725	7,303	41,72,578
Difference	—9,955	—85,419	+32,140	+29,289	+484	—1,14,974	—1,371	—1,49,806

The total expenditure shows a decrease of Rs. 1,49,806, to which all the heads in the table contribute, excepting repairs, establishment and contingencies, and tools and plant. The largest decrease is noticeable under "water-supply and water-works," and is due to there having been no expenditure under this head during the year under report comparable to that of Shahabad, of which in 1893-94 contributed Rs. 1,00,000 for the Municipal Water-works at Arrah. The expenditure on original works and repairs (columns 3 and 4) is divided thus between Communications and Buildings :—

	COMMUNICATIONS.		BUILDINGS.	
	Original works.	Repairs.	Original works.	Repairs.
	Rs.	Rs.	Rs.	Rs.
1893-94 ...	10,29,188	20,22,672	2,79,994	1,54,433
1894-95 ...	10,08,267	20,42,791	2,15,496	1,66,464

Under both heads the expenditure on original works is less and that on repairs more than in the preceding year. Under original works, the gross expenditure on which has fallen off by Rs. 85,419, the largest expenditure was incurred in the districts named in the margin. In the 24-Parganas the metalling of the road between Barasat and Barrackpore was nearly completed, the amount of expenditure during the year being Rs. 9,830. In Murshidabad and Khulna the expenditure was more than double that of the previous year, and comprised in the former district the raising of certain main roads and the construction and repair of bridges, and in the latter the making of light iron bridges over several khals. The Victoria bridge on the road from Burdwan to Katwa was completed and opened for traffic. The expenditure in Midnapore shows an increase of Rs. 17,829, which is reported to have been spent for the most

			Rs.
Muzaffarpur	...	...	1,05,603
Mymensingh	...	...	89,680
Backergunge	...	...	71,685
Gaya	...	...	67,977
Saran	...	...	64,646
Dinajpur	...	...	60,439
Jalpaiguri	...	...	56,584
Monghyr	...	...	56,166

part in replacing the wooden superstructures of some of the important bridges by iron girders, and in purchasing a house for the District Board's office. In Rajshahi office buildings for three Local Boards were constructed, two of which were completed during the year. The thatched boarding-houses attached to the Technical School having been burnt, substantial corrugated-iron sheds were constructed at a cost of Rs. 2,837. In Pabna the construction of two wings to the zilla school building was completed during the year. In Dacca the new female cottage ward at the Mitford Hospital was constructed, and a considerable sum was spent in constructing and bridging the district roads. In the Mymensingh district important works were carried out on behalf of Government in the shape of new cutcherry buildings at Jamalpur and Kishoreganj, and several roads and bridges were constructed. In Backergunge the quadruple munsifi at Patuakhali was completed, and the subdivisional residence at Patuakhali has been in progress. Several bridges were also constructed during the year. In Saran the expenditure on original works, as compared with last year, has nearly trebled. Several roads have been raised, metalled and bridged, and a bridge at Mushruk has been finished since the close of the year, supplying a link in the traffic between the grain-producing districts of Nepal and Chapra. The important bridge across the Punpun river in Patna was completed and opened to traffic during the year, and two bridges were constructed on the Bakhtiarpur-Bihar road. In Gaya the Ghumghar bridge is in hand. Owing to the unwillingness of the District Board of Monghyr to contribute more than Rs. 5,000, the important project for a bridge at Jamuia over the stream dividing the districts of Monghyr and Gaya had to be abandoned. The Lieutenant-Governor trusts that the Monghyr Board will reconsider the matter, for, if this river is spanned, there will be direct communication between Gaya, Nawadah, Secundra, and Jamui on the East Indian Railway. The Champaran Board constructed some bridges on the Motihari-Dhaka road, which was partly carried away in last year's flood. In Muzaffarpur, where the expenditure was highest under this head, the District Board have taken over the Municipal road from the station of Muzaffarpur to the Korlahiaghat bridge, which was washed away in the heavy floods of 1892-93. This road has been raised and metalled throughout, and it is proposed to construct a pontoon bridge over the Little Gandak, for which the Board have taken a loan of Rs. 80,000 from Government. Several other important bridges have also been constructed. The district of Darbhanga is gradually recovering from the former drain upon its resources; but as the District Board has to repay annually a large instalment of the loan granted to it, it will be unable to carry out any original work of importance for some time to come. The Board has, nevertheless, constructed several bridges, among which the one over the Dhoi nala has been altered and renewed at a cost of Rs. 22,750.

54. An examination of Appendix D shows the following results:—The mean provincial percentage of cost of civil works on total expenditure (column 9) is 62·8, the maximum (67·5) occurring in the Bhagalpur Division, and the minimum (50·5) in Orissa. Among districts Muzaffarpur shows the highest percentage (76·6), while Shahabad and Monghyr come next with 71·6 and 71·4 respectively. Turning next to the percentage of cost of establishment on total expenditure (column 10), the rate for the whole province is 9·2, against 8·8 of the last year, but in 13 districts the proportion exceeds 10 per cent. and in Bhagalpur, stands as high as 14·8. Again, while from column 11 it appears that the provincial average is 43·5, in Hooghly, Jessore, Rajshahi, Patna, Champaran, and Muzaffarpur the District Engineer receives as salary more than half the total sum shown as cost of establishment for the year. In Champaran his salary comes to 73·1 per cent. of the whole, and in Cuttack and Balasore the ratio is nearly 60 per cent. In column 12 of the statement, the provincial mean ratio of cost of establishment to expenditure on original works and repairs is shown to be 17·9, but it is exceeded in 21 districts, the highest place being taken by the Puri District Board (36·77 per cent.). Lastly, column 13 shows the provincial mean ratio of the District Engineer's salary to expenditure on original works and repairs to be 7·8, but 10 per cent. is exceeded in 10 districts, the first place being taken by Puri.

55. *Village roads.*—The statement in the margin shows the outlay on village roads in each Division during the past two years. In the Burdwan Division the Local Board of Suri undertook the repair of 36 roads, but only completed one, while the Rampur Local Board did work costing Rs. 1,545, but only Rs. 2 was actually brought into the accounts, because the District Engineer failed to have the works checked and the bills sent in at the proper time. In Howrah, Monghyr, Malda, and Chittagong the repairs were largely undertaken by planters and other resident gentlemen, and in Rajshahi the Chairman of the District Board reports that in his tours of inspection he has noticed excellent work done on village roads by both European and native gentlemen in their private capacity. Out of 1,911 miles of village roads in the Dacca Division, 1,585 miles are in Mymensingh, while Faridpur has only 33. Large balances remained unadjusted in Midnapore, and the matter is now under inquiry. The increase of Rs. 6,051 in Cuttack is due to the construction of 19 new village roads by the Local Board, five of which were taken up as relief works. The largest expenditure on village roads in any one district was Rs. 23,439 in Mymensingh, and the lowest (Rs. 303) in Jalpaiguri. As was remarked last year, the mileage cost of village roads varies greatly. In Champaran it cost Rs. 7-8 to maintain a mile of village road, while in the Ghatal subdivision of Midnapore the corresponding figure was Rs. 118. District Boards should, under the guidance of the Commissioner, frame a rule that roads which cost more than a certain sum to keep up should be classed as district roads.

	Expenditure.

Orissa "	17,243	22,339
Total ...	3,55,297	3,36,489

56. *Water communications.*—The outlay under this head during 1894-95 was trifling, but money was usefully spent by some District Boards in deepening, clearing, and improving channels. The Lieutenant-Governor is glad to notice that the members of the Dacca District Board have taken up the question of the silting up of the Buriganga river, on which the town of Dacca stands, and the maintenance of which is important for sanitation no less than for navigation. Nawab Ashanullah Khan Bahadur has, with his usual liberality, volunteered to contribute towards this work. In Noakhali the improvement of the Nadona khal, an important water-artery, has been pronounced practicable by the Chief Engineer, and will, it is reported, be begun as soon as the country dries.

57. *Steam communications.*—The District Board of Dacca still maintains a steam ferry between Narainganj and Munshiganj. The receipts, it is said, cover the annual cost of maintenance, and the service is much appreciated by the people. In Backergunge the subsidy to the steam service between Barisal and Khulna was reduced from Rs. 6,000 to Rs. 5,400. During the year no payment was made to the I. G. S. N. Company for their steamer service between Barisal and Chandpur, with a branch to Madaripur, as they supplied no statement of the arrivals and departures of their steamers. The Malda District Board contributed to the cost of the steam service between English Bazar and Rampur Boalia, the total amount paid being Rs. 1,200. A further subsidy of Rs. 1,084 was given by the Board during the year to the farmer of the Rajmahal ferry, for running a steamer between Rajmahal and English Bazar. The two steamer services in Tippera, one from Maniknagar to Gokarna, and the other from Chandpur to Hajiganj, were discontinued during the year, as they proved unprofitable to the Company. That between Noakhali and Barisal was maintained at a monthly cost of Rs. 200 a month, but the service between Sandwip and the mainland could not be improved, as the river is dangerous in the south-west monsoon. The Lieutenant-Governor is glad to notice that this question continues to engage the attention of the Noakhali Board. Steamer communication was maintained between Pabna and Kushtia for a part of the year on payment of a monthly subsidy of Rs. 300. The total outlay incurred by the District Board of Pabna was Rs. 1,950 during the year.

58. *Miscellaneous Public Improvements.*—During the year under report the river Kusi in Purnea, which has for sometime past been threatening the district with floods through several of its new off-shoots, was surveyed at an estimated cost of Rs. 7,800, of which Government contributed Rs. 2,800, in addition to the pay of the Engineer. The Belwa embankment, which protects Purnea from the overflow of the river Panar, was maintained at a cost of Rs. 3,669, which was levied from the owners of the lands benefitted by the work. In Faridpur the District Board had to pay Rs. 1,055 in fulfilment of the guarantee given to the Telegraph Department on account of the Madaripur telegraph service, and in Backergunge the jetties at Bhola and Patuakhali were repaired at a cost of Rs. 205. Considerable attention is reported to have been paid in almost all districts to arboriculture, and money was spent in planting and maintaining trees along the sides of roads. In Monghyr no less than 22,000 trees on road-sides are now maintained, and the sale of the fruit annually yields about Rs. 250. In Burdwan the expenditure on arboriculture amounted to Rs. 2,063, and in Pabna to Rs. 2,011.

59. *Railway Feeder Roads.*—Lists of projected feeder roads to the Eastern Bengal State Railway and the Bengal Central Railway have been prepared by the Public Works Department, and an officer of that Department will be deputed to survey these and prepare estimates of their cost. The work of construciton will be entrusted to the District Boards, and grants will be made to them from Provincial Revenues for this purpose, which it is hoped they will be able to supplement from their own funds. Something has already been done, though in a desultory and unsystematic fashion, towards carrying out this policy in certain districts, and as soon as the scheme described above has been completed, further progress may be looked for. In Nadia, for example, the District Board allotted Rs. 2,371 for the construction and improvement of five unmetalled feeder roads, on four of which some expenditure was incurred during the year. In Burdwan proceedings for the acquisition of land for a feeder road from the village of Devipur to the Railway station, have been stopped in consequence of the death of its chief promoter, Babu Kalidas Sinha. An effort is being made to obtain the necessary funds from other local magnates. In Birbhum eight miles of the road connecting the Sainthia Railway station with Suri were metalled during the year. In Dacca several roads were improved, and iron pipe drains and wooden bridges for the discharge of rain and flood water provided which will make these roads fit for traffic throughout the year. The important railway feeder road from Sripur station to Mathajuri, taken in hand during the previous year, was completed. In Mymensingh the feeder road from Kalibazar to Boilor was completed, and that from the same station to Iswarganj was commenced. The bridging of the Mymensingh-Porabari road was also undertaken during the year. A detailed survey was made for a raised and bridged road costing Rs. 80,682 from Mathajuri to Tangail, but the Board found the project beyond their present means. The Bhagalpur Board has sanctioned two fair-weather roads, to the Railway station at Sabour on the East Indian Railway and to Balua road station on the Tirhoot State Railway. In Purnea a feeder road from the Sonaili Railway Station to Pranpur is under construction. The total outlay on this road up to 31st March 1895 was Rs. 20,311, of which Rs. 11,463 was paid during the year. Another feeder road was constructed in this district by the Kishanganj Local Board at a cost of Rs. 203. In Tippera estimates for four new roads were sanctioned, and the works will be taken up on receipt of Government sanction to the projects.

60. *Railways and Tramways.*—In May last the District Board of Burdwan proposed to take up a scheme for a steam tramway or narrow gauge railway between Burdwan and Katwa and were prepared to offer certain guarantees. It is understood, however, that the Government of India intend that this line shall be constructed as part of the East Indian Railway. During 1893-94 the District Board of Bhagalpur proposed to grant a concession to use the road from Bhagalpur to the Sonthal Parganas for the Bhagalpur-Ahmadpur Railway promoted by Sir William Hudson. The project has since passed into the hands of the East Indian Railway and the alignment has been surveyd. The District Board of Birbhum has been asked to state what assistance they can

give towards the lower section of the line which will connect Suri with the East India Railway, superseding the scheme of a tramway from Suri to Sainthia. The proposal to construct a steam tramway on the district road from Barasat to Basirhat with a branch line from Bremangar to Baduria, aggregating 32 miles in length, under a guarantee from the District Board of the 24-Parganas was approved by the Board, but the negotiations with the contractors fell through, and fresh tenders have since been invited. A similar tramway from Ranaghat to Krishnaghar *viâ* Santipur, in the district of Nadia, will, it is reported, be commenced before the close of the current year, the preliminaries having been settled by the Board with the promoters of the scheme, Messrs. Martin and Company. The projected tramways from Howrah to Sheakhala and Amta have been sanctioned and are under construction: they receive guarantees from the District Board.

63. *Drainage.*—In the 24-Parganas Rs. 938 were spent in the improvement of the Sunti Nadi in the Barasat subdivision by removing obstructions from the channel to a uniform width of 20 feet for a distance of 10 miles. This is stated to have rendered the locality more healthy, and it shows how much can be done at a moderate cost to set stagnant water flowing and to remove the conditions which generate malarial fever throughout a large area. In Murshidabad Rs. 627 were spent in maintaining two drainage cuts. In Serampur the scheme for the canalization of the dead river Kausiki, about 14 miles long, is still pending for want of information on certain points, although Government has expressed its willingness to carry out the work and include it in the Eden Canal system, on condition of the District Board contributing half the cost. In Rajshahi a project was carried out for re-excavating the Putia drainage channel. In the Chittagong Division Rs. 1,894 was spent on drainage, and the Commissioner observes that in constructing the line through the Kolidaha swamp in Noakhali, the Railway have completely drained and reclaimed the swamp at a cost Rs. 2,000.

64. *General remarks.*—The Lieutenant-Governor will conclude this Resolution by reproducing the comments of Commissioners on the working of the District and Local Boards in their divisions during the year.

The Officiating Commissioner of the Burdwan Division writes:—

The following remarks have been left by Mr. Dutt, as Commissioner of the Division, for the year:—

"The District Boards have done their work fairly well throughout the Division, and no instance of friction or specially bad work came to my notice within the year. Local Self-Government has been a success in these provinces, and it is a distinct gain in the cause of good government to secure the co-operation of representative non-official gentlemen in our administrative work."

I am not disposed to go quite so far as my predecessor in these views, for I question whether any such conspicuous advantage to the administration has been gained by the introduction of Local Self-Government as he believes. Doubtless much good work has been done by District Boards, but it would probably have been done equally well under the old régime. The real advantage of the system lies, not in better administration but in the practical education in the management of local affairs which it affords to those who share in the work, and in the opportunities of obtaining advice which it gives to the District Officer. But I desire to add a word or two in acknowledgment of the good work done by the Sub-Committees of a District Board—work which is often tedious and disagreeable, but which has to be done by someone. The labours of the Finance Sub Committee in auditing the accounts of Local Boards and in examining the details of the budget often make large demands on the time of men, most of whom have little leisure. So, again, much time is given in some cases by the Education Committee to the consideration of questions arising from the numerous schools in the district. Mr. Windsor has correctly pointed out that the duties of the Board are consultative and not executive: those functions are exercised by the working triumvirate of Chairman, Vice-Chairman and District Engineer, with whom I might also associate the Deputy Inspector of Schools and the Civil Surgeon.

The work of the Local Boards was not so successful, chiefly because they have not enough work to interest them. As a reference to the discussions connected with the introduction of Local Self-Government will show, Local Boards are not really an integral part of the machinery of the scheme, and it has from the first been found difficult to assign to them their proper place. If they are to have enough work to interest and employ them, the District Board must divest itself of some important functions, which it had usually much better retain. If sufficient powers are not granted them, they obviously lag superfluous on the stage, and their consciousness of the fact does not tend to rouse their interest in such duties as do fall to

their lot. My predecessor shares these views, but he considers that Local Boards can be entrusted with useful and interesting work as soon as the work of village sanitation is begun.

Mr. Westmacott, Commissioner of the Presidency Division, observes:—

As remarked in my General Administration Report for the past year, it may be said generally that the District Boards are of some use as consultative bodies, but the work is really done by the Magistrate of the district as Chairman, and the quality of the executive work depends upon the character of the District Engineer and his loyalty to the Magistrate and Chairman. Had it not been for these officers, everything would have collapsed. The office work is supposed to be supervised by the Vice-Chairmen, some of whom look after it, and some do not. The executive work is done very much more expensively than it used to be when the ferry fund was administered by the Magistrate, and not more efficiently. The contractors and subordinate officials must be making large fortunes. I cannot but think that native members of the Board, who know what work ought to cost, could effect large reductions of expenditure if they tried. I have received a most unfavourable impression of the work of the Local Boards in the Division generally. Their management of pounds and of petty roads has been feeble and incompetent in the extreme, and I consider myself justified in pronouncing that these bodies are of no use whatever, and had much better be abolished. It is true that they have not been asked to do much, but what little has been entrusted to them, has been so very badly done, that it would be absurd to extend their functions.

The following are the comments of Mr. Nolan, Commissioner of the Rajshahi Division:—

In my opinion the Boards worked well during the year. The chief drawback was due to the many changes made in the office of Chairman, by the transfer of District Officers. The main business was done by these officers, and the degree of their efficiency always indicates that of the Boards.

The Commissioner of the Dacca Division (Mr. Luttman-Johnson) remarks:—

There can be no doubt that the District Boards as District Councils are a success in this Division. I do not know how they would manage without the official Chairmen. Under the guidance of the official Chairmen, and subject to the limitations prescribed by law and rule, they have generally proved useful consultative bodies. The neglect of towpaths and dispensaries by the Dacca Board is an exception to the rule. I regard the devolution of primary education to the more local Subdivisional Boards as a distinct step in advance. And I would like to see the Subdivisional Councils gradually take the place of the District Councils, as they do in the adjoining district of Sylhet, where a District Council never formed part of the scheme.

The Commissioner of the Patna Division (Mr. Forbes) records his opinion as follows:—

"On the general subject of the working of Local Self-Government institutions, I beg to reproduce below *in extenso* the remarks I made in my last General Administration Report:—

"'It is not easy to give one's opinion in a condensed form, and without writing an essay on the progress and success, or otherwise, of the system of Local Self-Government in this country. Putting the matter as shortly as I can, my own opinion is that the experiment has to a certain extent been a success, though not in the way hoped for by its originators. Experience of the working of the system brings into relief the fact that although the different local bodies are, as a rule, extremely useful as consultative bodies and in strengthening the hands of the executive, yet, with a few notable exceptions, they are not fit, and probably never will be fit, to be left to manage their affairs themselves.

"'Though I thus feel forced to admit that whatever hopes the founders of the scheme had of their *alumni* ever being able to work alone have not been realized, yet I think that the scheme has certainly succeeded in being of use, although not in the way anticipated. The District Boards have certainly been an undoubted success, in the *rôle* of advisers and upholders of the executive; and the system itself is a guarantee that everything is done *coram publico*. It ensures good counsels (or at least discussion) and publicity. That the members do not individually take part in the active work, or only to a very small degree, does not matter. The object is to get the work done, and it is done, and the Board see that it is done; and their usefulness is thus complete.

The Commissioner of Chittagong (Mr. Oldham) makes the following observations:—

"Of the Local Boards, of which there are only the three in Tippera, it is enough to say that they have done all that was required of them, and as well as could be expected. They have neither status nor scope enough to be councils analogous to the District Board, while their jurisdictions are far too large for them to be local self-governing bodies like the village unions, now for the first time created, the working of which will be watched with great interest.

"The three District Boards have again done very well, and as this has been the opinion consistently recorded about them by each of the many different Chairmen who have presided over them for the last five years and more, it may be taken that they are established working bodies, with considerable continuity, full of interest in what they have to do, capable of much independence, able to stand criticism, and important powers in the tract of country which they administer. There are several local reasons for these Boards having been so uniformly successful. They have on the whole been very well led. Their Vice-Chairmen have been gentlemen of exceptional capacity, public spirit, and energy. Except for the very modified system affecting a portion of the Tippera District Board, they are not elective, and are free from the jealousies attending that system, while they embrace, the District Officers believe, the most capable members of the community who are found willing to serve. They are free from other jealousies because of the absence of aristocratic exclusiveness, the equal diffusion of wealth, and the comparative social equality which prevail. The prevalence of Islam accounts no doubt for this latter feature.

"The anomalous feature in the constitution of those Boards is the wide area entrusted to them, and the consequent want of knowledge among their members of the needs and circumstances of the people and tracts which they have to administer.

The Commissioner of the Bhagalpur Division (Mr. Toynbee) makes the following remarks:—

"It is well known, as the Chairman of the Purnea District Board observes, that the work of the Local Boards is done entirely by the Chairman and Vice-Chairman: all depends upon their selection. It is to be regretted that many of these honorary elected appointments are made simply on personal consideration, and not for the good of the public or efficient working of the Board. It is perhaps a mistake to appoint pleaders of large practice as executive heads of such Boards: they do very well as adviser and consulting experts, but for practical executive work they have not the time. It is hoped that these gentlemen, when they find that they cannot carry on the duties of such honorary appointments, would resign in favour of members who have the time, inclimation, and ability to do the work.

During the last five years Sir Charles Elliott has watched with interest the working of District and Local Boards, and has formed a distinct opinion as to their respective merits as departments of the public service. In District Boards the Government possesses a valuable agency, for assisting the executive of the districts with information as to local wants and conditions, and advice in the manifold details of internal executive administration. The strength of these Boards resides in the fact that they represent more or less adequately the chief interests of the district, and that the questions which come before them are important enough to arouse their interest, while at the same time they are relieved by the executive of the duty of controlling and supervising details The chief defect of the District Boards consists in the large area of their jurisdiction and in the difficulty of appointing a body of men who will effectually represent all parts of the district and all interests in it. The division of functions between the Boards and their Chairmen is one well adapted to the work that has to be done. The representative body supplies the information and experience on which to base the decision as to what should be done; the officer who wields the executive power in the district gives effect to those decisions. With Local Boards it is different. It has hitherto been found impossible to extend their functions so as to give them work of sufficient importance to enlist their interest keenly. Nor, at any rate in most cases, have they at their head an officer of experience in business with a sufficient staff at his disposal. Thus their energies flag, and the work that is given them to do is too often indifferently looked after. The policy by which these defects can be cured seems to be one involving larger decentralisation, the devolution of some of the work now retained by the District Boards, the appointment of an official Chairman, and the abolition of the Sadar Local Board, which is an evident superfluity. It is possible also that the extension of Union Committees and the promotion of village sanitation may stimulate the energies of Local Boards and provide for them congenial work in supervising and guiding the action of the Committees; or again the latter, being more closely in touch with local interests, may in time absorb the functions of Local Boards and render these bodies superfluous. Either result, however, must be the work of time, and it would be premature to venture on any forecast of what will happen within the next few years.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

FORM No. I(*a*).

Statement showing the Constitution of the District Boards in Bengal during the year ending 31st March 1895.

Serial number.	Name of District.	Act under which constituted.	Area in square miles.	Population within the area.	Number of Members. Ex-officio.	Nominated.	Elected.	Total.	Officials.	Non-officials.	Europeans and Eurasians.	Natives.	Number of meetings held.	Number of meetings proved abortive for want of quorum or were adjourned.	Average attendance at each meeting. Officials.	Non-officials.	Total.

15 — REMARKS.

Burdwan Division:

* Including 103 miles of Provincial roads.

† Including a refund of Rs. 530.

Presidency Division:

(a) Includes 41 miles of the Provincial road.
(b) Includes 2,780 for compensation allowance of the District Engineer.
(c) Includes contingencies.
(d) Includes Rs. 50 for additional allowance for supervising Government buildings.

Rajshahi Division:

(a) Includes allowance of Rs. 50 a month for supervising Government buildings.
(b) The figure in column 7 (e) against Rajshahi includes Rs. 42 and 430 for quasi-permanent establishments on original works and repairs works, respectively.
(c) The figures in column 7 (i) against Jalpaiguri and divisional total include Rs. 4,000 paid to the Bengal Duars Railway Company by the District Board of Jalpaiguri.
(d) The figure in column 7 (e) against Bogra comprises Rs. 624 and Rs. 170 for quasi-permanent establishments on original works and repair works respectively.

N.B.—The amount shown in column 14 against Rangpur represents the present salary of the District Engineer. The rate of salary is Rs. 500, rising to Rs. 1,000, by biennial increment of Rs. 100.

NOMINATION OF A REPRESENTATIVE TO A SEAT IN THE COUNCIL OF THE LIEUTENANT-GOVERNOR FOR MAKING LAWS AND REGULATIONS ON THE RECOMMENDATION OF THE MUNICIPALITIES IN THE ORISSA AND CHOTA NAGPUR DIVISIONS.

No. 5826A.

APPOINTMENT.

RESOLUTION.

Dated Calcutta, the 3rd December 1895.

THE appointment of the Hon'ble Maharaja Jagadindranath Roy of Nator as a member of the Bengal Legislative Council will expire on the 23rd January 1896. The Maharaja was appointed on the recommendation of the municipalities in the Rajshahi Division, and in accordance with the decision arrived at in paragraph 5 of the Resolution of this Government, dated 25th March 1893, the municipalities of the Orissa and Chota Nagpur Divisions will be entitled to exercise the privilege of recommending a person for nomination to the Council to fill the Maharaja's vacant seat. The necessary notification will therefore now be published in the *Calcutta Gazette* specifying the groups of municipalities in the Orissa and Chota Nagpur Divisions from which a recommendation will be made to the Lieutenant-Governor for the nomination of one seat in Council.

2. The Lieutenant-Governor is pleased to prescribe that the same procedure shall be followed as was adopted in 1893 and in the summer of the present year, and that for the purpose of making its recommendation, each municipality concerned shall proceed to elect from amongst its own members an electoral representative, who shall be entrusted with full powers to vote for a member to represent the group in Council It has been determined that only those municipal corporations which enjoy a clear income from municipal resources proper of Rs. 5,000 and over shall exercise the right of electing an electoral representative. The voting power of each of these representatives will be calculated by the income of the municipalities concerned according to the following scale:—

	Votes.
Municipalities with an income of Rs. 5,000 and less than Rs. 10,000 will be entitled to ...	1
Municipalities with an income of Rs. 10,000 and less than Rs. 20,000 to ...	2
Municipalities with an income of Rs. 20,000 and less than Rs. 50,000 to ...	3
Municipalities with an income of Rs. 50,000 and less than Rs. 1,00,000 to ...	4
Municipalities with an income of Rs. 1,00,000 and less than Rs. 1,50,000 to ...	5
Municipalities with an income of Rs. 1,50,000 and less than Rs. 2,00,000 to ...	6
Municipalities with an income of Rs. 2,00,000 and less than Rs. 2,50,000 to ...	7
Municipalities with an income of Rs. 2,50,000 and over to ...	8

3. Each municipality will elect one electoral representative only, and this representative shall be entitled to record, in behalf of the candidate he supports, all the votes of the municipality which he represents.

4. According to the scale above laid down, the following municipalities will now proceed to elect a delegate:—

Municipalities in the Orissa Division.

District.	Name of Municipality.	Ordinary municipal income.	Number of votes to be exercised by each representative.
		Rs.	
Cuttack	Cuttack	41,798	3
	Kendrapara	7,230	1
Balasore	Balasore	18,568	2
Puri	Puri	29,673	3
			9

Municipalities in the Chota Nagpur Division.

District.	Name of Municipality.	Ordinary municipal income.	Number of votes to be exercised by each representative.
		Rs.	
Hazaribagh	Hazaribagh	7,899	1
	Chatra	5,054	1
Lohardaga	anchi	16,002	2
Manbhum	Purulia	15,016	2
			6

5. Under Rule IV of the Regulations which have been framed by the Governor-General in Council with the sanction of the Secretary of State under section 1 (4) of the Indian Councils Act, 1892, for Bengal, the Lieutenant-Governor desires that intimation may be at once communicated by the Commissioners of the Divisions concerned to the Chairmen of the Municipalities enumerated in the above list, requesting them to arrange without delay for the convention for a special meeting of each municipality concerned, at which one of their members may be elected to represent them for the purpose of recommending the nomination of a member in the Lieutenant-Governor's Council. The name of the delegate selected must be reported by the Chairman of the Municipality concerned for the information of the Commissioner of the Division.

6. The period of two months which is contemplated under Rule VII of the Regulations quoted as the period within which a recommendation shall be made to the Lieutenant-Governor, is hereby declared to run from the date on which the Commissioners concerned (whichever is latest) issue their invitations to the Chairman of any Municipality to elect a delegate.

7. As soon as the electoral representatives are elected by the municipalities, they will be called upon by the Commissioners of the Divisions concerned (who will act in concert for this purpose) to meet together on an early and convenient date with special reference to the limit of time imposed under Rule VII of the Regulations. The place of meeting will be in the Bengal Secretariat, Writers' Buildings, Calcutta, and delegates will be allowed their travelling expenses according to the scale laid down for the attendance at meetings of members of District Boards.

The names of all candidates put forward at such meeting shall be duly proposed by one of the electoral representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on occasion of the first ballot an absolute majority is not obtained, the candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates, and so on until an absolute majority is obtained.

The electoral representatives present at this meeting shall elect among themselves a Chairman, who shall preside and be responsible for the fair and proper exercise of the ballot vote.

As soon as the election is made, the Chairman of the meeting shall without delay report to the Chief Secretary to Government the name of the person so elected with the number of votes obtained, and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor to nominate for Council the person so elected.

8. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council and Secretary of State :—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation or group of Municipal Corporations that he shall be a person ordinarily resident within the municipality or the district in which it is situated, or in some one of the municipalities constituting the group or of the districts in which they are situated A similar condition shall also apply to persons to be recommended by District Boards.

Under this rule it is not necessary that persons recommended shall be members of any municipality or District Board concerned, but they must be ordinarily resident within the division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the electoral representatives to recommend a person under Rule V(c) according to the majority of their votes.

9. It is expected of Divisional Commissioners and District Magistrates that they will afford any assistance which may be required of them and do their utmost to facililate the smooth working of the election. At the same time it must be distinctly understood by all officers of Government of every department and grade that they are prohibited from interfering directly or indirectly with the free choice of a candidate by the elective bodies, or from attempting to influence or direct the action of these bodies in any way. No indication should be given by any official of the manner in which he himself personally intends to vote. All officers are warned that any violation of these orders will be severely dealt with.

Ordered that a copy of this Resolution be furnished to the Commissioners of the Orissa and Chota Nagpur Divisions for information and guidance, and for communication to the municipalities in their Divisions.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

Chief Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 2nd December, 1895.

Burdwan.—No rain. Weather cloudy. Prospect of *aman* crop very bad. Reaping of *aman* has commenced. Sugarcane very good. *Rabi* being sown. Condition of cattle good. Water and fodder sufficient. Common rice sells at an average price of 15½ seers per rupee.

Midnapore.—Rainfall nil. Weather getting cooler. *Aman* paddy is being harvested with poor results in the Ghatal subdivision. The high lands in the Contai subdivision have given an unfavourable outturn. *Rabi*, indigo, and sugarcane are doing well. Fodder and water sufficient. Prices of common rice:—

	Srs.	
Midnapore	16	per rupee.
Contai	21	
Tamluk	16	
Ghatal	14 to 15	

24-Parganas.—Rainfall nil. Weather seasonable. Harvesting of *aman* continues; prospects unfavourable except in the low lands and in the south of the district. *Rabi* sowings almost over. Sugarcane doing well. No cattle-disease. Fodder and water sufficient. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	15	3¾	
Diamond Harbour	16	0	

Murshidabad.—No rain. Weather seasonable. Sowing of *rabi* crops nearly finished. Harvesting of *aman* commenced; estimated outturn eight annas. Indigo, mulberry, and sugarcane are doing well. Fodder and water sufficient. Price of common rice 14 seers per rupee.

Khulna.—Rainfall nil. Weather seasonable. Harvesting of *chhotan* paddy going on. Cultivation of *rabi* crops nearly over. Standing crops doing well. Fodder and water sufficient. Prices of common rice:—

	Srs.	c.	
Sadar	17 to 22	0	per rupee.
Bagerhat	17	8	
Satkhira	14	3	

Dinajpur.—Rainfall nil. Weather warm during the day. Condition of standing crops good. Paddy is being cut. Sowing of *rabi* crops over. Rain much needed for these crops. Common rice sells from 15 to 16 seers per rupee. No report of cattle-disease. Fodder and water sufficient.

Rangpur.—Rainfall nil. Harvesting of *aman* commenced. Sowing of winter crops going on. Rain wanted. Prospects generally good. Common rice selling from 12 to 14 seers per rupee. Fodder sufficient. No cattle-disease.

Pabna.—No rain. *Aman* rice promises to yield an average outturn. Other crops good on the whole. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* rice commenced; prospects fair. *Rabi* crops being sown. No cattle-disease. Fodder available. Common rice sells at 16 seers per rupee.

Chittagong.—No rain. Weather hot and occasionally cloudy. Prospects of late winter rice not good. *Rabi* sowings continue. Water and fodder sufficient. Rice sells at 16 seers per rupee.

Patna.—No rain. Harvesting of paddy in progress. *Rabi* and poppy sowings completed; the latter reported to be on the whole promising and fairly forward for the time of the year. Common rice selling from 18 to 23 seers per rupee. Condition of cattle good. Fodder and water sufficient.

Gaya.—No rain. *Rabi* crops suffering for want of moisture. Rice being harvested. Price of common rice at Sadar 14 seers per rupee against an average of 17 seers.

Champaran.—No rain. *Rabi* sowings continue. Winter rice being harvested; 12 annas outturn estimated. Poppy had to be resown in many places, but is doing well. Common rice selling from 18 to 22 seers per rupee. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Paddy harvest in progress. Rain wanted for *rabi* crops. Poppy sowings completed. Fodder for cattle sufficient. Common rice selling at 16¼ seers per rupee.

Bhagalpur.—Rainfall nil. Weather seasonable. Harvesting of *aghani* paddy still continues. Sowing of *rabi* is almost over. Prospects of indigo fair. No cattle-disease. Fodder and water sufficient. Common rice sells at 17 seers 10 chitaks per rupee at Sadar.

Purnea.—No rain. *Aghani* harvest proceeds. *Rabi* sowings continue; prospects fair. Cattle-disease in Sadar thana. Fodder and water sufficient. Common rice sells from 15 to 24 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *laghu sarad* continues. *Guru sarad* maturing. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	22	5	per rupee.
Jajpur	29	10	
Kendrapara	31	3	
Banki	31	8	

Hazaribagh.—Rainfall nil. Harvesting of paddy continues; average outturn 8 to 12 annas. Rain wanted for *rabi* crops. Poppy promises well. Fodder and water sufficient. Price of common rice 12 to 16 seers per rupee.

General Summary.—No rain fell during the week. Harvesting of rice is in progress, and the outturn, as previously reported, is expected to be below the average, except in parts of Northern and Eastern Bengal and in Orissa. The sowing of the *rabi* and poppy crops is nearly over; the latter is doing well, but for the former the moisture is reported insufficient in Bihar and North Bengal. Sugarcane is generally a good crop, and the prospects of indigo are fair. Cattle-disease still exists in the Sadar thana of Purnea; elsewhere the cattle are in good condition. The price of common rice continues steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 3rd *December*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

The total fall from 1st January to 30th November 1895	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·15

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last ten years. The variations are *negative* when the mean of the week is less than the corresponding normal mean, and *positive* when greater. The humidity of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers denoting cloud amount represent the part of the sky covered, the whole sky being denoted by 10. Under the head District observation of rainfall the normal mean at the numerical means average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returns received in the district, *i.e.*, from total rainfall at the sub-divisional station in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 30th of November 1895.

Meteorological division.	Division.	District.	Station.	Sunday, 24th.	Monday, 25th.	Tuesday, 26th.	Wednesday, 27th.	Thursday, 28th.	Friday, 29th.	Saturday, 30th.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th October 1895.	Average rainfall from 16th October to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the retur[ns] ... [the] corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at ... 0 inch of rain has fallen.

CALCUTTA, *the* 3rd *December* 1895.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 30TH OF NOVEMBER 1895.

At the close of the previous week ordinary north-east monsoon weather prevailed over the whole province, and conditions were nearly normal. On the 24th of November, or the first day of the week under review, a moderate increase of pressure occurred, and pressure became in distinct excess, while a fall of temperature of about half to one degree took place, and the night temperatures became distinctly below the normal, though the day or maximum temperatures were still in small excess. Almost similar changes occurred on the 25th, but on the 26th a moderate fall of pressure commenced, though the temperature continued to fall. The changes on the 27th were small, but similar in character to those on the 26th; and though the day temperatures were still above the normal by about 1° to 2°, the night or minimum temperatures were in defect by about 1° to 3°. On the 28th the changes of pressure and temperature were very small and rather variable, and weather continued fine except in and near the hills, where it became a little disturbed, and a few showers fell which were reported on the 29th instant. On that day also though the changes of pressure were very small, the mean temperature at most stations had increased by about 1° to 2°, and both day and night temperatures were usually in small excess. Weather, however, was still very slightly disturbed in the hills, and one or two showers fell, while a little increase of cloud proportion was noticed at the stations in the plains. On the 30th a brisk increase of pressure had occurred, the rise at many of the Bihar stations exceeding a tenth of an inch, and again a considerable excess pressure was established over the province. Temperature on this day was also in distinct excess, the variation from the normal mean equalling about 2°.

Throughout the week except in and near the hills in North Bengal on the 28th and 29th instants, fine settled weather has again prevailed, and a fairly steady northerly wind current has been reported at practically all stations. Except also for a few local showers in and near the hills no rain has been reported throughout the week.

Pressure.—The mean pressure for the week has been in slight excess in all districts, the usual variation equalling from 0·02″ to 0·03″.

Temperature.—The average mean temperature for the week over the whole province has been 0·7° in excess of the normal, the seat of the largest excess having been in Bihar and Chota Nagpur, where it has ranged from one to two degrees.

The actual temperatures registered over the province and their variation from the normal values are, however, best seen in the table below, where the average temperature data for nine selected stations in different districts of the province are given.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 30th November 1895.

	Normal mean maximum temperature for the week ending 30th November.	Actual mean maximum temperature for the week ending 30th November 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 30th November.	Actual mean minimum temperature for the week ending 30th November 1895.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 30th November.	Actual mean daily temperature for the week ending 30th November 1895.	Variation of actual mean from the normal.

Rainfall.—Except a few local showers of no practical importance, which have fallen in and near the hills of North Bengal, there has been no rain again in the plains of Bengal during the week under review.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 30th of November 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL DURING 1894-95.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 9th December 1895.

RESOLUTION—No. 4387M.

READ—

The Reports from the several Commissioners of Divisions on the working of Municipalities in the Lower Provinces of Bengal (except Calcutta) during the year 1894-95.

Read again—

The Resolution reviewing the Divisional Commissioners' reports on the working of Municipalities during the year 1893-94.

THE following Resolution reviews the reports submitted by Commissioners of Divisions on the working of Municipalities in Bengal during the year ending on the 31st March 1895. Five of the reports were sent in punctually; those from Dacca and Rajshahi were a few days late; the Presidency report was three weeks and the Burdwan report about five weeks behind time. The Commissioner of the last-named Division explains that this was due mainly to the failure of the important Municipalities of Howrah and Hooghly to submit their reports in proper time. The Government of India attach much importance to the punctual submission of the Provincial Resolution, and the Lieutenant-Governor desires that District Officers will endeavour in future to induce the Municipalities in their districts to send in their reports in good time.

2. *Number of Municipalities, Population and Rate-payers.*—The number of Municipalities—146—remained unchanged. The table in Appendix A shows the date of establishment of each Municipality, the population within municipal limits, and the number of rate-payers in each. The population under municipal administration according to the Census of 1891 - no allowance being made for subsequent increase—was 2,725,434, against 2,727,620 in the previous year, the small decrease being due to the re-adjustment of the boundaries of certain Municipalities in the Patna Division.

3. The number of rate-payers was 459,750, or 4,210 less than in 1893-94, and their percentage to the total municipal population 16·8, against 17·0 in the previous year The decrease occurred in the Burdwan, Presidency, Patna, and Bhagalpur Divisions, and appears to have been mainly due to the system, which was prescribed last year, of counting actual rate-payers and not holdings. In Cuttack the number increased by 1,404, owing to the practice in former years of treating as rate-payers only persons who paid house-tax. The intructions given last year seem on the whole to have been complied with, and the statistics of rate-payers, having now been corrected and compiled on a uniform principle, will in future years be some test of the activity of Municipal Commissioners in revising their lists of assessees.

4. *Results of elections held during the year.*—General elections were held in the Municipality of Hazaribagh and in Kharar, in the district of Midnapore. Elections were also held in two wards of the Darbhanga Municipality owing to certain irregularities in the general elections held towards the close of the previous year, with the result that the same gentlemen who were returned at the previous election were re-elected without a contest. Both at Hazaribagh and Kharar only one ward election was contested, the percentage of voters who attended being 43·2 and 12·3 per cent., respectively, of the number entitled to vote. There were in all 50 bye-elections, of which only 12 were contested; the percentage of attendance of voters in the contested cases varied from 52·7 at North Dum-Dum to 4·6 at Baduria, both in the 24-Parganas district. Only in five instances did the electors fail to choose a Commissioner, and in two cases the full number of Commissioners was not elected. This was due to the omission to nominate candidates within the prescribed time. The vacancies were filled by appointment under section 16 of the Act. Great interest appears to have been displayed in the bye-elections held in the Municipalities of North Dum-Dum, Raniganj, Santipur, and Darbhanga.

5. *Constitution of Committees.*—The following table shows for each Division how the Municipal Committees were constituted, and compares the percentages of the total figures for each class with those of the previous year:—

Name of Division.	Number of Members.				Race.		Occupation or Profession.								
	Ex-officio.	Nominated.	Elected.	Total.	Europeans.	Natives.	Government servants.	Zamindars and land-holders.	Pleaders and mukhtears.	Planters.	Merchants, traders and money-lenders.	School-masters (other than Government employés).	Medical practitioners.	Government pensioners.	Unspecified.

Percentage on total...	·1	45·1	54·7	..	9·0	90·9	17·3	24·6	22·3	·6	11·7	4·6	4·3	3·2	11·4
Ditto for 1893-94 ..	..	45·2	54·7	...	9·0	90·9	16·8	24·3	22·8	·6	11·3	5·1	3·9	3·1	11·7

For the Province as a whole the composition of the Committees is unaltered. Looking to Divisional figures, however, in Burdwan the proportion of medical practitioners rose from 3·2 to 7·9 per cent., and that of school-masters (other than Government servants) fell from 11·7 to 7·9 per cent. In the Presidency there was an increase in the representation of Government servants (1·6), and merchants, traders and money-lenders (2·8), most of the other heads showing a decrease. In Chittagong the proportion of members of the trading class fell from 15·1 to 10·9, while the number of seats held by Government servants and the unspecified rose to a corresponding extent. In the Patna Division the representation of the landed interests increased by 2·5 per cent., and that of the legal profession fell off from 27·0 to 25·2 per cent. In the Orissa Division the number of zamindars and landlords serving as Municipal Commissioners rose from 9 to 14, whilst that of Government servants fell off from 26 to 23. Lawyers held most seats in Chota Nagpur (30·4 per cent.), Orissa (33·3), Chittagong (32·9) and Dacca (31·0), and fewest in the Presidency Division (12·9); the landed interest was most largely represented in the

Presidency (31·6) and Patna (31·4); and the trading element was strongest in Burdwan (16·1), Chota Nagpur (13·0), Presidency (12·7), and Patna (12·1), and weakest in Orissa (2·6).

6. *Attendance at meetings.*—The results of the year show an improvement both as to the number of meetings and the attendance of the Commissioners at them. There were in all 2,663 meetings held during the year against 2,359 in 1893-94. Of these, 225 meetings, or 8·4 per cent., were unsuccessful or adjourned, as against 206, or 8·7 per cent., in the previous year. The Sherpur Municipality in the Mymensingh district held the largest number of meetings, viz. 42, of which 8 had to be adjourned; Cossipur-Chitpur comes next with 39, which were all successful. In 1893-94 twenty-five Municipalities held more than 20 meetings, and 24 had less than 12 meetings; but during the year under review 48 Municipal Boards met more than 20 times, and only 12 failed to hold at least one meeting a month. Conspicuous among the latter are the important townships of Gaya (population 80,383), Darbhanga (population 73,561), and Jamalpur in Monghyr (population 18,089). Although there is an element of truth in the remark of the Commissioner of the Rajshahi Division that the disposition on the part of Municipal Commissioners to hold frequent and crowded meetings by no means indicates a corresponding energy in actual work, still on the whole experience tends to show that the holding of meetings with reasonable frequency is the best, if not the only means of keeping up an active interest in municipal business; and in any case the statutory provision requiring the Commissioners to meet at least every month ought not to be disregarded. In future the reasons for not meeting monthly should be fully explained. The Commissioners of Muzaffarpur, Purnea, Rangpur and Hazaribagh also held a comparatively small number of meetings. The smallest number of meetings were held in Jagdispur (7), Jhalda (5), and Chanduria (4). Of these, the Municipality of Jhalda has been abolished with effect from 1st April 1895, and a proposal to abolish the last-named Municipality is also under the consideration of Government.

7. In 96 towns, as against 93 in 1893-94, more than one-half the number of Commissioners on the average attended each meeting. The highest percentage of attendance was 89·0 at Rajpur, where the Commissioners held 20 successful meetings, while Cossipore-Chitpur stands second with a percentage of 77·6 at 39 meetings, all of which were successful. In three towns less than one-third of the Commissioners attended the meetings; but among these were the important Municipalities of Patna and Darbhanga and the small town of Baduria in the 24-Parganas. Patna shows the worst results in the Province in this respect, the attendance falling as low as 13·6 at 16 meetings, while Darbhanga shows a percentage of 27·2 at 10 meetings.

8. *Ward Committees.*—There were Ward Committees in 20 towns, against 24 of the previous year, and the weight of opinion seems on the whole to be adverse to them. The difficulty is to arrive at a suitable division of duties between them and the main body of Commissioners. If large powers are given to the Ward Committees they are apt to absorb the functions of the Municipal Executive and to act independently where uniformity should be aimed at, while on the other hand if the duties entrusted to them are trivial they lose interest in their work, and do nothing. The Lieutenant-Governor is disposed to think that the best results are likely to be attained by a combination of the two possible alternatives referred to in last year's Resolution. The Ward Commissioners might be placed in general executive charge of the wards for which they are elected, and at the same time Sub-Committees might be formed for the purpose of dealing with specific subjects, such as finance, dispensaries, schools, markets, sanitation, and the like. Where the Commissioners take a real interest in their work this system would ensure that all questions would be fully discussed from several points of view, would promote uniformity of administration in the various wards, and assist the general body of Commissioners in arriving at a decision on questions referred to them in meeting. The system of placing Commissioners in charge of the wards which they represent was in force in 39 towns, and is reported to have worked satisfactorily in many places. The policy adopted at Ranchi was to divide the town into as many blocks as there are Commissioners, both elected and appointed, each block being placed in charge of a Commissioner for the purpose of inspection. At Nator the Municipal Commissioners were put in executive charge of the works done in their respective wards, and all bills for works had to be certified by the supervising Commissioner before any payment was made. In the Burdwan Division sub-committees were formed during the year in thirteen

Municipalities for working out the details of important questions before their submission to special or general meetings for final decision. The Commissioner thinks that this practice greatly conduces to the despatch of business. In the Purulia Municipality there were six standing sub-committees, which are reported to have given much assistance to the Chairman and Vice-Chairman, and three similar sub-committees were formed in Chaibassa.

9. *Assessments and Taxation.*—The rate on holdings was in force in thirty-five towns, and a tax on persons, according to their circumstances and property, was levied in the remainder, Government property being assessed to the rate on holdings. In 21 towns the tax on holdings was assessed at the maximum rate allowed by the law; the names of the remaining 14 towns and the rate at which the tax was levied in them are shown in the margin. The maximum for Howrah and Patna was raised from $7\frac{1}{2}$ to 10 per cent., under Bengal Act IV of 1894, which came into force in August 1894, and no steps have as yet been taken to enhance the rate. Two places—Krishnaghar and Monghyr—have raised the rate to $7\frac{1}{2}$ per cent. since the close of the year, in order to carry out drainage schemes, and the Lieutenant-Governor trusts that all the towns shown in the table will follow this good example if they need an increase of income to enable them to carry out similar useful projects. Dacca and Bhagalpur are in urgent need of money for the extension of their water-works, and the Commissioners of the former town have recently been informed that their application to consolidate their existing loans and to incur a fresh loan will not be favourably considered until the rate of taxation is raised to the maximum of 10 per cent., as it is unreasonable that a Municipality, which escapes a water-rate, whilst it enjoys the benefits of a supply of filtered water, should not levy house-tax at the maximum rate, so as to meet the charges for maintenance and interest on loans. The tax on persons, which is in force in 111 municipalities, was levied at rates varying from $\frac{1}{4}$ per cent. on the estimated income of the assessee, as in the Ghatal Municipality, to 2 per cent. at Sonamukhi. In some places there is no fixed rate, the assessment being fixed arbitrarily in each case.

Name of Municipality.	Rate of tax. Rs.	Name of Municipality.	Rate of tax. Rs.
Hooghly and Chinsura	$6\frac{1}{4}$	Narayanganj	$6\frac{3}{4}$
Howrah	$7\frac{1}{2}$*	Patna	$7\frac{1}{2}$*
Krishnagar	6	Monghyr	$6\frac{1}{4}$
Ranaghat	$6\frac{1}{4}$	Jamalpur	7
Santipur	$6\frac{1}{2}$	Bhagalpur	7
Darjeeling	6*	Purnea	6
Dacca	8*	Sahibganj	5

* The legal maximum in these places is 10 per cent. on the annual value of holdings, and for the rest of the municipalities in the province it is $7\frac{1}{2}$ per cent.

10. The incidence of taxation per head of municipal population varied between Rs. 4-6-7 in the Darjeeling Municipality and 2 annas 11 pies in the small Municipality of Ramjibanpur in the Midnapore district. The average for the whole Province (excluding Calcutta) rose from 12 annas 9 pies in the previous year to 13 annas and 7 pies. In 31 towns, as against 28 in the previous year, the incidence of taxation exceeded one rupee. All of these are in Bengal Proper, whilst in the Divisions of Patna, Bhagalpur, Orissa and Chota Nagpur not a single town attains to this standard of taxation. On the other hand, in the Rajshahi Division, which has the highest average incidence in Bengal, taxation is nowhere less than one rupee a head, except in Rangpur, where the rate is ten annas and ten pies. In 62 towns, as against 68 in the previous year, the incidence of taxation was less than 8 annas per head. The following important towns, which form the head-quarters of districts, continue to be lightly taxed:—

Name of Municipality.	Incidence of taxation. 1893-94. As.	P.	1894-95. As.	P.	Name of Municipality.	Incidence of taxation. 1893-94. As.	P.	1894-95. As.	P.
Bankura ...	6	10	7	3	Balasore ...	8	6	9	5
Gaya ...	9	6	9	10	Hazaribagh ...	5	5	5	1
Arrah ...	7	0	7	2	Ranchi ...	9	2	8	7
Darbhanga ...	5	8	5	3	Daltonganj ...	6	1	6	1
Chapra ...	7	5	7	3	Purulia ...	9	4	12	3
Motihari ...	8	0	8	0	Chaibassa ...	6	7	6	2
Puri ...	13	8	12	8					

There was a satisfactory increase in taxation in the Municipalities of Muzaffarpur, Monghyr and Purulia.

11. The incidence of taxation, low as it is generally, would be further reduced if the large amount of taxes paid by Government on State buildings were excluded

from the calculations. The following interesting figures, collected by the Commissioner of Dacca, show what a large proportion of the income from taxation in some of the municipalities in his Division is derived from the State:—

Name of Municipality.	Population.	Taxation of all kinds.	Taxes paid by Government for State buildings.	Percentage of assessment of tax on Government buildings to total taxation (column 4 on column 3).
1	2	3	4	5
		Rs.	Rs.	
Dacca	82,321	1,12,915	5,675	5·0
Naraingan j	17,715	38,843	1,923	4·9
Nasirabad	11,555	26,722	4,002	14·9
Netrokona	9,821	3,345	171	5·0
Tangail	17,973	5,500	536	9·7
Faridpur	10,774	9,853	1,829	18 5
Madaripur	13,772	7,562	658	8·7
Barisal	15,482	21,899	4,119	18·8
Pirojpur	12,246	5,273	355	6·7
Patuakhali	4,885	2,337	185	7·9
Total for all Municipalities ...	255,026	2,62,646	19,878	7·5

The Lieutenant-Governor fully agrees with the following remarks of the Commissioner of Dacca on the state of things disclosed by the above statistics:—

"That on the whole Government pays 7·5 per cent. of these taxes rising in Barisal to 18·8 per cent., is the most striking feature of municipal administration in this Division. In Nasirabad, Faridpur, and Barisal the general tax-payer contributes rather more than he can afford towards Municipal Government, especially when it is remembered that, if he be a native of the district, he also contributes something through the District Board."

The Commissioner of Patna raises the further point that the incidence of taxation, as now calculated on sub-columns 5 to 12 of Statement II, exaggerates the burden borne in so far as it includes the income derived from both on ferries, water-rate and conservancy, and suggests that a column should be added to show separately the incidence of the house and personal taxes which would represent more truly what the residents in towns contribute to the cost of municipal administration generally, as distinguished from payments for special services such as water-supply and the cleansing of latrines.

12. General or partial revisions of assessment came into force in 69 towns, and resulted in an increase of income in all but 12 cases. The best financial results were obtained in the towns mentioned in the margin. In the town of Bihar, in the Patna district, a revision made by a paid assessor, which came into force on the 1st April, added Rs. 3,291 to the tax on persons and Rs. 3,000 to the latrine tax. The largest decrease was in Midnapore (Rs. 1,041) and Revelganj (Rs. 492). The reason assigned for the decrease in Midnapore is that about 572 dilapidated holdings, which had been assessed before, were struck off the list of holdings at the present

Name of town.	Amount of increase.
	Rs.
Ghatal ...	1,041
Kharar ...	501
Debhatta ...	682
Darjeeling ...	5,230
Jamalpur (Mymensingh)	1,614
Madaupur ...	945
Patna ...	8,918
Tikari ...	867
Siwan ...	596
Muzaffarpur ...	6,102
Sitamarhi ...	1,253
Monghyr ...	2,064
Balasore ...	1,100

assessment, which was made by the Commissioners themselves. At Revelganj the decrease was mainly due to the destruction of several *golas* in the town by fire.

The Commissioner of the Patna Division found, on inspecting the Chapra Municipality in December 1894, that the municipal finances were in a hopeless condition; the cash balance at the time was only Rs. 148, whilst the total amount of the unpaid bills was Rs. 11,206, of which nearly Rs. 4,000 were due on account of the year 1893-94. The Commissioners proposed to meet the deficit by borrowing Rs. 8,000, and by curtailing expenditure on road-watering, lighting and salaries. Mr. Forbes disapproved of the proposal and, being of opinion that the town was much under-assessed, and that the results of the revision that had been effected were quite inadequate, suggested the employment of a salaried assessor to revise the assessment of the town with the object of increasing taxation and restoring the credit of the Municipality. The Commissioners declined to act upon this advice, and the matter being then laid before Government, the Lieutenant-Governor was constrained to issue an order under Section 111A of the amended Municipal Act, calling upon the Commissioners to revise the assessment. A salaried assessor has since been appointed, and it will depend upon the results of his assessment and upon the manner in which it is dealt with by the Municipal Commissioners whether any and what further action is taken by Government to restore order in the affairs of this Municipality.

13. *Demands, collections, remissions and outstandings on account of taxes.*—Under those heads the following statement compares the totals for the three years 1892-93, 1893-94 and 1894-95:—

Year.	Demand.			Collections.						Remissions.				
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Percentage of column 5 on column 2.	Percentage of column 6 on column 3.	Percentage of column 7 on column 4.	Arrear.	Current.	Total.	Percentage of column 13 on column 4.	Outstanding balance.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.				Rs.	Rs.	Rs.		Rs.
1892-93 ...	4,21,006	22,52,676	26,73,682	2,65,052	18,60,231	21,25,283	62·9	82·5	79·4	65,910	56,840	1,22,750	4·5	4,25,643
1893-94 ...	4,27,689	22,81,279	27,08,968	2,43,143	18,60,629	21,03,772	56·8	81·5	77·6	59,612	59,372	1,18,984	4·3	4,86,212
1894-95 ...	4,93,558	23,71,593	28,65,151	2,74,419	19,76,277	22,50,696	55·6	83·3	78·5	96,983	58,144	1,55,127	5·4	4,59,328

Along with an increase in the total demand there has been an improvement of about two per cent. in the collection of the current demand, whilst the collection of arrears has fallen off by 1·2 per cent. as compared with the previous year, and 7·3 per cent. as compared with the results of the year 1892-93. The outstanding balance is smaller than in the previous year, but this is due mainly to the enormous remissions allowed during the year, which in the case of arrears demands were as high as 19·6 per cent. of the demand, against 13·9 per cent. in the previous year.

14. The table below shows the percentages of collection attained by the municipalities in each Division as compared with the previous year:—

Percentage of total collections on total demand.	Number of Municipalities.																			
	Burdwan.		Presidency.		Rajshahi.		Dacca.		Chittagong.		Patna.		Bhagalpur.		Orissa.		Chota Nagpur.		Total.

Total number of Municipalities.	26	26	37	37	11	11	17	17	5	5	25	25	11	11	5	5	8	9	146	14

The Dacca, Chittagong, Orissa and Rajshahi Divisions have the best results all round, and show a creditable advance on last year's collections. All the municipalities in those Divisions collected over 80 per cent. of their demands, except Rangpur, where the collections were only 64·7 per cent. of the demand. Patna and Rajshahi have the bulk of their municipalities in the first group. In the important Divisions of Burdwan and the Presidency the results are again bad. Bhadreswar in the former and Maniktala in the latter Division are placed in the lowest group of all. The latter town collected only 45·5 per cent. of its total demand of Rs. 1,00,895 or 64·3 per cent. of its current demand of Rs. 50,897, and the Commissioner rightly remarks that the Deputy Magistrate of Sealdah, Babu Shamadhub Roy, who has been Chairman since the end of 1892, ought to have set a better example of methodical and business-like administration. On the general question of securing punctual collection of municipal dues, the following remarks of the Commissioner of Chota Nagpur go to the root of the matter and indicate the course of action which all municipalities should endeavour to adopt:—

"It appears to me that in the majority of the municipalities in which the collections are unsatisfactory, no attempt is made to strictly enforce the provisions of sections 118 and 121 of the Municipal Act. If the Commissioners have the bills and notices of demand written out in advance and served as soon as each quarter begins instead of allowing the collecting establishment to wait until the quarter is well advanced and impose penalties on all defaulters who choose not to pay the tax due by them within the time allowed, there can possibly be no accumulation of arrears. Once introduce the system of issuing bills and notices in the beginning of every quarter and proceed against all defaulters according to law, the collections cannot fail to be kept up to the mark, and will tend in time to become automatic."

15. In 30 towns more than 95 per cent. of the demands was collected during the year, and among them the results of the 11 municipalities named in the margin show what can be done by careful administration. In all these places the collections exceed 98 per cent., whilst in eight of them there was no arrear at the close of the year, the remissions in every case being less than 1 per cent., except at Roserah, where these amounted to 1·4 per cent. The Lieutenant-Governor congratulates these municipalities on their successful management and specially commends the Commissioners of the large town of Gaya, where, with a small remission of Rs. 41, no arrear was left out of a total demand of Rs. 49,106.

	Percentage of collections.		Percentage of collections.
Gaya ...	99·9	Kendrapara ...	99·1
Jagadispur ...	99·7	Cox's Bazar ...	99·2
Naraingunj ...	99·4	Nalchiti ...	99·0
Deoghur ...	99·3	Tikari ...	98·7
Sonamukhi ...	99·2	Tamluk ...	98·7
		Roserah ...	98·5

16. The average percentage of remissions for the whole Province has risen from 4·3 in 1893-94 to 5·4, the increase being shared by five Divisions, the percentage being highest in the Presidency Division, where it rose from 6·1 to 9·9. There was a reduction in the remaining four Divisions, viz., Rajshahi, Patna, Orissa, and Chota Nagpur. Remissions exceeding 10 per cent. on demand were granted in the following 11 municipalities:—

Name of Municipality.	Percentage of remissions on total demands.	Percentage of outstanding balance on total demands.
Midnapore	12·3	18·3
Maniktala	29·8	24·5
Baranagar	10.1	12·0
South Suburban	11·09	25·3
South Dum-Dum	12·6	19·9
North ditto	17·4	17·2
Naihati	10·2	19·6
Santipur	14·5	22·6
Nadia	28·08	9·6
Jamalpur (Mymensingh) ...	11·1	...
English Bazar	22·6	14·1

The above figures point to the danger of a tendency to reduce large outstanding balances by wholesale remissions. Much of what was written off during the year would probably have been realised had prompt measures been taken in proper time. Municipal incomes everywhere are made up of a large number of petty sums collected from a population which comprise,

24. *Rate on the value of holdings.*—This tax yielded a revenue of Rs. 8,16,912, being Rs. 30,149, or 3·8 per cent., more than in the previous year. The increase was shared by all Divisions, except Burdwan and Chittagong, where the receipts fell off, and Chota Nagpur, where the rate on holdings is not in force. In the Burdwan Division there was a heavy decrease of Rs. 9,982 in Howrah, due entirely to lax supervision on the part of the Secretary and the tax daroga. The former has retired from the service of the municipality, and the latter has been compelled to resign. In the Presidency Division, Maniktala had the large increase of Rs. 5,399 owing to the introduction of the contract system of collecting. For the short collections in Santipur, the inadequate excuse is given that collection work was stopped when the accounts were under audit towards the close of the year. In the Rajshahi Division there was an increase in the Darjeeling Municipality, caused by a general revision of the assessment. Dacca and Narainganj are said to have made better collections and to have assessed new holdings. In Patna there was an increase of Rs. 14,064, owing partly to the collection of arrears and partly to revision of assessment. In the Bhagalpur Division the increase was due to the revision of assessment in Monghyr, to the increase in the number of holdings in Jamalpur, and to better collection of arrears at Bhagalpur, Purnea, and Sahibganj. The latter cause also explains the increase of Rs. 1,329 in Cuttack.

25. *Tax on Animals and Vehicles.*—The receipts from this source rose in the Chittagong, Bhagalpur, Orissa, and Chota Nagpur Divisions. In the remaining Divisions there was a slight falling off. In the Presidency Division the heaviest decrease was in Lalbagh (Rs. 1,167), of which no explanation has been given. The decrease in Baranagar and Naihati is reported to be due to the new section 147A. of the amended Municipal Act restricting the levy of fees to one municipality, and in Santipur, to the non-payment of the fees during the year by a person to whom they had been irregularly farmed out. The farming of fees for cart registration is open to serious objections, and has been rightly stopped by the Commissioner. The decrease in the Satkhira Municipality is ascribed to the fact that cart-owners are avoiding registration by taking advantage of the obscurity of the words "habitually used" in section 142 of the Act. This question has recently been before the High Court in connection with a case which arose in the small Municipality of Chanduria. A cart owner was prosecuted under section 146 of the Municipal Act for not registering his cart under section 142. It was admitted that he lived and kept his cart outside the Municipality, and used it inside the Municipality twice a week throughout the year. The Deputy Magistrate who tried the case held that the cart had not been habitually used in Chanduria within the meaning of section 142, and therefore acquitted the accused. Against this decision an appeal was ordered by Government with the object of obtaining an authoritative interpretation of the word "habitually," regarding which there has been much difference of opinion. The Hon'ble Judges decided that although the word was not capable of being exactly defined as a matter of law, still it denoted some degree of frequency, and, in order that a cart may be said to be used habitually within the limits of a Municipality, it must be used within those limits oftener than not. They therefore upheld the judgment of the Lower Court. The decision, which has been circulated for the information of all Municipalities, will probably lead to a substantial decrease in the income from fees for cart registration.

26. *Tax on professions and trades.*—All Divisions, except Orissa, show an increase under this head, the largest amount being in the Dacca Division, where it rose from Rs. 1,913 during 1893-94 to Rs. 4,059 during the year under review. In the Dacca Division this tax was levied for the first time during the year at Faridpur, Madaripur, Barisal and Jhalokati.

27. *Tolls on ferries.*—There are no tolls on roads in the Province, nor do ferries exist in any of the municipalities of the Chota Nagpur Division. In other Divisions the income from ferry tolls shows an increase, the largest being in the Patna Municipality (Rs. 8,757), which was due to more favourable settlements. The re-opening of the ferry over the Gandak, consequent on the collapse of the Victoria Bridge, caused an increase of revenue at Muzaffarpur. In the Presidency Division the income has decreased by a net sum of Rs. 1,337, owing chiefly to the reduction of income from the Jiaganj ferry in the Lalbagh Municipality, on account of the action of the East Indian

Railway Company. It is reported that an arrangement with the Railway Company is under consideration.

28. *Water-rate.*—This rate was levied for the first time in the Nasirabad and Arrah Municipalities. In the former the total receipts amounted to Rs. 5,424, and in the latter only to Rs. 71, as the tax was introduced shortly before the close of the year. The only other municipalities where the tax is in force are Burdwan, Darjeeling and Bhagalpur, and in these places there was an increase of income, due to revision of assessment and better collections.

29. *Lighting-rate.*—This rate was levied only in the Howrah Municipality. The collections of 1893-94 were lower than those of 1892-93 by Rs. 678; and in the year under report there was a further decrease of Rs. 772. The falling off is attributed partly to large remissions for vacant holdings and to an inconvenient arrangement for collecting the rate, which is now being altered.

30. *Conservancy, including scavenging and latrine rates.*—The large advance of Rs. 32,726 in the receipts under this head was distributed among all the Divisions except Orissa and Chota Nagpur, where there was a decrease of Rs. 815 and Rs. 1,003 respectively. The Burdwan and Presidency Divisions show advances of Rs. 10,715 and Rs. 8,766 respectively.

31. *Tax on persons according to their circumstances and property.*—Under this head there was an increase of a little over 5 per cent., distributed, as shown in the margin, among all Divisions except Bhagalpur, where the receipts declined by Rs. 182.

Name of Division.		Amount of increase.
		Rs.
Burdwan	...	2,602
Presidency	...	15,065
Rajshahi	...	1,940
Dacca	...	5,056
Chittagong	...	2,448
Patna	...	441
Orissa	...	2,125
Chota Nagpur	...	1,658

Of the 111 municipalities in the Province in which this tax is in force, 69 show an increase and 42 a falling off of income. The increase was most marked in the following municipalities, where it is ascribed for the most part to revision of assessment and improved collections:—

			Rs.
Baranagar ...	...	...	2,376
North Barrackpore	...	...	1,427
Naihati ...	...	...	1,190
Berhampore ...	...	...	5,279
Lalbagh ..	...	...	3,191
Nasirabad ...	...	...	1,928
Comilla ...	...	...	1,273
Brahmanbaria	...	...	1,098
Sitamarhi ...	...	...	1,250
Cuttack ...	...	...	1,193
Balasore ...	...	...	1,019
Purulia ...	...	...	2,097

The Berhampore Municipality has added largely to its income by paying its collecting staff by commission instead of by fixed salaries, and the Lieutenant-Governor thinks this system might be more generally adopted. For the decline in the receipts, which has occurred in many municipalities, various reasons are assigned, such as agricultural depression, death and migration of rate-payers, and in the Municipality of Chatra in Hazaribagh, the embezzlement of collections by the tax daroga. But the real reason for the low collections, whether of this tax or of the rate on houses, is the neglect of the executive of the municipalities to organise and enforce an efficient system of making collections, and to exercise constant supervision over the subordinate agency employed. Both conditions are essential. No system will work automatically; no amount of supervision will make up for want of system.

32. *Other sources of revenue.*—There was a decrease of Rs. 6,318 in the rate levied in the municipalities of Cossipore-Chitpur and Maniktala for the maintenance of the fire-brigade under Bengal Act IV of 1883, as amended by Act I of 1894, owing to the change in the law in respect of the fee payable on account of licenses for warehouses.

33. *Grants from Provincial and Local Funds.*—The table in Appendix L shows in detail the contributions received by municipalities from Provincial and Local Funds, as well as the contributions from other sources during the last

two years; and the following statement summarises and classifies the contributions in 1894-95:—

PURPOSE FOR WHICH MADE.	Provincial.	District Fund.	Other funds and public charity.	Total.
1.	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Medical	3,431	23,168	35,285	61,884
Education	4,105	...	994	5,099
Public Works	20,624	...	18,537	39,161
Other purposes	...	2,518	6,500	9,018
Total ...	28,160	25,686	61,316	1,15,162

The most important of the items shown in Appendix L are a grant of Rs. 10,000 from Provincial Funds as an instalment of a total contribution of Rs. 50,000 for the improvement of the town of Khulna, and a contribution of Rs. 5,275 to the Muzaffarpur Municipality towards the execution of a drainage project.

34. *Gifts by private individuals.*—The Lieutenant-Governor desires to acknowledge here certain further instances of liberality on the parts of private gentlemen which do not find a place in Appendix L. In the town of Bally bathing ghats were commenced by Babus Kristo Dhone Coomar and Hari Das Pal at a cost of Rs. 6,000 and Rs. 8,000, respectively. A tank belonging to the Dighapatia Raj, in the Jessore Municipality, was re-excavated at the cost of the estate. In Darjeeling, Raja Ban Bihari Kapur, Manager of the Burdwan Raj, gave land to widen the roadway at the Chaurasta, and His Highness the Maharaja of Kuch Bihar granted a site for a water reservoir at Rockville. Kumar Bhupendra Narain, the Civil Medical Officer of Pabna, added at his own cost to the charitable dispensary a building for moribund and destitute cases. Messrs. Ralli Brothers laid out Rs. 4,704 on a ghat and road at Naraingani. The zamindars of Gauripur improved the drainage of the Netrakona market. Babu Durgapal Lal, of Hassua, gave Rs. 1,500 to the Gaya Municipality for the construction of a moribund ward in the Pilgrim Hospital, and Babu Chote Lal Sijwar, C.I.E., had the Surajkund tank in the town cleansed for the second time in three years at a cost of Rs. 1,300. In the Tikari Municipality Babu Shiva Gulam Misir, one of the Municipal Commissioners, completed a public tank, commenced in 1893-94, at a total cost of Rs. 1,000. The Maharani of Dumraon constructed a well at Buxar, and Babu Hazari Mull, a Municipal Commissioner, built a *dharmsala* in Bettiah. Rai Gunga Pershad Singh Bahadur, of Darbhanga, made a donation of Rs. 18,350 for the construction of a hospital at Laheria Serai, and Babu Gajraj Sahai contributed Rs. 2,000, and Babu Baldeo Sahu and Mohant Deodar Rs. 1,000 each towards the Muzaffarpur drainage scheme.

7. EXPENDITURE.

35. The total municipal expenditure of the province (excluding Calcutta) was Rs. D·67,711 against Rs. 32,20,364 of the preceding year, being an increase of Rs. 8,47,347, most of which is accounted for by the expenditure on water-works which came to a lakh in Arrah, more than 5 lakhs in Howrah, and nearly half a lakh in Cossipore-Chitpur. The year closed with a balance of Rs. 4,86,669 against Rs 5,11,710 in 1893-94. The statement in Appendix F shows the percentage that the expenditure under each of the principal heads

bears to the total outlay (excluding debt and suspense heads). For the whole province the percentages for the two years are as follows:—

YEAR.	General establishment.	Lighting.	Water-supply.	Drainage.	Conservancy.	Medical.	Vaccination.	Public Works.	Education.
1	2	3	4	5	6	7	8	9	10
1893-94 ...	10·9	5·5	5·1	9·5	27·9	9·4	·6	18·2	4·5
1894-95 ...	8·8	4·2	21·8	7·2	23·4	8·7	·49	15·5	3·6

36. The following statement shows the expenditure of 1894-95 under its main heads, and also shows how these totals have varied from those of the previous year:—

HEADS OF EXPENDITURE.	Total expenditure in 1894-95.	COMPARISON WITH 1893-94. Increase.	Decrease.	Percentage of variation.

37. *Office and Collection Establishment.*—The total expenditure on office establishment shows a small increase of Rs. 843, and that on collection establishment of Rs. 3,607. The number of municipalities where this item exceeded one-fourth of their whole expenditure fell from fourteen to three. The system of paying collection establishments by commission was introduced during the year in the municipalities of Maniktala, North Dum-Dum, Krishnaghar, Santipur, Kushtia, Berhampore, Jangipur, and Khulna in the Presidency Division, and the fact that in all of these places, except Santipur, the percentage of establishment charges has fallen promises well for its success.

38. *The prevention of fire.*—The expenditure under this head rose from Rs. 27,406 to Rs. 29,552, the increase being mainly in Cossipore-Chitpur, where the contribution towards the Metropolitan Fire Brigade amounted to Rs. 24,103 against Rs. 14,714.

39. *Lighting.*—The expenditure fell from Rs. 1,66,167 in 1893-94 to Rs. 1,60,596. The number of municipalities which spend nothing on lighting fell from 33 to 23; but among the latter were North and South Barrackpore with a population of over 20,000 each; Barh with 12,000, and Chatra with nearly 11,000 inhabitants. The Commissioners of these places should be pressed to take the matter in hand.

40. *Water-supply.*—The total expenditure under this head rose from Rs. 1,55,684 to Rs 7,97,303, of which Rs. 7,36,231 was spent on original works and Rs. 61,072 on maintenance. The large advance in capital expenditure was due to the construction or extension of water-works in Howrah (Rs. 5,13,432), Arrah (Rs. 1,00,000), Cossipore-Chitpur (Rs. 46,156), Bhagalpur (Rs. 10,901), Maniktola (Rs. 8,330), and Burdwan (Rs. 6,459). The scheme for supplying the town of Howrah with filtered water and a loan of Rs. 15,00,000 for the purpose were sanctioned by Government during the year; the works were started in November 1894, and will probably be completed by April 1896. The sum of Rs. 1,00,000 spent at Arrah represents the contribution paid by the municipality towards the cost of the water-works constructed by a joint-committee of the Municipality and the District Board, and opened during the year. The negotiations for the supply of filtered water from the mains of the Calcutta Corporation to the Cossipore-Chitpur Municipality were concluded during the year, and a scheme for the supply of a minimum of 31,000 gallons daily, at the rate of 4 annas per thousand gallons, was completed during the year at a cost of Rs. 80,202. The charge was met from savings, and no money was borrowed for the purpose. The successful completion of the scheme was mainly due to the efforts of the Chairman, Rai Gopal Chandra Mukherjee, Bahadur, formerly an Executive Engineer, who supervised the execution of the project free of charge. A project for extending the water-works at Bhagalpur, so as to benefit the poorer quarters of the town, at a cost of 3 lakhs has recently been sanctioned by Government. This scheme owes its origin to the energy of a former Magistrate, Mr. F. H. Skrine, and the persevering efforts and personal liberality of the present Chairman of the Municipality, Rai Shib Chunder Banerjea Bahadur.

41. The Commissioners of the Raniganj Municipality are negotiating with the East Indian Railway to supply the town with water from the Damodar river for a fixed monthly charge, the works necessary for filtration and distribution of the water being executed by the municipality in consultation with the Sanitary Board. A scheme for the supply of filtered water to the town of Midnapore is under discussion between the Commissioners and the Sanitary Board. No progress was made in the comprehensive scheme for the supply of filtered water from the mains of the Calcutta Municipality to the riparian municipalities of North and South Barrackpore, Baranagore, and North Dum-Dum owing to the absence of Mr. Kimber, Engineer of the Calcutta Corporation, on long leave. It is proposed to connect the South Dum-Dum Municipality with the cantonment water system, and the Commissioner of the Presidency Division has been asked to have a definite scheme prepared. In Darjeeling, the Municipal Commissioners have decided to introduce the Pasteur-Chamberland filter, and their decision has been confirmed by Government since the close of the year. The works for supplying fresh river water to the moats around the residence of the Nator Raj family and the Laldighi, a tank in that town, on which nearly the whole population of the town depend for their water-supply, were completed during the year at the cost of

the Raj, and their maintenance will be supervised by the District Engineer. The Municipal Commissioners of Pabna applied for a loan of Rs. 20,000 for improving the water-supply of the town, but the scheme has been returned for revision. Rupees 1,672 were spent in Gaya in completing certain experiments in the bed of the river Phalgu in connection with the projected water-works, and Rs. 939 in making a survey of the town for the same purpose. Since the close of the year the Swetganga tank at Puri, which has long been in a filthy condition, was cleansed by the Rani of Puri to whom it belongs, and the water, though still far from pure, is said to have been greatly improved.

42. In addition to these large schemes, petty improvements in the supply of drinking water were effected in many municipalities by sinking wells, excavating and reclaiming tanks and guarding them from pollution. These reforms, though small in themselves, go a long way to lessen the number of preventible diseases which owe their origin to bad drinking water. The remarks of the Commissioner of the Burdwan Division on this point, which apply generally to all the municipalities in the Province, deserve quotation :—

"One of the most urgent wants of the municipalities in this Division is good drinking water, just as improved drainage is the chief need in rural areas, and it is satisfactory to find that this fact is now more widely appreciated than it used to be. The amendments to the Municipal Act have given much greater powers to Municipal Commissioners in the way of reserving tanks and closing tanks and wells whose water is unfit for use, and it is hoped that as these larger powers are more generally realised they may be more widely employed. If Municipal Commissioners and local proprietors will bestir themselves to preserve their tanks free from pollution, I feel confident that in a little while public feeling will side with them, and although numbers will continue to disregard every sanitary precaution, yet it will be possible for those who desire to drink pure water to obtain it. If, further, Municipal Commissioners will utilise the provisions of sections 198 to 200 of the Municipal Act, and if, lastly, the Sanitary Commissioner will issue a few simple instructions for the disinfection and purification of wells, much can be done to prevent outbreaks of disease and to preserve lives, which are now sacrificed to sheer ignorance and apathy."

43. *Drainage.*—The total sums spent on original works and on establishment during the year were Rs. 2,02,413 and Rs. 71,328 respectively. Out of the capital outlay Rs. 1,08,768 were devoted to the completion of the drainage scheme in the Patna Municipality, and Rs. 53,925 to the works constructed at Muzaffarpur. After excluding these two items, the total capital expenditure on drainage works in the rest of the municipalities stands at Rs. 39,720 against Rs. 30,051 calculated in the same manner in 1893-94. The maintenance charges show an increase of Rs. 5,665 over the expenditure of the previous year. Besides Patna and Muzaffarpur the municipalities named in the margin incurred considerable expenditure on drainage, but in most of them the charge falls under the head of maintenance and repairs.

	Rs.

Madhubani .	2,605
Bhagalpur ...	3,044
Puri ...	4,763

A drainage scheme estimated to cost Rs. 1,75,000 has been drawn up by the Municipal Commissioners of Burdwan, but the embarrassed state of their finances will preclude them from taking it up for many years to come. This is much to be regretted, for the Sanitary Commissioner believes the prevalence of malarial fever in the town to be due mainly to the obstruction of both surface and subsoil drainage, and to the existence of unwholesome tanks and depressions which serve as cess-pools. These no doubt can be dealt with in detail, but nothing short of a comprehensive project will diminish the saturation of the soil which generates malarial fever. It would be well for the Municipality to consider whether, by acting in concert with the District Board, it might not be possible to frame a project for dealing with the town and its immediate surroundings under the Sanitary Drainage Act.

The Hooghly-Chinsura Municipality has under consideration a scheme for gradually draining the town on a regular system. Projects were also prepared for Uttarpara and Baidyabati, but in the former case the Sanitary Board rejected the map drawn up, and in the latter the proposal was found too expensive. In Serampore money was spent on a drainage channel, but the expenditure incurred under this head in past years is said to have been wasteful, and the matter is now under enquiry. In Howrah no important drainage works were

undertaken, but a survey party was employed during the year at a cost of Rs. 6,312 for the preparation of a drainage scheme under the supervision of the Sanitary Engineer and the Resident Engineer of the Howrah water-works. A drainage project for Bally was drawn up in 1893-94, but Rs. 20,000 is wanted to carry it out, and the Municipal Commissioners have not yet decided what to do. In the Presidency Division surveys were made and maps prepared in Ranaghat, Kumarkhali, Nadia and Kushtea, but nothing further was done, and the two latter municipalities stated that their incomes were too limited to admit of their undertaking any comprehensive projects. The scheme for draining the town of Krishnagar by opening up the Anjona khal has been under discussion ever since the Lieutenant-Governor's visit in 1891. The Government has promised to assist the municipality by a considerable grant from Provincial funds. In Meherpur and Jessore a good deal was done to get rid of stagnant water by simply digging ditches, and if due regard is paid to the levels and the ditches are looked after, so that a continuous flow is kept up, this plan may meet the needs of most rural municipalities. A loan of Rs. 18,000 was granted to the Jalpaiguri Municipality for the improvement of the drainage of the town, and Rs. 8,068 was spent. In Dinajpur a loan of Rs. 10,000 was given by Government for the improvement and extension of the drainage system, but no work appears to have been done. In the Dacca Division a drainage scheme estimated to cost more than two lakhs was drawn up for the town of Nasirabad, and steps were taken or are contemplated towards preparing similar schemes in Muktagacha, Jamalpur, Kishoreganj and Tangail. No satisfactory progress has been made in the scheme for the improvement of the drainage of the Comilla Municipality, and the Magistrate has suggested the formation of a joint-committee of the Municipality and of the District Board for the execution of a scheme estimated to cost Rs. 50,000. The local authorities concerned should consider whether the provisions of the Sanitary Drainage Act cannot be applied to the case. The natural drains of the town of Chittagong, eleven miles in length, were cleared during the year for the first time by a special gang of Sonthal labourers. In Puri the Baradanda drainage scheme, for which a loan was obtained from Government, was completed during the year.

44. *Conservancy (including road watering) and latrines.*—There was an increase of expenditure on this item in all the Divisions* except Patna and Orissa. The total expenditure rose from Rs. 8,40,849 to Rs. 8,84,861, or by 5·2 per cent. In view of this fact it is clear that the following towns, none of which spend as much as 10 per cent., do not devote enough to this important purpose:—

	Rs.		Rs.
*Burdwan ...	3,716	Chittagong ...	1,209
Presidency ...	16,163	Bhagalpur ...	10,361
Rajshahi ...	4,046	Chota Nagpur ...	483

Taki ...	3·05	Sherpur (Mymensingh)	7·8		

In Midnapore the trenching ground was used after it had been exhausted, and new grounds approved by the Sanitary Commissioner are now being acquired. Serious complaints have been received of the neglect of conservancy in Ranaghat, where three outbreaks of cholera have been attributed to this cause. The Sanitary Commissioner has been instructed to make a searching inspection of the town, and after considering his report the Government will determine what action should be taken. Good work has been done by the Chairman of Cossipore-Chitpur; an insanitary tank has been filled up, and the condition of the trenching ground has been approved of by the Sanitary Commissioner. The Maniktala ground on the other hand is too small and has been badly managed. The contract system of conservancy in force in the South Suburban Municipality is reported to have failed; no supervision was exercised by the late body of Commissioners; the contract was not properly executed, and the contractor's bills were left unpaid. In South Barrackpore no arrangements have been made for disposing of night-soil, although

Part IX of the Act has long been in force in the most important wards. Throughout the Rajshahi Division conservancy shows a great improvement, and the Sanitary Commissioner's instructions for trenching night-soil are said to be generally carried out. In the Dacca Division great difficulty has been felt in finding land above flood level, and resort to the expensive process of raising will probably be necessary. The Lieutenant-Governor is glad to find that in Patna City a large number of well-privies have been got rid of; but the difficulty of finding suitable trenching ground has not yet been solved. The question how to dispose of sewage and night-soil is one that requires the closest attention on the part of all municipalities. No branch of their duties has a more direct and immediate bearing upon the public health, and none requires more constant and watchful supervision. The trenching system offers a complete and satisfactory solution of the problem, and, if properly managed, may even become a source of profit by increasing the fertility of the soil trenched; but this depends on the minute observance of certain well-known rules, which have been drawn up by the Sanitary Commissioner for the guidance of local authorities, and the Lieutenant-Governor trusts that Municipal Commissioners and inspecting officers will insist upon the conservancy staff doing their work properly.

45. *Hospitals and Dispensaries.*—The total expenditure under this head rose from Rs. 2,82,189 in 1893-94 to Rs. 3,31,052 in 1894-95, the increase being contributed by all the Divisions, except Burdwan, Dacca, and Chota Nagpur, which show a falling off. The increase was most marked in the Chittagong Division. Excluding the sum of Rs. 30,711, which the Chittagong Municipality contributed towards the construction of a building for the general hospital on the Rangmehal Hill, there was an increase of Rs. 1,359, which was shared by all the municipalities in the Division, except Comilla. The towns noted in the margin show the most considerable fluctuations as compared with the expenditure of the previous year. New dispensaries were opened by the Municipalittes of Sonamukhi and Moheshpur, and the charitable dispensary founded at Ranaghat by Mr. James Monro, C.B., is reported to be extremely popular. In the seven municipalities named in the margin no expenditure was incurred on medical relief, while very trifling sums were expended at Kharar (Rs. 6), Bansbaria (Rs. 10), Goverdanga (Rs. 11), Nadia (Rs. 21), and Tikari (Rs. 3). With regard to Dainhat and Debhatta, the plea of shortness of funds may be urged, but this cannot be accepted in the case of the Jainagar Municipality. It is reported that the Bansbaria Municipality, instead of having a separate dispensary of their own, resolved to contribute to a charitable dispensary maintained by the Free Church Mission, and the Nalchiti Municipality decided to pay a private practitioner Rs. 5 per mensem for giving gratuitous relief at certain hours. The municipalities of Kalna, Kandi, Tangail, and Tikari are relieved of charges on this account owing to the existence of dispensaries maintained by private individuals.

	Increase. Rs.		Decrease. Rs.
Cossipore-Chitpur ...	720	Midnapore ...	912

English Bazar ...	1,436		

Kalna. Dainhat. Jainagar. Kandi. Debhatta. Tangail. Nalchiti.

46. A lady doctor was employed at the Burdwan dispensary, for which the District Board contributed Rs. 25 per mensem. The Commissioners of the Serampore Municipality continued their monthly contribution of Rs. 4 to a lady doctor and paid Rs. 24 to a lady student of the Campbell Medical School. The female ward of the Krishnaghar dispensary, for which Babu Nafar Chandra Pal Chowdhry subscribed a sum of Rs. 2,500, about two years ago, was in course of construction during the year. At Jessore a lady doctor was engaged for the newly-constructed female ward of the local dispensary. The lady doctor who was trained in the Campbell Medical School at the cost of the Rampur Boalia Municipality has been practising in that town. Rupees 236 were spent by the Darjeeling Municipality on the medical education of two hill girls at the Sealdah School. A Dufferin Zanana Hospital on the cottage system has been built at Dacca, and a lady doctor was engaged for the

institution and also for the supervision of the female ward attached to the Mitford Hospital through the liberality of Nawab Ahsanulla Khan Bahadur. At Patna a new building for the treatment of in-door and out-door female patients has nearly been completed at a cost of Rs. 64,000. It has been named "The Duchess of Teck Hospital." A zanana hospital was under construction at Monghyr, the whole cost of which is to be borne by Babu Kamaleshwari Prosad Sinha.

47. *Vaccination*.—The statement in Appendix H gives full statistics in regard to vaccination. Two hundred and five vaccinators, employed at a cost of Rs. 18,642, performed 105,022 operations, as against 90,502 performed in the previous year. Of these operations, 87·6 were returned as successful. Of the total municipal population, 3·2 per cent. received primary vaccination as against 3·05 of the previous year. This progress is satisfactory; but seeing that the average rate of births is estimated at more than 5 per cent. of the population, the percentage of primary operations cannot be deemed quite satisfactory until it reaches or closely approaches that standard. The Lieutenant-Governor is glad to see that the average percentage for the Orissa and Rajshahi Divisions is 5·1 and 4·4 respectively, and that it exceeded 5 per cent. in the fourteen towns named in the margin. The provisions of the Compulsory Vaccination Act are in force in all municipalities. Prosecutions for non-compliance with the provisions of the Act are reported to have been undertaken in the four municipalities of Gaya, Tikari, Kendrapara, and Lohardaga.

Darjeeling ...	10·2	Daudnagar ...	5·6
Kurseong ...	29·2	Arrah ...	5·7
Madaripur ...	6·1	Bhabhua ...	7·6
Nalchiti ...	7·5	Monghyr ...	5·4
Jhalakati ...	6·6	Jamalpur ...	6·9
Pirojpur ...	5·5	Cuttack ...	9·2
Comilla ...	5·3	Ranchi ...	6·2

48. *Public Works*.—The total expenditure on account of public works rose from Rs. 5,47,823 in 1893-94 to Rs. 5,86,247. The following table compares the expenditure under the several sub-heads during the two years:—

YEAR.	Establishment.	Buildings.	Roads.	Stores.	Total.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1893-94 ...	64,490	45,940	4,31,451	5,942	5,47,823
1894-95 ...	65,736	60,458	4,52,097	7,956	5,86,247
Increase ...	1,246	14,518	20,646	2,014	38,424

In the town of Howrah the expenditure on roads fell from Rs. 41,730 to Rs. 28,203; in Midnapore an additional municipal building was constructed and a new road was opened in Suri. In the Presidency Division the expenditure on roads increased from Rs. 99,327 to Rs. 1,25,443, the increase being largest in Maniktala (Rs. 5,732), Khulna (Rs. 4,374), Baranagar (Rs. 3,843), and Cossipore-Chitpur (Rs. 3,343), and the Commissioner states that this branch of municipal work has been fairly looked after. In the Rajshahi Division a decline of over Rs. 2,000 is explained by the fact that the Municipalities of Rampur Boalia, Nator, Darjeeling, and Pabna had spent large sums on roads in 1893-94 and reduced their outlay during the past year. The expenditure on public works in the Patna Division rose from Rs. 1,06,431 to Rs. 1,27,986, of which Rs. 89,435 was spent on roads and Rs. 24,046 on buildings. The outlay on roads in Chapra fell off by Rs. 2,448, bills being left unpaid in consequence of the involved state of the municipal funds. In the Bhagalpur Division the expenditure on public works generally rose from Rs. 34,115 to Rs. 44,414, and on roads from Rs. 27,668 to Rs. 33,242. It was shared by Monghyr, Bhagalpur, English Bazar, Deoghur, and Sahibganj The expenditure on roads in the Orissa Division decreased from Rs. 14,839 to Rs. 11,763, all the Municipalities except Jajpur being affected.

49. *Public Instruction*.—The total expenditure on education as shown in paragraph 36 above was Rs. 1,36,524. This, however, includes charges met from

the fees paid by scholars, and the net cost to the municipal funds was Rs. 98,946 shown in Appendix I. Some discrepancy in the accounts has arisen from the usual cause, viz. that cheques issued at the end of March in one year and cashed on or after 1st April of the next are charged to the former year in one statement and to the latter year in another which is compiled on a different principle. The figures embodied in Appendix I, and those shown in Subsidiary Table IV appended to the General Report on Public Instruction, which are obtained from the same source, ought to agree, and repeated attempts have been made to bring about this end. There is, however, a difference of Rs. 3,003 between the total expenditure as shown in the two returns, which, although small, is distributed over all the heads of expenditure, except "High schools" and "Technical schools."

50. The total net expenditure on education, which amounted to Rs. 98,946 (Appendix I), shows an increase of Rs. 5,745 over that of the previous year. This increase, together with the savings effected in the grants to high and middle schools, was entirely devoted to the support of primary education; and the expenditure on that account rose from Rs. 48,379 in 1893-94 to Rs. 57,337, showing an increase of Rs. 8,958, or 18·5 per cent., on the previous year's expenditure. The Lieutenant-Governor cordially approves this substantial increase of expenditure, which was shared by all the Divisions, as will appear from the table below:—

NAME OF DIVISION.	Cost of teaching half the boys of a school-going age in each Municipality at 10 annas per head.	TOTAL EXPENDITURE ON PRIMARY EDUCATION.		Variation between columns 2 and 4.	Increase of expenditure as compared with previous year (column 4 on column 3.)	Ratio of expenditure on primary education to total ordinary income.	
		1893-94.	1894-95.			1893-94.	1894-95.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.		
Burdwan ...	12,015	8,940	9,171	−2,844	231	1·9	2·05
Presidency ...	14,084	10,313	14,128	+ 44	3,815	3·7	3·18
Rajshahi ...	3,610	3,627	4,143	+ 533	516	1·8	1·9
Dacca	6,752	2,354	4,864	—1,888	2,510	1·1	2·2
Chittagong ...	1,763	1,215	1,962	+ 199	747	2·1	3·04
Patna	18,776	12,416	12,656	−6,120	240	2·9	2·7
Bhagalpur ...	5,293	4,402	4,717	− 576	316	3·02	2·9
Orissa	3,098	3,225	3,694	+ 596	469	4·2	4·6
Chota Nagpur ...	2,174	1,887	2,002	− 172	115	3·0	3·5
Total ...	67,565	48,379	57,337	−10,228	8,958	2·3	2·6

The increase was highest in the Dacca Division, where the expenditure was more than doubled, and in the Presidency and Chittagong Divisions, where it rose by 37·0 and 61·4 per cent. respectively. As was stated in the last year's Resolution, it has been laid down as an approximate standard for the guidance of municipalities that provision should be made for the primary education of not less than half the male population of school-going age within municipal limits at the rate of 10 annas a head, which the returns show to be the average yearly net cost of the education of pupils of this class in Bengal; and the expenditure on this account was approximately fixed at 3 2 per cent. of the ordinary income of municipalities. The figures in column 2 of the foregoing table show the total approximate cost of working up to this standard in each division, and a comparison of these with the figures in column 4 shows that in four Divisions, viz., Presidency, Rajshahi, Chittagong, and Orissa, the actual expenditure exceeded the standard,

whilst in the rest it fell short of the requirements, the deficiency being most marked in Burdwan, Dacca and Patna.

51. *Loans.*—The table in the margin shows the new loans received during the year and the purposes for which these were obtained. The five lakhs shown against Howrah was the first instalment of its large loan of Rs. 15,00,000 for the construction of water-works. Besides those, the Patna and Muzaffarpur Municipalities received Rs. 1,60,000 and Rs. 15,000 as the second instalment of their loans for drainage works, respectively. The total loan liability of municipalities at the close of the year was Rs. 15,84,890.

Name of Municipality.	Amount of loan.	Purpose.
	Rs.	
Howrah ...	5,00,000	Water-supply.
	10,000	Improvement of Conservancy Department.
Dinajpur ...	10,000	Drainage works.
Jalpaiguri ...	18,000	Ditto.
Darjeeling ...	20,000	Improvement of water works.
	20,000	Improvement of market.
Kurseong ...	2,000	Water-supply.
Arrah	1,00,000	Water-works.
Total ...	6,80,000	

52. *Accounts, audit and embezzlements.*—Embezzlements of Municipal funds occurred in Burdwan, Tamluk, Hooghly-Chinsura, Howrah, South Suburbs, Maniktala, Maheshpur, Debhatta, Satkhira, Dacca, Noakhali, Patna, Bhagalpur, English Bazar (Malda) and Chatra. In Burdwan the confusion was so great that it was found necessary to appoint a special officer under section 82 of the amended Act to examine and report on the accounts of the Municipality. The sums embezzled in Patna amounted to Rs. 12,773, and it was clear that the frauds had been going on for a considerable time, and that the offenders believed themselves to be practically safe from detection. Registers were irregularly kept, and the instructions of the local Auditor were disregarded, with the result that heavy arrears accumulated and large remissions were granted on very inadequate evidence. In this and all similar cases the defalcations which took place were rendered possible by gross neglect of the account rules on the part of the Vice-Chairmen concerned. The amendment of these is now under consideration, and the opportunity will be taken to define the Vice-Chairman's duties more fully and precisely than is done in the present rules.

53. *Working of the Bengal Porters and Dandiwallas' Act, V of* 1883.—This Act is in force in the Darjeeling Municipality only. The Deputy Commissioner of the district reports as follows:—"The law is carefully observed, and an effort is made to supervise the work of dandiwallas and porters. A special officer is employed to look after and prosecute offenders, and complaints are not so frequent." The number of porters and dandiwallas registered was 1,203, against 980 in the previous year; the prosecutions under the Act numbered 45, and the fines amounted to Rs. 91-8 against Rs. 52-12 imposed in the previous year.

54. *Inspections.*—Much useful work was done during the year by the Commissioners of Divisions and District Officers in inspecting municipalities, and inspection reports on thirty-three municipalities were submitted to Government by Commissioners of Divisions. The smaller municipalities should be inspected and reported on by Subdivisional Officers. Special attention should be paid by all inspecting officers to the arrangements made for collecting municipal taxes, the system of granting remissions and the state of the accounts.

55. *General working of the Act during the year.*—Mr. Romesh Chunder Dutt, Officiating Commissioner of the Burdwan Division, left the following general remarks before his transfer from Burdwan:—

"Excepting Howrah, all the municipalities I have inspected have a non-official Chairman. I have found them, as well as the Municipal Commissioners, willing to devote their time and attention to the work they have undertaken, and accept and act on all reasonable suggestions that we make for improvements. Work is carried on tolerably well and with intelligence and care. It is necessary for us to indicate the way in which sanitary improvements can be effected, and to urge on such improvements being effected, so far as is possible within the resources of the municipalities. It is also necessary for us to carefully examine the municipal budgets, as there is a tendency to over-estimate income, and also to allow unduly frequent increments to municipal servants. In both these matters District Magistrates have generally done their duty by giving sympathetic advice and making practical suggestions. And with such help Local Self-Government within municipal areas has attained a fair measure of success."

56. Mr. J. A. Bourdillon, who subsequently held charge of the Division and submitted the report, writes :—

"In the above note of qualified approbation I am quite prepared to join. I find the Municipal Commissioners everywhere glad to receive suggestions and ready to accept criticism in a friendly spirit; but it is in execution that they usually fail. No schemes of government in Bengal work automatically, and it is absolutely essential that persons in authority should not only pass orders but see that they are carried out. Here and there one finds an active spirit among the officers or members of a Municipal Corporation, but as a rule they content themselves with passing orders and trusting that somehow or other they will be carried out. Thus, arrangements admirable on paper are found to be abominable in practice: taxes are not collected, roads are not repaired, and elaborate rules for conservancy and sanitation are grossly violated. Until it is universally understood that taxes are to be collected promptly and paid in punctually without fear or favour, and that a close supervision in all departments is just as essential to good government as wise advice and admirable systems, municipal administration will never reach the high standard which Government sets before it. On the other hand it is impossible to forget that the work done by Municipal Commissioners is gratuitous and that it is often discharged at considerable personal sacrifice. Of the value of their services I am deeply conscious as well as of the real interest which many Commissioners take in their duties; and in making the above remarks I desire to pose not as a hostile detractor magnifying failure, but as a friendly critic showing what still divides present achievements from complete success."

57. Mr. E V. Westmacott, Commissioner of the Presidency Division, writes :—

"In reviewing the municipal administration of another year, it must be considered what progress has been made, and whether such efficiency has been attained as would, to any extent, justify the relaxation of official control. I cannot say that I find indications of this at present. In the allotment of their funds, Municipal Commissioners are not sufficiently considerate of the welfare of the general body of the people, and look exclusively to the wants of a certain class. Of the people generally they are in no sense representative, and with them they have less sympathy than a European official would have. Municipal administration by the educated Babu class is in no sense Local Self-Government by the people, whose interests it is necessary to safeguard by external control. Very few Commissioners are sufficiently enlightened to appreciate the advantages of sanitation, and in some cases, they are actively opposed to it. While ready to spend public money on higher education for the benefit of children of their own class, they will not, without pressure, provide for primary education. It is necessary that a controlling authority should make sure that proper provision is made for conservancy, roads, drainage, water-supply, and primary education, and that any tendency to increase of establishments, providing employment or raising salaries for the Babu class, or to pay for the higher education of their children, is kept in check. In exercising a firm and just control over subordinates and making them do their work efficiently, I find an almost general failure and an inaptitude for command, which is quite distinct from the constitutional dislike to personal exertion which prevents effectual supervision of work out of doors. It extends also to work done in the office, and it is very rarely that the collection of rates and taxes is efficiently supervised as it might be even without going outside the office walls. Bills are left for indefinite periods in the hands of collecting officers, no one troubling themselves to find out whether amounts not paid in have been collected or not, and instead of regular periodical inquiry respecting uncollected amounts, balances are allowed to remain on the books for several years, when inquiry is useless. Enormous amounts are eventually written off as irrecoverable, much of which might have been found to have been realised by dishonest officers had inquiry been made in due time. Regular quarterly inquiry into balances would control the collecting staff as it certainly is not controlled at present, and for such inquiries Ward Committees ought to be utilised. I do not believe that all Municipal Commissioners are so apathetic or inefficient, that a good working Committee could not be established in every ward, and from what I have seen, I think the jealousy of the Chairman and Vice-Chairman is generally the real obstacle in the way of the existence of efficient Ward Committees. It is easier to awaken a man's interest in the affairs of his own immediate neighbourhood than in those of a large municipality generally, and if each Commissioner were allowed a share in the executive management of the affairs of his own ward, the general body of Commissioners would manage the affairs of the municipality much more efficiently and intelligently than they do at present. There are still Municipal Commissioners and even Chairmen and Vice-Chairmen who are absentees, and do not visit the municipality, except to attend at meetings, but I think that the number of such Commissioners is smaller than it used to be, and that in this respect there has been improvement. There is a general complaint of the difficulty of obtaining answers to letters addressed to a municipal office. This is, I think, generally due only to dilatory and unbusiness-like habits; but I have also found instances in which it is due to the jealousy of Municipal Commissioners, who insist on the absurd practice of sending round letters, however unimportant, to every individual Commissioner before answering them. The faults which I mention have been noticed before, and I mention them as no new discovery, but as considering to what extent they have been corrected during the year; and I

must say that I find little improvement. Upon considering the work of the year, I can only come to the conclusion that far from satisfactory as municipal administration has been, it would rapidly deteriorate and become less efficient if official control and supervision were removed. The visits of the Magistrate of the district and of the Commissioner of the Division are important and indispensible factors in keeping up the standard of municipal work; and the examination by the official auditor with the resulting orders of controlling officers is highly necessary to secure the proper keeping of accounts. In the few instances in which municipal administration is carried out in a business-like and intelligent manner, and where interference is not necessary, control may gradually become nominal, but generally I see no possibility at present of relaxing the supervision of the Magistrate and of the Commissioner of the Division."

58. Mr. P. Nolan, Commissioner of the Rajshahi Division, sums up the year's work with these remarks:—

"In my opinion the only serious objection to the development of municipal institutions is the great increase in taxation by which it has been accompanied. This is a good deal felt by the people, who formerly had to pay very little in this form. On the other hand, the advantages derived from the sanitary and other measures of improvement on which the money raised has been spent are undoubted, and the form of administration by Committees elected or nominated is popular."

59. Mr. Luttman-Johnson, Commissioner of the Dacca Division, says:—

"I have so often said that whatever may be the shortcomings of our Municipal Boards, they are better than nothing, that I hardly care to repeat the platitude. Some grievous shortcomings, some grievous instances of administrative inaptitude, of hopeless want of ordinary business capacity, have come to my notice. But this, I fear, is a national characteristic, which must be borne with and, as far as possible, corrected in municipal as in other affairs."

60. The following are the comments of Mr. W. B. Oldham, C.I.E., Commissioner of the Chittagong Division:—

"The Chittagong and Comilla Municipalities are doing good work. The Cox's Bazar Municipality is virtually managed by its Chairman, the Local Subdivisional Officer. The Brahmanbaria and Noakhali Municipalities do little more than enough to save themselves from being superseded by the authorities. There are absolutely no indications that the Cox's Bazar people would prefer a real municipal system to the nominal system which they have. Detached parts of the Brahmanbaria municipal area frequently pray for release from the Municipality. There are no signs of any wish by the people of Chandpur, or Hajiganj, or Feni, all rapidly rising centres of business and population, to have municipal government introduced, and those concerned prefer to provide privately or by subscription for their needs. The Chittagong Municipal Commissioners have shown a sense of their requirements by invariably electing a European as Chairman, and supporting him against opposition or complaints which would make an ordinary office untenable. Altogether it is not even certain if the present municipal system is in this Division preferred by the great majority of those concerned, or except by the English-speaking class, to the old *régime* under the Magistrates."

61. Mr. A. Forbes, C.S.I., Commissioner of Patna, concludes his report with the following remarks:—

"It must be admitted that the past year has in many respects been disappointing. In many Municipalities, such as Arrah, Gaya, Motihari, Bihar, Siwan, Madhubani, Rosera, Jagdispur, and elsewhere, the non-official Chairmen or Vice-Chairmen have performed their duties in a thoroughly satisfactory manner, and have, as a rule, been suported in carrying out any desirable reforms by the rest of the Municipal Commissioners (though not always, *e.g.*, Arrah). But in other places, notably Chapra, Darbhanga, and Patna, there has not only been much mismanagement, but also in the two first-named much deliberate obstructiveness to progress and reform, however obviously needed, when it was a question of increasing or revising taxation. I reproduce the following remarks from my General Administration Report:—'On the whole, however, I doubt very much whether, under the present system, we shall ever, in municipal matters, get beyond a certain limited point, and I am afraid that we have about reached it. Signs are not wanting of an unwillingness among municipal bodies to bestir themselves actively or to listen to advice, and I fear that the feeling is growing. If this goes on, it may be found in time that the legislation of the last 12 years has weakened the hands of Government to an extent inconsistent with the public interests'."

In paragraph 404 of his General Administration Report Mr. Forbes also wrote as follows:—

"The Municipal Commissioners have to make, or at least to supervise the making of, assessments and collections, and to carry out the whole of the executive work themselves. And in all these *active* duties, whether from *inertia*, dislike to increase taxation, an instinctive shrinking from responsibility, or want of proper appreciation of the rules of sanitation, or from all these failings combined, if left to themselves, they almost invariably fall short of the standard of excellence one would wish to see them attain. It is a regrettable fact, but no

less true, that in one municipality after another, any important reform, however patent its need, is, as a rule, only introduced in consequence of direct official pressure. And not only so, but the ordinary administration of each municipality, if not constantly looked into and brought into line by the officers of Government, is almost certain in a short time to fall into a state of *laisser-aller* and disorder."

62. Mr. Toynbee, the Commissioner of the Bhagalpur Division, has recorded the following remarks:—

"The number of Municipalities in the Division remained the same as it was last year, and little or no change occurred in their condition. The application of modern western ideas of sanitation to eastern towns is not only a difficult but a very costly operation. The municipal authorities cannot carry the people with them, not only because sanitary reform means extra taxation, but also because conservative as they are, they cannot divest themselves in a day of the habits of generations. In most of the municipalities in this Division the Municipal Commissioners are engaged in a constant struggle to make both ends meet, and to steer clear of any very unfavourable remarks by the Sanitary Commissioners or Local Auditor. Unless they are rich enough to afford a paid Secretary, the supervision of out-door work has practically to take care of itself. No funds are available unless a loan be obtained from Government for any new works or improvements, however necessary or advisable they may be. It is not, therefore, I think, to be wondered at that true Local Self-Government seldom stirs out of the meeting-rooms of the Municipal Commissioners. The municipal cart sticks in the mud, but as a rule no Municipal Commissioner puts his shoulder to the wheel."

63. Mr. W. H. Grimley, Commissioner of the Chota Nagpur Division, has recorded the following remarks:—

"The municipal bodies in the five districts of Chota Nagpur are not sufficiently advanced to be trusted to walk alone, and are therefore placed under the guidance of an official Chairman, who at head-quarters is the Deputy Commissioner of the district and in other places the Munsif, Magistrate, or Sub-Registrar; it consequently depends very much on the capacity of this officer whether any real progress is made in municipal administration. If he is active and efficient he can under the large powers conferred upon him by section 44 of the Act take ready action, and so prevent temporary encroachments on roads, obstructions to drainage, or other nuisances from becoming permanent and irremovable; while if on the contrary he is weak, wanting in self-reliance, or intractable, instead of making prompt endeavours to carry out improvements suggested, it may be, by the Sanitary Commissioner, the Commissioner of the Division, or by Government, he will take shelter behind the resolutions of the Municipal Board, which is proverbially slow to move in such matters. It is only by timely notice and by prompt prosecution of those who contravene the law that many municipal improvements become possible. Whenever the state of the roads is bad, the drainage obstructed, encroachments permitted, the collections unpunctual, it is a sure sign that the executive is not controlled with a firm hand, and a strong executive is the main essential in the municipalities of this Division, where the Commissioners, who are mostly pleaders, mukhtars, petty traders, and money-lenders, are busy men whose time is chiefly taken up with their own concerns. Their interest in municipal business is mostly confined to mere routine matters and to a more or less regular attendance at the meetings, and the tendency generally is towards a mild or slack administration, which may be said to be in harmony with the public feeling on the subject."

64. Looking back on the work done by the municipalities of the province during the last five years the Lieutenant-Governor has much pleasure in recognising not only that many permanent improvements have been made, but that on the whole the standard of administration has been raised and a more active interest has been created in the business that comes before the Commissioners. Meetings are held oftener and are better attended than was the case five years ago; the municipal income has risen from Rs. 28,24,204 to Rs. 40,45,345, and the incidence of taxation now stands at 13 annas and 7 pies per head against 11 annas and 11 pies at the beginning of the period. Under all the main heads which contribute to the health and comfort of the urban population a marked increase has taken place in the expenditure of municipal funds. The amount spent on conservancy has risen from Rs. 6,90,123 to Rs. 8,84,861; on lighting from Rs. 1,43,343 to Rs. 1,60,596; on public works from Rs. 4,73,551 to Rs. 5,86,247; on hospitals and dispensaries from Rs. 2,32,651 to Rs. 3,31,052; and on public instruction from Rs. 1,15,288 to Rs. 1,36,524. On water-supply the capital expenditure has increased from Rs. 1,10,284 to Rs. 7,36,231, and the charges for maintenance from Rs. 28,217 to Rs. 61,702; while drainage works show a rise in capital outlay from Rs. 25,860 to Rs. 2,02,413, and in maintenance charges from Rs. 62,185 to Rs. 71,328. Within these five years water-works supplying filtered water on a large scale have been opened in Arrah, Maniktala, and Cossipore-Chitpur by municipal enterprise, and in Nasirabad by the liberality of Raja Surjya Kanta Acharjia. A large

scheme has been started, after much discussion, in the town of Howrah, and is now approaching completion. In Dacca the original works have been extended so as to double the supply of water; the works at Burdwan have been enlarged; the Darjeeling Municipality have improved their system and introduced the Pasteur-Chamberland method of filtration; and within the last few days the Lieutenant-Governor has had the satisfaction of according sanction to an extension of the Bhagalpur water-works which will distribute pure water to the poorest and most unhealthy quarters of the town. Good progress has been made in the experiments undertaken in connexion with projected water-works in Gaya, and water-works are being designed for Midnapore; but the schemes for supplying water to the small municipalities on either bank of the Hooghly are still incomplete. Minor projects which aim merely at improving the existing water-supply, without resorting to filtration, have also been carried out in Kurseong, Khulna, Comilla, Nator, and Purulia, and schemes of the same character are under considertion in Pabna and Raniganj. Under the head of Drainage large schemes have been carried out in the towns of Patna, Muzaffarpur, and Jalpaiguri; the municipal drainage system has been remodelled in Darjeeling and Rampur Boalia and improved in Dacca, Puri, and Naihati, and drainage projects are under consideration in the numerous towns mentioned in paragraph 43 of this Resolution.

65. For results such as these, though doubtless to some extent due to initiative influence on the part of the officers of Government, the municipalities concerned may fairly claim a substantial measure of credit. In most cases the Municipal Commissioners have shown themselves amenable to the suggestions that have been made to them; but both Mr. Nolan and Mr. Forbes write warningly of the growing impatience of increased taxation, however good the object may be, and Mr. Westmacott and Mr. Forbes are seriously alarmed at the tendency to resist or to ignore the advice and corrections of District and Divisional Officers. It is of course out of the question that municipalities should be independent of official control, nor does the Lieutenant-Governor believe that such a claim would be put forward by those Commissioners who have the success of municipal administration really at heart. On the other hand it is not desirable to extend the sphere of official supervision, and the general tendency of the amended Municipal Act has been to increase the reasonable liberty of action enjoyed by the Commissioners in the management of local affairs, while it has strengthened the power of the State to intervene in the exceptional cases where that discretion is seriously abused and the abuse persisted in.

66. At the close of his term of office Sir Charles Elliott has much pleasure in recording that municipal administration in Bengal is on the whole creditably carried on, and that there is a tendency to improvement in the efficiency with which municipal funds are expended for the public good. The defects which exist are due mainly to the constitution of the Committees themselves. Few Municipal Commissioners have had any training in public business, and most of them are fully occupied with their own affairs. For deliberation and discussion they have considerable aptitude: their difficulties begin when decisions expressed in general terms have to be carried out in detail. Here they are at a great disadvantage as compared with the District Boards. Municipalities have to create their own executive and to acquire for themselves experience in the transaction of business, while District Boards have both of these essential requisites found for them in the person of the Chairman and his permanent staff. The executive work done by the former agency cannot, therefore, be judged by the same standard as is applied to the latter, but for all that municipalities fill a useful place in the system of administration and discharge a number of functions which could not conveniently be undertaken by Government officials.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

FORM No. I.

STATEMENT SHOWING THE CONSTITUTION OF THE MUNICIPALITIES IN BENGAL

DURING

1894-95.

FORM I.—*Statement showing the Constitution of the Municipalities in Bengal during the year* 1894-95.

RESOLUTION ON THE PROGRESS REPORT OF THE FOREST ADMINISTRATION IN THE LOWER PROVINCES OF BENGAL FOR THE YEAR 1894-95.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 9th December 1895.

RESOLUTION—No. 5278.

READ—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1894-95.

Read again—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1893-94, and the Government Resolution thereon.

The Report is submitted by Mr. A. E. Wild, who held the post of Conservator of Forests in the province throughout the year. It was received on 7th November, some weeks after the due date (1st October); it is explained that the delay was owing to the fact that the time between the receipt of divisional reports by the Conservator and the date fixed for the submission of his report to Government is insufficient. The Conservator proposes to alter these arrangements to ensure the punctuality of his report in future.

The report is not altogether satisfactory. Mr. Wild, endeavouring no doubt to confine his remarks within the limit prescribed by the Forest Code, has reduced the printed matters by six pages, as compared with the report of 1893-94 But the decrease is hardly earned at the expense of clearness, with the result that it is impossible to learn, without reference to the statistical tables, many facts which should have been shown in the body of the report.

2. The remarks made by this Government and the Government of India in reviewing the report and the tables compiled for illustrating the statistics, should be noticed by the Conservator, and similar remarks and tables should be embodied in the next report. There was only a small increase of 40 square miles in the area of the various classes of forests, so far as they have been ascertained. The limitation, however, is important, for the areas of the forests in the Sonthal Parganas and in Chota Nagpur (except Hazaribagh) are still unknown and have not been shown in the statement. The revenue settlement operations now in progress in Palamau and Singhbhum will fix definitely the forest areas in the resettled portions of those districts, and the Lieutenant-Governor trusts that the officer now posted to the Sonthal Parganas will ascertain approximately the area of his charge during the current year. The following table shows the areas under management:—

FOREST.	At commencement of the year.	Added.	Excluded.	At close of the year.	PERCENTAGE— Of total forest area.	Of the area of the provinces.
1	2	3	4	5	6	7
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Reserved ...	5,831	8	...	5,839	45	3·7
Protected ...	3,059	32	...	3,091	24	2·0
Unclassed ...	4,034	...	..	4,034	31	2·6
Total	12,924	40	...	12,964	100	8·3

3. *Protected Forests.*—An important addition was made during the year to the protected forests by Government Notification, No. 4844, dated the 2nd November 1894, which extended the protection of the Act to the forests of the Sonthal Parganas. In May 1895 the Forest Division of the Sonthal Parganas was constituted, and an officer of the department placed in charge. No

officer, however, has been added to the cadre of the service to meet the wants of the newly-created division, and, though it was deemed advisable to place an officer in charge, he could ill be spared from the other divisions.

4. *Settlements.*—As directed in the Resolution on last year's report, the forest tracts in respect of which, though they have not been formally settled, no further enquiry into the rights of Government and private persons is judged necessary, have been added to the areas actually settled under the Act, and the amalgamated total of areas for which no further settlement operations are required has been given as 5,641 square miles. At the commencement of the year, 931 square miles were undergoing settlement; with the exception of small plots of land acquired under the Land Acquisition Act for special purposes, no new work was undertaken during the year, while operations were brought to a conclusion only in 7 square miles which were added to the Buxa Reserve. The tracts in which settlement operations are in progress consist of 191 square miles in the Darjeeling civil district and 733 square miles in the Chittagong Division. The delay in the case of the former is not understood, and the Revenue authorities will be desired to explain. The work is not of a difficult nature, and in the past year's report it was stated that the settlement had been practically finished in July 1893; it is therefore strange that it has not yet been brought to a close. In Chittagong the Forest Department is not responsible for the delay. The work has to go hand in hand with that of the Revenue Settlement, and in addition is complicated by innumerable claims which have to be decided.

Orders have been issued for the delimitation of the forest area and the preparation of a record-of-rights in the Kolhan estate in Singhbhum and the Government estate in Palamau concurrently with the revenue settlement operations now in progress. During the land settlement of the Western Duars in Jalpaiguri, 843 blocks of land, aggregating 50,137 acres in area, were set apart for fuel and fodder reserves. These areas are at present in the charge of the Civil Department, but since the close of the year orders have issued for the Forest Officers of Buxa and Jalpaiguri to examine the various blocks with a view to the larger and more important among them being taken over by the Forest Department.

5. *Working Plans.*—No progress has been made in the preparation of working plans. The work in hand last year in the Darjeeling and Tista Divisions is still unfinished, and the Jalpaiguri area has been undertaken during the year. Having regard to the paucity of officers available, the lack of progress is not perhaps surprising. But the fact remains that Bengal is very backward in respect of working plans, and the Conservator should spare no efforts to push on this important branch of the administration.

The only areas for which working plans are now in operation are the Sundarbans covering 4,340 square miles and 38 miles in the Darjeeling Division. In the former case the provisions of the plan were in every instance worked up to, in the latter some deviations have occurred.

6. *Communications and Buildings.*—The following statement compares the expenditure on communications and buildings during the last two years and the Budget allotment for 1894-95:—

	Buildings.			Roads and Bridges.			Total.		
	1893-94.	1894-95.	Budget allotment for 1894-95.	1893-94.	1894-95.	Budget allotment for 1894-95.	1893-94.	1894-95.	Budget allotment for 1894-95.
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
New construction ...	21,757	6,623	14,600	5,998	10,227	20,865	27,755	16,850	35,6[illegible]9
Repairs	10,435	9,410	9,800	6,885	7,046	6,035	17,320	16,456	15,601
Unapportioned ...	....	314	....	1,633	93	......	1,633	407	......
Total ..	32,192	16,347	24,400	14,516	17,366	26,900	46,708	33,713	51,300

No new expensive buildings were constructed during the year, and thus the expenditure under the head decreased by Rs. 15,845. The expenditure on

roads, on the other hand, increased considerably; 73 miles of new road were made at a cost of Rs. 10,227 and 622 miles were repaired at a cost of Rs. 7,046, the expenditure in 1893-94 having been Rs. 5,998 for 51 miles of new roads and Rs. 6,885 for the repairs of 487 miles.

7. *Breaches of Forest Law.*—One hundred and thirty-five cases were prosecuted in the Courts compared with 126 in 1893-94; convictions were obtained in 92 per cent. of the cases, against 88 per cent. in the previous year. The number of prosecutions for injury to the forests by fire increased from 8 to 18.

No details have been given regarding those cases. In future the report should show the number of cases in which convictions and acquittals were obtained, the number of persons concerned in each case, the number of cases pending at the beginning and end of the year, and the penalties inflicted. It has been ascertained that during the year under report convictions were obtained in 15 out of the 18 cases, the accused were all discharged in two cases and one was pending at the close of the year. In all 45 persons were convicted and 15 acquitted. The proportion of convictions was satisfactory, but the punishments inflicted were generally light. The Conservator explains this by the fact that cases detected were of a trivial nature, and that the real incendiary fires were undetected. In one case in Jalpaiguri, 11 persons were convicted of deliberately setting fire to the forest in order to drive out the game, and were fined only Re. 1 each. The case was referred to the High Court, who in their judgment wrote—'It is not now desirable to enhance the sentence in this case, but when the offence charged was found to be established, and there were no mitigating circumstances, we think that more than a nominal punishment was called for.' Some mention should have been made in the report of a case of such importance, and information should have been given of the effect of the Lieutenant-Governor's orders that all cases of inadequate punishment should be reported to Government. This should be done in future reports. There were, besides the 18 cases brought to trial, 13 cases which after enquiry remained undetected. Of the 18 cases brought to trial, 13 occurred in Singhbhum, 2 in Puri, 2 in Kurseong, and 1 in Jalpaiguri.

The number of cases compounded by the Forest Officer, under section 67 of the Act, was 958, involving 1,562 persons, as against 982 and 1,516 persons in 1893-94. The amount received as compensation for these offences was Rs. 5,653, or Rs. 5-14-5 for each case and Rs. 3-9 for each person. In compliance with the orders given last year, no offences by fire were compounded.

The number of offences was greatest in the Darjeeling (395 cases) and in the Tista (281 cases) Divisions, and the same divisions headed the list in 1893-94.

8. *Grazing.*—Leaving out of consideration the Sundarbans area in which grazing is impossible owing to the absence of pasture, the whole area of the protected and unclassed forests, except 12 square miles, is open to grazing. In the reserved forests, on the other hand, out of a total area of 3,747 square miles (omitting the Sundarbans reserves), 3,339 square miles are closed to all animals, 20 square miles are closed to browsing animals, and only 388 square miles are open for pasturage. The actual receipts from grazing fees in the reserved forests amounted to Rs. 10,022, as compared with Rs. 7,722 in the previous year; the increase occurred chiefly in the Jalpaiguri and Tista Divisions. In the protected area, fees were levied in the Puri Division only, excepting Rs. 10 in Singhbhum, and the actual receipts amounted to Rs. 5,138, against Rs. 3,141 in 1893-94.

As regards cattle trespass, the number of cattle impounded is said to have been 1,432, against 1,762 in the previous year, but the figures for the current year are admittedly incomplete, as some of the Divisional Officers have failed to furnish statistics. Complete figures should be given in future reports.

9. *Forest fires.*—The area over which protective measures against fire were adopted extended to 1,874 square miles, or 32 per cent. of the total area of the reserves. Only 9 square miles, or 0·49 of this area, were burned, compared with 689, or 37 per cent., in 1893-94. The area successfully protected thus amounted to over 99 per cent.

In all areas, specially protected or otherwise, only 56 square miles, or 0·63 per cent., were burned, and of this some 36 square miles were purposely burned by the Department, so that only 0·23 of the total area of forests suffered

from accidental or incendiary fires. Of this unusual success, the Conservator remarks :—

"It is too venturesome to attempt to explain this immunity. No doubt the representations made last year and the measures taken thereon have, in some degree, perhaps, borne fruit, yet it is too early to speak confidently of their real effect; and though credit is undoubtedly due to both Civil and Forest Officers for the success attained, there is no question that their exertions in this respect have been materially aided, not only by the favourable season, but more so, perhaps, by the very severity of the fires of the previous year, for it is seldom that two seasons, more than usually disastrous, succeed each other."

No doubt the measures taken against fires were attended with much better results during the year under report than in the previous year, but His Honour would point out that the comparison is vitiated by the absence of any figures from the protected areas in Singhbhum, of which in 1893-94 it was reported that 320,000 acres were burnt. The Conservator explains that accurate figures for the area in Singhbhum cannot be given, but adds that as a rule fire overruns the whole. Granting that this is so, it completely destroys the use of statistical tables to show in one year the whole protected area as having been burned as was done in last year's report, and to shew none as burned in the following year. Either the figures should be excluded every year or shown every year. Areas intentionally burned by the Department should not be shown in the statement.

Rules framed under section 75 (*d*) of the Forest Act were introduced into the Puri district in January 1895 to regulate the lighting of fires and the collection of inflammable material in the vicinity of reserved forests during the dry months of the year from January to July. When directing the enforcement of these rules, the Lieutenant-Governor expressed his opinion that a small fine was neither a severe nor even a sufficient penalty for the carelessness which might destroy a vast mass of valuable State property, and that any person, who by his culpable neglect sets fire to a reserved forest, should receive a sufficiently severe punishment to deter him from similar carelessness in future.

10. *Gross yield and outturn of Forest Produce.*—The following statement gives details of the outturn during the year from all the forests in the Province, including the removals by privileged villagers:—

CLASS OF FOREST AND AGENCY BY WHICH PRODUCE WAS REMOVED.	Timber.	Fuel.	Total wood.	Bamb	Minor produce.
1	2	3	4	5	6
Reserved.	C. ft.	C. ft.	C. ft.	No.	Rs.
Government	14,224	119,349	133,573	29,135	218

Total ...	560,247	17,697,474	18,257,721	4,000,850	1,54,653
Unclassed.					
Government	6,377	......	6,377	6,840	218
Purchasers	376,043	195,899	571,942	10,413,729	8,936
Free grants	......	......	......	......	......
Right-holders	......	......	......	......	......
Total ...	382,420	195,899	578,319	10,420,569	9,154
Grand total in 1894-95 ...	4,493,234	30,195,622	34,688,856	22,049,274	2,72,942
Grand total in 1893-94 ...	4,880,620	27,819,890	32,700,510	21,101,508	2,48,571
Difference in 1894-95 ...	—387,386	+2,375,732	+1,988,346	+947,766	+24,371

The removals of timber from the reserved forests by purchasers were 237,200 cubic feet less than in the previous year. The falling off was most noticeable in the Sundarbans Division, where, it is explained, the abundant rice

harvest enabled the cultivators to obtain a livelihood without resort to the difficult and dangerous occupation of cutting and extracting timber from the forest.

Exploitation by purchasers is now the method almost exclusively adopted in Bengal; Departmental operations, which consisted mainly in the delivery of firewood to the troops at the Jelapahar Cantonment, comprised only 20,927 cubic feet of timber, 119,510 cubic feet of fuel, and 35,975 bamboos.

11. *Financial results.*—The receipts for the Forest year amounted to Rs. 8,25,669 and the charges to Rs. 4,09,552, so the net revenue was Rs. 4,16,117, which is the highest on record. The figures for the last five years, according to the financial year, are given in the following table:—

Year.	Financial year.		
	Receipts.	Charges.	Net revenue.
	Rs.	Rs.	Rs.
1889-90	7,68,718	3,90,265	3,78,453
1890-91	7,27,392	4,14,005	3,13,387
1891-92	7,89,553	4,22,930	3,66,623
1892-93	7,44,882	3,81,608	3,63,274
1893-94 ...	8,01,611	4,04,043	3,97,568
1894-95	7,95,673	3,98,601	3,97,072

12. The following table shows the results in each division for the last two financial years: -

Division.	Receipts.		Charges.		Surplus.		Deficit.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.

Palamau	2,318	2,766	9,637	9,225	......	......	7,319	6,519
Singhbhum	28,633	42,364	43,115	38,015	......	4,349	14,482	.
Angul	4,741	2,436	12,176	12,860	...	...	7,435	10,424
Puri	20,163	19,692	13,795	14,173	7,158	5,519	.....	......
Sundarbans	4,91,163	4,46,801	1,06,156	91,051	3,85,007	3,55,750	.....	.....
Chittagong	97,261	95,660	27,262	30,034	69,999	65,626	.....	....
Total .	8,01,611	7,95,673	4,04,043	3,98,601	4,82,088	4,61,329	84,520	64,257
Net surplus ...	......	......	...	......	3,97,568	3,97,072	.. ..	......

Eighty-nine per cent. of the net income of the circle represents the profits of the Sundarbans Division; the Chittagong Division makes the next greatest profit, but shows a regrettable decline as compared with the previous year.

13. *Miscellaneous.*—Mr. Wild was in charge of the circle throughout the year. He was on tour for 172 days and inspected seven out of the thirteen divisional offices. Details of his tours with dates should be furnished in the next report. His Honour again notices with regret that a large number of changes have been necessary in the divisional charges owing to the deaths, illnesses and absences of officers on leave. The Tista Division was held by no less than seven officers during the year, the Direction Division by five, Darjeeling by four, and Angul by three; only Kurseong and Jalpaiguri were under the same officer throughout the year. Both these two Divisions, especially Kurseong, have done better financially than last year, owing, no doubt, partly to this cause. It is with regret that the Lieutenant-Governor records the death of Mr. G. A. Richardson, Deputy Conservator, who, when on privilege leave in March last, succumbed somewhat suddenly to an attack of pneumonia, his constitution having been weakened by long service in the Buxa Duars; and in April last the death of Mr. H. H. Davis, the senior officer of the circle, whose great local knowledge and wide experience were of great service to Government.

Order.—Ordered that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

EARLY COTTON CROP IN BENGAL, 1895.

THE following is published for general information.

REV. DEPT.,
The 10th December 1895.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

NOTE ON THE EARLY COTTON CROP IN BENGAL, 1895.

Explanatory.—There are, generally speaking, two cotton crops in these Provinces, viz., the early crop, which is sown during the monsoon rains and harvested during the cold weather by the end of December, and the late crop, which is usually sown at the close of the rainy season and harvested during the hot weather in May and June.

Of the districts for which returns are given in the appended statement, the early crop is reported to be grown only in Jalpaiguri, Chittagong Hill Tracts, Sonthal Parganas, Hazaribagh, Lohardaga, and Palamau, while in the remaining districts, noted in the margin, both the early and late crops are cultivated. This report furnishes estimates of area and outturn for the early crop only.

* Midnapore. Monghyr. Bhagalpur. Cuttack. Balasore. | Puri. Angul and the Khondmals. Manbhum. Singhbhum.

Character of the season.—The rainfall of the monsoon season of 1895 has generally been less than the normal in the early cotton-growing districts of these Provinces. In July, the rainfall was below the normal in all these districts except in Jalpaiguri, Monghyr, Bhagalpur, and (generally) in Chota Nagpur; it was deficient also in August in all districts except in Jalpaiguri, Bhagalpur, and Orissa; in September Puri only received more than the normal fall; and in October, Cuttack, Manbhum, and Singbhum were the only districts in which the rainfall was above the normal. In November the rainfall was light.

Area sown.—The total area this year sown with the early cotton crop in these Provinces appears from the statement annexed to this note to be 91,000 acres. The corresponding area for the previous year is shown in the same statement as 95,600 acres. The present estimated acreage is nearly 5 per cent. less than that of last year. The decrease is noticeable chiefly in Puri and Singbhum, and is reported to be due in Puri to excessive rain, and in Singbhum to insufficient rain. Sonthal Parganas, Angul and the Kondmals, and Palamau show a slight increase in area, which the Deputy Commissioners of those districts attribute to a favourable season for cotton cultivation.

Character of the crop.—From the attached district estimates, it will be seen that two out of the fifteen districts from which returns have been received, viz., the Chittagong Hill Tracts and Angul and the Khondmals report an average crop of 16 annas; seven* report crops varying from 12 to 15 annas, and the remaining six districts report crops varying from 8 to 11 annas. On comparing the meteorological reports of this year with those of last year, it appears that the climatic conditions of this year have been, on the whole, more favourable for the early cotton crop than those of last year. From the district estimates of outturn, it will be seen that six districts, viz., Midnapore, Chittagong Hill Tracts, Sonthal Parganas, Balasore, Hazaribagh, and Manbhum, report better crops than those of last year; five districts, viz., Jalpaiguri, Cuttack, Puri, Angul and Khondmals, and Lohardaga, report equal crops; and four districts, viz., Monghyr, Bhagalpur, Palamau, and Singhbhum, report worse crops.

* Midnapore. Jalpaiguri. Cuttack. Balasore. Hazaribagh. Manbhum. Singhbhum.

The arithmetical mean of the anna estimates of outturn returned by District Officers, reckoned with reference to areas, gives a 11·6 anna, or about three-fourths of an average crop, for these Provinces as a whole, against 10·2 annas estimated for the crop of last year.

N. N. BANERJEI,

Assistant Director of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

W. C. MACPHERSON,

Director of Land Records and Agriculture, Bengal.

CALCUTTA,

The 2nd December 1895.

Forecast of the early Cotton Crop of Bengal, 1895.

1	2	3	4	5	6	7	8	9
DIVISION.	District.	Approximate normal area under *early* cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
					Annas.	Annas.		
Burdwan ...	Midnapore	2,000	2,000	2,000	8	12	There being no heavy rain during the sowing time and subsequently there being only occasional showers of rain, the growth of the crops has been better this year and a better outturn is expected than that of last year, though much below a full crop.	
Rajshahi ...	Jalpaiguri	500	500	400	12	12	The difference of 100 acres between the figures in columns 3 and 5 is due to the lands for the cotton crop in the Bhalka tahsil having been included in tea estates.	
Chittagong ...	Chittagong Hill Tracts	17,000	17,000	17,000	12	16	The Assistant Commissioner of Chittagong Hill Tracts returned the outturn of the cotton crop this year as 4 annas, and attributed the cause of decrease to the heavy gale on the 2nd October 1895, which destroyed the cotton plants and their capsules. The Commissioner of Chittagong remarked on this as follows:— "I do not accept this and hope for a full average crop. The season and rainfall, &c., resemble those of 1891, and are most favourable. The gale did damage, but it was a steady gale, not at all cyclonic, and a great deal of the crop is well sheltered."	Meteorological reports show that the rainfall in this district was below the normal throughout the last monsoon season.
Bhagalpur ...	Monghyr	400	400	400	12	8	The decrease in the outturn is due to scarcity of rain this year.	

1	2	3	4	5	6	7	8	9
DIVISION.	District.	Approximate normal area under *early* cotton in acres.	Approximate area sown last year in acres.	Estimated area sown this year in acres.	Taking 16 annas to represent the average outturn per acre, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn per acre, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Bhagalpur—*contd.*	Bhagalpur	11,300	11,300	10,500	14	9	Want of timely rain accounts for the reduced outturn this year.	
	Sonthal Parganas ...	12,900	12,500	12,900	9	11	The increase in the area cultivated during 1895 is due to better distribution of rainfall. The outturn will be better than that of last year.	
Orissa ...	Cuttack	3,100	1,800	1,800	12	12	On account of heavy rainfall at the time of sowing a large area could not be sown, hence the decrease in area and outturn as compared with the normal figures.	
	Puri	14,500	9,200	6,000	8	8	The decrease in the area under cultivation is due to untimely excessive rainfall.	
	Balasore	1,000	900	900	10	13	The decrease in the area, as compared with the normal, is due to want of rain at the time of sowing, and the increase in outturn, as compared with that of the last year, is due to seasonable rain at the time of growth.	
	Angul and Khondmals	1,500	1,200	1,500	16	16	The rainfall was favourable to the early cotton crops in Angul. No cotton is grown in the Khondmals subdivision.	
Chota Nagpur	Hazaribagh	7,500	7,500	7,500	11	12	......	
	Lohardaga	8,800	8,800	8,800	10	10	The decrease in the outturn is due to insufficient rainfall in the latter part of the rainy season.	
	Palamau	10,000	3,200	5,000	9	8	The increase in this year's area, as compared with that of last year, is due to sufficient rain during the sowing season; but the outturn will be worse for want of rain at the time of flowering.	
	Manbhum	12,000	12,000	12,000	8	12	The increase in the outturn is due to favourable rainfall in the latter part of the rainy season.	
	Singhbhum	7,200	7,300	4,400	14	13	The decrease in the outturn and area sown this year as compared with that of last year is attributed to insufficient rainfall.	
	Total ...	109,700	95,600	91,100	10[illegible]	12(*a*)	......	(*a*) Estimated by the Department of Land Records and Agriculture, Bengal.

N.B.—Twenty annas represent a bumper crop, 16 annas an average crop, 12 annas three-fourths of an average crop, and so on.

WEATHER AND CROP REPORT.

For the week ending the 9th December, 1895.

Burdwan.—Rainfall nil. Weather fair. Prospect of *aman* crop very bad. Sugarcane very good. *Rabi* crops are being sown. Condition of cattle very good. Fodder and water sufficient. Common rice sells at an average price of 16 seers a rupee.

Midnapore.—Rainfall nil. Weather cold. Paddy is being harvested with good outturn except in Ghatal. Rain wanted to improve the growth of *rabi*. Sugarcane and indigo doing well. Common rice selling at—

	Srs.	
Midnapore	18	per rupee.
Contai	21 to 23	
Tamluk	16	
Ghatal	14 to 15	

24-Parganas.—Rainfall nil. Weather bright and cool. Harvesting of *aman* continues outturn estimated to be 8 annas in the north and 12 annas in the south of the district. *Rab* crops doing well. No cattle-disease. Fodder and water sufficient. Rice sells at—

	Srs.	
Sadar	12 to 14	per rupee.
Barasat	15	
Basirhat	16	
Diamond Harbour	16	

Murshidabad.—Rainfall ·22. Weather seasonable. State of *kalai* good. Harvesting of *aman* continues; estimated outturn 8 annas. Sowing of *rabi* crops finished. Cutting of sugarcane going on. Indigo and mulberry doing well. Fodder and water sufficient. Common rice sells at 14 seers per rupee.

Khulna.—Rainfall nil. Weather cold. Harvesting of *aman* commenced. Cultivation of *rabi* over. Fodder and water sufficient. Common rice sells at—

	Srs.	c.	
Sadar	17 to 22	0	per rupee.
Bagerhat	17	8	
Satkhira	14	3	

Dinajpur.—Rainfall nil. Weather cold. Standing crops good. Sowing of *rabi* crops over. Common rice selling at 14 to 16 seers per rupee. No report of cattle-disease. Fodder and water sufficient.

Rangpur.—Average rainfall ·12. Sowing of winter crops completed. Harvesting of *aman* going on. Prospects generally good. Common rice selling at 14 seers per rupee. Fodder sufficient.

Pabna.—No rain. Prospect of *aman* not good at Sirajganj, where rain wanted. Harvesting of *aman* at Sadar commenced. Common rice sells at Sadar 18 seers and Sirajganj 14 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Harvesting of *aman* rice commenced; prospects fair. *Rabi* crops being sown. No cattle-disease. Fodder available. Price of common rice 17 seers per rupee.

Chittagong.—No rain. Weather seasonable. Late *aman* ripening. Prospects not good. *Rabi* sowings continue. Water and fodder sufficient. Rice sells at 16 seers per rupee.

Patna.—Rainfall at Sadar ·23. Harvesting of paddy and sugarcane in progress. *Rabi* and poppy generally doing well, but a shower of rain would do much good. The sowing of poppy, wheat, &c., in some places had to be repeated for want of moisture. Condition of cattle good. Fodder and water sufficient. Common rice sells from 18 to 23 seers per rupee.

Gaya.—No rain. *Rabi* crops suffering for want of it. Poppy has germinated well after resowings. Price of common rice at Sadar 15¼ seers per rupee against an average of $16\frac{1}{16}$ seers.

Champaran.—Rainfall at Sadar ·37. *Aghani* being harvested with an estimated outturn of 12 annas. Rain has improved prospects of poppy and done much good to *rabi*. Common rice sells from 16 to 22 seers per rupee. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Paddy harvest in progress. *Rabi* doing fairly well, but rain very much wanted. Poppy reported to have been resown in places. Fodder and water sufficient. Prices stationary.

Bhagalpur.—No rain. Weather seasonable. Harvesting of *aghani* paddy not yet finished. Indigo and *rabi* crops promising. Rain wanted. No cattle-disease. Fodder sufficient, except in Banka, where it is reported as getting scarce. Price of common rice 18 seers 12 chitaks per rupee.

Purnea.—No rain. *Aghani* harvest proceeding. *Rabi* sowings continue. Prospects good. Fodder and water sufficient. Cattle-disease in Sadar thana. Price of common rice 16 to 24 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* begun; that of *laghu sarad* going on. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	23	10	per rupee.
Jajpur	29	10	
Kendrapara	31	0	
Banki	29	11	

Hazaribagh.—No rain. Weather seasonable. Harvesting of paddy continues; average outturn 8 to 12 annas. *Rabi* doing well. Poppy progressing satisfactorily; *kothi* measurements commenced. Fodder and water sufficient. Common rice selling at 12 to 16 seers per rupee.

General Summary.—There was rain in Murshidabad, Rangpur, Patna, and Champaran during the week, but none in the other reporting districts. The harvesting of winter rice is proceeding, and, as previously reported, the outturn over the greater part of the province is expected to be below the average. The *rabi* crops are generally doing well, but in parts of Bihar the want of moisture is still felt. Poppy, which had to be resown in many places in Bihar, is coming on satisfactorily. Prospects of indigo and sugarcane are good; the latter is being harvested in some districts. No cattle-disease is reported except from the Sadar thana of Purnea. The price of common rice continues steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 10*th December*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for t... A clear sky is denoted by 0 and an overcast sky by 10. T... The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. ...mean at the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional stations for the period in questi... station in the district sending in return divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

...r the week ending Saturday, the 7th of December 1895.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1895. Mean for district.	Normal mean.	Variation.	District.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least ·10 inch of rain has fallen.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING, 8 A.M., SATURDAY, THE 7TH OF DECEMBER 1895.

FINE settled weather of ordinary north-east monsoon character prevailed over Bengal at the commencement of the week under review, but slightly unsettled conditions were setting in over North-Western India. On the 2nd instant, pressure had fallen moderately in Bengal, though it was still above the normal, while temperature was also falling slowly, and the mean temperature was still usually about 2° to 4° in excess. Fine weather still prevailed on the morning of the 2nd in Bengal, but conditions over North-Western India, and probably over the Himalayas, were distinctly disturbed. On the 3rd this slightly unsettled weather had travelled eastward and southward, and light showers were reported in Bihar and North Bengal and in parts of Chota Nagpur, and also at some stations in the hills. A further brisk fall of pressure had occurred over the whole of Bengal, and pressure was in defect by small to moderate amounts, but temperature had risen moderately, and was in decided excess. Conditions continued slightly unsettled on the 4th, and again a few rain showers were reported in the same districts as on the 3rd, but pressure was commencing to rise, showing the disappearance of the disturbed conditions from Bengal, while a brisk fall of temperature had occurred. Though conditions were thus becoming more settled in Bengal, a fresh disturbance was affecting North-Western India. On the 5th the changes of temperature and pressure in Bengal were small, and conditions remained settled except in the hills, where Gnatong reported a snowstorm, while the disturbance over North-Western India had passed away or broken up after giving hail and snow in the Punjab Himalayas. On the 6th pressure was rising slowly in Bengal, while the temperature changes were variable, and weather was fine and settled except in the hills, where again Gnatong reported a snowstorm. On the 7th the pressure changes were small, but usually a fall had occurred. Temperature, however, was falling briskly to rapidly owing perhaps to the snow which had been previously falling in the Himalayas, and at the great majority of stations, except a few in the extreme west and south-west of the province, mean temperature below the normal was registered. Weather, however, was fine and settled in Bengal on this day, though cloud proportion was higher than usual.

Throughout the greater part of the week, therefore, except in Bihar and North Bengal on one or two days, and in the hills on several days, weather has been fine and settled, and there has been practically no rain. In the districts mentioned, however, weather has been slightly disturbed, and light showers, and in the hills snowstorms, have occurred.

Pressure.—The variation of the mean pressures from the normal have been small, and at the great majority of stations defects of about 0·01″ or 0·02″ have been registered. Very slight excess pressures, on the other hand, have been registered at a few of the stations in Bihar.

Temperature.—The mean temperature of the province for the week has been 1·7° in excess of the normal, the excess having been largest in Orissa and Chota Nagpur, where it has equalled no less than two and-a-half degrees.

The actual average temperatures registered in the province and their variation from the normal values are, however, best seen in the table below, where the average temperature data for nine selected stations in different districts of the province are given :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending Saturday, the 7th December 1895.

	Normal mean maximum temperature for the week ending 7th December.	Actual mean maximum temperature for the week ending 7th December 1895.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 7th December.	Actual mean minimum temperature for the week ending 7th December 1895.	Variation of actual mean from the normal. Rainfall.—An average fall of a tenth of an inch has occurred in Bihar, but in all other divisions the falls have been unimportant. In Bihar the falls have been received principally in Shahabad, Saran, Champaran, Muzaffarpur, and Sonthal Parganas, while rain has also been received in other divisions in the districts of Bogra, Mymensingh, and Manbhum.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 7th of December 1895 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1895.

The lowest pressure in the month	29·821	3rd	16
The range of pressure	0·310		
	Hours.		
The total number of hours of bright sunshine during the month	259·5		
The maximum possible number of hours of sunshine ...	330·8		
	°		
The mean temperature of the month	74·3		
The average temperature of November from 24 years' registers	74·8		
The highest temperature in the month	86·6	11th & 14th	
The lowest temperature in the month	58·4	23rd	
The range of temperature during the month	28·2		
The mean daily range of temperature	17·4		
The greatest range of temperature in one day	22·9	23rd	
	Per cent.		
The mean humidity of the month	77		
The average humidity of November from 24 years' registers ...	72		
	Inches.		
The mean vapour tension of the month	0·647		
The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	1·49		
The average cloud proportion of November from 18 years' registers	2·46		
	Inches.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in November from 24 years' registers	2		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	138·5		
The mean difference of sun and air temperatures	55·0		
The greatest sun temperature	145·8	9th	
The greatest excess of sun over air temperature	61·6	9th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	59·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	9·3	22nd	
	Miles.		
The mean movement of the wind per day	43·3		
The greatest movement of the wind in one day	86·0	11th	
The greatest movement of the wind in one hour	10·0	11th, 8 to 9 a.m. and 9 to 10 a.m.	

The number of hours with winds from each of the 8 points—
N. 168, N.E. 50, E. 43, S.E. 30, S. 26, S.W. 62, W. 104, N.W. 72, Calm 165.

* The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 8 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

*N.B.—In the monthly abstract for September 1895 read 29·682 for 29·862 as the average pressure of September from 24 years' registers, and 14·4 for 4·4 as the greatest range of temperature in one day in September 1895.

C. LITTLE,

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	72
	Inches.
The total fall of rain from 1st to 7th December 1895	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·04
The total fall from 1st January to 7th December 1895 ...	39·38
The average fall of the corresponding period for 24 years, Surveyor-General's Office	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermogra[ph] and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All thermometers are verified and the readings have been corrected to a standard constructed and verified at Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four f[eet] above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed [by] the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌂, dew.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 9th December 1895.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

Vital Statistics of the Districts of Bengal for the month of October 1895.

THE CANAL REVENUE REPORTS FOR 1894-95.

No. 1330*I.A.*

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Accounts.

Dated Calcutta, the 3rd December 1895.

RESOLUTION.

READ—

The Canal Revenue Reports for 1894-95 and the Chief Engineer's note on the same.

The capital outlay on canals in Bengal, of which Capital and Revenue Accounts are kept, had reached a total of Rs. 7,52,85,304 at the close of the year under review. Of this sum, Rs. 1,07,66,220 have been provided from Provincial Funds, Rs. 6,16,30,182* from Loan Funds, and Rs. 8,66,000 contributed by the Imperial Government from Famine Relief and Insurance Funds.

2. The total length of the canals in Bengal is 916 miles, of which 495¼ miles are for both irrigation and navigation, 242¾ miles for irrigation only, and 178 miles for navigation only. The total length of the distributaries is 2,603¾ miles, and the area irrigable from them 1,570,219 acres.

3. The receipts for the year from both major and minor works were Rs. 1,95,569 less than in the preceding year, and the net revenue fell from Rs. 2,65,949 in 1893-94 to Rs. 1,38,135 in 1894-95.

4. The results of the year's working of the several canal systems in Bengal are exhibited in the following table, the capital expenditure to date being also shown:—

Name of Canal.	Capital expenditure (direct and indirect) during year.	Capital expenditure (direct and indirect) to date.	Receipts of year, *less* refunds.	Average receipts of nine years ending 1893-94.	Expenditure of year including indirect expenditure.	Average expenditure of nine years ending 1893-94.	Net income of year.	Average net income of nine years ending 1893-94.
1	2	3	4	5	6	7	8	9
Major Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	3,45,479	2,62,43,062	3,82,345	3,05,062	4,83,320	4,63,698	—1,50,975	—1,58,634
Midnapore Canal ...	......	84,45,469	2,94,423	2,62,864	2,24,664	2,22,344	69,859	40,520
Hijili Tidal Canal ...	1,08,945	24,28,181	58,525	46,933	47,426	48,718	11,099	—1,785
Sone Canals ...	39,657	2,69,09,599	8,34,834	8,74,339	7,06,739	7,04,448	1,28,095	1,69,891
Total for 1894-95 ...	4,94,081	6,40,26,311	15,20,127	14,89,198	14,62,049	14,39,206	58,078	49,992
Total for 1893-94 ...	5,27,305	6,35,32,230	16,65,005		15,41,144		1,23,861	
Minor Works and Navigation for 1894-95.	§47,452	§1,12,58,993	6,79,861	7,88,366	5,99,804	5,04,549	80,057	2,83,817
Ditto 1893-94 ...	§43,850	§1,12,11,541	7,30,552		5,88,464		1,42,088	

* Exclusive of indirect charges amounting to Rs. 20,22,902.
§ The Orissa Coast, Calcutta and Eastern, and Saran Canals are the only minor works for which capital accounts are kept.

The interest charges debited to Provincial revenues amounted to Rs. 24,81,895, which, after deducting the net Revenue, works out to a deficit of 3·79 per cent. on the Capital expenditure.

5. The area irrigated during the year was 509,811 acres, against an average of 558,480 acres during the preceding nine years. The defect was in the areas irrigated from the Midnapore and Sone Canals, where the rainfall was not only abundant but very seasonable, these conditions being as favourable to the crops, as they are unfavourable to irrigation.

The statement below shows the areas irrigated for the last ten years. Except in the case of the Sone Canals, the rabi irrigation is too insignificant to be shown separately:—

Year.	Orissa Canals.	Midnapore Canal.	Sone Canals. Kharif.	Sone Canals. Rabi.	Sone Canals. Total.	All Canals.	Rainfall.
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Inches.

Average of nine years ending 1893-94 ...	136,437	76,419	281,678	63,946	345,624	558,480	52·49

6. The collection of water-rates is made under the orders of Superintending Engineers, while the collection of arrears is under the Special Canal Deputy Collectors in subordination to the District Officers, who exercise appellate jurisdiction in regard to all orders passed by Canal Officers under Act III (B.C.) of 1876. The progress made in collection work is exhibited in the following table:—

Year.	Balance at beginning of year.	Balance at the end of the year.	Remissions, including cancelled demand statement.	Irrecoverable items.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1885-86	8,84,289	5,33,177	1,41,162	41,229
1886-87	5,33,177	3,69,789	57,375	22,612
1887-88	3,69,789	5,59,883	32,356	19,796
1888-89	5,59,883	5,79,983	42,666	14,074
1889-90	5,79,983	5,09,188	80,282	20,592
1890-91	5,09,188	4,72,113	48,674	16,476
1891-92	4,72,113	4,04,120	38,421	12,126
1892-93	4,04,120	2,26,174	61,576	11,168
1893-94	2,26,174	1,72,235	29,054	4,818
1894-95	1,72,235	77,498	14,367	4,815
Average of nine years ending 1893-94 ...	5,04,302	4,25,185	59,061	18,099

These figures show great and steady improvement, the arrears having been brought down from 8¾ to 1¾ lacs in the ten years; while the opening balance of 1894-95 was reduced from Rs. 1,72,235 to Rs. 77,498 by the close of the year.

7. The remissions amounted to only Rs. 14,367, or less than half those made in 1893-94. The working of each canal is shown in the following table:—

Canal.	Demand.			Collections (including remissions).			Percentage of current collection on current demand.	Percentage of total collection on total demand
	Arrear.	Current.	Total.	Arrear.	Current.	Total.		
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.		
Orissa ...	63,350	1,68,449	2,31,799	48,584	1,51,075	1,99,659	89·68	86·13
Midnapore ...	7,027	1,35,016	1,42,043	6,332	1,31,162	1,37,494	97·14	96·79
Sone ...	1,01,858	6,86,905	7,88,763	92,418	6,55,536	7,47,951	95·43	94·82

8. The collections made under navigation (excluding miscellaneous navigation receipts and those of the transport services) are shown below for ten years:—

Year	Orissa Canals.	Midnapore Canal.	Hijili Tidal Canal.	Sone Canals.	Total.	Miles open.	Tollage per mile.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Miles.	Rs.
1885-86	64,093	1,37,578	52,143	41,712	2,95,526	490	603·1
1886-87	58,664	1,09,693	51,904	49,665	2,69,926	490	551·8
1887-88	66,628	1,26,574	40,406	50,984	2,84,592	490	580·7
1888-89	69,830	1,46,760	53,910	52,162	3,22,662	496½	649·9

1894-95	96,220	1,35,492	57,089	49,349	3,38,150	524¼	645·0
Average of nine years ending 1893-94.	87,177	1,26,499	45,843	51,132	3,10,661	......	......

The revenue under navigation, though less than that of the preceding year, which was enhanced by the large pilgrim traffic attracted by the special festival at Puri, was above the average.

9. The miscellaneous revenue was Rs. 83,685, as compared with Rs. 78,006 in 1893-94, the average for the nine years preceding 1894-95 being Rs. 65,400.

10. The net revenue of the year was considerably less than that of 1893-94, for reasons which will be given in the following comments on the year's working of each canal system.

11. The capital outlay on the Orissa Canals has amounted to Rs. 17,19,078 from 1890-91 to the end of the year under review, against a sanctioned estimate of Rs. 19,58,356. Accordingly on the 31st March 1895, on which date the construction estimate of the Orissa Project was closed, there was a balance of Rs. 2,39,278 available for expenditure on works which had been sanctioned, but were incomplete at the close of the year. The most important of these are the new distributaries, of which 326¾ miles have been opened since 1890-91, making an aggregate length of 1,091½ miles now in use. Although no additional channels are contemplated, much still remains to be done to many of those recently opened. There are also various details on works classed under the heads 'Main Canals' and 'Drainage and Protective Works,' which still remain to be completed.

12. The receipts on the Revenue Account were Rs. 3,32,345, against an average of Rs. 3,05,062 of the preceding nine years. Compared with 1893-94, however, the receipts show a decrease of Rs. 43,020. The falling off was chiefly in navigation receipts, which in 1893-94 were somewhat abnormally swelled by the large pilgrim traffic to the special festival at Puri. The decrease in water-rates amounted to Rs. 15,992, and was due partly to the comparatively small arrear balance which remained to be collected at the beginning of the year, and partly to the fact that the irrigated area of 1893-94 was much less than that of the preceding year. The earnings of 1894-95 were, however, greater than in the preceding year, as the area irrigated in that year was 122,561 acres, against 103,526 acres in 1893-94. The rainfall of the year, though not so abundant as in 1893-94, was still very seasonable, and the increase in the irrigated area is decidedly satisfactory, and will lead to a larger collection of water-rates next year.

13. Owing to the wide divergence between the results of the crop experiments made in 1893-94 in the Sone and Orissa Circles respectively, extra care was bestowed on them, during the year, in Orissa, where an officer with experience of the Sone methods was deputed to conduct them. They were also in many cases made jointly by Civil and Public Works officers. The following table gives an abstract of the results:—

	Quality of crop.	Outturn per acre.	
		Paddy maunds.	Straw maunds.
1	2	3	4
Orissa	Good ...	32·96	57·85
	Average ...	25·07	44·00
Sone	Good ...	31·92	75·38
	Average ...	24·12	57·30

The results differ so much from those obtained in previous years that the Lieutenant-Governor does not consider that they can be treated as conclusive, and desires that they should be repeated in the current year, and that the greatest care should be taken to secure accuracy. The conditions of the year were exceptionally favourable to Orissa, and the crops were extraordinarily good both in yield and quality, so that the outturn in 1894-95 obtained by these

experiments can hardly be considered as representing the normal yield. The rice crop in Orissa is probably much inferior in most years to that in the Sone, and the close correspondence between the results in the two tracts is presumably not in accordance with the ordinary state of things. The Lieutenant-Governor further observes that in every case the outturns obtained from the experiments made in the Brahmini-Byturni Division are very considerably less than those of the experiments made in the Mahanadi and Acquapada-Jajpur Divisions. This seems to point to a want of uniformity in the methods adopted in conducting the experiments. Paddy weighed on the same day that it is cut will certainly be heavier than, if weighed after an interval of several days. The Lieutenant-Governor therefore desires that a revised set of rules be framed for the guidance of officers conducting experiments in each circle in future. If methods of exact precision are adopted in every irrigation division in the province, results will be obtained which will be strictly comparable, and therefore as useful as they will be interesting.

14. The number of certificate cases instituted during the year was 5,683 compared with 6,667 in 1893-94. This is a decided improvement, but the number is still larger than it should be, and the Lieutenant-Governor hopes that in future years it may be possible to avoid to a further extent, the necessity of having recourse to this method of recovering water-rates. He, however, notes with satisfaction that the number of cases pending at the close of the year was only 127, against 476 at its commencement.

15. The improvement in the collection of water-rates is very marked. The outstanding balance was reduced from Rs. 63,350 at the beginning to Rs. 32,140 at the close of the year. The number of objections to the assessments and he amount remitted was also less than in the perceding year.

16. The working expenses of the Orissa Canals were well kept down and do not grow. They amounted to Rs. 4,83,320 during the year, as compared with Rs. 5,35,477 in 1893-94 and Rs. 5,05,507 in 1892-93.

17. The net receipts of the Midnapore Canal fell from Rs. 3,04,769 in 1893-94 to Rs. 2,94,423 in the year under review, but the collections of water-rates in the former year were much increased by the large recovery of arrears. The water-rate receipts of 1895-96 will be still lower as the earnings of 1894-95 fell to Rs. 1,04,875, against Rs. 1,30,111 in 1893-94, and the area irrigated was 70,116 acres, against 85,763 acres in the previous year. The decrease is accounted for by the even distribution of the rainfall, which was nearly everywhere sufficient for the crops, though it fell short by nearly 10 inches of the rainfall of 1893-94. The leased area of 1893-94 was also swelled by the large area of 6,213 acres of rabi irrigation, which was quite exceptional. Usually there is little or no rabi irrigation from the Midnapore Canal. Navigation receipts on the other hand rose from Rs. 1,14,994 to to Rs. 1,35,492 owing to a larger export of rice.

18. The statistics furnished by the Deputy Collector of the collection work done during the year are highly satisfactory. At the close of the year the arrears uncollected amounted to only Rs. 4,549, whereas at the beginning of of the year they were Rs. 7,027, and at the beginning of 1893-94 the amount was Rs. 48,567. The amount remitted or written off was also less than in any of the five preceding years. The Lieutenant-Governor notices also the very creditable decrease in the number of certificate cases taken out. Only 579 cases were instituted during the year, as compared with 1,799 in 1893-94.

19. The working expenses of the canal amounted to Rs. 2,24,564, and were Rs. 16,374 in excess of those of the previous year. The increase was caused by some rather heavy repairs which were required at the head works. In other respects the expenditure was normal.

20. The capital expenditure in remodelling the Hijili Tidal Canal was Rs. 1,06,322, chiefly incurred on the large sluice on the Haldi River at Terapakia. The navigation receipts were Rs. 58,525, as compared with Rs. 59,196 of the previous year, and there was an appreciable reduction in the working expenses from Rs. 56,501 in 1893-94 to Rs. 47,426 in 1894-95, so that the net revenue rose from Rs. 2,695 to Rs. 11,099. The tonnage carried was larger, but the number of passengers less.

The Superintending Engineer remarks:—

"Notwithstanding the reduction of tolls for through traffic and a closure of the canal for three weeks during the busiest season, the receipts of the year fell little short of those for last year, which was an exceptional one.

21. The net revenue of the Sone Canals was Rs. 1,28,095, against Rs. 1,84,699 in 1893-94, and an average of Rs. 1,69,891 for the last nine years. The total receipts were Rs. 8,34,834 against Rs. 9,25,675 in 1893-94. The receipts for water-rates fell off from Rs. 8,42,309 to Rs. 7,43,243, while for navigation the amounts collected in the two years were nearly equal. The miscellaneous receipts were Rs. 35,620, against Rs. 29,578 in the previous year. The working expenses were Rs. 7,06,739, as compared with Rs. 7,40,976 in 1893-94, Rs. 7,51,247 in 1892-93, and Rs. 6,97,840 in 1891-92. The decrease falls mainly under the head "Maintenance and repairs," the expenditure on which in 1894-95 was only Rs. 2,20,227, against an average of Rs. 2,74,221 for the last five years, showing a reduction of Rs. 53,994. The cost of dredging has been much reduced. The Lieutenant-Governor regards these results with much satisfaction, and considers that they reflect credit on the Superintending Engineer and the officers serving under him.

22. The area irrigated was 317,134 acres, against 366,776 acres in 1893-94, and an average of 345,624 acres. The falling off was in both the kharif and rabi seasons, but especially in the latter, and was due to the abnormally heavy rainfall of the year. The Superintending Engineer remarks:—

"The copious rainfall in October, together with the heavy rainfall of the rabi season itself, which was more than double the average, so far moistened the soil, that irrigation in most cases was entirely unnecessary for the rabi crop."

There was a large falling off in the area irrigated under long-term leases from 291,746 acres in 1893-94 to 263,990 acres in 1894-95. This was due to the fact that a large number of leases lapsed on the 31st March 1894, and, on account of the copious rainfall of the two past years, were not renewed.

23. It is anticipated that the rules introduced in December 1894 to restrict the areas irrigated in villages near the canals, which have hitherto monopolized an undue share of canal water, will eventually prove very beneficial. The new rules prescribe that leases are not to be granted for more than 50 per cent. of the area of a village, unless the village has been under long lease and seeks its immediate removal when it expires, when it will be decided in each case whether it would be right to refuse to renew the lease for more than 50 per cent. of the area of the village. When these rules have had time to take effect, villages which have hitherto been left out in the cold will enjoy the benefits of canal water, and the areas adjacent to the canals should become more sanitary.

24. The Lieutenant-Governor notes with pleasure the very good work done in collecting water-rates. The arrears outstanding on the 1st April 1894 amounted to Rs. 1,01,858. Of this balance, Rs. 92,218 were collected during the year, giving a percentage of 90·7 per cent. The current demand for 1894-95 was Rs. 6,86,905, of which Rs. 6,55,536, or 95·4 per cent., were collected. The unadjusted balance at the end of the year was Rs. 40,809. The arrears have never been so low, the percentage of collection never so high.

25. The amount remitted fell to Rs. 4,091, which is less than in any previous year, and the number of objections preferred against the assessment of water-rates has fallen greatly as compared with previous years, and is now only 2,557, of which number only 75 were undisposed of at the end of the year. There is hardly any better test of good administration than this. The number of certificate cases also fell from 2,372 in 1893-94 to 2,119 in 1894-95, and all of these were disposed of except 70.

26. The financial results of the canals classed as minor works and navigation are shown in the statement below. The Eden Canal has been included, as, though neither Capital nor Revenue Accounts are kept, revenue is derived from it. The Saran Canals were closed throughout the year, and they have accordingly been excluded:—

1	Capital Expenditure.		Receipts.	Expenditure.	Net income.	Average net income of nine years ending 1893-94.
	Of year.	To end of year.				
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern Canals ...	1,076	53,38,522	4,43,003	2,89,267	1,53,736	2,41,331
Orissa Coast Canal	47,576	44,57,463	65,940	87,071	—21,131	—15,232
Nadia Rivers	Nil	Nil	1,41,698	1,40,879	819	79,473
Eden Canal	Nil	Nil	30,200	52,738	—22,538	—16,071*
Total ...	48,652	97,95,985	6,80,841	5,69,955	1,10,886	2,89,501

* Average of six years.

27. The receipts from the Calcutta and Eastern Canals, which are purely navigation works, were Rs. 4,43,003, against Rs. 4,20,541 in the previous year. The working expenses were Rs. 2,89,267, as compared with Rs. 2,87,129 in 1893-94. The net revenue therefore increased from Rs. 1,33,412 to Rs. 1,53,736. This improvement is satisfactory as far as it goes, but the receipts are still below the average of the last nine years, which is Rs. 5,07,189, and, it may be added, are still lower than they ought to be. It has been represented that the tolls on flats towed by steamers, and the tolls levied on steamers using the Sundarbans route are inadequate. The expenditure incurred during the last eleven years in maintaining this route was Rs. 70,114, whereas the tolls realised during that period amounted to only Rs. 55,285. This question is still under consideration. A very substantial increase in the number of boats using the canal is reported, and there is every indication of the traffic still further increasing, notwithstanding the competition of the Eastern Bengal State Railway with the canal. The Bhangore khal is a section of the canal which the tide enters at both ends, depositing a great mass of silt in the middle. The shallowness of the water, and the consequent long closures necessary to clear the khal, have been a great obstruction to navigation. It has been decided to construct locks at both ends of the section, at a cost of about eleven lakhs of rupees, and the works will be commenced during the current year. If they are eventually successful, they may prove the forerunnre of other and similar measures on the various links of the route, which are at present, though in a lesser degree, in much the same condition as the Bhangore khal.

28. On the Orissa Coast Canal the receipts were less by Rs. 30,627 than those of 1893-94, which were exceptionally large on account of the abnormal pilgrim traffic, but they were not much less than the average of ordinary years. The expenditure was Rs. 87,071, as compared with Rs. 98,133 in 1893-94, and the net result was a loss of Rs. 21,131. With the object of inducing boats using the upper reaches of the coast canal to continue their journey to Calcutta by the Hijili Tidal Canal, a change was made in the tolls during the year, and through tickets were issued at reduced rates from various stations on the coast canal to Gewankhali, where the Hijili Canal enters the Hooghly. The tendency had been for boats when they emerged from the coast canal at Kalinagar to go down the Russulpore River and up the Hooghly, thus avoiding the payment of tolls on the Hijili Canal. It will not probably be ever possible to entirely stop this in fine weather, but the safety of the canal route compared with the river, will induce boats to use it in bad weather, if they can get tickets at cheap rates.

29. The receipts from the Nadia Rivers amounted to Rs. 1,41,698, against Rs. 1,71,251 of the previous year, showing a decrease of Rs. 29,553. The expenditure decreased from Rs. 1,46,657 to Rs. 1,40,879. The receipts are about Rs. 46,000 below and the expenditure about Rs. 32,000 above the average of the last 9 years, and as a result the net revenue was only Rs. 819, compared with an average of Rs. 79,473. The reasons given for the large fall in the receipts are that the Jalangi River had deteriorated so much that it was found impossible to keep it open, and for the greater part of the year it was unnavigable for large boats. There was some improvement in the Bhagirathi, but the depth of water was not sufficient to float the large boats which usually ply on the Jalangi. Altogether the number of boats in these rivers fell off by 6,600 or 12 per cent., and the tonnage fell from 7,89,000 to 6,68,000

tons. The rise in the expenditure is to be accounted for in the gradual deterioration of these rivers, and the consequent increase in the cost of training works both at the heads, and in the courses of the rivers:

30. The area irrigated from the Eden Canal during the year was 20,390 acres, as compared with 11,739 acres in 1893-94. The rainfall, though not large, was seasonable, and in the kharif season it was as copious as in the previous season. Out of a total demand of Rs. 69,662 only Rs. 29,674 were collected against Rs. 35,943 in 1893-94, and the outstanding balance (after remissions) was Rs. 33,169. Such large arrears must not be allowed to accrue in future. The expenditure was Rs. 52,738 against Rs. 50,340 in the previous year. Only half of this expenditure was on maintenance, and the rest was devoted to original works and improvements.

31. The amount of inspection done by the Superintending Engineer, Orissa Canals, was too small, but the other Superintending Engineers and all the Executive Engineers devoted a full and sufficient amount of time to this duty.

32. Mr. Odling took leave on 12th March 1894, and on his return from furlough has been transferred as Secretary in the Public Works Department and Chief Engineer to the North-Western Provinces, thus severing his connection with Bengal, in which province he has been employed for 30 years. Sir Charles Elliott desires to record his high appreciation of Mr. Odling's services throughout the three years doing which he has been in charge of the Irrigation and Marine Departments in this Province. In the difficult and technical business of the Marine Department his experience and ability have been of the greatest assistance to the Lieutenant-Governor. In the Irrigation Department he has carried out a series of administrative reforms which His Honour had greatly at heart, and the increased punctuality of the assessments, the diminished number of objections, the great decrease in the arrears of water-rates and of certificates needed for the realization of arrears, the alterations in the dates of payment and in the incidence of the water-rates, and the equalisation of the tollage rates in navigation, are results which are equally beneficial to the Administration and to the public who use the canals. At the same time on the professional or engineering side of his duties he has maintained the efficiency of the Sone canal system and improved that of the Orissa system by strengthening its embankment and developing its distributaries.

33. Colonel McArthur officiated as Secretary in Mr. Odling's absence to the Lieutenant-Governor's satisfaction, and as Superintending Engineer he and Mr. Buckley have contributed largely to the successful working of the department.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note, and its accompaniments, be submitted to the Government of India in the Public Works Department, and published in the *Calcutta Gazette*. Also that it be circulated to other Governments and to all Departments and Officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

O. C. LEES,

Under-Secretary to the Govt. of Bengal.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by COL. A. D. MCARTHUR, R.E., *Offg. Chief Engineer, on the Canal Revenue Reports of Bengal for the year* 1894-95.

THE Capital expenditure on Irrigation Works in 1894-95 was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	4,82,915	11,166	4,94,081
Minor Works and Navigation ...	46,818	634	47,452
Total ...	5,29,733	11,800	5,41,533

2. The total Capital outlay at the end of the year 1894-95, excluding interest charges was:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works—			
Productive Public Works ...	6,22,88,824	17,37,487	6,40,26,311
Minor Works and Navigation—			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial. }	1,01,07,578	2,85,415	1,03,92,993
Total ...	7,32,62,402	20,22,902	7,52,85,304

tons. The rise in the expenditure is to be accounted for in the gradual deterioration of these rivers, and the consequent increase in the cost of training works both at the heads, and in the courses of the rivers.

30. The area irrigated from the Eden Canal during the year was 20,390 acres, as compared with 11,739 acres in 1893-94. The rainfall, though not large, was seasonable, and in the kharif season it was as copious as in the previous season. Out of a total demand of Rs. 69,662 only Rs. 29,674 were collected against Rs. 35,943 in 1893-94, and the outstanding balance (after remissions) was Rs. 33,169. Such large arrears must not be allowed to accrue in future. The expenditure was Rs. 52,738 against Rs. 50,340 in the previous year. Only half of this expenditure was on maintenance, and the rest was devoted to original works and improvements.

31. The amount of inspection done by the Superintending Engineer, Orissa Canals, was too small, but the other Superintending Engineers and all the Executive Engineers devoted a full and sufficient amount of time to this duty.

32. Mr. Odling took leave on 12th March 1894, and on his return from furlough has been transferred as Secretary in the Public Works Department and Chief Engineer to the North-Western Provinces, thus severing his connection with Bengal, in which province he has been employed for 30 years. Sir Charles Elliott desires to record his high appreciation of Mr. Odling's services throughout the three years during which he has been in charge of the Irrigation and Marine Departments in this Province. In the difficult and technical business of the Marine Department his experience and ability have been of the greatest assistance to the Lieutenant-Governor. In the Irrigation Department he has carried out a series of administrative reforms which His Honour had greatly at heart, and the increased punctuality of the assessments, the diminished number of objections, the great decrease in the arrears of water-rates and of certificates needed for the realization of arrears, the alterations in the dates of payment and in the incidence of the water-rates, and the equalisation of the tollage rates in navigation, are results which are equally beneficial to the Administration and to the public who use the canals. At the same time on the professional or engineering side of his duties he has maintained the efficiency of the Sone canal system and improved that of the Orissa system by strengthening its embankment and developing its distributaries.

33. Colonel McArthur officiated as Secretary in Mr. Odling's absence to the Lieutenant-Governor's satisfaction, and as Superintending Engineer he and Mr. Buckley have contributed largely to the successful working of the department.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note, and its accompaniments, be submitted to the Government of India in the Public Works Department, and published in the *Calcutta Gazette*. Also that it be circulated to other Governments and to all Departments and Officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

O. C. LEES,

Under-Secretary to the Govt. of Bengal.

Government of Bengal.

IRRIGATION DEPARTMENT.

REVENUE REPORT.

Note by COL. A. D. MCARTHUR, R.E., *Offg. Chief Engineer, on the Canal Revenue Reports of Bengal for the year* 1894-95.

THE Capital expenditure on Irrigation Works in 1894-95 was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	4,82,915	11,166	4,94,081
Minor Works and Navigation ...	46,818	634	47,452
Total ...	5,29,733	11,800	5,41,533

2. The total Capital outlay at the end of the year 1894-95, excluding interest charges was:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works—			
Productive Public Works ...	6,22,88,824	17,37,487	6,40,26,311
Minor Works and Navigation—			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial. }	1,01,07,578	2,85,415	1,03,92,993
Total ...	7,32,62,402	20,22,902	7,52,85,304

3. The outlay abstracted above is shown in the following statement divided under the different projects:—

Works.	During 1894-95.			To end of 1894-95.		
	Direct charges.	Indirect charges.	Total.	Direct charges.	Indirect charges.	Total.
1	2	3	4	5	6	7

REVENUE.

4 The statement below shows the totals for the last five years, of the receipts, working expenses, and interest charges for Major Irrigation Works:—

PARTICULARS.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts from all sources (less refunds of revenue)	13,39,141	15,98,608	18,83,347	16,65,005	15,20,127
Working expenses (direct and indirect charges)	14,32,136	14,37,935	14,85,393	15,41,144	14,62,049
Net revenue ...	(-) 92,995	1,60,673	3,97,954	1,23,861	58,078
Charges for interest	23,87,119	24,16,363	24,42,363	24,61,878	24,81,895
Deficit	24,80,114	22,55,690	20,44,409	23,38,017	24,23,817
Rate per cent. of deficit on Capital outlay	4·02	3·61	3·24	3·68	3·79

INTEREST

5. The total amount of interest payable to the Imperial Treasury on account of Major Irrigation Works for the year 1894-95 is Rs. 24,58,205.

FINANCIAL RESULTS.

6. The financial results of Major Irrigation Works to the end of the year 1894-95 were as follows:—

		Major Irrigation Works.
		Rs.
Direct revenue		2,46,96,145
Working expenses (direct charges)		2,40,66,691
Results on direct charges only	Profit	6,29,454
Indirect charges debitable to revenue		13,68,776
Results on both direct and indirect charges ...	Loss	(—)7,39,322
Charges for interest on Capital		4,86,18,575
Net results, including interest to end of 1894-95	Loss	(—)4,93,57,897

7. The financial results to the close of the year 1894-95 of Minor Works and Navigation are shown below:—

		Works for which capital and revenue accounts are kept.		Works for which only revenue accounts are kept.
		Rs.		Rs.
Direct revenue		2,39,65,341		88,80,539
Working expenses (direct charges) ...		1,02,72,426		49,63,337
Results on direct charges only	Profit	1,36,92,915	Profit	39,17,202
Indirect charges debitable to revenue ...		3,09,484		2,64,957
Results on both direct and indirect charges	Profit	1,33,83,431	Profit	36,52,245

8. The following statement shows the financial results of Irrigation, Navigation, and Agricultural Works during the year compared with those of 1893-94:—

Receipts.	1893-94. Rs.	1894-95. Rs.
XXIX—Major Irrigation Works—Direct Receipts—Provincial ...	16,72,626	15,24,040
XXX—Minor Works and Navigation—Irrigation and Navigation Works—Provincial	7,33,287	6,83,701

* Exclusive of lands surreptitiously irrigated, for which leases were granted in subsequent years.

The results of the working of each of the canal systems of the province during the year will now be described separately as in previous years.

GENERAL.

In all statements showing totals of receipts or expenditure, the figures are those of the Examiner of Accounts. In dealing with details, the figures of the Commissioner or of the Superintending Engineer have been taken.

ORISSA CANALS.

CAPITAL ACCOUNT.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

I.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1894-95.	Outlay to end of 1894-95.
1	2	3
DIRECT CHARGES	Rs.	Rs.
I.—Works	2,63,128	1,86,38,983
II.—Establishment	55,114	46,37,815
III.—Tools and plant	25,427	20,65,399
IV.—Suspense accounts	(—)5,920	1,40,379
Loss by exchange	...	2,68,070
Total ...	3,37,749	2,57,50,646
V.—*Less*—Receipts on Capital account	36	86,237
Net total Direct Charges ...	3,37,713	2,56,64,409
INDIRECT CHARGES.		
Capitalization of abatement of land revenue	50	33,233
Leave and pension allowances	7,716	5,45,420
Total Indirect Charges ...	7,766	5,78,653

The principal works charged to capital account in progress during the year were:—The raising of the right or flood bank of the Kendrapara extension canal; the construction of the Bara Kharsua flood embankment, which protects the Jajpur canal distributaries; the completion of the new distributaries from the Jalanda, Machgong, Gobri, Patamundi, and Jajpur canals; the construction of offices for zilladars at Munijunga, Jagatsingpur, Kendupatna, Kendrapara, Janapur and Aquapada; and quarters for sectional officers at Gopalpore, Marsaghai, Nurtang, Dasruthpore and Orai.

A few small drainage cuts and syphons for drainage under distributaries were constructed.

Since 1890-91 the expenditure on distributaries has been Rs. 7,18,371. The balance remaining to be spent on them is Rs. 41,614.

2.—INTEREST ACCOUNT.

INTEREST ACCOUNT.

		Rs.
Interest charges to end of 1893-94 ...	...	1,86,67,621
Ditto for 1894-95 ...	...	10,19,822
Total	...	1,96,87,443

3.—REVENUE ACCOUNT—(Actuals).

REVENUE ACCOUNT.

PARTICULARS.	EXPENDITURE— During 1893-94.	EXPENDITURE— During 1894-95.	PARTICULARS.	RECEIPTS— During 1893-94.	RECEIPTS— During 1894-95.

			Net total receipts	3,75,365	3,32,345
INDIRECT CHARGES ...	30,083	27,507	Deficit ...	1,60,112	1,50,975
Total Working Expenses	5,35,477	4,83,320	Total ...	5,35,477	4,83,320

NOTE.—The details by heads of expenditure for the year 1894-95 and nine preceding years will be found in the table given in paragraph 12 following.

There was a decrease in both the receipts and expenditure, but the deficit was slightly less than in the previous year. The falling off in the navigation receipts is probably only temporary, and the receipts were enhanced in the previous year on account of the large pilgrim traffic.

EARNINGS.

11. The following statement compares the earnings with the outlay for the last two years. The term "earnings" as applied to irrigation denotes the assessed water-rate value of the irrigation effected during the year; as applied

to navigation it denotes the amount of tollage assessed during the year together with the actual realizations of miscellaneous revenue charged to navigation. The miscellaneous earnings are the actual receipts during the year under this head:—

EARNINGS.	1893-94.	1894-95.
	Rs.	Rs.
Irrigation	1,50,146	1,76,202
Navigation	1,41,780	1,17,608
Miscellaneous	23,122	24,321
Total ...	3,15,048	3,18,131
Deducts refunds ...	1,210	727
Net earnings	3,13,838	3,17,404
Outlay	5,35,477	4,83,320
Net deficit	2,21,639	1,65,916

FINANCIAL RESULTS.

12. The revenue receipts and working expenses for the last ten years are tabulated below:—

PARTICULARS.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.

LENGTHS OF CANALS AND DISTRIBUTARIES.

13. The following statement gives the usual information concerning the canals and distributaries for 1894-95, compared with the previous year:—

...es of Canals.	1893-94. Navigable canals.	1893-94. Canals for irrigation only.	1893-94. Distributaries and village channels.	1893-94. Area protected from flood.	1893-94. Area under command.	1893-94. Area provided with distributaries.	1893-94. Area irrigated.	1893-94. Percentage of area irrigated to area provided with distributaries.	1894-95. Navigable canals.	1894-95. Canals for irrigation only.	1894-95. Distributaries and village channels.	1894-95. Area protected from flood.	1894-95. Area under command.	1894-95. Area provided with distributaries.	1894-95. Area irrigated.	1894-95. Percentage of area irrigated to area provided with distributaries.

It will be seen that there is an increase in the length of distributaries including village channels in the Mahanadi Series of 12¼ miles, and in the area provided with distributaries, of 13,129 acres.

The length of the distributaries in the Brahmini-Byturni Series has been reduced by 6¼ miles, which is the length of the Jajpur Canal, and which was previously shown twice.

RAINFALL.

14. The average rainfall of the last five years at thirteen stations situated within the canal-irrigated area is shown below for the kharif and rabi seasons:—

		Average of thirteen stations. 1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1		2	3	4	5	6
		Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season ...	July ...	12·59	10·34	11·99	8·17	10·34
	August ...	7·58	16·98	8·08	8·63	9·59
	September ...	14·40	19·45	10·71	15·73	6·79
	October ..	8·63	1·17	5·66	5·52	6·37
	Total ...	43·20	47·94	36·44	38·05	39·09
Rabi „ ..	November ...	1·94	6·77	0·85	0·09	3·07
	December ...	0·05	......	......	......	0·03
	January ...	......	......	2·00	0·02	0·02
	February ...	0·99	0·20	1·89	0·18	0·60
	Total ...	2·98	6·97	4·74	0·29	3·72
	Whole year ...	63·17	61·08	56·43	74·83	58·91

The total mean fall was 58·91 inches as compared with an average for the last 26 years of 57·85 inches. The rain was well distributed, and in consequence very favourable to the crops. The average rainfall recorded at

the stations in the Central Provinces, from which the Mahanadi derives the greater part of its supply, was 60·27 inches in 1894-95, as compared with 94·74 inches in 1893-94.

FLOODS. 15. The maximum flood levels recorded during the year are compared in the following table with the maximum levels in 1893-94 and with the highest recorded levels:—

NAME OF RIVER.	Locality.	1894-95.		1893-94.		HIGHEST RECORDED.

	Ditto below weir	28th " " ...	68·50	26th " "	65·50	4th " " ..	70·60

The Superintending Engineer writes:—

"The flood in the Mahanadi was a moderate one, and caused no injury to the canal works. The flood in the Brahmini was a very high one. It overtopped and breached the protective embankment under construction on the Khursua river, and did considerable damage to some of the new distributaries of the Jajpur Canal."

IRRIGATION. 16. The assessed and irrigated areas for the last ten years with the yearly rainfall are shown in the following statement:—

YEAR.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1885-86 ...	70,563	1,605	171	72,339	52·59
1886-87 ...	75,115	2,440	154	77,709	60·07
1887-88 ...	108,867	502	137	109,506	47·84
1888-89 ...	156,319	2,779	194	159,292	49·07
1889-90 ...	180,568	5,897	162	186,627	67·95
1890-91 ...	175,829	4,250	220	180,299	63·17
1891-92 ...	173,453	3,943	289	177,685	61·03
1892-93 ...	158,025	2,594	333	160,952	56·43
1893-94 ...	100,406	2,904	216	103,526	74·83
1894-95 ...	118,116	4,102	343	122,561	58·91

17. The following statement shows the details of the assessments as compared with the figures of the two preceding years :—

ASSESSMENT OF CROPS.

Crop.		Rate per acre.	1892-93.		1893-94.		1894-95.	
			Area.	Amount.	Area.	Amount.	Area.	Amount.
1		2	3	4	5	6	7	8
		Rs. A. P.	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.

Rabi	Flow	0 8 0 to 2 0 0	2,291	2,408	2,713	3,239	3,440	4,429
	Lift ...	0 5 0 to 1 8 0	303	263	191	199	662	657
Dhoya	...	0 8 8	...	...	..	...	...	...
Unauthorised irrigation	Kharif	...	101	302	174	779	779	2,883
	Rabi	...	...	...	..	...	...	...
Total ...		...	160,952	2,40,200	103,526	1,50,146	122,561	1,76,202

(a) 170,816 ac res 5-year lease, and 2,626 acres annual lease.
(b) 156,566 acres 5-year lease, and 1,358 acres annual lease.
(c) 100,232 acres 5-year lease only.
(d) 117,188 acres 5 years lease, and 147 acres annual lease.

The area of unauthorized irrigation was 779 acres against 174 acres in 1893-94.

The increase in the kharif leased area was mainly due to the renewal of lapsed leases on all the canals. The decrease on the High Level Canal, Range III, is due to the non-renewal of many of the lapsed leases which were taken out during the drought of 1888. The greater portion of the area commanded by this canal, it is said, does not require canal water except in years of drought.

Of the commanded area 21·97 per cent., and of the area provided with distributaries 31·47 per cent. were under lease during the year.

18. The statement below shows the duties obtained in the kharif and rabi seasons on each of the canals, calculated from the gross discharge at the canal heads :—

DUTY OF WATER.

Particulars.		Kendrapara Canal system.	Taldunda Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.	Jajpur Canal.
1		2	3	4	5	6	7
94-95	Kharif ... Acres	62,840	24,136	12,878	2,453	14,120	1,689
	Duty on gross supply	64·38	68·18	35·91		75·42	91·89
93-94	Kharif ... Acres	59,393	11,941	10,468	2,000	15,801	...
	Duty on gross supply	67·56	73·82	35·95	142·25	113·50	...
	Rabi ... Acres	1,866	113	23	52	1	...
	Duty on gross supply	3·78	1·21	0·16	6·21	0·44	...
92-93	Kharif ... Acres.	65,724	36,327	20,950	2,285	32,194	...
	Duty on gross supply	64·93	114·97	60·51	119·76	98·95	...

	Duty on gross supply	5·80	13·03	1·82	74·58	0·74	...

The duties in the kharif season calculated (i) on the gross discharge entering, (ii) on the discharge utilized, are given below :—

	Kendrapara Canal system.	Taldunda Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.	Jajpur Canal.
1	2	3	4	5	6	7
Area of kharif irrigation ... Acres	62,840	24,136	12,878	2,453	14,120	1,689
Average gross discharge at head of canal ... C. ft.	976·00	354	358·62	...	187·22	18·38
Average discharge utilized ,,	869·57	345	173·27	...	178·07	18·38
Duty of quantity entering canal ... ... Acres	64·38	68.18	35·91	...	75·42	91·89
Ditto utilized ... ... ,,	72·26	69·95	74·32	...	81·30	91·89

Taking the rainfall into account, the Superintending Engineer compares the amount of water used for rice irrigation in Orissa, with that used in Shahabad, as given in the Sone Canal Revenue report for 1893-94, and shows that more water is used in Orissa than in Shahabad. This, he considers, to be due partly to the want of village and field channels in Orissa, and partly to the different system of cultivation. The Superintending Engineer gives the discharge entering Range II, High Level Canal, but as he states there has obviously been some error in calculating it, the figures are not reproduced here, and this accounts for no duty being shown on this range. The duties obtained in the kharif season were lower on all the canals than those obtained in 1893-94. The duty in the rabi season is not given, as the rabi irrigation in Orissa is so small, that no useful object would be gained by considering the duty.

EXPERIMENT.

19. In paragraph 17 of the Government of India's Review on the Bengal Revenue Report of 1893-94 reference is made to the divergence between the sets of experiments on the rice crop outturn in the Orissa and Sone Canals. As the explanation of the differences was not very satisfactory, it was determined in 1894-95 to have the experiments in Orissa conducted with the same amount of care as is bestowed on them in the Sone Circles. An officer who had experience in the methods adopted in the Sone was deputed to carry out the experiments in Orissa and the necessity of exercising great care was impressed on all concerned. In all 497 experiments were made, 397 of them on lands irrigated by canal water and 100 on unirrigated lands. The results are abstracted in the following tables:—

Results of experiments on "good" rice crops transplanted, 1894-95.

Division.	Irrigated lands.					Unirrigated lands.				
	Number of experiments.	Average yield per acre weighed dry.				Number of experiments.	Average yield per acre weighed dry.

Orissa Circle average	54	23	13	42	38	11	24	30	37	26

Results of experiments on average rice crops broadcast, 1894-95.

Division.	Irrigated Lands.						Unirrigated Lands.				
	Number of experiments.	Average yield per acre weighed dry.					Number of experiments.	Average yield per acre weighed dry.			
		Paddy.		Number of experiments.	Straw.			Paddy.		Straw.	
		Maunds.	Seers.		Maunds.	Seers.		Maunds.	Seers.	Maunds.	Seers.
1	2	3	4	5	6	7	8	9	10	11	12
Mahanadi	37	32	25	37	54	18	22	24	5	31	21
Brahmini-Byturni	56	21	39	56	34	15	3	19	5	24	35
Aquapada-Jajpur	34	28	20	34	52	19	12	20	29	33	37
Orissa Circle average	127	26	33	...	45	3	37	22	25	31	31

Taking the average of the experiments on both "transplanted" and "broadcast" rice crops on irrigated lands, the results are as follows compared with those obtained in the Sone Circle:—

	Quality of crop.	Outturn per acre.	
		Paddy maunds.	Straw maunds
1	2	3	4
Orissa	Good ...	32·98	57·85
	Average ...	25·07	44
Sone	Good ...	31·92	75·38
	Average ...	24·12	57·3

The results as regards grain agree very closely.

The value of the rice outturn from the irrigated lands in Orissa was Rs. 32·86 per acre, while from the unirrigated lands, it was Rs. 29·82 per acre.

20. The demands, collections and balances of water-rates are shown below for the last five years:—

Years.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realisations.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1890-91 ...	1,76,762	2,69,650	4,46,412	2,09,806	38,242	1,98,364
1891-92 ...	1,98,364	2,82,880	4,81,244	2,17,256	30,284	2,33,704
1892-93 ...	2,33,704	2,61,023	4,94,727	3,52,368	52,543	89,816
1893-94 ...	89,816	1,90,824	2,80,640	2,09,542	7,748	63,350
1894-95 ...	63,350	1,68,449	2,31,799	1,93,550	6,109	32,140

The reduction in the outstanding balance is satisfactory. Of the total, Rs. 6,109, remitted and written off, Rs. 3,959 was classed as remission, and

Rs. 2,150 written off as irrecoverable. Including miscellaneous revenue, the total amount realized by the Deputy Collector was Rs. 2,12,178 as against Rs. 2,26,851 realised in the previous year.

CERTIFICATES.

21. The amount of certificate work done in each district is shown in the following statement:—

	CUTTACK.				BALASORE.				TOTAL.

2. By being wholly satisfied ...	4,994	21,981	4,522	23,626	1,867	10,153	1,278	5,504	6,861	32,134	5,800	29,13
Total ...	5,243	24,846	4,019	24,598	1,927	10,620	1,313	5,862	7,170	35,466	6,032	30,46
Balance outstanding at the close of the year	423	3,546	125	1,042	53	509	2	17	476	4,055	127	1,05

The results are satisfactory. There was less need to resort to this method of recovering water-rates and miscellaneous revenue during the year than in either of the two previous years. The number of cases pending at the end of the year is very small.

OBJECTIONS TO ASSESSMENTS.

22. The following table shows the number of objections filed against assessment and disposed of during the year:—

DIVISION.	CLAIMS FOR ORDINARY REMISSION.				OTHER COMPLAINTS.			Total complaints received during the year, excluding those pending from previous year.	Pending.
	Received during the year and pending from previous year.	Disposed of— Remission allowed.	Disposed of— Remission refused.	Pending.	Received during the year and pending from last year.	Disposed of—	Pending.		
1	2	3	4	5	6	7	8	9	10
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Revenue	783	351	284	148	10	13	7	655	155
Mahanadi	135	65	57	13	57	53	4	189	17
Brahmini-Byturni	294	101	187	6	42	41	1	328	7
Akhoyapada-Jajpur	500	228	202	70	61	58	3	479	73
Total ...	1,712	745	730	237	180	165	15	1,651	252

REMISSION.

23. The following is a statement of the amounts remitted, and written off as irrecoverable, during the year on account of water-rates, &c., compared with the figures of the previous year:—

Revision of Assessment.

	1893-94.	1894-95.
	Rs.	Rs.
(a) Unirrigated crops	2,640	2,155
(b) Damaged „	153	287
(c) Chaukidar's jagir	1,942	382
Total ...	4,735	2,824

Remissions.

	1893-94.	1894-95.
	Rs.	Rs.
(d) Waste land	63	77
(b) Land occupied by canals	4	2
(c) Twice assessed	48	49
(a) Barred by limitation	...	...
(e) Excess recovery refunded	...	...
(f) Change of rates	1,216	590
(g) Erroneous assessments	91	25
(h) Loss of crops	...	384
(i) Error in totalling	...	7
Total ...	1,422	1,134

Written off.

Irrecoverable demands ...	1,591	2,150
Grand Total ...	7,748	6,109
Deduct remissions under miscellaneous revenue ...	...	...
Net remission ...	7,748	6,109

Of the total remissions Rs. 3,959 was remitted by the Deputy Collector, on the recommendation of the Executive Engineer and Rs. 2,150 written off by the Superintending Engineer, on the recommendation of the Deputy Collector.

The decrease in the amount of remissions, especially in those required on account of wrong assessments is very satisfactory.

24. The cost of the revenue establishment for the last five years is shown below:— REVENUE ESTABLISHMENTS.

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
Establishment under Deputy Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowance	21,848	22,014	31,086	43,981	43,679
Temporary establishment	17,451	17,504	16,020	11,580	11,166
Contingencies	2,928	3,458	4,098	3,811	3,206
Headmen's fees	2,803	6,591	20,040	3,464	80
Establishment under Executive Engineer.					
Permanent and temporary establishment, including travelling allowance.	3,417	3,447	5,930	7,874	8,568
Water-regulation establishment	4,144	4,127	3,274	3,278	2,982
Total ..	52,591	57,141	80,448	73,988	69,681
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	2,19,692	2,28,451	3,73,244	2,26,851	2,12,178
Percentage ...	23·9	25·0	21·0	32·6	32·8

The reduction in the cost of the establishment under the Deputy Collector is due mainly to the change in the system of collections by which fees are no longer paid to headmen.

The increase in the establishment under the Executive Engineer was entirely in the temporary staff and was due to the employment of extra draftsmen, and muharrirs to prepare the maps and schedules showing the amount of land which is irrigable in each village.

The charge for water regulation is not strictly one that should be debited to revenue establishment, but should be incuded in the charges for maintenance of the canals, as the staff is almost exclusively employed on the various anicuts.

NAVIGATION.

25. The following statement shows the receipts from "Navigation" for last five years:—

Year.	Taldunda Canal System.		Kendrapara Canal System.		High Level Canal, Range I.		High Level Canal, Range II.		High Level Canal, Range III.		Jajpur Canal.		Total.	
	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
1890-91	31	2,148	75	86,907	33	12,229	12½	3,185	19	2,174	6½	318	177	1,06,961
1891-92	55½	4,357	78	98,462	33	12,851	12½	3,027	19	1,775	6½	286	204¾	1,20,761
1892-93 ...	55½	6,534	78	73,600	33	15,278	12½	3,165	19	1,761	6½	275	204¾	1,00,503
1893-94	55½	14,369	78	83,905	33	14,616	12½	3,691	19	2,026	6½	508	204¾	1,19,115
1894-95 ...	55½	10,024	78	65,090	33	10,587	12½	2,561	19	1,507	6½	451	204¾	96,220

The reduction of traffic, which was greatest on the High Level and Kendrapara Canals, was caused by the bad rice crop of 1893. Less rice than usual was available for export, and there was in consequence less money to support the import trade.

TRAFFIC.

The traffic on the Orissa Canals is detailed below for the last ten years, the transport service being excluded.

		1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.

Tonnage of cargo and passenger boats ...	Tons	180,142	128,898	175,996	153,674	186,019½	250,243	266,601½	239,583	2,50,444½	1,97,866
Estimated value of cargo, including rafts ...	Rs.	46,32,733	41,81,650	50,32,093	47,10,957	48,08,255	85,21,551	95,40,756	84,09,728	71,69,437	51,72,772

TRANSPORT SERVICE.

26. The total receipts from the transport service amounted to Rs. 18,981, which is nearly Rs. 5,000 less than those of 1893-94. But, as explained in the Revenue Report for 1893-94, the returns for that year were increased by the large pilgrim traffic. A transport service is maintained by Government on the High Level Canal and the steamers make two trips a week between Bhadrak, Jajpur, and Cuttack. The cost of working the transport service excluding the charge of Rs. 6,651 for tollage, which is practically a receipt, was Rs. 11,440, and the service therefore worked at a profit of Rs. 7,541. The Superintending Engineer writes of the transport service as follows:—

"There is no doubt that for the next few years, or until the railway to Calcutta from Cuttack is made, this service is a public benefit, and that it is being maintained at very little, if any, loss to the State."

MISCELLANEOUS RECEIPTS.

27. The following statement shows the miscellaneous receipts in detail for the last five years:—

Details.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water ...	222	56	158	46	112
Plantations	1,035	917	1,960	1,244	2,514
Other canal produce	845	936	1,123	528	492
Rent of buildings	3,067	6,332	4,749	4,892	5,168
Miscellaneous: Rent of lands ...	6,793	8,232	9,291	9,247	9,248
Miscellaneous: " fisheries ...	1,039	1,104	972	1,191	740
Miscellaneous: Cost of process ...	6	...	7,420	4,951	5,593
Miscellaneous: Sales of old materials	100	96	3	...	...
Miscellaneous: Other items ...	601	170	856	1,023	454
Total ...	13,708	17,843	26,532	23,122	24,321

MAINTENANCE AND REPAIRS.

28. The expenditure on maintenance and repairs during the year is shown in the following statement, compared with the expenditure in 1893-94 and in 1892-93:—

	1892-93.	1893-94.	1894-95.
1	2	3	4
	Rs.	Rs.	Rs.
Extensions and improvements	9,123	29,355	6,547
Head-works	53,456	45,757	59,800
Main canals	1,23,060	1,27,400	1,21,928
Distributaries	30,033	29,261	27,950
Drainage and protective works	11,997	8,237	5,480
Cost of working transport service	11,814	15,707	13,094
Total ..	2,39,483	2,55,717	2,34,799

The Superintending Engineer states that the expenditure on Extensions and Improvements was confined to revetting some portions of the bank of the Kendrapara and Gobri Canals with stone, to protect them from the wash of steamers, and to the completion of the new under sluice shutters of the Sone type at the Byturni weir.

The expenditure on maintenance and repairs was normal.

HEAD-WORKS.

29. The cost of maintaining each of the weirs is shown below:—

NAME OF WEIR.	Length.	EXPENDITURE.			RATE PER RUNNING FOOT.		
		1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7	8
	Feet.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Naraj ...	3,833	4,031	5,621	2,505	1·05	1·48	0·65
Mahanadi ...	6,349	15,136	14,718	16,144	2·38	2·32	2·54
Beropa ...	1,980	9,546	4,043	5,930	4·77	2·04	3·00
Brahmini ...	4,000	2,985	4,044	1,903	0·74	1·01	0·48
Pattia ...	783	3,224	4,019	4,776	4·11	5·13	6·10
Byturni ...	1,026	4,604	4,315	2,810	4·48	4·20	2·74
Burra ...	526	3,140	2,262	15,306	5·97	4·30	29·10
Total of all weirs ...	18,497	42,666	39,022	49,427	2·30	2·11	2·09

MAIN AND BRANCH CANALS.

30. The following statement shows the expenditure on each canal for the last three years:—

CANALS.	1892-93.			1893-94.			1894-95.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara	39	40,122	1,029	39	38,112	977	39	42,458	1,089
Ditto extension ...	15	7,639	509	15	17,901	1,193	15	4,970	331
Gobri	15	7,747	517	15	8,045	536	15	10,132	675
Do. extension	9	5,008	556	9	4,737	526	9	7,471	830
Pattamundi	47	8,526	181	47	7,698	164	47	13,460	286
Taldunda	51½	14,051	271	51½	11,053	213	51½	16,591	320
Machgong	32	11,163	349	32	11,097	346	32	7,134	223
High Level, Range I ...	33	8,914	270	33	12,266	371	33	9,283	281
Ditto, do. II ...	12½	6,836	547	12½	4,539	363	12½	3,209	257
Ditto, do. III ...	19	6,870	362	19	7,409	390	19	5,792	305
Jajpur Canal	6½	1,932	297	6½	1,547	237	6½	1,024	157
Total ...	279½	1,18,818	425	279½	1,24,604	395	279½	1,21,524	434

The increased expenditure on the Kendrapara, Pattamundi and Taldunda Canals was due to a more extensive clearance of silt than in previous years, and on the Gobri Canal, to thorough repairs having been carried out during the closure of the canal. On the other canals the expenditure compares favourably with that of the two previous years.

DISTRIBUTARIES.

31. The maintenance cost of the distributaries per mile is shown below. The average rate of Rs. 36 shows a satisfactory decrease as compared with the mileage rates of 1893-94 and of 1892-93, which were Rs. 38 and Rs. 39, respectively.—

	1892-93.			1893-94.			1894-95.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.
1	2	3	4	5	6	7	8	9	10
DISTRIBUTARIES.	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara Canal System	357	14,426	40·49	357	11,182	31·32	357	10,340	29
Taldunda Canal	71¼	3,784	52·92	71¼	2,662	36·97	71¼	3,948	55
Machgong Canal	122½	6,034	41·17	122½	4,603	36·46	122½	1,656	38
High Level Canal, Range I	131¼	2,945	22·43	131¼	4,648	35·48	131¼	4,013	31
Ditto, do. II	......	......	......	......	......	......	......	......	......
Ditto, do. III	49¼	2,164	43·71	49¼	3,600	73·40	49¼	3,281	66
Pattamundi Canal	37½	680	18·25	37½	2,477	66·05	37½	1,710	46
Total ...	768¾	30,033	39	768¾	29,262	38	768¾	27,948	36

The lengths of distributaries in the above are those which have been brought on the revenue account, and consequently differ from the lengths given in paragraph 13 which include all so far advanced as to be fit for use, whether the capital account is still open or not.

DRAINAGE AND PROTECTIVE WORKS.

32. The total expenditure on these works was Rs. 5,480, which is considerably less than the expenditure in any of the three previous years. It includes the upkeep of 131 miles of first class protective embankments and 247 miles of drainage cuts.

DREDGING AND SILT-CLEARING.

33. The following table shows the cost of silt clearing and dredging during the year 1894-95:—

NAME OF CANALS.	Silt-clearing.			Dredging.		
	Quantity.	Rate per 1,000.	Cost.	Quantity.	Rate per 1,000.	Cost.
1	2	3	4	5	6	7
	C. feet.	Rs.	Rs.	C. feet.	Rs.	Rs.
Kendrapara Canal	6,126,469	3·64	22,298	617,282	4·94	3,049
" Extension ..	39,762	14·91	593	10,400	17·40	181
Pattamundi Canal	1,771,795	2·12	3,765	...	...	...
Gobri Canal	1,679,793	1·72	2,892	22,428	7·53	169
" Extension	1,144,257	2·50	2,868	30,168	8·19	247
High Level Canal, Range I ...	948,304	2·86	2,713	...	...	...
Ditto " II ...	78,829	2·51	198	...	...	...
Ditto " III ...	232,287	2·41	550	...	...	...
Jajpur Canal	...	...	...	...	...	...
Taldunda Canal	1,731,525	2·90	5,030	364,633	7·68	2,799
Machgong Canal	223,954	2·20	491	...	...	...
Total ...	13,976,975	2·96	41,398	1,044,911	6·17	6,445
Total, 1893-94 ...	3,726,140	3·16	11,775	1,105,270	4·97	5,490

There was an extensive clearance of silt, which had to a large extent been deposited during the cyclone of the previous year, in all the canals of the Kendrapara system. The Superintending Engineer writes:—

"The quantity removed by means of the steam dredgers was rather less than in the previous year, but the total cost and the average rate was higher. This is due to the high rate on the Taldunda Canal. The rate on the Kendrapara Canal (including lifting on boats

by the dredgers and carrying to the spoil banks by manual labour) was Rs. 4·94 per 1,000, as against Rs. 6 24 in the previous year. The Executive Engineer, Mahanadi Division, explains the high rate, viz., Rs. 7·68 per 1,000 on the Taldunda Canal, as due to the extra lead in carrying the silt dredged to fill up and improve some low ground near the steamer ghat."

TELEGRAPH OFFICES.

34. The receipts from the Postal and Telegraph offices at Jagatpur, Kendupatna, Aquapada, and Janapur amounted to Rs. 1,083 during the year. The amount guaranteed by the Department was Rs. 1,464. The difference Rs. 381 is a charge against the canal revenue.

PLANTATIONS.

35. The following statement shows the number of trees in each Division in 1894-95 compared with the numbers in the previous year :—

DIVISIONS.	NUMBER OF TREES.		Difference.
	1893-94.	1894-95.	
1	2	3	4
Mahanadi	33,736	37,917	+ 4,181
Brahmini-Byturni	77,709	72,874	— 4,835
Acquapada-Jajpur	23,568	25,891	+ 2,323
Total ...	1,35,013	1,36,682	+ 1,669

The reduction in the Brahmini-Byturni division is reported as being chiefly due to the omission of about 5,000 self-sown seedling date palms which are of no use. The receipts from plantations amounted to Rs. 2,515. Babu Jagdum Sahai was in charge of the Revenue Division during the year and did good work.

MIDNAPORE CANAL.

36. The Capital, Interest, and Revenue Accounts of this Canal are given below:—

CAPITAL ACCOUNT.

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1894-95.	Outlay to the end of 1894-95.

NOTE—The details by heads of expenditure for the year 1894-95 and nine preceding years will be found in the table given in paragraph 38 following.

EARNINGS.

37. The earnings of the Canal during the year, *i.e.*, the assessed water-rate value of the irrigation done during the year, the assessed tollage, and the actual receipts under the head Miscellaneous, are compared below with the actual outlay:—

EARNINGS.		1893-94.	1894-95.
		Rs.	Rs.
Irrigation ...	...	1,30,111	1,04,875
Navigation ...	...	1,19,416	1,31,078
Miscellaneous	...	24,319	22,308
Total	...	2,73,846	2,58,261
Deduct refunds of revenue		174	259
Net earnings...	...	2,73,672	2,58,002
Outlay ...	...	2,08,190	2,24,564
Net earned profit	...	65,482	33,438

FINANCIAL RESULTS.

38. The Revenue Receipts and Working Expenses of the Midnapore Canal for the last ten years are tabulated below:—

PARTICULARS.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9	10	11
RECEIPTS.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

LENGTHS OF CANALS AND DISTRIBUTARIES.

39. In the following statement are tabulated particulars concerning the canals and distributaries. There has been no change in their lengths or in the areas protected or commanded:—

f Canal.	1893-94.								1894-95.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
	Miles.	Miles.	Miles.	Acres.	Acres.	Acres.	Acres.	Acres.	Miles.	Miles.	Miles.	Acres.	Acres.	Acres.	Acres.	Acres.
napore weir	44	44	286	294,400		100,000	74,804	74·8	44	44	286	294,400		100,000	62,724	62·7
Panchkurah	12	12	35	112,640	180,000	23,000	13,233	57·5	12	12	35	112,640	180,000	23,000	6,627	28·8
reaches, I and II ...	16	16	18	30,080		2,000	842	42·1	16	16	18	30,080		2,000	765	38·2
Midnapore ...	72	72	339*	437,120	180,000	125,000	88,879	71·1	72	72	339*	437,120	180,000	125,000	70,116	56·09

* The length of distributaries is 283 miles.
" of village channels is 156 "

OUTLETS.

40. The following statement shows the areas commanded by the distributaries and the number of outlets in use:—

Portion of canal.	Total length of channel.	Area commanded.	Number of temporary outlets.		Number of permanent outlets.	
			1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7
	Miles.	Acres.				
Under Midnapore weir ...	229·94	100,000	1,370	737	57	32
Do. Panchkurah weir ...	35·25	23,000	202	257	10	1
Do. Tidal Reaches, Ranges I and II ...	18·00	2,000	6		11	
Total ...	283·19	125,000	1,578	994	78	33

The reduction in the number of temporary outlets was due to the smaller area under lease. The small number of permanent outlets is striking, but this is a matter which is now under consideration, and it is hoped the number will be increased soon.

RAINFALL.

41. The average rainfall of the last five years at four stations within the canal-irrigated area is shown below:—

Stations.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	Average of former years.	
						No. of years.	Average rainfall.
1	2	3	4	5	6	7	8
	Inches.	Inches.	Inches.	Inches.	Inches.		Inches.
Midnapore ...	57·61	55·08	41·44	66·31	43·99	26	55·68
Panchkurah ...	56·84	41·60	39·95	65·37	71·62	26	55·95
Luchmapur ...	59·30	57·48	47·13	74·18	54·22	10	58·40
Mowah ...	49·93	53·07	33·60	76·67	53·77	10	54·57
Average ...	55·68	51·81	41·28	70·63	55·90	......	56·15

The rainfall was very evenly distributed. The Superintending Engineer writes:—

"The rainfall was much heavier to the east than in the west of the district, but it was practically speaking, everywhere sufficient for all crops; and hence there was a comparatively smaller demand for canal water, and a considerable area under five years' lease neither required nor received canal water."

The rainfall in the kharif season was distributed as follows:—

	Midnapore.	Panchkurah.	Luchmapur.	Mowah.	Average, 1894-95.	Average, 1893-94.
1	2	3	4	5	6	8
	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
July ...	9·29	15·28	15·31	15·94	13·95	8·28
August ...	7·25	24·36	10·05	4·48	12·53	7·42
September ..	7·04	6·52	4·56	4·60	5·68	15·98
October ...	3·96	4·76	4·17	3·55	4·11	5·41
Total, kharif season, 1894-95.	27·54	50·92	34·09	28·57	36·27	37·09
Do. 1893-94 ...	32·90	35·73	40·42	39·33	37·09	......

FLOODS.

42. The floods, though of frequent occurrence, were not very high, and no damage was done by them. The following table shows the highest levels of

the Cossye and Rupnarain rivers compared with those of last year and with the highest recorded levels :—

River.	Locality.	1893-94.		1894-95.		Highest recorded.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8
Cossye ...	Midnapore above weir	24th June 1893 ..	91·70	25th July 1894 ...	85·70	1868 ...	92·30
	Ditto below weir	Ditto ...	79·00	Ditto ...	84·00	Do. ...	91·55
	Panchkurah above weir	23rd June 1893 ...	32·50	26th July 1894 ...	33·50	10th October 1876 ...	35·00
	Ditto below weir	Ditto ..	32·20	Ditto ..	33·40	Ditto ...	34·30
Rupnarain ...	Dainan	11th September 1893	15·80	2nd September 1894 .	16·30	26th August 1855 ...	17·38
	Kantapukhur	26th May 1893 ...	16·50	Ditto ...	16·40	Ditto ...	16·80

The greatest discharge of the Cossye during the year was 40,071 cubic feet per second. After September the discharge diminished rapidly. The minimum discharge occurred on the 23rd March 1895, when only 16 cubic feet per second was registered.

43. The areas of the crops irrigated and leased during 1894-95 and the ten previous years, as also the average annual rainfall are shown below :— IRRIGAT

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.		Acres.	Inches.
1885-86 ...	68,769	...	...	70,604	81·28 *
1886-87 ...	69,762	...	...	69,762	53·05 *
1887-88 ...	64,702	1,162	...	65,864	22·08
1888-89 ..	66,408	3,369	...	69,777	62·13 †
1889-90 ..	68,370	440	...	68,810	44·47 †
1890-91 ...	82,002	...	...	82,002	55·68 †
1891-92 ...	83,905	68	...	83,973	51·81 †
1892-93 ...	91,217	...	...	91,217	41·28 †
1893-94 ...	79,550	6,213	...	85,763	70·63 †
1894-95 ...	69,941	175	...	70,116	55·90 †

* Mean of observations of two stations—Midnapore and Panchkurah.

† Average of four stations throughout the irrigated areas under the Midnapore and Panchkurah weirs.

The total area leased during the year was 70,116 acres as compared with 88,879 acres of the previous year. The kharif irrigation during the year amounted to 69,941 acres, which was less than that irrigated during 1893-94 by 12,725 acres. The Superintending Engineer writes :—

"The decrease in the area under kharif irrigation was due to the non-renewal of the lapsed leases, owing to the seasonable rainfall of 1894-95. There is practically no rabi irrigation from the Midnapore canal. The large area, viz., 6,213 acres last year was exceptional, and was due to the winter rice crop on a large tract of country having been inundated by a flood, which breached the left bank of the Cossye at Jagatpore, and the sowing of a part of this area afterwards with boro rice."

44. The following tables gives particulars about the areas under leases :— LEASES.

Particulars.	Kharif.			Sugarcane and other perennial irrigation.	Rabi.	Total.
	Long leases.	Annual leases.	Surreptitious irrigation.			
1	2	3	4	5	6	7
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Leases in force at the end of 1893-94	82,606	...	206	...	9,562	92,434
" which expired at the end of 1893-94 ...	(a) 15,475	...	206	...	9,562	25,243
" in force at the beginning of 1894-95 ...	67,191	...	...	...	...	67,191
" executed during 1894-95	(b) 2,735	...	...	...	190	2,925
" in force during the year 1894-95 ...	69,926	...	...	...	190	70,116
" which expired at the end of 1894-95 ...	17,224	...	...	...	190	17,414

(a) Includes the decrease due to check measurement.
(b) Ditto increase ditto ditto.

DUTY OF WATER.

45. The duty obtained in the kharif season and calculated from the gross discharge is given below for the last three years :—

Particulars.			Under Midnapore weir.	Under Panchkurah weir.
1			2	3
1892-93	Kharif ...	Acres	82,642	7,690
		Duty on gross supply ..	138	54
1893-94	Kharif ...	Acres ...	73,738	4,970
		Duty on gross supply ...	134	191
1894-95	Kharif ...	Acres	30,209	2,731
		Duty on gross supply ...	204	170

These figures are not of much importance. The efficiency of a canal can only be properly tested during a period of maximum demand, whereas the Superintending Engineer states that "only once during the season was there even a moderate demand, viz., between the 19th and 28th September, when the average discharge was 550 cubic feet per second, and the area irrigated 30,000 acres, which is equivalent to a duty of 55·5 acres." The small demand was owing to the seasonable rainfall.

CROP EXPERIMENTS.

46. The results of the crop experiments made during the year by the Deputy Collector are shown below:—

Statement showing the average outturn of each crop experimented by each officer of the Midnapore Canals Revenue Division during the year 1894-95.

Name of officer.	Name of crop.	Number of experiments.		Average weight per acre if weighed wet.		Average weight per acre if weighed dry, or reduced if weighed wet.		Remarks.
				Grain.	Straw.	Grain.	Straw.	
1	2	3		4	5	6	7	8
				Mds. s.	Mds. s.	Mds. s.	Mds. s.	
Babu Raj Mohan Chakravarti, Special Deputy Collector.	Winter rice ...	Wet	4	32 12	88 11	...	...	
" Rakhal Das Bose, Zilladar.	Ditto ...	Dry	4	...	...	23 10	53 27	
		Wet	4	26 35	79 23	...	...	
" Shiddhesvar Mazoomdar, Zilladar.	Ditto ...	Dry	8	...	...	21 7	35 6	
" Mahananda Gangooli, Zilladar.	Ditto ...	Wet	9	35 21	97 16	...	...	

These experiments are not of much value owing to the seasonable rainfall, which rendered irrigation unnecessary. They show the average outturn of rice in the irrigated tract in a year of good rainfall. The experiments were not confined to the field actually irrigated during the year.

ASSESSMENTS, COLLECTIONS, AND BALANCES.

47. The balances, assessments, and recoveries of water-rates on the Midnapore Canal during the last five years are shown in the following statement:—

Year.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1890-91 ...	50,644	1,30,595	1,81,239	1,15,438	834	64,967
1891-92 ...	64,967	1,29,822	1,94,789	1,32,981	2,836	58,972
1892-93 ...	58,972	1,39,990	1,98,962	1,49,057	1,338	48,567
1893-94 ...	48,567	1,30,111	1,78,678	1,65,630	6,021	7,027
1894-95 ...	7,027	1,35,016	1,42,043	1,36,852	612	4,549

The amount shown in column 3 as falling due during the year 1894-95, includes the amount of water-rate assessments for the boro rice irrigated in 1893-94, which did not fall due until 1st April 1894. The increase was also due to the realization of enhancements of the previous year's rates as a result of check-measurement of the old leases at the time of their renewal. The work done by the Deputy Collector during the year was satisfactory. The Superintending Engineer writes as follows regarding the system of water-rate collections:—

"For the first time notices of assessment were issued by him (the Deputy Collector) showing the area irrigated. The amount of water-rate due, the date of instalment, and other matters, were served upon each lessee with a view to prevent any fraud being practised upon them by tahsildars as to the amount of rates payable."

ARREARS

48. The following statement shows the arrears of each former year which were outstanding at the beginning of 1894-95, as well as the current dues and the extent to which they have been worked off:—

Year.	Amount previously due and unrealised.	Amount falling due within the year.	Total amount due to end of the year.	Adjustments of the year. Cash recoveries.	Remissions authorised.	Written off as being irrecoverable.	Total.	Balance unrealised at end of the month of March 1895.
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1891-92 ...	162 9 0	..	162 9 0	109 5 0	53 4 0	...	162 9 0	...
1892-93 ...	1,055 12 0	218 14 0	1,274 10 0	1,254 1 3	20 8 9	...	1,274 10 0	...
1893-94 ...	5,808 7 6	29,922 8 0	35,730 15 6	34,844 4 6	191 4 3	...	35,035 8 9	695 6 9
1894-95 ...	...	1,04,875 0 3	1,04,875 0 3	1,00,674 6 6	346 11 3	...	1,01,021 1 9	3,854 14 6
Total ...	7,026 12 6	1,35,016 6 3	1,42,043 2 9	1,36,882 1 3	611 12 3	...	1,37,493 13 6	4,549 5 3

REMISSI

49. The remissions granted during the year were very small and were as follows:—

	Rs.
Remissions granted by the Collector under Rule 28 of the Midnapore canal rules	85
Remissions granted by Special Deputy Collector under clauses I and II of Rule 24 of the rules	26
Remissions granted by Special Deputy Collector under Rule 25 of the rules	501
	612

TIFIC

50. The extent to which recoveries by means of certificates were made during the year is shown in the following statement:—

Particulars.	Midnapore. 1893-94. No.	Amount.	1894-95. No.	Amount.
1	2	3	4	5
Cases for disposal.		Rs.		Rs.
1. Cases pending at the close of the preceding year ...	356	1,962	70	493
2. Cases instituted during the year	1,799	12,102	579	5,708
Total ...	2,155	14,064	649	6,201
Cases disposed of.				
1. By being struck off, owing to the demand having been remitted.	48	248	97	1,370
2. By being wholly satisfied	2,037	13,323	535	4,602
Total ...	2,085	13,571	632	5,972
Balance outstanding at the close of the year ...	70	493	17	229

The reduction in the number of cases taken out, from 1,799 in 1893-94, to 579 in 1894-95, is very satisfactory and indicates good work on the part of the

collecting staff. Of the 97 cases struck off during the year, 30 were on account of the demand being irrecoverable owing to the death or insolvency or absconding of the debtors and 67 on account of objections.

OBJECTIONS TO ASSESSMENTS

51. The number of objections to assessments filed during the year and the nature of their disposal is shown in the following statement:—

Division.	Claims for ordinary remission.				Other complaints.			Total complaints received during the year, excluding those pending from previous year.	Pending.
	Received during the year and pending from previous year.	Disposed of		Pending.	Received during the year and pending from last year.	Disposed of.	Pending.		
		Remission allowed.	Remission refused.						
1	2	3	4	5	6	7	8	9	10
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Cossye ...	259	44	204	11	229	222	7	459	18

REVENUE ESTABLISHMENTS.

52. The cost of the revenue establishment during the last five years is shown below:—

Establishment under the Collector.	1890-91.	1891-92.	1892-93.	1893-94	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowances ...	19,757	17,947	20,263	16,620	18,436
Temporary establishment ...	649	682	441	346	1,289
Contingencies ...	1,260	1,154	1,014	1,814	873
Headman's fees ...	60	335	375	325	813
Total ...	21,726	20,118	22,093	19,105	21,411

In addition to the above, the following sums were paid by the Executive Engineer for water regulation:—

	Water-regulation.	
	Permanent.	Temporary.
	Rs.	Rs.
1890-91	488	595
1891-92	473	682
1892-93	419	500
1893-94	822	288
1894-95	1,187	263

The increased cost of the permanent establishment is due to the transfer of patrols from the Revenue Department to the Executive Engineer's establishment in January 1894. The cost of collecting and assessing was 16·70 per cent. of the amount realized, as compared with 12·2 per cent. of the previous year. The Superintending Engineer attributes the increase to the reduction of demand, owing to the non-renewal of the lapsed leases, and also to the entertainment of temporary amins for check-measurement of the long leases.

NAVIGATION.

53. The navigation receipts of the year amounted to Rs. 1,35,492, as compared with Rs. 1,14,994 in 1893-94. The number of passengers carried by the Calcutta Steam Navigation Company was the largest on record, and the amount of tolls recovered from the Company was Rs. 44,434 as compared with

Rs. 30,647 of the previous year. The Superintending Engineer makes the following remarks:—

"The rice crop was a good one, and consequently the export was large. A large traffic seems to have sprung up in the tidal reaches, consisting of rice from the Ghattal side to Calcutta, and of paddy on the return journey from Calcutta.

"It is probable, however, now that parts of the Buxi khal have been cleared, that during spring tides, and especially during bad weather, these boats will only use that part of the tidal canal from Bansbaria to Ulubaria, so as to avoid the Rupnarain."

There was an increase of 3,698 tons of rice and 50 tons of paddy carried on the Midnapore Canal, as compared with the amounts carried in the previous year.

TRAFFIC.

Particulars regarding the traffic on the canal for the last ten years are tabulated below:—

DESCRIPTION.		1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91	1891-92.	1892-93.	1893-94.	1894-95.

(a) Inclusive of tolls (Rs. 41,180,29,066, Rs. 30,647, and 44,434) paid by the Calcutta Steam Navigation Company.
(b) Inclusive of passengers (92,257, 100,916) and 109,059 carried by the Calcutta Steam Navigation Company's steamers.

MISCELLANEOUS RECEIPTS.

54. The miscellaneous receipts for the last five years were as follows:—

DETAILS.		1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1		2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water		...	...	10	4	...
Plantations		52	40	34	44	55
Other canal produce ...		37	5	1	2	1
Rent of buildings ...		721	711	740	712	890
Miscellaneous	Rent of lands	6,079	8,758	8,586	12,468	12,049
	" of fisheries	736	4,447	1,162	1,479	1,507
	Cost of process	1,009	2,516	1,280	2,173	722
	Other items...	370	2,670	5,166	7,437	7,084
Total ...		9,004	19,147	16,979	24,319	22,308

MAINTENANCE AND REPAIRS.

55. The actual cost of maintenance and repairs, exclusive of establishment and tools and plant during the last four years is shown below:—

	1891-92.	1892-93.	1893-94.	1894-95.
	Rs.	Rs.	Rs.	Rs.
Head works, including buildings	8,373	9,965	9,430	15,461
Main canal and branches ...	1,18,241	59,802	67,404	68,702
Distributaries ...	10,365	12,612	20,932	18,501
Drainage and protective works	1,239	2,090	2,058	1,240
Working steamers ...	3,044	2,961	3,354	538
Total ...	1,41,262	87,430	1,03,178	1,04,502

The large increase in the cost of maintaining the head works was due mainly to sand-filling and rubble-packing in front of the under sluices at Mohanpur. The cost of working Government steamers and bholio was only Rs. 598, as compared with Rs. 3,354 in 1893-94. The expenditure on tools and plant was Rs. 39,569, against Rs. 38,788 of the previous year.

HEAD WORKS AND WEIRS.

56. The expenditure on the Midnapore and Panchkurah head works during the year was Rs. 10,497 and Rs. 4,964, respectively, against Rs. 5,638 and Rs. 3,892 in the preceding year. On weirs the expenditure was at the rate of Rs. 3·59 per foot run at Midnapore, and Re. 1·24 at Panchkurah, against Rs. 0·74 and Re. 1·53, respectively, last year.

MAIN CANAL.

57. The outlay on repairs to the main canal, including that on head works, on working steamers, and on drainage works, was Rs. 86,001, against Rs. 82,246 in 1893-94.

DISTRIBUTARIES.

58. On distributaries the expenditure on repairs was Rs. 18,501, or Rs. 65 per mile, against Rs. 20,932, or Rs. 74 per mile, in the previous year.

59. The cost of maintenance per mile of both the main canal and the distributaries is given below for each of the last ten years:—

Year.	Main Canal and Head Works, &c.			Distributaries.		
	Length of canal open.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
1	2	3	4	5	6	7
	Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1885-86 ...	48	1,10,350	2,299	277	14,424	52
1886-87 ...	48	1,20,135	2,503	283	17,617	63
1887-88 ...	48	1,10,494	2,301	283	20,687	74
1888-89 ...	48	83,675	1,743	283	22,464	79
1889-90 ...	48	93,738	1,953	283	19,769	69

1891-92 ...	48	1,30,897	2,727	283	10,365	36
1892-93 ...	48	74,818	1,558	283	12,612	44
1893-94 ...	48	82,246	1,713	283	20,932	74
1894-95 ...	48	86,001	1,792	283	18,501	65

DREDGING AND SILT CLEARING.

60. The quantity of silt dredged during the year was larger than usual, though the rate was reduced. The figures compared with those of 1893-94 are shown in the following table:—

Name of dredger.	Quantity of earth dredged.	Actual cost of lifting.	Cost of removing		Total.	Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet.	Remarks.
			Steam hopper-barges.	Ordinary hopper-barges.

Total for 1894-95 ...	6,290,719	22,414	4,215	...	27,775	3·6	0·7	4·4	
Total for 1893-94 ...	4,455,444	19,455	4,575	...	24,030	4·3	1·0	5·4	

61. The expenditure on plantations during the year was Rs. 195, against Rs. 236 of the previous year. A large number of saplings were destroyed by strong winds in June and July 1894. The following table compares the condition of the plantations in 1894-95 with 1893-94 :—

PLANTATIONS.

YEAR.	Trees upwards of 12 feet high.	Saplings between 4 and 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1894-95 ...	13,010	4,113	3,227	20,350
1893-94 ...	10,151	5,794	3,109	19,054

62. On the whole the administration of the year was satisfactory, though the seasonable rainfall resulted in a falling off in the irrigated area.

GENERAL RESULTS.

Babu Raj Mohan Chakravarti was in charge of the Revenue Division during the year and did good work.

HIJILI TIDAL CANAL.

63. The capital, interest and revenue accounts of this canal are given below:—

1.—CAPITAL ACCOUNT.

CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1894-95.	Outlay to end of 1894-95.
1	2	3
DIRECT CHARGES.	Rs.	Rs.
I.—Works	81,583	16,62,210
II.—Establishment	18,739	5,51,988
III.—Tools and plant	6,000	1,33,004
IV.—Suspense accounts	......	......
Loss by exchange	......	22,790
Total ...	1,06,322	23,69,992
V.—*Less*—Receipts on capital account	......	925
Net total—direct charges ...	1,06,322	23,69,067
INDIRECT CHARGES.		
Capitalization of abatement of land revenue	......	......
Leave and pension allowances	2,623	59,114
Total—indirect charges ...	2,623	59,114

The works in connection with the remodelling of the canal are approaching completion. During the year good progress was made with the large sluice on the Haldi river at Terapakia, which, when finished, will be used to feed the second range of the canal. The channel leading from it to the canal, about 2½ miles in length, is intended to act as a silt trap, so that by the time the water reaches the canal it will be free from matter in suspension. No other works charged to capital account were in progress during the year.

2.—INTEREST ACCOUNT.

INTEREST ACCOUNT.

	Rs.
Interest charges to end of 1893-94	17,45,805

RAINFALL.

65. The rainfall registered during the year at Contai station was 83·37 inches as compared with 78·26 inches in 1893-94.

The total maintenance charges amounting to Rs. 47,426 included Rs. 7,000 expended in repairing the locks during the closure. The net revenue of Rs. 11,099 compares favourably with the average of the previous nine years.

FLOODS.

66. The floods of 1894-95 in the rivers crossed by the canal were not high ones and call for no remarks. The following statement shows the highest gauge readings of the rivers Hooghly, Haldi, and Russulpur:—

NAME OF RIVER.	Locality.	1893-94.		1894-95.		HIGHEST RECORD.		REMARKS.
		Date.	Reading.	Date.	Reading.	Date.	Reading.	
1	2	3	4	5	6	7	8	9

Rate of toll per mile ..	1,798	1,734	1,338	1,700	1,200	821	1,128	1,607	2,007	1,968
Number of boats, including empty boats No.	19,316	17,542	13,503	16,481	13,755	10,215	15,332	16,084	14,716	15,133
Tonnage of boats ... Tons	163,535	149,747	124,903	165,635	124,605	91,114	133,575	168,239	1,78,640	193,345
Passengers carried ... No.	...	6,569	11,951	34,032	(b)30,222	(b)22,420	(b)27,320	(b)42,488	60,081	(b)34,951
Estimated value of cargo, including rafts ... ... Rs.	32,74,961	31,48,826	26,13,351	33,01,123	27,29,720	20,78,972	34,97,725	52,56,550	42,37,488	44,85,280

(a) Inclusive of tolls, Rs. 1,603, Rs. 1,532, Rs. 4,590, Rs. 5,523, Rs. 3,346, Rs. 3,631, Rs. 5,508, Rs. 7,586, and Rs. 5,330 paid by the Calcutta Steam Navigation Company.
(b) Inclusive of passengers, 23,243, 17,554, 21,209, 31,792, 41,280, and 16,484 carried by the Company's steamers.

The tollage receipts amounted to Rs. 57,089, and show a decrease of Rs. 1,120 compared with the figures of 1893-94. But in that year the tolls were abnormally large on account of the pilgrim traffic attracted by the Car festival at Puri, which only occurs once in every 10 or 12 years. Comparing the returns of 1894-95 with those of 1892-93, the total tonnage shows an increase of 15 per cent., while the increase in the tollage is 10 per cent. The reason of the tollage not keeping pace with the increase in tonnage is probably to be found in the reduced rates of through-tickets from the Orissa Coast Canal to Gewankhali. The object of this reduction was, as explained in paragraph 125 following, to encourage boats to use the Hijili Tidal Canal in their journeys to Calcutta, instead of going down the Russulpore river and up the Hooghly. It is too early yet to pass judgment on the effects of the change.

MISCELLANEOUS RECEIPTS.

68. The miscellaneous receipts for the last five years are shown below:—

1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
Rs.	Rs.	Rs.	Rs.	Rs.

* In 1893-94 only one dredger, a *Marchant*, worked with 5 mud punts.

The Superintending Engineer gives the following details of the work of the dredgers:—

The *Comus* (Bruce's) worked from 27th August to 20th October in the 13th mile of Range II, and removed nearly a lac of silt.

Marchant No. I from 28th to 29th August was employed in removing the nose from end of Kalinagar lock entrance, where it meets the Sadar khal. From 30th August to 18th October it was engaged in clearing silt at Kalinagar, 29th mile of Range II. From 21st October to 12th November it worked in the 13th mile of Range II, when it was sent to the Kidderpore Dockyard for thorough repairs. From 2nd March 1895, it was at work again in removing the bund put up during closure at Gowankhali, Range I. "*Jack*" (*Marchant* No. II) worked from the date of its arrival (6th December 1894 to end of March 1894) in the 13th and 14th mile of Range II. *Marchant* No. III worked from the date of its arrival (3rd February 1895) to end of March, in the 2nd and 3rd mile of Range I at Etamugra in removing bund put up for closure works."

The quantity of silt removed from the Gowankhali, Etamugra and Terapakia locks and their entrances during the short closure of the canal in February and March is given below:—

		Quantity in c. ft.	Rate.	Cost.	Remarks.
1		2	3	4	5
Gowankhali from	Canal ...	...	...	...	
	Lock ...	8,610	8	69	
Etamugra from	Canal ...	1,891	5	9	
	Lock ...	5,409	6·5	35	
Terapakia from	Canal ...	...	...	...	
	Lock ...	8,715	6·5	57	

PLANTATIONS.

70. The following table shows the state of the plantations for the last two years:—

Year.	Trees upwards of 12 feet in height.	Saplings from 4 to 12 feet in height.	Seedlings under 4 feet.	Total.
1	2	3	4	5
1894-95 ...	3,051	2,199	828	6,078
1893-94	2,863	2,510	898	6,271

GENERAL.

71. An opportunity was taken by the Executive Engineer during the closure of the canal to make some exepriments on the loss due to leakage, evaporation, and percolation from the impounded water. From the results obtained and from the observations of the daily loss during January, February, and April, when the canal was working, the Superintending Engineer shows that the loss of water due to leakage through the lock gates is five times greater than the loss due to lockage alone. This heavy leakage is through the old iron lock-gates. The efforts already made to make them stanch have not been very successful, and it will be a matter for consideration whether they should not be replaced by wooden gates similar to those employed on the Coast Canal locks.

The Rasalpur river has deepened considerably, owing to the water brought into it by the recently remodelled Baliaghye drain. This is very encouraging, as also is the improvement in the Sadar khal effected by the dredging of the Kalaboria khal.

SONE CANALS.

72. The Capital, Interest and Revenue accounts of these canals are given below:—

CAPITAL ACCOUNT.

I.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1894-95.	Outlay to end of 1894-95.
1	2	3
Direct Charges.	Rs.	Rs.
I.—Works	24,191	1,87,45,822
II.—Establishment	5,551	52,02,867
III.—Tools and plant	30,043	22,59,099
IV.—Suspense accounts	(—)20,905	1,08,448
Loss by exchange	......	52,240
Total ...	38,880	2,63,68,476
V.—*Less*—Receipts on capital account	......	3,74,445
Net total direct charges	38,880	2,59,94,031
Indirect Charges.		
Capitalization of abatement of land revenue	......	37,911
Leave and pension allowances	777	8,77,657
Total indirect charges	777	9,15,568

No important works were carried out during the year chargeable to the Capital Account of the Sone Project. Good progress was made on the Mohunpur drainage scheme which has for its object, the draining of the land adjacent to the Jamroro Subdivisional head-quarters, and some permanent outlets were constructed on the Chowsa Branch Canal. These works were charged to Minor Works and Navigation. Under Major Works, the work of the year was confined to some outlets on distributaries and some small syphons.

INTEREST ACCOUNT.

II.—INTEREST ACCOUNT.

		Rs.
Interest charges to end of 1893-94	... ...	1,86,53,306
Ditto for 1894-95	... ...	10,38,984

Total ..	9,25,675	8,34,834	Total Receipts ...	9,25,675	8,34,834

Note.—The details by heads of expenditure for the year 1894-95 and nine preceding years will be found in the table given in paragraph 74 following.

Earnings.

73. The following statement compares the "Earnings" with the actual outlay for the years 1893-94 and 1894-95:—

	1893-94.	1894-95.
	Rs.	Rs.
Earnings—		
Irrigation	7,39,959	6,56,332
Navigation	59,905	58,850
Miscellaneous	29,578	35,620
Total ...	8,29,442	7,50,802
Deduct refunds of revenue ...	6,237	2,927
Net earnings	8,23,205	7,47,875
Outlay	7,40,976	7,06,739
Earned profit ...	82,229	41,136

The irrigation earnings are the net assessments for the irrigation of the year, after deducting refunds, or in other words, the water-rate value of the irrigation done during the year. A portion of these assessments, viz., those for rabi irrigation are not legally payable until the 5th April. Consequently the total irrigation earnings during the year will not be the same as the total amount of water-rates falling due during the year. Thus the Rs. 6,56,332 shown above as the irrigation earnings of 1894-95, includes a sum of Rs. 16,636 for rabi irrigated during the year, which was not payable until 1895-96, and excludes a sum of Rs. 45,866 which fell due during the year for rabi irrigation of 1893-94. The navigation earnings are the assessed

tollage for the year, together with the actual miscellaneous receipts charged to navigation The miscellaneous earnings are perforce the actual realisations under that head.

74. The following is a statement of the revenue account and working expenses of the canals for ten years:—

FINA RES

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.

Net revenue ...	4,78,644	3,04,871	(—)1,63,730	36,846	1,51,045	27,071	2,08,234	3,01,334	1,84,699	1,28,095

The decrease in the irrigation receipts was due to the seasons being very favourable for the crops, and consequently unfavourable to irrigation. The decrease in the working expenses is satisfactory. It was due in a great measure to the economy exercised in silt clearing. The increase under Extensions and Improvements was chiefly on account of the construction of a surface supply inlet at Dehri for the purpose of testing certain theories of Mr. Buckley concerning the action of the head sluice in scouring heavy sand from the bed of the river. The Eastern Main Canal and Patna Canal were closed from the 21st April to the 19th June, and the Western Main Canal from 14th to the 25th May, for repairs.

LENGTHS OF CANALS AND DISTRIBUTARIES.

75. The following table shows the lengths of canals and distributaries in operation and the areas commanded, provided with distributaries, and irrigated at the close of each of the last two years, respectively:—

Name of Canal.	1893-94.								1894-95.							
	Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of areas irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

* The decrease in this area is due to a revision of the areas provided with distributaries from the Buxar and Chowsa Branch Canals.

The additional lengths of distributaries in the Buxar Division is chiefly due to the parallel channels in Bhojepur distributary and Chowsa Branch Canal not included in previous returns.

VILLAGE CHANNELS AND OUTLETS.

76. The lengths of village channels and the number of outlets in use during the year were as follows:—

Division.	Total length of village channels completed up to end of 1894-95.	Total number of temporary and permanent outlets in use during 1894-95.	Number of permanent outlets.
1	2	3	4
	Miles.	No.	No.
Eastern Sone	393¾	1,449	951
Arrah	1,092¼	2,186	1,744
Buxar	693	925	479
Total, 1894-95 ...	2,179¼	4,560	3,174
Total, 1893-94 ...	1,888¼	4,906	3,036

The increase of 290¾ miles to the length of village channels is very satisfactory, as is the continued increase in the number of permanent outlets.

RAINFALL.

77. The following is a statement of rainfall in the vicinity of the Sone Canals for the last five years:—

		Average of 22 Stations.				
		1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1		2	3	4	5	6
		Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season	August ...	14·47	9·11	15·47	7·52	14·81
	September...	6·58	4·09	4·27	10·30	9·50
	October ...	0·99	1·17	0·33	4·42	8·06
	Total ...	22·04	14·37	20·07	22·24	32·37
Rabi season ...	November...	......	......	0·03	0·32	2·08
	December ...	0·01	......	......	......	0·03
	January ...	1·69	0·13	0·61	0·09	0·56
	February ...	0·39	1·03	2·07	0·93	0·61
	Total ...	2·09	1·16	2·71	1·34	3·28
	Whole year ...	52·86	29·12	38·36	47·66	58·22

The Superintending Engineer writes—

"The rainfall in the kharif season was extremely heavy, being more than 50 per cent. in excess of the average of the previous eight years. In the Buxar Division it is believed that the rainfall was the largest on record since the canals were opened."

The "Hathia Naichhatra," *i.e.*, the period between the 25th September and the 8th or 9th October, when in Bihar it is generally considered necessary to water the rice crop, was one of abnormally favourable rainfall in two consecutive years, "a fact which has greatly influenced the area leased under long term leases."

Regarding the rainfall in the rabi season the Superintending Engineer says—

"The copious rainfall in October, together with the heavy rainfall of the rabi season itself—which was more than double the average—so far moistened the soil that irrigation in most cases was entirely unnecessary for the rabi crop."

FLOODS.

78. There was no high flood in the Sone during the year. The highest level at the Dehri weir was practically the same as the highest level in 1893-94, as is shown in the statement below. The R. L. of the crest of the weir is 334·00:—

RIVER SONE.

Locality.	1894-95—18th August 1894.		1893-94—25th September 1893.		Highest known 1876-77—7th July 1876.	
	Above weir.	Below weir.	Above weir	Below weir.	Above weir.	Below weir.
1	2	3	4	5	6	7
	R. L.	R. L.	R. L.	R. L.	R. L.	R. L.
Dehri	338·35	336·70	338·30	336·50	342·10	341·00
Barun	339·50	338·30	340·00	337·70	343·50	342·70

The highest flood readings recorded in this circle for the river Ganges in 1894-95 were—

RIVER GANGES.

Locality.	Date.	Reading.	Highest known since 1875.	
			Date.	Reading.
1	2	3	4	5
		R. L.		R. L.
Buxar	22nd August 1894 ...	199·05	6th August 1875 ...	200·71
Digah	23rd " " ...	167·63	14th " 1879 ..	169 20
Hajipur, confluence of rivers Ganges and Gandak ...	24th " " ...	164·50	14th " " ...	166·20

The Executive Engineer of the Buxar Division remarks that the flood in the Ganges was remarkable for its duration. He states that it was above 197·00 from the 18th to the 28th August.

IRRIGATION. 79. The irrigation for ten years, together with the rainfall over 16 stations actually situated on the canal irrigated area, is shown below:—

Year.	Kharif.	Rabi.	Perennial. hot weather.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1885-86 ...	217,072	87,936	27,562	332,570	44·52
1886-87 ...	177,510	60,639	30,055	268,204	58·84
1887-88 ...	220,428	69,945	25,007	315,380	40·18
1888-89 ...	238,895	100,142	16,872	355,909	45·43
1889-90 ...	230,741	55,613	18,928	305,282	49·65
1890-91 ...	211,726	51,318	17,970	281,014	52·23
1891-92 ...	248,819	210,907	14,997	474,723	26·82
1892-93 ...	274,839	126,195	9,727*	410,761	37·69
1893-94 ...	280,528	66,458	19,790*	366,776	46·62
1894-95 ...	258,361	41,664	17,109*	317,134	59·65

* These figures are for hot weather crops only. Those of the years previous to 1892-93 represent both sugarcane and hot weather-crops.

The total area irrigated was 49,642 acres less than that in the previous year.

80. The following statement gives the areas of each crop irrigated under annual and five-year leases from 1889-90 to 1891-92, and under season and long-term (seven and three-year) leases in 1892-93, 1893-94 and 1894-95 under the new rules:—

IRRIGATION UNDER LEASES (UNDER RULES OLD AND NEW).

CROP.		1889-90.	1890-91.	1891-92.	1892-93.		1893-94.	1894-95.
1		2	3	4	5		6	7
		Acres.	Acres.	Acres.		Acres.	Acres.	Acres.
Kharif ...	Five-year leases...	174,780	189,227	200,716	Long-term leases	235,637	254,515	233,756
	Annual leases ...	41,917	22,499	48,103	Season leases	39,202	26,013	24,605
	Total ...	216,697	211,726	248,819		274,839	280,528	258,361
Rabi ...	Five-year leases...	31,128	20,761	20,274	Long-term leases	36,329	37,231	30,234
	Annual leases ...	20,336	20,632	177,308	Season leases	89,866	29,227	11,430
	Total ...	51,464	41,393	197,582		126,195	66,458	41,664
Sugarcane	Five-year leases...	18,360	13,568	13,801	*			*
	Annual leases ...	5,004	4,402	1,196	*			*
	Total ...	23,364	17,970	14,997	......		...	...
Hot-weather		13,757	9,925	13,325	Season leases	9,727	10,790	17,109
GRAND TOTAL ...		305,282	281,014	474,723		410,761	366,776	317,134
Total five-year leases ...		224,268	223,556	234,791	Total long-term leases	271,966	291,746	263,990
" annual leases ...		81,014	57,458	239,932	" season leases	138,795	75,030	53,144

* Under the new rules for the Sone Canals there are no separate leases for sugarcane. They are included in each season lease as explained above.

The total areas irrigated under each form of lease are abstracted as follows for convenient reference:—

		1892-93.	1893-94.	1894-95.
		Acres.	Acres.	Acres.
Area irrigated under long-term leases	...	271,966	291,746	263,990
" " " season leases	...	129,356	74,292	51,913
" " by sale by volume ...	...	5,732	57	55
" " without permit ...	...	3,707	681	1,176
Total	...	410,761	366,776	317,134

The very large falling off in the rabi irrigation was entirely on account of the heavy rainfall in the rabi season following the abnormal rain fall in October. The Superintending Engineer points out that the area irrigated in the rabi season was the smallest since 1882-83 when only 25,935 acres were irrigated. That year was distinguished by weather conditions similar to those of 1894-95, *i.e.*, there was heavy rain in the rabi season following a very wet October.

Regarding the falling off in the long-term leases the Superintending Engineer writes—

"The area of leases which lapsed on the 31st March 1894 was unusually large. These leases were five-year ones, which had been made in 1889-90: in the two years previous to that one, and notably the year 1888-89, there had been deficient rainfall in the "Hathia:" indeed in 1888-89 there was hardly any rainfall after the 11th of September until the end of the kharif season. These two bad years produced a large demand for long-term lease in 1889-90, which have expired, rather unfortunately in some respects, after a year of remarkably copious rainfall in the critical period of the "Hathia," and the people have declined to renew many of the leases which have expired."

Another cause of the decrease in long-term leases was that care was taken not to grant leases unless the village channels were in good order, and the boundaries of the block suitable.

New rules were introduced in December 1894 to restrict the area irrigated in villages near the canal, which have hitherto monopolized more than 70 per cent. of the available supply of water in the kharif season, in order that villages less favourably situated may obtain water. Leases for more than 50 per cent. of the area of a village will not, under the new rules, be granted, unless the village has been under long lease and seeks its immediate renewal when it expires. When 60 per cent. of a village is under long lease, no "season" lease will be granted. It is, however, being considered whether it would not be advisable, when existing leases expire, to refuse to renew them beyond 50 per cent. of the total area of the village.

It has been decided to enhance the long-term lease rate from Rs. 2 to Rs. 2-8 per acre, and the "season" lease rate from Rs. 3 to Rs. 3-8 per acre. The last of the old five-year leases will expire on the 31st March 1896, and as none of the seven-year leases which were first issued in 1892 will expire till 1899, the year 1897 offers a good opportunity for introducing the revised rates. A notification to this effect was published on the 28th January 1895. It has been ruled that the increased rate for long-term leases will remain unchanged for seven years. Widespread notice of the pending change has been given over all the area commanded by the canals.

DISTRIBUTION BY SUBDIVISIONS.

The areas irrigated in each subdivision are shown below:—

	Acres.	Acres.
Eastern Sone Division—		
Daudnagar subdivision	39,797	
Bikram ditto	41,060	
		80,857
Arrah Division—		
Nasriganj subdivision	31,003	
Koath ditto	46,172	
Ramnagar ditto	49,306	
Ageaon ditto	31,963	
		158,444
Buxar Division—		
Sikroul subdivision	39,991	
Jamrore ditto	26,769	
Basawan ditto	11,073	
		77,833
Total		317,134

LONG-TERM LEASES.

Particulars of the long-term leases are given in the following statement:—

Division.	Leases which lapsed on 31st March 1894.	Leases in force on 1st April 1894.			Leases entered into during 1894-95.		Total area under long-term leases in 1894-95.
		Seven-year leases.	Five-year leases.	Three-year leases.	Seven-year leases.	Three-year leases.	
1	2	3	4	5	6	7	8
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Eastern Sone ...	10,069	26,561	28,022	755	10,264	618	66,220
Arrah	29,329	38,497	52,833	3,823	24,444	1,204	120,801
Buxar	30,818	28,108	17,522	8,045	9,158	...	62,833
Total ...	70,216	93,166	98,377	12,623	43,866	1,822	249,854

The Superintending Engineer writes—

"The area under long-term leases has increased steadily from 1888 up to 1893-94. This increase has now met with a check which will probably continue during 1895-96, for there was again most copious rainfall in October 1894. It must, however, be noticed that there is no check in the Eastern Sone Division, where the increase in long-term leases still continues."

UNAUTHORISED IRRIGATION.

81. The assessments for the unauthorized use of water and for wastage were slightly in excess of those of the previous year. The figures for the last five years are given below:—

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
	Rs.	Rs.	Rs.	Rs.	Rs.
Unauthorized use of water...	2,734	13,861	14,549	4,760	6,910
Wastage of water ...	256	314	105	615	682

Under the rules now in force, irrigation effected without permit in the kharif season cannot be assessed if the water used is drawn from lands which are under lease.

IRRIGATION EACH DIVISI (UNDER T NEW RULES

82. The following statement shows the areas actually irrigated in each Division since the year 1892-93, when the new rules came into force:—

Eastern Sone Division.					Arrah Division.					Buxar Division.					Total for all Divisions.				
Long-term leases.	Season Leases.			Total.	Long-term leases.	Season Leases.			Total.	Long-term leases.	Season Leases.			Total.	Long-term leases.	Season Leases.

DUTY OF WATER.

83. The following table gives the duties obtained during the kharif and rabi seasons on the several canals for the last three years. But the year under review was one of such abundant rainfall that the figures are of little value, and the Superintending Engineer points out that the high duty of 146·22 acres, in the Buxar Division, during the kharif season, really means that a great portion of the area under lease took hardly any water at all.

Kharif.

	1894-95.		1893-94.		1892-93.	
	Acres.	Duty.	Acres.	Duty.	Acres.	Duty.
1	2	3	4	5	6	7

Sone Canals ...	41,664	44·23	66,548	67·33	126,195	79·87

Some interesting observations were recorded during the year by the Executive Engineer of the Arrah Division on the loss of water in distributaries in the kharif season, and on the duty of water in hot-weather irrigation. It was found that the loss per cent. per mile of channel varied from 0·40 to 2·05, though on the Dumraon Branch Canal, when the average discharge was 173 cubic feet per second, the percentage of loss per mile was only 0·18. The experiments on the duty of water in the hot weather, *i.e.*, from the 25th March to the 25th June, showed it to be about a third less than that obtained in the kharif season, *viz.*, from 25th June to 25th October, and the depth of water required nearly six inches against four in the kharif season.

CROP EXPERIMENTS.

84. *Crop experiments.*—The results of the experiments made during the year to determine the yield of rice and wheat crops irrigated from the canals are given in the following tables:—

TABLE I.

Result of experiments on "good" rice crops irrigated with canal water for the year 1894-95.

DIVISION.	Number of experiments.	AVERAGE YIELD PER ACRE WEIGHED DRY. Grain. Maunds.	Grain. Seers.	Straw. Maunds.	Straw. Seers.
1	2	3	4	5	6
Eastern Sone	35	33	28	75	28
Arrah	51	31	30	76	17
Buxar	39	30	21	73	28
Sone Circle average ...	125	31	37	75	14

N.B.—A good crop means a crop decidedly above the average crop in the village in which it was taken.

TABLE II.

Result of experiments on "average" rice crops irrigated with canal water.

DIVISION.	Number of experiments.	Grain. Maunds.	Grain. Seers.	Straw. Maunds.	Straw. Seers.
Eastern Sone	22	25	1	53	10
Arrah	50	24	8	65	9
Buxar	56	23	28	51	32
Sone Circle average ...	128	24	5	57	12

N.B.—An "average" crop means a crop that was considered as an average crop in any village in which an experiment was made.

TABLE III.

Result of experiments on "good" wheat crops irrigated with canal water for the year 1894-95.

Buxar ...	...	20	8	9	12	6
Sone Circle average ...	...	62	8	27	13	38

85. The demands, collections, and balances of water-rates for the last five years are shown below:—

DEM COLL AND C

Year.	Amount outstanding at commencement of year.	Amount falling due for recovery during the year.	Total for recovery.	Cash realisation.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1890-91 ...	2,81,782	6,29,124	9,10,906	6,44,718	21,460	2,44,728
1891-92 ...	2,44,728	6,93,685	9,38,413	8,11,750	15,230	1,11,443
1892-93 ...	1,11,443	9,50,733	10,62,176	9,59,472	14,914	87,790
1893-94 ...	87,790	8,53,161	9,40,951	8,31,261	4,832	1,01,858
1894-95 ...	1,01,858	6,86,905	7,88,763	7,43,863	4,091	40,809

As explained in paragraph 73, the assessments of the year will not correspond with the amount falling due in the year, on account of the rabi irrigation assessments not being legally payable until the 5th April. In other words the amount of assessments for rabi irrigated in one year does not fall due until the following year. This accounts for the difference between the Examiner's figures and those shown in the preceding statement. The Examiner regards

the assessments received during the year as being payable during the year, and his balance outstanding is based on those assessments. But a portion of the amount so shown is not in reality an outstanding balance at all, but is the amount falling due in the following year. Thus the Examiner gives the amount outstanding at the end of the year as Rs. 57,443 instead of Rs. 40,809 as shown above. The amount of Rs. 6,86,905 shown in this statement as falling due during the year, is arrived at as follows:—

	Rs.		Rs.
Examiner's "assessments of the year" ...	......		6,57,054
Add—The assessments of the rabi of 1893-94 which were "received" in that year, but legally due in 1894-95	45,866	Add	29,230
Deduct—The assessments of the rabi of 1894-95 which were "received" in that year, but legally due in 1895-96	16,636		
			6,86,284
Deduct—Certain excess recoveries which are treated as "amounts falling due during the year" (see paragraph 29 of Deputy Collector's Revenue Report)	......		621
Amount falling due during the year	......		6,86,905

ARREARS.

86. In the following statement the Deputy Collector shows the extent to which the arrears as well as current demand have been worked off:—

	Demand of 1894-95 consisting of—	Collected or remitted in 1894-95.	Percentage of demand adjusted.	Unadjusted balance at close of year.
1	2	3	4	5
	Rs.	Rs.		Rs.
Arrears of 1892-93	3,960	3,141	79·3	819
Do. of 1893-94	97,897	89,077	90·9	8,820
Total arrears outstanding on 1st April 1894 ...	1,01,857	92,218	90·5	9,639
Current demand for 1894-95	6,86,905	6,55,737	95·4	31,168
Total ...	7,88,762	7,47,955	94·8	40,807

These figures are highly satisfactory. Not only are the arrears lower than they have ever been before on the Sone Canals, but the percentage of collection is higher than in any previous year.

COLLECTIONS.

87. The following statement gives the collections in each district:—

District.	Demand.			Adjustments.				Balance on 31st March 1895.	Percentage, column 8 on column 4.
	Arrears on 31st March 1894.	Current demand for 1894-95.	Total.	Collection.	Remission made by canal officers.	Written off as irrecoverable.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Shahabad	75,554	5,18,489	5,94,043	5,58,230	1,226	2,464	5,61,920	32,123	94·6
Patna	19,596	77,478	97,074	92,336	30	194	92,560	4,514	95·3
Gaya	6,707	90,938	97,645	93,297	171	7	93,475	4,170	95·7
Total ...	1,01,857	6,86,905	7,88,762	7,43,863	1,427	2,665	7,47,955	40,807	94·8

Besides the collections of Rs. 7,43,863 shown above, a further sum of Rs. 1,828 was credited to water-rate accounts as below:—

	Rs.
Surplus or excess recoveries	(—)620
Process fees in certificate cases	2,432
Miscellaneous	16
Total ...	1,828

88. The sums remitted in 1893-94 and 1894-95 according to the figures given by the Examiner of Accounts, were —

	1893-94.	194-95.
	Rs.	Rs.
By Canal officers	1,606	1,237
By Civil do.	3,226	2,854
Total ...	4,832	4,091

According to the figures supplied by the Superintending Engineer the remissions were—

	1893-94.	1894-95.
	Rs.	Rs.
Written off by Civil officers as irrecoverable ...	3,226	2,665
Remissions granted by Executive Engineers ...	2,180*	2,640
Extraordinary remissions by Superintending Engineers	...	189
Remitted on revised and cancelled khatianis ...	15,251	8,370
	20, 657	13,864

The continued reduction in the amounts written off as irrecoverable is very satisfactory. The Superintending Engineer thinks that the system of embezzling money under the guise of its being irrecoverable, of which a notable case has lately been brought to light, was formerly more common than has been supposed, and that the reduction of fraud brought about by increased vigilance and supervision is largely accountable for the decrease in the amounts shown as irrecoverable.

Of the Rs. 2,640 remitted by Executive Engineers, Rs. 1,403 were in reality refunds on account of amounts which had been recovered by the Deputy Collector before the remission statements had been received by him.

The following table explains the remissions made by Executive Engineers :—

Class.	Causes.	Eastern Sone Division.	Arrah Division.	Buxar Division.	Total 1894-95.	Total 1893-94.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
a	Charged by mistake for land cultivated by others	...	...	...	...	7
b	Excess measurement or errors in calculation	49	131	108	288	449
c	Lift charged as flow	5	3	...	8	43
d	Irrigation not denied, but remitted as not chargeable under the Act ...	...	12	61	73	381

Headmen's fees	28,861	26,550	32,032	26,080	23,86
Total ...	1,45,528	1,52,113	1,59,300	1,49,732	1,46,960
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department.	6,47,839	8,15,858	9,71,202	8,45,177	7,45,691
Percentage	22·3	18·66	16·4	17·7	19·7

* Lambardar's fees and contractor's percentage.

The decreased expenditure is due to the smaller irrigation of the year as compared with that of the previous year, and to the reduced collections.

COST PER ACRE.

90. The total cost of the revenue establishment under each Executive Engineer per acre irrigated, is shown below:—

DIVISION.	1894-95.			1893-94.
	Revenue* establishment.	Area irrigated.	Cost per acre.	Cost per acre.
1	2	3	4	5
	Rs.	Acres.	A. P.	A. P.
Eastern Sone	17,487	80,857	3 5	3 5
Arrah	34,619	158,444	3 6	3 3
Buxar	23,308	77,833	4 9	4 1
Total Sone Canals ...	75,414	317,134	3 9	3 6

* Includes proportion of water regulation establishment employed on the head works.

91. The following statement gives particulars of the disposal of objections to assessments. Claims for ordinary remission are distinguished from other complaints, such as petitions alleging damage from the canals, complaints against individuals, and other miscellaneous claims. The totals are compared with those of the two previous years.

OBJECTIONS TO ASSESSMENTS.

Division.	Claims for Ordinary Remission.				Other Complaints.			Total complaints received during the year, excluding those pending from previous year.	Pending.
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.	Pending.		
		Remission allowed.	Remission refused.						
1	2	3	4	5	6	7	8	9	10
	No.	No.	No.	No.	No.	No.	No.	No.	No.
Eastern Sone ...	314	121	182	11	25	20	5	329	16
Arrah	1,246	319	885	42	30	29	1	1,205	43
Buxar	1,081	426	641	14	69	67	2	1,023	16
Total ...	2,641	866	1,708	67	124	116	8	2,557	75

The Superintending Engineer writes:—

"The large reduction in complaints is probably due to the bumper season: every one was well off and satisfied. About one-third of the claims for remission were admitted to be good: this is the same proportion as in previous years. Out of the 2,690 cases dealt with during the year, there were 27 only in which the complainants appealed to the Collector of the district against the orders of the Canal officer: about one-third of the appeals were allowed and two-thirds were rejected."

92. The following statement shows the number of appeals to the Collectors of districts against Executive Engineers' decisions, and how they were disposed:—

APPEALS.

Division.	Number of Appeals—		Appeals allowed.	Appeals discharged.	Pending.
	Pending from last year.	Instituted during the year.

TRANSPORT SERVICE.

96. The contract for the transport service was again given to Messrs. Radford & Co., the rates being increased to Rs. 750 per month for the hire of steamers and Rs. 1,250 for compounded tollage. The corresponding amounts of the former contract were Rs. 600 and Rs. 500, respectively. The ordinary repairs of the steamers, which belong to Government, are executed by the lessees. The following table shows the extent of the steamer traffic:—

Particulars.			Patna Canal.	Arrah Canal	Buxar Canal.	Total.	Total for 1893-94.
1			2	3	4	5	6
Passengers carried	Up ...	No.	4,848	12,742	7,924	25,514	26,229
	Down	"	4,617	12,966	7,983	25,566	25,926

	Down ...	"	955	558	533	2,049	2,114

On the Patna Canal the steamer makes one trip in a week each way. On the Arrah and Buxar Canals there is a service twice a week. Rs. 7,800 was realized during the year for the hire of steamers, and Rs. 1,750 for the hire of accommodation boats and mud punts. The four cargo boats belonging to Government which used to contribute to these receipts were sold in 1893.

MISCELLANEOUS RECEIPTS.

97. The details of the miscellaneous receipts for the last five years are given below:—

Particulars.		1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1		2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.	Rs.
Sale of water ...	...	393	1,056	805	730	867

MAINTENANCE CHARGES AND REPAIRS.

98. The expenditure on maintenance and repairs by main sub-heads for the last four years is shown below.—

PARTICULARS.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Head works ...	20,922	22,374	27,297	29,618
Main canal, including branches	1,75,837	2,00,130*	1,89,160	1,48,428
Distributaries	58,248	55,918	46,457	37,802
Drainage and protective works ...	3,622	2,157	3,014	4,379
Cost of working transport service	1,155	...	...	...
Compensation	28	...	...	...
Total ...	2,59,832	2,80,579	2,65,928	2,20,227

* Includes Rs. 600 for the Arrah-Dehri Telegraph line, and Rs. 4,491 on account of theft money in the Revenue Division and of money embezzled in the Patna district.

REPAIRS TO HEAD WORKS.

99. The cost of repairs to head works during the last four years were:—

	1891-92.	1892-93.	1893-94.	1894-95.
	Rs.	Rs.	Rs.	Rs.
Weir on Sone River	11,617	14,058	18,262	22,426
Other works	8,773	7,577	8,301	5,696
Total ...	20,390	21,635	26,563	28,122

The expenditure on the Sone weir was largely increased by the repairs to the apron of the Barun under-sluices, which the large holes scoured out below floor level made imperative.

MAINTENANCE OF MAIN CANALS AND DISTRIBUTARIES.

100. The following table details the expenditure on maintenance and repairs in each division for the last three years:—

	ARRAH DIVISION.			BUXAR DIVISION.			EASTERN SONE DIVISION.			TOTAL.		
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	189[illegible]

*Includes cost of maintaining the Telegraph line from Arrah to Dehri.

The Superintending Engineer is to be congratulated on the success which has attended his efforts to effect economy in the maintenance of the Sone Canals. The total expenditure shows a decrease of Rs. 43,587 as compared with the figures of 1893-94, and Rs. 62,351 compared with those of 1892-93.

101. The following table gives particulars of dredging during the year, compared with the results of the two previous years:—

Canals.	1892-93.			1893-94.			1894-95.		
	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost, including removal over spoil bank, or discharge into river.	Rate per 1,000 cubic feet.

Total ...	12,068,714	58,966	4 8 4	8,795,039	46,118	5 3 10	8,043,015	32,990	4 1 7

The Superintending Engineer gives the following explanation of the decrease in the amount dredged from the Eastern Main and Patna Canals:—

"The decrease in the quantity of dredging was partly due to a small decrease in deposit, but mainly to the fact that it was decided not to dredge as much silt as usual from the head of the canal, but to reduce the bed width of the canal to 100 feet in the first ⅝th mile, where it is 160 feet base nominally. The dredging at the head of the canal was stopped on the 28th October, a much earlier date than usual."

There was a large increase in the amount dredged from the bed of the Sone river in order to keep a channel open from Dehri to Barun. It is due to the river silting up more and more every year. Surveys are now being made with the object of finding a channel, not direct across, which may be opened out at a cheaper cost.

In the Arrah division, the amount dredged from the lock channels was only 99,345 cubic feet, at a cost of Rs. 483, against 561,402 cubic feet, costing Rs. 2,625 in the previous year. The reduction was effected by cutting the channels to the smallest width sufficient for the traffic and not to the full width as in previous years. From the Buxar Canal, 452,758 cubic feet were excavated.

The rates given above include the cost of lifting the silt into barges and of carrying it either over the spoil banks or into the river.

102. The cost of lifting the silt on to the barges, or dredging proper was as shown below.—

	1892-93.			1893-94.			1894-95.		
	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.
1	2	3	4	5	6	7	8	9	10

					Net decrease ...		...	...	...	5,955

The decrease is explained as due to the destruction of seedlings from various causes.

The receipts and expenditure of the year were as under:—

Division.	Receipts.	Expenditure.
1	2	3
	Rs.	Rs.
Eastern Sone ...	585	445
Arrah ...	249	1,905
Dehri Workshops ..	845	2,400
Buxar ...	41	2,156
Total ...	1,720	6,906

MILLS. 109. A sum of Rs. 1,715 was realized during the year for the leasing of mills, the expenditure on their up-keep being Rs. 182.

Maulvi Syed Mahamed Nasiruddin was in charge of the Revenue Division during the year and did excellent work.

CALCUTTA AND EASTERN CANALS.

CAPITAL ACCOUNT. 110. The Capital and Revenue Accounts of these canals are given below:—

I.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1894-95.	Outlay to end of 1894-95.
1	2	3
	Rs.	Rs.

Under extensions and improvements a few useful works including a masonry latrine, a landing ghat, and a small masonry building for the Chitpur durwan, were undertaken, at an aggregate cost of Rs. 1,275. Under this head also was charged the cost of a survey amounting to Rs. 491, of the Bhangore khal which was necessary for the preparation of the estimates and plans for its canalization.

The percentage of the net revenue on the capital outlay is shown below for ten years:—

Year.	Capital outlay (direct and indirect)—		Receipts and Working Expenses.			Percentage of net revenue to capital outlay to end of year.
	During the year.	To end of the year.	Gross revenue.	Charges (direct and indirect).	Net revenue.	
1	2	3	4	5	6	7

1894-95	1,076	53,58,522	4,43,003	2,89,267	1,53,736	2·8

(a) Is Rs. 35,185 smaller than it should be by reason of error of account.

The actual realizations of the year were Rs. 22,462 in excess of those of 1893-94, while the increase in the working expenses was only Rs. 2,138. The improvement, though not great, may, on the whole, be considered satisfactory. The supervisor of the canals, Mr. Cooksey, regards with disfavour the increase in the number of steamers and flats using the Circular Canal. The number which entered it during the year was 221 against only 45 in 1893-94. The Superintending Engineer states that the new measurement rules are undoubtedly favourable to flats. He writes:—

"Under existing rules, native boats pay tollage on the maundage carried; whereas, flats pay approximately on 65 maunds for every hundred maunds of cargo. As the number of flats is steadily increasing, it now becomes a question if a rule should not be at once introduced so as to ensure flats paying, like country boats, on the actual weight of cargo on board."

112. There was no change in the lengths of the canals open for navigation. They are as follows:—

			Miles.
Calcutta and new canals		...	10
Tolly's Nala with 20 miles of Kaorapookhar khal ...		...	37
Total Calcutta Canals		...	47
Eastern Canals	Inner boat route	189	316
	Outer ditto	127	
Steamer route		...	350
Total Calcutta and Eastern Canals		...	713

NAVIGATION.

113. The statement below shows the collections made during the year by the Collector and Supervisor of the Canals and by the Executive Engineer, respectively:—

Canals.	Number of boats and rafts.	Collections by Collector and Supervisor.						Collections by Executive Engineer.	Grand Total, gross revenue.
		Tolls from boats and rafts.	Demurrage.	Ferry tolls.	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts.	Total.	Rents of buildings, lands, and other miscellaneous receipts.	
1	2	3	4	5	6	7	8	9	10
	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern Canals.	71,126	3,06,237	5,106	3,776	5,495	6,566	3,27,180	} 7,858	4,20,824
Tolly's Nala ...	74,338	83,252	1,277	1,055	...	202	85,786		
Total 1894-95 ...	145,273	4,12,738	5,594	4,145	6,925	0,295	4,35,697	7,760	4,43,457
Total 1893-94 ...	145,511	3,89,489	6,383	4,831	5,495	6,768	4,12,966	7,858	4,20,824

The tolls from boats and rafts, which constitute the chief source of revenue from these canals, amounted during the year to Rs. 4,12,738 against Rs. 3,89,489 of the previous year. This increase was due in a great measure to the large rice and jute crops in Eastern Bengal, which stimulated the traffic in these products. There was also a very substantial increase in the coal traffic, while in salt, though there was an increase in the tonnage, the tollage, was Rs. 1,503 less than last year. This was due to the larger use of flats which as stated in paragraph 111 pay tolls on only ⅔rds of their actual cargo, and also to a larger quantity being sent in to the canal and there unloaded, for which a reduced rate is charged.

In kerosine oil there was a large decrease, chiefly due to the diversion of the traffic to the Eastern Bengal Railway. The Superintending Engineer considers that a great portion of the jute traffic also, which was formerly borne by the canal, has been diverted to the Railway.

TRAFFIC.

114. The following table classifies the boats which used the canals during the last two years:—

Year.	Canal.	Number and Class of Boats—					
		Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
1	2	3	4	5	6	7	8
1893-94	Calcutta and Eastern Canals.	40,003	23,480	6,778	775	26	71,063
	Tolly's Nala	23,068	12,657	855	2	...	36,582
	Total 1893-94 ...	63,071	36,137	7,633	777	26	1,07,644
1894-95	Calcutta and Eastern Canals.	41,469	27,278	3,494	184	37	72,462
	Tolly's Nala	24.087	12,551	136	...	...	36,774
	Total 1894-95 ...	65,556	39,829	3,630	184	37	109,236

In the total number of boats which entered the canals during the year, there was an increase of 1,592. No comparison can be made of the numbers of boats of different classes in the two years, owing to the change in the system of measurement. In 1893-94 some boats were measured under the old, some under the new, system.

There was a decrease in the number of small boats which entered Tolly's Nala from Koarapookhar and paid tolls at Russa, from Rs. 37,749 in 1893-94 to Rs. 35,965 in 1894-95. Including these boats the total number was 145,201 against 145,393 in the previous year.

The tonnage of boats as determined by canal measurement, and the estimated weight and value of the cargo* are shown in the comparative statement below:—

Year.	Canal.	Number of boats, excluding rafts.*	Tonnage of boats by canal measurement.	Weight of cargo in tons.	Value of cargo.	Tollage, including demurrage.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7	8
		No.	Tons.	Tons.	Rs.	Rs.	Rs.
1893-94 ..	Circular Canal	71,062	851,462	534,913	4,52,26,749	3,16,794	
	Tolly's Nala ...	74,331	339,261	187,493	1,26,50,485	84,288	
	Total 1893-94 ...	145,393	1,190,723	722,406	5,78,77,234	4,01,082	0·69
1894-95 ...	Circular Canal	72,462	768,964	560,601	4,69,91,110	3,31,531	
	Tolly's Nala ...	72,739	256,777	199,251	1,40,13,278	93,490	
	Total 1894-95 ...	145,201	1,025,741	759,852	6,10,04,388	4,25,021	0·69

* Includes passenger and empty boats.

The decrease of tonnage is only apparent and is due to the new system of measurement introduced in 1893-94.

The increase in the weight and value of the cargo is attributed to the increase in the rice and jute traffic.

MISSING TICKETS.

115. The number of missing tickets in each of the last ten years is shown below:—

Year.	No.	Year.	No.
1885-86	653	1890-91	212
1886-87	542	1891-92	210
1887-88	677	1892-93	169
1888-89	329	1893-94	252
1889-90	238	1894-95	170

The reduction from 252 in the previous year to 170 during the year under review is satisfactory.

REVENUE ESTABLISHMENT.

116. The following statement compares the cost of the revenue establishment for each of the last five years:—

Particulars.	1890-91.	1891-92	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Supervisor ...	11,475	11,863	10,529	9,780	9,946
Salary of Canal Inspectors ...	5,172	5,016	5,013	4,545	4,882
Supervisor's office establishment ...	5,155	5,424	6,076	6,879	6,931
Canal police	2,061	2,049	2,059	2,058	2,067
Supervisor's steam-launch establishment ...	98	...	...	...	...
Inspector's boat establishment	1,049	1,036	696	691	685
Dhappa water-boat establishment ...	168	168	166	168	168
Dafadars	271	480	828	747	828
Travelling allowance	22	71	71	118	42
Contingencies	1,261	3,125	2,106	1,877	1,624
Toll-collecting establishment	11,478†	12,127†	12,391	12,486†	12,232†
Total cost of establishment ...	38,210	41,359	39,935	39,344	39,405

† Includes salaries of darogas, clerks, cashiers, kootnavises, koyals, toll poons, and dinghi crews.

117. The miscellaneous receipts during the year amounted to Rs. 12,688 against Rs. 13,129 in 1893-94, showing a small decrease of Rs. 441. MISCELLANEOUS RECEIPTS.

118. The expenditure under this head was Rs. 1,766 against Rs. 53 in the previous year. EXTENSIONS AND IMPROVEMENTS.

119. The statement below shows the distribution of the maintenance charges under the several sub-heads as compared with the previous year:— MAINTENANCE AND REPAIRS.

CANALS.	Locks.	Masonry bridge.	Roads.	Buildings.	Plantations.	Dredging.	Channel and banks.	Towpaths.	Rustic bridges.	Steam-launches.	Miscellaneous.	Drainage.	TOTAL.
1	2	3	4	5	6	7	8	9	10	11	12	13	14

Total, 1894-95 ...	3,081	5,955	16,483	4,529	1,062	28,522	37,367	16,947	23,213	3,627	23,978	82	1,64,876
Total, 1893-94 ...	3,452	7,500	16,405	8,173	1,195	21,569	37,995	22,055	21,111	3,896	21,430	162	1,64 948

The increased expenditure on dredging was chiefly owing to two of the dredgers being worked during the whole year instead of for nine months only as in the previous year.

The variations under the other sub-heads are not such as to call for special comment.

120. The work done by the dredgers and the cost, including that of delivering the mud, are shown below:— DREDGING AND SILT CLEARANCE.

	Quantity dredged.	Cost.	Rate per 1,000 cubic feet.
1	2	3	4
	C. feet.	Rs.	Rs. A. P.
Steam dredger, *Victoria* ...	812,400	7,970	9 12 11½
Fouracres' dredger ...	645,600	5,821	9 0 3
Marchant's hand dredger ...	339,000	3,825	11 4 6
Hydraulic dredger, *Clinker* ...	1,463,670	10,902	7 7 2

The actual rates of dredging, excluding the cost of delivering the mud, the cost of repairs, and the interest on original cost of dredging plant, were as follows:—

	Rs. A. P.	
Steam dredger, *Victoria*	4 5 6	Per 1,000 cubic feet.
Fouracres' dredger	3 6 10	
Marchant's hand dredger	0 11 5	
Hydraulic dredger, *Clinker*	2 15 6	

The *Victoria* only worked for 139 days, the Fouracres' dredger for 254 days, the Marchant's dredger for 242 days and the *Clinker* for 229 days.

The *Victoria*, Fouracres and *Clinker* are all steam dredgers.

PLANTATIONS.

121. The state of the plantation for the last two years is shown below:—

Year.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1893-94 ...	2,496	1,977	720	5,193
1894-95 ...	2,986	1,684	601	5,271

The cost incurred during the year was Rs. 1,062 against Rs. 1,195 in 1893-94.

STEAMER ROUTE.

122. The expenditure on the steamer route and the receipts from steamers and flats using it are shown below for each of the last ten years:—

Years.	Receipts.	Expenditure— On capital account.	On revenue account.	Total.	Net revenue.	Remarks.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
1885-86 ...	5,230	15,096	1,629	16,725	(—)1,495	
1886-87 ...	4,365	......	1,627	1,627	2,738	
1887-88 ...	4,445	......	1,864	1,864	2,581	
1888-89 ...	4,670	......	5,352	5,352	(—)682	
1889-90 ...	4,640	......	2,094	2,094	2,546	
1890-91 ...	5,425	......	2,268	2,268	3,157	
1891-92 ...	4,640	......	1,920	1,920	2,720	
1892-93 ...	4,955	28,964	2,094	31,058	(—)26,103	
1893-94 ...	5,495	627	2,094	2,721	2,774	
1894-95 ...	6,925	754	2,094	2,848	4,077	
Total ...	50,790	45,441	23,036	68,477	(—)17,687	

The increase in the receipts amounted to Rs. 1,430 over those of last year, and as the expenditure was practically the same, the increase in the net revenue was Rs. 1,303.

ORISSA COAST CANAL.

123. The Capital and Revenue Accounts of this canal are given below:—

CAPITAL ACCOUNT.

1.—CAPITAL ACCOUNT.

Heads of account.	Outlay during 1894-95.	Outlay to end of 1894-95.
1	2	3
	Rs.	Rs.
Direct charges	46,942	43,35,817
Less—Receipts on capital account	...	3,293
Total direct charges ...	46,942	43,32,524
Indirect charges	634	1,04,989

The canal, which, including 4½ miles of river crossing, is 102 miles long from end to end, was open for navigation throughout the year.

There was an expenditure of Rs. 19,684 under capital account during the year on the works detailed below:—

		Rs.
(a)	Building a new inspection bungalow at Charbatia ...	1,619
(b)	Ditto ditto at Bhaitghur ...	2,602
(c)	Remodelling flood escapes on Ranges IVA and V ...	7,744
(d)	Making a new escape in the 109th mile of Range V and closing an old one at Jamka in the 108th mile ...	6,042
	Completing the dock and two tanks at Panchpali ...	360
	Dredging some of the unexcavated portions of Ranges IVA and V	1,317
	Total ...	19,684

The Superintending Engineer writes:—

"The construction of the inpection bungalows at Charbatia and Bhaitghur was nearly completed when the year expired. A commencement was made with the revetted escapes at Jamka, Panchpali, Gumai, and Atilabad, consisting of brick blocks laid at certain levels with stone pitching between them one foot deep.

The new escape in the 109th mile of Range V was completed in place of the one closed in the 108th mile at Jamka. The remodelling of the Jamka sluice was taken in hand, but not completed."

2.—REVENUE ACCOUNT—(Actuals.)

REVENUE ACCOUNT.

Particulars.	Expenditure— During 1893-94.	Expenditure— During 1894-95.	Particulars.	Receipts— During 1893-94.	Receipts— During 1894-95.
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.

			Total ...	97,710	66,031
Total direct charges ...	94,132	83,346			
			Less—Refunds of revenue ...	1,143	91
Indirect charges ...	4,001	3,725			
Total working expenses	98,133	87,071			
Net revenue ...	(—)1,566	(—)21,131			
Total ...	96,567	65,940	Net total receipts	96,567	65,940

NOTE.—The details by heads of expenditure for the year 1893-94 and nine preceding years will be found in the table given in paragraph 124 following.

The receipts were less by Rs. 30,627 than those of 1893-94, which were exceptionally large owing to the abnormal pilgrim traffic, but were about the average of ordinary years. The net result was a loss of Rs. 21,131.

FINANCIAL RESULTS.

124. The receipts on Revenue account and working expenses of the canal for the last ten years are shown in the following statement:—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	189

The reduction in the maintenance expenditure from the figures of the previous year amounted to Rs. 10,655. On works alone the rate was Rs. 541 per mile as compared with Rs. 613 per mile in 1893-94. The repairs of the sluices damaged by the cyclone of May 1893 formed no inconsiderable item in he expenditure, the Jamka outlet sluice in particular having been very roughly treated. The other important works executed under repairs were the opening of a channel from the Bhograi lock to the Subarnrekha, owing to the deterioration of the Guchida river; the repairs to several escapes; silt clearing from the outfall channel of the Kansbans sluice; and the revetment of the eroded left bank of the Burrabullong river close to the Nulcool lock.

NAVIGATION.

125. An important change in the tollage assessments was made during the year by the introduction, on the 1st January 1894, of through tickets at reduced rates from various toll stations on the Coast Canal to Gewankhali. The rate from Balasore to Gewankhali was reduced from 86 to 66 annas, and on Range V also the rate was reduced from 38 to 28 annas. The object aimed at was to induce boats to use the Hijili Tidal Canal instead of going round by sea to the Hooghly, and also to stimulate traffic on Range V. Notwithstanding this concession, the Executive Engineer reports that "boats still prefer to use the Rasalpur and Haldi rivers when weather permits," and that 8,610 boats adopted this route, rather than pay the tollage on the Tidal Canal. The Superintending Engineer believes this must be chiefly local traffic from the river marts, and suggests, as worthy of consideration, the reduction of the tollage on the Hijili Canal during the cold weather months.

To estimate the effect of the reduced rates, a comparison with the returns of 1892-93 should be made rather than with those of 1893-94 when, as stated in paragraph 123, the traffic was abnormal. The following is an abstract from the returns of the two years:—

Year.			Tonnage.	Tollage.
				Rs.
1892-93	...	11,334 boats 851 steamers	100,807	37,406 from boats. 18,372 from steamers.
1894-95	...	15,477 boats 863 steamers	151,412	44,342 from boats. 18,297 from steamers.

Though the reduced tolls applied to the steamers, they actually pay 7½ per cent. higher rates than they did in 1892-93, owing to the reduction in the allowance made for engine space from ½ to ⅓rd. Consequently, the decrease in their tollage shown in the table above, must have been due to lighter loads, as their number increased from 851 in 1892-93 to 863 in 1894-95. The increase in the tonnage of boats was was 50 per cent., which was probably due as much to the good rice crop as to the reduction in the tollage. Regarding the effect of the reduction of rates on Range V, the Superintending Engineer writes:—

"It is satisfactory to note an increase of tollage on Range V, notwithstanding the reduced rate. Rice is now being boated down this part of the canal from Balasore for shipment at Chandbali."

TRAFFIC.

126. The following table compares the traffic of the year with that in 1893 94:—

CANAL.	Number of boats.		Tonnage of boats.		Value of cargo, including rafts.		Tolls.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
1	2	3	4	5	6	7	8	9
	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Orissa Coast Canal	11,823	10,771	141,826	127,662	37,45,657	31,27,901	95,238	64,024

MISCELLANEOUS RECEIPTS.

127. The miscellaneous receipts during the last five years are shown below:—

1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
Rs.	Rs.	Rs.	Rs.	Rs.
1,410	2,072	9,149	2,477	1,937

DREDGING AND SILT CLEARANCE.

128. The amount of dredging done during the year was less than usual. The following table gives the results of the working for the last two years:—

Year.	Names of dredgers.	Quantity dredged.	Cost of—			Rate per 1,000 C. ft.		
			Lifting by dredger.	Removing by mud-punts.	Total.	Lifting.	Removing.	Total.
1	2	3	4	5	6	7	8	9
						Rs. A. P.	Rs. A. P.	Rs. A. P.
1893-94	*Marchant* with 8 mud-punts.	186,110	645	691	1,336	3 7 4	3 11 4	7 2 8
	Comus with 10 mud-punts.	149,710	1,273	579	1,852	8 8 0	3 12 9	12 4 9
	Total ..	335,820	1,918	1,270	3,188	5 11 3	3 12 9	9 8 0
1894-95	*Marchant* with 6 mud-punts.	126,420	654	415	1,069	5 1 7	3 4 9	8 6 4
	Comus with 2 mud-punts.	156,102	1,351	710	2,061	8 10 5	4 8 9	13 3 2
	Total ...	282,522	2,005	1,125	3,130	6 14 0	3 14 9	10 12 9

PLANTATIONS.

129. The state of the plantations for the last two years is shown in the following statement:—

Year.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1893-94 ...	825	1,082	5,873	7,780
1894-95 ...	1,454	4,627	4,602	10,683

FLOODS.

130. The highest flood levels recorded on the various rivers crossed by the Orissa Coast Canal, are shown in the following table:—

Name of River.	Locality.	1894-95.		1893-94.		Highest on record.		Remarks.
		Date.	Reading.	Date.	Reading.	Date.	Reading.	
1	2	3	4	5	6	7	8	9
Subarnarekha	Bhograi ...	27th July 1894 ...	116·60	29th June 1893	117·20	June 1863* ...	121·5	* Without date on plan (Mr. Vertannes).
Panchpara ...	Panchpara ...	25th " " ...	115·50	14th September "	118·50	Not known ...	118·00	
Burrabullong	Nalcul ...	29th " " ...	116·70	12th " "	115·50	22nd September 1885.	118·90	
Matai ...	Charbatia ...	29th " " ...	113·6	26th May "	113·50	Not known ...	116·05	

All the rivers were in high flood in July 1894, but no damage worth recording was done.

The highest levels in the various ranges were as follows:—

Range III	...	...	=113·10	on 29th	July 1894.
" IVA	...	...	=115·50	on 25th	ditto.
" IVB	...	...	=115·80	on 26th	ditto.
" V	...	...	=113·60	on 29th	ditto.

SARAN CANALS.

CAPITAL ACCOUNT.

131. The Capital Account of these canals has been closed. The Revenue Account is given below:—

LENGTH OF CANALS OPEN AND AREAS COMMANDED AND IRRIGATED.

133. There was no change in the lengths of the canals, which are given in the following table:—

NAME OF CANAL.	1894-95. Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	1893-94. Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

IV.—Gandaki		6·57								6·57						
In addition to the above, the following are maintained:-																
I.—Thakraha Sota		1·50	.	...	...		...	..	...	1·50	...	...	..	...	...	...
II.—Roopan Chap Sota		27·00		...	...	.	...	...	...	27·00	..	...	...	...	...	...

These canals were closed on the 31st March 1894, by the construction of dams across the mouths of the feeders. The 38 miles of distributaries in the Moniara and Sadowa estates are the property of the proprietors of those concerns. No other distributaries exist. Two dams, constructed ten years ago by the Manager of Moniara, across the Daha, for irrigation purposes, were cut during the year to allow the drainage of the head cut to pass down the canal.

RAINFALL.

134. The average rainfall on the area under command is shown by seasons in the table below for the last five years:—

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95
	Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season* ...	24·60	11·52	27·70	24·96	28·55
Rabi	1·43	0 61	2·29	1·08	2·62
Year	58·63	35·05	49·19	49·95	51·28

* August, September and October.

The Superintending Engineer writes:—

"The rainfall was very general over the whole district and was even more favourable than the previous year; light and seasonable rain fell during the hot-weather months. The rainfall during the rains, especially in September and October, was abundant, so that even if the canals had been opened, there would have been no demand for irrigation. Both the indigo and rice crops gave better outturns than the average."

FLOODS.

135. The floods which occurred during the year were not very high, but one which came down the Gunduk on the 27th June 1894 caused a good deal of damage to indigo and other crops on the Dearas.

IRRIGATION.

136. As the canals were closed, there was no irrigation during the year.

ASSESSMENTS, COLLECTIONS AND BALANCES.

137. The agreement with the proprietors of the Moniara and Sadowa concerns, which expired on the 31st March 1894, was not renewed. It was decided to make a radical change in the system of working the canals, and rules were accordingly published in the *Calcutta Gazette*, laying down the conditions under which water would be admitted to them. The most important of these is that payment of the charge levied for the supply of water to any canal must accompany any application for the opening of its head sluice. The amounts fixed for each canal are as follows:—

		Rs.
No. III.—The Daha	.. ...	10,000
„ IV.— „ Gandaki	.. ...	5,500
„ V.— „ Dhanai	... ...	6,500
„ VI.— „ Gangri	... ...	8,000
Total	...	30,000

As no one applied during the year to have any sluice opened, the canals remained closed throughout the year.

When the agreement with the proprietors of Moniara and Sadowa terminated on the 30th March 1894, there were two outstanding revenue accounts—

(i) The account with the old guarantors whose agreement expired on the 31st March 1891.

The discrepancies which existed between the Collector's account and that kept by the Executive Engineer, were carefully investigated during the year by the Executive Engineer and the Collector, and the following is the amended account up to the 31st March 1895:—

Serial number.	Guaranteeing Factory.	By Treasury Account Balance on 1st April 1891.		Collected from April 1st 1891 to 31st March 1894.	Balance on 31st March 1894. 	Total ...	7,408 12 8	3,167 10 8	5,720 1 5	2,059 8 5	3,538 7 5	5,301 8 5	296 7 5	

(ii) The account with the proprietors of the Moniara and Sadowa concerns for three years from the 1st April 1891 to the 31st March 1894.

At the beginning of the year there was still an outstanding balance of Rs. 4,382 which, by the terms of the agreement, should have been paid to Government by the proprietors on or before the 31st March 1894. But there was a sum of Rs. 5,267 outstanding for irrigation done outside the proprietors' dehats, which, if it had been recovered, would have been payable to them. A compromise was therefore effected. A sum of Rs. 3,724, which represented the total of all demands over Rs. 2 of these assessments, was credited to the proprietors' accounts, and the balance Rs. 1,648, was remitted to the cultivators. There then only remained a sum of Rs. 672 to be paid to Government by the proprietors. The amount was paid, and the account closed.

MAINTENANCE AND REPAIRS.

138. The expenditure on maintenance during the past five years is shown below:—

	Miles.	1890-91.	1891-92	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
Repairs to head out and river protective works ..	6·34	7,445	4,304	1,841	1,766	432

Refund of revenue ...	...	...	...	...	530	3,182
GRAND TOTAL ...	...	37,403	12,538	13,502	6,492	4,661

DREDGING AND SILT CLEARANCE.

The principal item in the expenditure of 1894-95 was the construction of the dams to close the mouths of the feeders. There was no silt clearance during the year.

PLANTATIONS.

139. The state of the plantations for the last two years is shown below:—

YEAR.			Trees over 12 feet.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	TOTAL.
1			2	3	4	5
			No.	No.	No.	No.
1893-94	...	...	5,276	6,117	6,041	17,434
1894-95	...	...	8,436	4,588	4,935	17,959

The expenditure on plantations was Rs. 50 against Rs. 73 in preceding year.

MISCELLANEOUS.

The only revenue derived from the canals during the year was Rs. 422 which was realized on account of the grass and fisheries which were sold for Rs. 755.

NADIA RIVERS.

REVENUE ACCOUNT.

140. There was no appreciable change in the lengths of the channels in the Nadia rivers system, which, as recorded last year, aggregate 477 miles approximately. No capital account of expenditure is kept. The Revenue account for the last two years is given below:—

PARTICULARS.	EXPENDITURE—		PARTICULARS.	RECEIPTS—

The decrease in the receipts, amounting to Rs. 29,553, was due to the Jalangi river being unnavigable for large boats during a considerable portion of the year. There can be no doubt that these rivers are gradually deteriorating, and the difficulties and cost of keeping them open for navigation are increasing every year. It is true there was some improvement in the state of the Bhagirathi, but the depth of water was not sufficient to allow large boats to ply on it, and the usual route by the Jalangi was entirely closed to them. The average receipts of late years have appreciably diminished, and the fast declining revenue has almost disappeared. The Executive Engineer seems hopeful, however, of an improvement next year, and the Superintending Engineer writes that "it is quite possible, with good entrances, and a plentiful supply in the Ganges, for the shoals to be so improved as to greatly reduce the cost of maintenance. It is to be hoped that from 1895-96 a new period of prosperity will begin for these rivers."

142. No rainfall register is kept up for these rivers. RAINFALL. FLOODS.

The gauge readings at Gheria and Berhampore for the last six years are given below:—

		GHERIA.		BERHAMPORE.
1889	...	34·00	...	30′4½″
1890	...	34·70	...	30′11¾″
1891	...	29·30	...	26′7″
1892	...	31·55	...	29′1¼″
1893	...	30·75	...	27′11½″
1894	...	32 75	...	30′3½″

The highest flood levels of 1894-95 are compared below with the highest levels in the previous year and with the highest levels on record. The readings given are the heights above mean sea level :—

River.	Locality.	1894-95.		1893-94.		Highest known.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8
Bhagirathi ...	Berhampore	29th Aug. 1894	64·04	20th Aug. 1893	61·70	14th Aug. 1890	64·71
Jalangi ...	Sarupganj	6th Sept. "	39·41	20th Sept. "	27·42	28th " "	34·83
Mathabhanga ...	Hanskhali	27th Dec. "	24·96	1st Oct. "	23·75	3rd Sept. "	39·93

The Bhagirathi river rose to within 8¼ inches of the highest recorded level. The embankment at Laltakuri was seriously threatened, but happily the danger was successfully averted.

143. The several classes of boats which plied on the rivers and the tolls collected from them are tabulated below :—

Name of River.	Number and class of boats.						Collections by Toll Collectors.					
	Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.	Tolls from boats.	Tolls from rafts.	Tolls from steamers and flats.	Total tolls.	Miscellaneous receipts.	Total collections.

Total, 1893-94 ...	57,118	789,852	322,492	3,96,34,759	1,71,166	0·43

* Tolls from boats, steamers, flats and rafts.

STEAMER SERVICE.

145. No transport service is maintained by Government on these rivers. The steamer service kept up by the several companies are shown in the statement below:—

NATURE OF SERVICE.	TERMINAL STATIONS— From—	To—	Outward and inward.	PERIOD.
1	2	3	4	5
	Calcutta Steam Navigation Company.			
Weekly ...	Calcutta ...	Jangipur ...	Both ...	From 1st July to 23rd December 1894.
Twice a week ...	Kalna ...	Katwa and Juaganj.	Do. ...	Throughout the year.
Ditto ...	Azimganj ...	Dhulian ...	Do. ...	21st September to 3rd November 1894.
Twice daily ...	Berhampore	Azimganj ...	Do. ...	June 1894 to 31st March 1895.
	East Indian Railway Company.			
Twice a week ...	Azimganj ...	Dhulian ...	Both ...	9th July to 19th December 1894.
Daily ...	Berhampore	Azimganj ...	Do. ...	19th February to 10th March 1895.

REVENUE ESTABLISHMENT.

146. The cost of the revenue establishment for the last five years is shown below:—

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Collectors	13,224	13,210	2,391	12,644	14,807
Accounts and office establishment	9,223	8,942	18,879	8,901	8,494
Travelling allowance ...	711	530	601	525	766
Contingencies	472	452	411	947	395
Total ...	23,630	23,134	22,282	23,017	24,462

There was an increase of Rs. 1,445 during the year due mainly to the higher pay and allowances drawn by the Officiating Toll Collector, Mr. Street (now Honorary Assistant Engineer).

MAINTENANCE AND REPAIRS.

147. The charges for maintenance and repairs (exclusive of establisment and tools and plants) for the last three years are detailed below:—

PARTICULARS.	1892-93.	1893-94.	1894-95.
1	2	3	4
	Rs.	Rs.	Rs.
Re-opening lower entrance channel, Bhagirathi river	...	546	...
Training works in river Bhagirathi ...	46,518	51,481	41,642
" " Bhyrub ...	3,174	4,318	3,989
" " Jalangi ...	3,287	6,430	7,034
" " Mathabhanga ...	3,062	2,060	2,717
Sounding Nadia rivers	6,161	6,500	6,535
Maintaining and working divisional boats ...	2,698	2,635	2,493
Petty and other charges	3,863	3,394	4,178
Total ...	68,763	77,436	68,588

The total expenditure was Rs. 8,776 less than that of the previous year, and is explained by the Superintending Engineer as follows:—

"The decrease was due to every endeavour having been made to keep down the expenditure on training works to the lowest possible figures, as also to the favourable condition of the Bhagirathi throughout the year, occasioned by the opening of the new entrance at Narainpur."

MISCELLANEOUS RECEIPTS. 148. The miscellaneous receipts during the year amounted to Rs. 279, against Rs. 86 in the previous year.

DREDGING AND SILT CLEARANCE. 149. There was no expenditure under this head during the year.

PLANTATIONS. 150. The only plantations kept up in the Nadia Rivers division are those on the berms of the Bhagirathi embankments. Their condition is shown by the following statement:—

Year.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1893-94 ...	11,546	31,111	7	14,664
1894-95 ...	13,558	3,169	3,616	19,543

EDEN CANAL.

LENGTH OF CANAL. 151. No capital or revenue account of this canal is maintained. The aggregate length of the excavated channels has been increased by one mile during the year, by making two short links to connect the old blind channel Rankini Doho with the Kana Damodar and Kana Nadi. The lengths of the several channels are as follows:—

	Miles.
Joojooty sluice and channel	2
Eden Canal, proper	190
Kana Damodar junction cut	2½
Saraswati junction cut	2½
Connecting channel between the Rankini Doho and the Kana Damodar	½
Connecting channel between the Rankini and Kana Nadi	0
Total ...	27½

In addition to the above the natural channels of the Kana Nadi, Kana Damodar, and North and South Saraswati are included in the system.

The gross area commanded by the Eden canal is about 300,000 acres, of which about 200,000 acres are culturable, and 100,000 acres irrigable.

REVENUE ACCOUNT. 152. The receipts and expenditure for the last two years are given below:—

EXPENDITURE.	1893-94.	1894-95.	RECEIPTS.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.
Works	515	12,554	Water-rates ...	35,943	29,674
Maintenance and repairs	35,619	25,303	Miscellaneous ...	620	576
Establishment ...	13,474	14,129			
Tools and plant ...	732	752	Total ...	36,563	30,250
Total expenditure ...	50,340	52,738	*Less*—Refunds of revenue	654	50
Balance, deficit ...	14,431	22,538	Net total receipts ...	35,909	30,200

The original works executed or in progress during the year were the following:—

(a) Remodelling the existing irrigation channel from Halara above the Kana Damodar stop-dam to Kalna. This work was commenced in 1893-94, and completed during the year under review at a total cost of Rs. 694, of which a sum of Rs. 179 only was expended during the year.

(b) Combined bridge and regulator over the Kana Damodar at Chakdighi, to regulate the supply of water in the Kana Damodar for irrigation purposes, as well as to give the people of Chakdighi and of the neighbouring villages, the benefit of a substantial road bridge. The estimated cost of the work is Rs. 10,300 against which a sum of Rs. 8,229 was expended during the year.

(c) A project for connecting, by two channels, an old blind water-course called Rankini Doho, 7,400 feet in length, with the Kana Damodar and Kana Nadi, and for providing a sluice at the mouth of the channel. The land was given free of cost by the promoters, and the work was completed at cost of Rs. 4,111 against the estimated amount of Rs. 5,169.

Besides the above, the following original works were also carried out during the year, but their cost was charged to the grant for maintenance of the canal.

(i) *Stop-dam at the mouth of the Channel No. 2 at Joojooty.*—To obviate the necessity of removing silt from the channel at an annual cost of about Rs. 6,000, and also to guard the sluice itself from the free action of the floods. The work was completed during the year at a cost of Rs. 7,791.

(ii) *Connecting channel between the Behula and the Gangoor Nadis.*—To facilitate the irrigation of a number of villages. The cost of the work was Rs. 734.

(iii) *Remodelling the existing channel from regulating sluice No. 3 at Chanchai to feed the Dhosi Nadi.*—The work was completed during the year at a cost of Rs. 716.

The expenditure on maintenance was only Rs. 25,303 against Rs. 35,619 of the previous year, the decrease being due to the small amount of silt which it was necessary to excavate from the canals. The receipts from water-rates on the other hand diminished from Rs. 35,943 in 1893-94 to Rs. 29,674 in the year under review. This was due to the cancelling of a number of leases on the banks of the Banka, the full length of which has not been brought under the operation of Irrigation Act, and to other causes.

RAINFALL.

153. The rainfall registered at Edilpore was 48·1 inches as compared with 67·48 inches in the previous year. But the rain was seasonable, and in the kharif season practically the same amount fell as in the corresponding months of 1893-94. The demand for canal water was therefore not large.

CROP EXPERIMENT.

154. Regarding crop experiments the Superintending Engineer writes:—

"Owing to abundant rainfall, the year was not favourable for crop experiments. A few experiments were, however, made with paddy crops only, with the result that an acre of middle class land irrigated by canal water produced 25 maunds and 35 seers of paddy and 38 maunds 14½ seers of straw, whereas an acre of the same class of land not receiving the benefit of canal water, yielded only 20 maunds and 26 seers of paddy and 30 maunds and 5½ seers of straw."

AREAS LEASED AND IRRIGATED.

155. The total area leased during the year was 44,584 acres as compared with 47,925 acres in 1893-94, the falling off being due to the cancelling of leases of villages on the banks of the Banka Nala and Kana Damodar.

From the Eden canal alone 17,982 acres were irrigated in the Burdwan district, against 10,670 acres in the previous year, and 2,408 acres in the Hooghly district, against 1,069 acres in 1893-94. The increase was mainly due to the scanty rainfall, but as the fall was well distributed, a large portion of the leased area did not require canal water.

The areas irrigated by the Eden canal during the last five years are shown below:—

YEAR.	Long leases.	Annual leases.	One flushing beyond area commanded.	Unauthorised.	Total.	REMARKS.
1	2	3	4	5	6	7
	Acres.	Acres.		Acres.	Acres.	
1890-91 ...	...	...	...	...	1,330	
1891-92 ...	12,707	1,478	...	...	14,185	
1892-93 ...	47,848	6,534	...	16,951	71,333	
1893-94 ...	11,601	138	...	...	11,739	
1894-95 ...	19,650	20	720	...	20,390	

Those figures show that it is only in exceptional years that there is any demand for canal water.

DEMAND, COLLECTION AND BALANCE. 156. The water-rates assessed during the year amounted to Rs. 38,121 and the total demands, including the arrear balance from the previous year of Rs. 31,541, was Rs. 69,662. Against this amount Rs. 29,674 were collected during the year, Rs. 6,725 remitted, and Rs. 94 adjusted as excess recoveries. The balance left unrealized at the end of the year was Rs. 33,169.

REVENUE ESTABLISHMENT. 157. The cost of the revenue establishment during the year was Rs. 4,052 against Rs. 2,378 in the previous year.

MISCELLANEOUS RECEIPTS. 158. The miscellaneous receipts amounted to Rs. 576 against Rs. 620 in 1893-94.

PLANTATIONS. 159. The expenditure on plantations was Rs. 76 against Rs. 66 in 1893-94. The number of mahogany trees was increased from 334 to 360.

FLOODS. 160. There were eight floods in the Damodar river during the year, the last of which, only 2 feet 5 inches below the highest recorded, occurred as late as 27th October 1894. No damage to the canal was done, though the flood which reached its maximum at Edilpore on the 8th July, was only 11 inches below the highest on record.

GAIGHATTA AND BUXI KHAL.

LENGTH OF CHANNEL. 161. This channel, 7½ miles in length, was taken over by the Public Works Department on the 1st April 1894. It was formerly an important trade route connecting the Damodar and Rupnarain rivers, but its importance diminished when the Midnapore canal was opened, and it was placed under the management of the Hooghly Road Cess Committee. After this, from want of proper attention it silted up so much that the traffic of even small boats was almost stopped. Subsequently, it came into the hands of the District Board of Howrah, and its annual income was then estimated at Rs. 2,810. Government was eventually asked to resume its management, as it continued to deteriorate, and its income in consequence to diminish.

RECEIPTS AND EXPENDITURE. An estimate, amounting to Rs. 31,471, was sanctioned for its re-excavation, of which Rs. 19,854 were spent during the year. The total expenditure on its maintenance amounted during the year to Rs. 27,269. The miscellaneous receipts were Rs. 820.

The right of collecting tolls for 1895-96 has been farmed out for Rs. 5,100.

MADHUBAN CANAL.

EXPENDITURE.

162. The expenditure incurred in maintaining this canal during the last five years is shown below:—

PARTICULARS.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Works	6,236	...	...	...	...
Maintenance ...	2,011	7,300	7,093	5,913	5,567
Establishment ...	3,293	3,003	2,813	2,438	2,405
Tools and plant ...	287	203	126	2	36
Total ...	11,827	10,506	10,032	8,383	8,008

There was no high flood in the Teur river during the year, and consequently the weir was much less damaged than usual during the flood season. A deep hole was scoured out below the apron in front of the under-sluices, and a portion of the apron itself was damaged.

No revenue is derived from the canal.

The miscellaneous receipts were Rs. 63 against Rs. 163 in 1893-94.

IRRIGATION.

163. As the rainfall was very deficient up to the end of August, there was a large demand for canal water and a total area of 5,518 acres was irrigated. The areas of the different crops irrigated during the last four years were as follows:—

Nature of crop.	1891-92.	1892-93.	1893-94.	1894-95.
1	2	3	4	5
	Acres.	Acres.	Acres.	Acres.
Kharif	2,539	4,895	2,710	5,033
Rabi	495	150	46	117
Poppy	552	734	301	322
Hot weather crops ...	...	640	14	46
Total ...	3,586	6,400	3,071	5,518

PLANTATIONS.

164. The state of the plantations for the last two years is shown below:—

YEAR.	Trees over 12 feet.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1893-94 ...	188	182	286	656
1894-95 ...	247	246	202	695

GENERAL RESULTS.

NET REVENUE.

165. The net results of the year 1894-95, compared with those of the previous year, are shown below:—

PARTICULARS.			Receipts from all sources.	Working expenses, including refunds of revenue. (Direct and indirect charges.)	Profit or loss.
1			2	3	4
MAJOR IRRIGATION WORKS.			Rs.	Rs.	Rs.
1893-94	...	...	16,72,626	15,48,765	+1,23,861
1894-95	...	...	15,24,040	14,65,962	+58,078
MINOR WORKS AND NAVIGATION.					
For which Capital and Revenue accounts are kept.					
1893-94	...	...	5,25,348	3,93,423	+1,31,925
1894-95	...	...	5,10,870	3,81,607	+1,29,263
For which only Revenue accounts are kept.					
1893-94	...	...	1,71,252	1,46,658	+24,594
1894-95	...	...	1,42,518	1,69,186	−26,668
For which neither Capital nor Revenue accounts are kept.					
1893-94	...	...	36,687	59,377	−22,690
1894-95	...	...	30,313	60,823	−30,510
Total	1893-94	...	24,05,913	21,48,223	+2,57,690
	1894-95	...	22,07,741	20,77,578	+1,30,163

The total receipts show a surplus of Rs. 73,741 over the figures of the revised budget estimates, while the total expenditure was Rs. 1,18,358 less than that budgetted for.

EARNINGS.

166. Reckoned on earnings, that is on assessed revenue, as opposed to actual receipts, the net results of the Major Irrigation Works for the last two years were as follows:—

		Earnings.	Working expenses.	Profit or loss.
		Rs.	Rs.	Rs.
1893-94	...	14,77,532	15,48,765	(—)71,233
1894-95	...	13,85,719	14,65,962	(—)80,243

The revenue from Minor Works and Navigation is derived mainly from tollage receipts.

ARREARS.

167. Good progress was made during the year in the recovery of water-rates, and the reduction of the uncollected balance from Rs. 1,72,235 to Rs. 77,498, is very satisfactory.

The figures for the three canal systems are given below:—

Canals.	Outstanding on 1st April 1894.	Demand of 1894-95.	Collected or adjusted.	Outstanding on 1st April 1895.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Orissa	63,350	1,68,449	1,99,659	32,140
Midnapore	7,027	1,35,016	1,37,494	4,549
Sone	1,01,858	6,85,905	7,47,954	40,809
Total ...	1,72,235	9,90,370	10,85,107	77,498

Canal.	Demand.			Collections.			Percentage of collections.		
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Arrear.	Current.	Total.
1	2	3	4	5	6	7	8	9	10
1894-95.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Canals	63,350	1,68,449	2,31,799	48,584	1,51,075	1,99,659	76·60	89·68	86·13
Midnapore Canal	7,027	1,35,016	1,42,043	6,332	1,31,162	1,37,494	90·11	97·14	96·79
Sone Canals	1,01,858	6,86,905	7,88,763	92,418	6,55,536	7,47,954	90·73	95·43	94·82
Total, 1894-95 ...	1,72,235	9,90,370	11,62,605	1,47,334	9,37,773	10,85,107	85·54	94·68	93·33
1893-94.									
Orissa Canals	89,816	1,90,824	2,80,640	59,738	1,57,552	2,17,290	66·51	82·56	77·42
Midnapore Canal	48,567	1,30,111	1,78,678	47,349	1,24,302	1,71,651	97·49	95·53	96·77
Sone Canals	87,790	8,53,161	9,40,951	83,830	7,55,263	8,39,093	95·48	88·52	89·18
Total, 1893-94 ...	2,26,173	11,74,096	14,00,269	1,90,917	10,37,117	12,18,034	84·41	88·33	87·70

168. A comparison is made in the following table between the approximate value of crops irrigated by Major Irrigation Works during the year and in 1893-94:—

VALUE OF CROPS.

Canals.	1893-94.		1894-95.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres.	Rs.
Orissa	103,526	32,05,156	122,561	37,78,130
Midnapore	85,763	26,35,605	70,116	25,22,086
Sone	366,776	1,22,10,325	317,134	1,21,71,797
Total ...	556,065	1,80,50,786	509,811	1,84,72,013

The average value per acre of the various crops irrigated has increased from Rs. 32·4 to Rs. 36·2.

169. The date fixed for the submission of revenue reports to the office of the Chief Engineer is the 5th September. The dates when the different reports were received are shown below:—

DATE FOR SUBMISSION OF REPORTS.

		In 1894.	In 1895.
Orissa Circle ...	Deputy Collector's report through Commissioner.	8th September.	17th August.
	Superintending Engineer's report ...	5th ditto.	5th September.
South-Western Circle	Deputy Collector's report through Commissioner.	5th October.	6th August.
	Superintending Engineer's report ...	6th September.	2nd September.
Sone Circle ...	Deputy Collector's report through Commissioner.	8th ditto.	4th ditto.
	Superintending Engineer's report ...	3rd ditto.	27th August.

All the reports were punctual.

GENERAL RESULTS.

170. It was stated in the Revenue Report for 1893-94, that that year had been one of a disappointing character, as far as irrigation was concerned, by reason of the heavy and seasonable rainfall. These unfavourable conditions were even more marked during the year under review. The rainfall was quite as seasonable, and in many irrigation centres, far more abundant than in 1893-94. It is not therefore surprising to find that there was a general disinclination on the part of cultivators to enter into fresh leases, and that there was very little demand for canal water. The consequence has been an inevitable decline in the revenue derived from irrigation. The year has nevertheless presented many very satisfactory features. The efforts made in each circle to effect economy in maintenance have not been altogether in vain, and on the Sone Canals in particular, the unremitting energy displayed by Mr. Buckley, in order to attain this desirable object, deserves special commendation. In the Arrah division, the expenditure was the lowest on record, and for the whole circle there was an appreciable reduction in the working expenses. The improvement effected in the recovery of water-rates is another gratifying result of the year's work. Never before has the outstanding balance been so low as it was at the close of the year 1894-95, and while credit is due to the Deputy Collectors in charge of the Revenue divisions, it is the Superintending Engineers who are mainly responsible for this very satisfactory state of things. As regards Navigation, the history of the year suggests several questions for serious consideration. The difficulty of keeping the Nadia rivers open for navigation is becoming every year more pronounced and the work itself more costly. The tollage receipts are steadily declining and during the past year barely covered the working expenses. Unless a marked improvement takes place during the ensuing season, some modification in the system of controlling these channels will probably have to be made. On the Calcutta and Eastern Canals the traffic shows a steady development notwithstanding the competition of the Eastern Bengal Railway, but the tendency to employ flats in the place of the old type of country boat, seems to demand a revision of the measurement rules, which unduly favour the former.

TOURS AND INSPECTIONS OF OFFICERS.

171. The statement showing the number of days spent by the various officers on tour is a satisfactory record, and proves that in all cases works away from head-quarters received due attention. The inspections of divisional and subdivisional offices were nearly up to the standard in the Sone and South-Western Circles, but in Orissa only one divisional office was inspected. This may be partly accounted for by the fact that Mr. Connan who was in charge of the circle proceeded on furlough in December 1894. He was succeeded by Mr. Hughes.

A. D. McARTHUR, COLONEL, R.E.,
Offg. Chief Engineer.

The 8th November 1895.

STATISTICAL TABLES.

IA.

STATEMENT OF CANALS IN THE PROVINCE OF BENGAL DURING THE YEAR 1894-95.

Particulars.	Orissa Canals.			Midnapore Canal.	Hijili Tidal Canal.	Sone Canals.			Saran Canals.	Calcutta and Eastern Canals.	Orissa Coast Canal.

(a) Rupees 19,58,356 sanctioned for direct outlay on the Orissa project from 1st April 1890 to date of closing of construction estimate on 31st March 1895—*vide* Government of India, Public Works Department letter No. 295*I.*, dated 8th December 1892. From 1890-91 to 1894-95 Rs. 17,19,078 have been expended out of this amount.

(b) and (c) The estimates for the Midnapore and Hijili Tidal Canals respectively having been withdrawn and closed, the figures shown are the totals of the old and fresh sanctions.

(d) Sanction to the construction estimate for the Sone project expired on 31st March 1891. The expenditure from 1st April 1891 is chargeable against the schedule of works amounting to Rs. 7,63,707 for direct outlay and Rs. 16,306 for indirect outlay sanctioned in Government of India, Public Works Department letter No. 6*I.*, dated 6th January 1893 and against Rs. 6,932 sanctioned in Bengal Government letter No. 915*I*, dated 18th August 1893.

(e) There is no general sanctioned estimate for this project.

(f) Includes Rs. 8,66,000 expended from famine relief funds.

(g) Includes Rs. 69,001 expended against the estimate for Rs. 58,631 sanctioned in Bengal Government letter No. 531I., dated 27th July 1893, chargeable to the head 43—Minor Works and Navigation.

(h) This length is that of the Calcutta and new cut canals and Tolly's Nala with 20 miles of Kaorapukur Khal. The Eastern Canals are 316 miles in length.

STATEMENT SHOWING THE WATER-RATES PER ACRE IN FORCE ON CANALS IN BENGAL DURING 1894-95.

Canals.	Description of leases and crops.	Occupier's Rates per Acre.	
		Flow irrigation.	Lift irrigation.
1	2	3	4

ORISSA CIRCLE.

Canals.	Description of leases and crops.	Flow irrigation. Rs. A. P.	Lift irrigation. Rs. A. P.
Orissa Canals ...	I.—For the whole irrigable or rice cultivated area of any village, if application is made for a lease of five years ...	1 8 0	1 0 0
	For the Rice Crop.		
	II.—For any fractional area of a village or for other term	3 0 0	2 0 0
	For Cold Weather Crops.		
	III.—Dalwa rice	1 8 0	1 0 0
	IV.—For cotton, tobacco, huldi, ginger, wheat, vegetable, indigo and all garden produce grown in villages the rice-lands of which are leased under Rule I	1 0 0	0 10 0
	V.—For the above produce when grown in villages the rice-lands of which are not leased under Rule I ...	2 0 0	1 8 0
	VI.—For linseed, oil-seeds, dál and all pulses grown in villages the rice-lands of which are leased under Rule I ..	0 8 0	0 5 0
	VII.—For the above produce when grown in villages the rice-lands of which are not leased under Rule I ...	1 0 0	0 10 0
	For Perennial Crops.		
	VIII.—For sugarcane	6 0 0	4 0 0
	IX.—The charge for filling tanks is Re. 1 per 10,000 cubic feet of water used.		

SOUTH-WESTERN CIRCLE.

For the Rice Crop.

For water supplied between June and November—whether by flow or lift—

Canal	Description	Rs. A. P.	
Midnapore Canal.	For five year leases	1 8 0	per acre for each season.
	For one year lease or for water supplied on a provisional license for which a permit for a term of years is not subsequently issued	3 0 0	per acre.
	Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develop the system of blocks shall be charged ...	1 8 0	per acre.
	Otherwise, in addition to the rate of Re. 1-8 an extra rate of 12 annas per acre shall, in the first year only, be charged on leases for less than five and more than one year		
	For Winter Crops.		
	For supply of water, when available	2 8 0	per acre per season.
	For unauthorized use of canal water	5 0 0	per acre or such less rate as may be sanctioned by the Deputy Collector.

SOUTH-WESTERN CIRCLE—*concluded.*

For supply of water for manufacturing or other purposes Re. 1 to be charged for each 10,000 cubic feet or part of 10,000 cubic feet supplied.

The same charge will be made if water is taken into a tank without authority or used in an unauthorized manner.

Tanks may be filled with canal water without charge wherever water can be made available without injury to the cultivation dependent on any canal under certain conditions noted in Rule 31.

		Per bigha. Rs.	A.	P.	
EDEN CANAL.	I.—Long leases entered into before the 1st October 1895, per season	0	4	0	
	II.—Long leases entered into after the 1st January 1896, per season	0	5	0	
	III.—Extra charge for long leases entered into during the irrigation season, *i.e.* between 1st June and 1st October in any year, in addition to the rates mentioned in I and II, for the first year only	0	2	0	
	IV.—Season leases, kharif, per season ...	0	8	0	
	V.—Single waterings outside the area commanded in each watering	0	4	0	
	VI.—Season leases, rabi, sugarcane and potatoes and other crops	1	0	0	
	Boro rice, per season	0	8	0	
	VII.—Unauthorized irrigation—*				
	Kharif season	1	0	0	or such lower rates as may be fixed by the Canal officer.
	Rabi season	2	0	0	

* No rates shall be imposed on lands irrigated without permits beyond the area shown as commanded on the map referred in Rule 1.

SONE CIRCLE.

SONE CANALS.

The following schedule is in force with reference to long leases taken in, and previous to the year 1891-92:—

RESOLUTION ON THE REPORTS OF THE PROGRESS OF SURVEYS AND SETTLEMENTS DURING THE YEAR ENDING 30TH SEPTEMBER 1895.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 14th December 1895.

RESOLUTION—No. 5421.

READ—

Letter No. 1244A., dated the 6th December 1895, from the Board of Revenue, submitting the Reports of the Director of the Department of Land Records and Agriculture on Settlements and Land Records, and the Deputy Surveyor-General on Surveys, in Bengal, for the year ending the 30th September 1895.

The Reports.

THE Lieutenant-Governor is glad to be able to review the Settlement and Survey Reports for the survey year ending 30th September, 1895, before his term of office expires. He has to acknowledge the punctuality with which, in accordance with his wishes, as expressed in the Resolution of the 13th April 1895 on the Reports for 1893-94, Mr. Macpherson and Colonel Sandeman have collected the materials from the officers under them and submitted their reports, and he is obliged to the Board for sending them on to Government with their review so expeditiously. His Honour trusts that the Settlement Officers will find it a relief to have done with their accounts of the work of a previous year before embarking on the cold-weather field operations of the current year; and that in future the same commendable promptness may be observed by all concerned. The reports are not so long in either case as in the previous year: chiefly, because there have been fewer points of principle for discussion and record. But they omit nothing which deserves to be included for comment and future reference.

Charge and inspection.

2. Colonel J. E. Sandeman, I.S.C., was Director of Bengal Surveys throughout the year, but was absent on leave from 19th April to the end of September 1895, during which time the current duties of his office were conducted by Captains Fleming and Hodgson, under the orders of Colonel Wilkins, Officiating Deputy Surveyor-General. Since 25th March, Colonel Sandeman has been Deputy Surveyor-General, and his direct connection with Bengal surveys has ceased. He was on tour for 93 days during the first six months of the year, inspecting the work in progress in Bihar, Orissa, the Darjeeling Terai, and the Kolhan. Mr. W. C. Macpherson, C.S., was in charge of the office of Director of Land Records and Agriculture throughout the year, and altogether spent 148 days on tour, distributed over nine months of the year. He visited all the settlements of importance under his charge, and attended several conferences, besides being much engaged with the Land Records Maintenance Act, III (B.C.) of 1895.

The Lieutenant-Governor inspected the settlement work in North Bihar and Gaya in November 1894, the settlement office at Muzaffarpur in August 1895, and discussed the Orissa settlement work at Chandbali in July 1895. The Member of the Board of Revenue in charge of the Department was unable to inspect any of the major settlements during the year.

Survey and Settlement Manuals.

3. During the year the Board's Survey and Settlement Manuals of 1888 were revised and amalgamated into one work by Mr. E. W. Collin, C.S., on special duty. Short rules for petty surveys and settlements were also drawn up by the same officer. The revised Manual has been issued for the guidance of Settlement Officers in the season now commencing, has been reviewed by the Board, and is now being finally issued with the approval of Government.

Survey work from 1890-91 to 1894-95.

4. Colonel Sandeman has brought together in a convenient form (paragraph 36) the outturn in square miles year by year, and the total outturn for five years, of all kinds of survey, including record-writing. The whole area traversed by the theodolite (on which the survey of details on various scales is based) has covered 18,822½ square miles, *i.e.*, about one-eighth of the area of the whole Province. The figures of the detail survey work are as follows:—cadastral survey with records, 12,159½ square miles; cadastral survey without records, 1,034 square miles; skeleton boundary survey, 1,752 square miles; city survey, 15 square miles; topographical, 1,737 square miles; forest, 501 square miles: aggregate outturn, 17,198½ square miles. In the outturn of cadastral survey are included the revision of previous cadastral surveys of 958 square miles, and the revision of the previous records of 417 square miles.

General results of 1894-95.

5. Settlement work was in progress during the year under the control of the Director of Land Records in Districts containing the following areas:—(1) for revision of land revenue in temporarily-settled estates and Government estates, 7,813 square miles; (2) for survey and record of rights (not connected with settlement of land revenue) in estates other than wards' estates, 9,872 square miles; (3) for survey and record of rights in wards' estates, 760 square miles; total 18,445 square miles, as compared with 13,037 square miles in 1893-94, and 12,490 square miles in 1892-93. The following statement shows the general outturn and cost of survey-settlement work under the control of the two Directors during the year 1894-95, as compared with the three preceding years, according to the reports received (*a*):—

YEAR.			Traverse survey.	Skeleton boundary survey.	Forest survey.	Topographical survey.	Cadastral survey.	Record-writing.	Hill sketching.	Cost of survey.	Cost of settlement.	Total.
1			2	3	4	5	6	7	8	9	10	11
			Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Rs.	Rs.	Rs.

1893-94	...	...	3,485	175	......	..	3,754†	3,637	......	6,90,125	5,53,228	12,43,353
1894-95	...	...	3,091	23	......	1,026	2,786‡	3,120§	......	6,04,304	6,97,135	13,01,439
Total	...		16,614	1,632	327	1,405	11,902	11,158	194	26,75,007	22,17,804	48,92,811

(*a*) Revised figures have been furnished in certain cases for previous years.
* Includes 363 square miles revision survey in Cuttack.
† Ditto revision survey of 195 square miles in Puri and 63 square miles in Gaya.
‡ Ditto 424 square miles revision survey in Muzaffarpur.
§ Ditto 417 square miles ditto ditto.

The cost of survey and settlements incurred by Government from the beginning of the operations up to the 30th September 1895 in Orissa, Chittagong, and the Western Duars—the three principal areas which have been, and with the exception of the Duars still are, under settlement of land revenue—has increased from nearly 32 lakhs to nearly 36 lakhs of rupees. The expenditure in wards' estates on account of survey and settlement proceedings has been Rs. 71,147, Rs. 1,30,223, and Rs. 85,539 in the last three years. In private estates other than wards' estates, the expenditure was Rs. 5,94,144 in 1893-94, and has been Rs. 6,34,609 in 1894-95.

6. In the following paragraphs the progress made in the larger survey-settlements will be reviewed in the same order as in preceding years.

BIHAR—Survey.

7. The Bihar survey was first taken in hand experimentally in the District of Muzaffarpur in 1885, soon after the passing of the Bengal Tenancy Act, but was stopped in 1886, when the survey party under Colonel Barron had completed—

					Sq. miles.
Traverse survey	...	...	...	...	803
Cadastral ,,	...	...	...	...	414
Record-writing	...	...	...	...	414

Orders for the resumption of the work were received in September 1891, and a traverse party took the field on the 19th December 1891, but the full strength of the establishment was not at work until about the 10th January

1892. The following table shows the survey work done in each District, season by season :—

1	Traverse Survey. Area in square miles. (2)	Traverse Survey. Cost. (3)	Cadastral Survey. Number of villages. (4)	Cadastral Survey. Area in square miles. (5)	Record-writing. Number of villages. (6)	Record-writing. Area in square miles. (7)	Total cost of cadastral survey and record-writing. (8)	Cost rate per square mile. Traverse survey. (9)	Cost rate per square mile. Cadastral survey and record-writing (approximate). (10)	Cost rate per square mile. Total cost (approximate). (11)	Cost of survey and record-writing per acre. (12)	Expenditure on settlement. (13)

NOTE.—The excess of record-writing over survey is due to the inclusion in the former of some villages of which the survey was made, but the records were not prepared, by Colonel Barron.

The traverse survey having gone far ahead of the cadastral survey, no work was done in Darbhanga during the past season. The survey work in the District of Muzaffarpur falls under three different heads, vz. —

(1) Original cadastral survey with record-writing, which was done on the system described in the Resolution No. 2031, dated the 13th April 1894, on the Report for 1893-94;

(2) Revision of the cadastral survey and record-writing done by Colonel Barron in 1885-86; and

(3) Correction of the maps and records of certain villages belonging to the Darbhanga Raj, which were surveyed and settled in 1878-79, under Mr. Finucane's supervision.

With regard to (1), the Lieutenant-Governor notices with satisfaction that the record-writing is now absolutely up to date with the field survey, and that the arrears of previous seasons have been completed. It is reported that

some of the petty proprietors in Muzaffarpur brought pressure on their tenants either to absent themselves from the record-writing or to repudiate their claims if they had previously put forward any; but, notwithstanding this, the raiyats are reported to have shown a much keener interest in the proceedings during the past year than previously, and to have at last arrived at a proper understanding of the value of the "parchas" given to them. The revision of Colonel Barron's survey entailed the survey of village sites in detail, the correction of the maps with reference to waste lands newly brought under cultivation and new roads, and to changes of boundaries and other changes which have occurred since 1885-86, the rewriting of the khewats and khatians, and the revision of khasras in red ink. The alterations in the khasras have proved to be very numerous, and, in 16 of the villages dealt with last year, it was found necessary to write entirely new khasras. In the revision of Mr. Finucane's survey of the Darbhanga Raj villages, as few alterations as possible have been made in the maps prepared in 1878-79, but all extensions of cultivation and new topographical items were carefully surveyed. This part of the work has hitherto cost only Rs. 16·1 per square mile, but the revision of the records has proved more difficult, and has cost Rs. 56·9 per square mile. In Champaran the outturn of field survey amounted to 1,162 square miles. It is reported that had it not been for the unhealthiness of the northern tract late in the season, on account of which the field work had to be closed, the whole 1,200 square miles would have been accomplished.

Cost of revision surveys.

8. The Board remark (in paragraph 14 of their letter) on the great extent to which the records of Colonel Barron's survey needed revision, and the large cost entailed, as compared with the cost of revising Mr. Finucane's survey of the Darbhanga villages which was made a much longer time ago. The explanation lies perhaps in the fact that Colonel Barron's area contains a mass of involved coparcenary tenures, while Mr. Finucane's villages belong to a single proprietor; but the chief difference is that the figures as to Mr. Finucane's survey apply only to five villages, and are not complete for them. Such comparison cannot be usefully instituted unless the areas are large. The Lieutenant-Governor also understands that the number of changes registered includes changes in the names of the occupants of the boundary fields. In this way a transfer or succession in the tenancy of a single field entails changes not only in the entries regarding that field, but in those regarding the four fields which bound it on four sides. These figures must be more carefully edited before any conclusions can be drawn from them as to the amount of change which has taken place. The Lieutenant-Governor, however, agrees with the Board that the cost of revising the records in Colonel Barron's area, Rs. 86 per square mile, is excessive, and it probably indicates that revision is being carried out in unnecessary detail. He trusts that Captain Crichton will give his attention to this matter during the current year.

Bihar—Settlement.

9. The settlement staff took the field in November 1892, and first broke ground in the District of Muzaffarpur. Work was also commenced in Champaran during the same season, and was extended to Saran in 1893-94. The following statement shows the principal items of work done in each District since the beginning:—

		Attestation.				Draft records published.	Settlement of fair rents under section 104.			Cases under section 105.		Cases under section 106.		Final records published
		Area in square miles.	Number of villages.	Number of plots.	Number of tenancies.	Number of villages.	Number of cases disposed of.	Number of tenants affected.	Rents raised or lowered by decisions up to date.	Number of objections filed.	Number of objections disposed of.	Number instituted.	Number disposed of.	Number of villages

10. The programme for the settlement staff in Muzaffarpur for the season 1894-95 was (1) to attest the records of about 758 square miles which had been dealt with by the survey staff in 1893-94, (2) to supervise the record-writing and decide boundary disputes in an area of 1,367 square miles, and (3) to complete the records of 376 square miles attested in 1893-94, and case-work in the area to be attested in 1894-95. The Settlement Officer, Mr. P. C. Lyon, had a staff of 14 Assistant Settlement Officers employed during the working season, and five during the recess. The record-writing was supervised by the Settlement Officer and five Assistant Settlement Officers, but Mr. Lyon writes that on account of ill-health and other causes the supervision was less continuous than he would have wished. The work of settling boundary disputes was not so heavy as in the previous year, the number of cases filed being 376, against 593 in 1893-94, although the area dealt with was much more extensive. Since the commencement of the operations, 1,267 of these disputes have been filed, of which 1,243 have been disposed of; and out of 67 appeals decided, the summary orders of the Revenue Officers have been upheld in 62, modified in 3 (1 by compromise) and reversed in two cases. The Lieutenant-Governor agrees with the Director of Land Records and the Settlement Officer in considering these results to be very satisfactory. Nine officers were employed on attestation work, the programme for which was nearly completed, the average outturn for each officer being 22,000 plots per mensem. This is a better result than that of 1893-94, when the average outturn slightly exceeded the standard rate of 20,000 plots per mensem, and is specially satisfactory considering that in Muzaffarpur landlords are numerous, tenancies small, and disputes very frequent. One Assistant Settlement Officer was employed exclusively on case-work, and four more did this work during the recess. Cases under sections 104 and 105 of the Bengal Tenancy Act were more numerous than in the preceding year. The figures given in columns 7 to 9 of the statement above relate for the most part to rents settled on applications made by private landlords or by tenants. Of the 435 cases disposed of during the year in the Muzaffarpur district, 111 were filed by European indigo planters, out of which 69 were subsequently withdrawn "as having been filed by mistake for very small claims." The total number of tenants for whom fair rents have been settled from the beginning is 5,632, which is only a little more than one per cent. of the 461,872 tenants for whom existing rents have been recorded, and the increase of rent on the total attested rental is less than ½ per cent., or 8 annas in Rs. 100. Of the enhancements hitherto decreed, Rs. 3,535 have been given on the ground of increased area, and only Rs. 123 on that of prevailing rate. In the Government villages in the riverain area, 29 cases affecting 595 tenants were disposed of, and the rents raised from Rs. 1,487 to Rs. 2,847; but the increase is not real, as the farmers and raiyats had colluded and caused figures far below the reality to be entered as existing rents. Up to the end of 1894-95, 14 appeals against fair rent decisions had been preferred; and out of 13 decided, the decisions of the Revenue Officers had been upheld in 11 cases and modified in two. Although the operations extended over a larger area, the number of suits under section 106 fell from 952 in 1893-94 to 808 in 1894-95. This is attributed to the orders of the Government of India, No. $\frac{2829}{24}$, dated the 1st October 1894, prescribing *ad valorem* fees, and to instructions issued by the Settlement Officer as to a charge of a court-fee of Rs. 10 on all such plaints. Mr. Lyon's instruction is understood to have the support of the Special Judge; but the subject is under consideration.

11. With regard to cases under section 106 of the Tenancy Act, Mr. Lyon writes as follows:—

"In my Annual Report last year I gave some reasons for a respectful protest against the work thrown upon us by section 106 of the Bengal Tenancy Act, and it is for those reasons that I have said above that I do not think we should cheapen this form of litigation in our Courts. The Special Judge has again reiterated his ruling that we have no concern, in dealing with these cases, with questions of right and title, and in his advice as to the levy of a court-fee of Rs. 10 in all cases, on the ground that it is impossible to determine, for the purposes of an *ad valorem* fee, the value of our decisions, he has clearly intimated that those decisions differ in many respects from the decrees of Civil Courts. At the same time, the ruling of the High Court in the case of Pandit Sirdar renders practically valueless all our

proceedings in the very numerous cases between landlord and landlord and raiyat and raiyat. * * * * It does not seem to me that we act with due consideration for the interests of the disputants in encouraging them to embark on expensive litigation in our Courts for the purpose of obtaining decrees which will certainly not be looked upon with favour by the Civil Courts, even under the most favourable circumstances, and which will in many cases be treated by them as of no legal value whatsoever. I think that we should confine our settlement proceedings to the preparation of a record which will carry a presumption in favour of the correctness of the entries in it, and that all our enquiries should be summary in their nature and untrammelled by the procedure of Courts whose decisions are decrees. And I fully believe that all parties concerned would welcome such a change, the present law having failed already to give satisfaction to parties who wish for a final settlement of their disputes and an end to litigation."

This decision of the High Court, that the powers of Settlement Officers to settle disputes with the authority of a Civil Court under section 106 of the Tenancy Act are confined to disputes between landlord and tenant and do not extend to disputes between landlord and landlord and tenant and tenant, is a serious blow to the completeness of the record of rights, and defeats the intention of the Legislature. It is one of several points as to which Sir Charles Elliott has drawn up a Minute showing in what respects amendment of the law is necessary in order to make the settlement procedure simple and efficient.

12. In consequence of ill-health, the Settlement Officer, Mr. E. G. Colvin, had to take leave from the 23rd February 1895, and Mr. Lyon was placed in charge of this district as well as of Saran, in addition to his duties as Settlement Officer of Muzaffarpur. During the greater part of the field season of 1894-95, when the settlement staff was at its maximum, nine Assistant Settlement Officers were employed in Champaran, four on record-writing, four on attestation, and one on case-work; and three were engaged on case-work throughout the recess. The programme of work was (1) the attestation of the records of 500 square miles, (2) supervision of record-writing and disposal of boundary disputes in 1,168 square miles, and (3) case-work under sections 104, 105, and 106 in the 500 square miles to be attested. Record-writing was inspected in 542 villages, and orders passed on 362 boundary disputes. Twenty-one appeals in village boundary cases were decided, in 19 of which the orders of the Revenue Officers were upheld, in one case modified, and in one reversed. The attestation programme was practically completed before the end of April, and the average outturn of work for each officer per mensem amounted to about 21,500 plots. The following is an extract from the Settlement Officer's report:—

Champaran.

"On the whole the attestation work was carried through with a remarkable absence of friction. A large proportion of the area dealt with was held by three large indigo concerns; and very great assistance was given to us in the preparation of the records by the managers and assistants of the factories. The attendance both of landlords and raiyats was good; and with the help of carefully kept and systematically arranged zamindari papers most of the difficulties of the attestation work were quickly surmounted."

Applications for settlement of fair-rents have been filed in much greater numbers in this District and in Saran than in Muzaffarpur. Fair rents have been settled in Champaran for not quite 25 per cent. of the 142,491 tenants for whom existing rents had been recorded down to the end of September 1895, and the percentage of increase of rent for the 35,001 tenants for whom rents have been settled is 11·35. During the year 323 cases against 17,896 tenants have been decided, and an enhancement of Rs. 15,438, or 10·5 per cent., decreed. Of this total, only Rs. 780 were given on the ground of prevailing rate, and the remainder on account of excess areas, no enhancement having been decreed on the ground of rise in prices. A large part of the increase has been decreed in accordance with compromises arranged between the landlords and tenants. The Director observes that there has been a noticeable decrease in the percentage of increase given, as the work has proceeded from areas in the north, where there is much waste land, to areas more south, where there is less waste land. Since the beginning of the operations, 23 appeals against fair-rent decisions have been decided; in 15 of these, the decisions of the Revenue Officers have been upheld and in 8 modified. As regards case-work under sections 105 and 106, out of 29 appeals instituted, the decisions of the Revenue Officers have been upheld in all the four cases hitherto decided.

Saran.

13. Six Assistant Settlement Officers were employed in this District for nearly the whole of the year, five on attestation and one on case-work during the cold weather; and five on case-work during the recess. The programme was to attest the records and dispose of case-work under sections 104, 105 and 106 in an area of 487 square miles, and to complete the case-work and finally publish the records of the 68 villages attested during 1893-94. The programme of attestation work was completed, each officer having dealt with over 24,000 plots a month. This is the largest rate of attestation work attained during the year in any District, but work was facilitated by the fact that the area taken up belonged almost entirely to one proprietor, the Maharaja of Hatwa, and by the good records kept by the estate. The Settlement Officer states that in this District the people generally have followed the settlement operations with keener interest and appreciation than anywhere else in Bihar. Enhancement suits are brought by the Raj against every raiyat who is found by the survey to be in occupation of more land than he held when the estate was measured 20 years ago, and also against those who are found to hold at favourable rates. The number of tenants involved in these suits is over 30,000, or about 23 per cent. of the entire number of tenants. Including 426 persons dealt with in 1893-94, rents have been settled in all for 20,209 tenants, but in the case of about 17,000 tenants, the rents were settled by compromise between them and the landlord. The net increase of rents allowed down to the end of September 1895 is Rs. 30,067, or 13 per cent. on the rents settled, of which two-thirds are on account of excess area, and one-third on account of prevailing rates. The Settlement Officer estimates that the addition to the Hatwa rent-roll, after the completion of these proceedings, will probably amount to Rs. 50,000. Only one appeal has hitherto been preferred under this head.

Status and rents of tenants.

14. The following table shows the results of the record of the status and rents of tenants in the three districts:—

	Muzaffarpur (1,006 villages—area 400 square miles).					Champaran (475 villages).					Saran (about 1,238 villages).				
	Number of holdings.	Percentage.	Cultivated area.	Rent.	Average rent per acre.	Number of holdings.	Percentage.	Cultivated area.	Rent.	Average rent per acre.	Number of holdings.	Percentage.	Cultivated area.	Rent.	Average rent per acre.

Total …	164,406	……	225,808·22	7,13,009 6 0	……	72,932	……	2,82,976	3,65,142	……	112,317	……	…	…	…

A study of this table throws a great deal of light on the agricultural economy of these Districts, and tends to disperse many fallacies. The quantity of land held as proprietor's *sir*, and the area under non-occupancy tenants, appear wonderfully small compared with an average North-Western Provinces District. The area under "settled tenants" is, on the other hand, very large, and testifies to the benefits conferred by the wise legislation of the Tenancy Act. The average rent-rate is extremely low in Champaran, and not at all exceptionally high in Muzaffarpur, even after allowance is made for the error made in the Settlement Office in not separating produce-paying from cash-rented land. The failure to prepare the table for Saran is very regrettable, for the Settlement Officer's belief that the average rate is Rs. 4 per acre may turn out to be mistaken. In Muzaffarpur he guesses that the exclusion of produce—rented lands will bring up the cash rate by 10 per cent., in which case the incidence on settled tenants will be Rs. 4 per acre. For 378 villages, covering about 100 square miles, the figures are tabulated in more detail, and there settled tenants pay Rs. 5-3-9 per acre, but it is not stated whether this is an average area, or the exceptionally rich land round Hajipur. Mr. Macpherson remarks that Rs. 4 is a high average rate compared with adjoining districts in the North-Western Provinces, but this is a mistake if tracts of equal value are compared. Among the North-Western Provinces districts he has quoted Mirzapur, with its large area of barren hills, and Gorakhpur, which has always been low-rented for the same

reason as the north part of Champaran, viz., that it has lately been reclaimed from jungle. Truer analogues are the Ghazipur and Ballia districts, where the rates exceed Rs. 4, and Azamgarh, where 20 years ago Mr. J. R. Reid found the average rate to vary from Rs. 4 to Rs. 4-12, and now the rate is reported by the North-Western Provinces Board of Revenue to be about Rs. 5. Saran is a district of exceptionally rich and well-cultivated land, superior in fertility to any of the three North-Western Provinces districts mentioned. It is premature to formulate any definite conclusion from these tables till the figures are more accurately compiled and cover a large area; but, so far as they indicate, they tend to dispel the impression that the North Bihar raiyat is a down-trodden and rack-rented creature. Every district in the North-Western Provinces would envy North Bihar the possession of such a large proportion of land held by settled raiyats, and most districts would think the average rent-rate fair and moderate.

Expenditure.

15. The expenditure on the operations in North Bihar has been as follows:—

	Survey.		Settlement.		Total.		Remarks.
	During the year.	To end of September 1895.	During the year.	To end of September 1895.	During the year.	To end of September 1895.

(a) Including the cost of survey of Muzaffarpur town and Hajipur Municipality.

On the basis of the expenditure incurred, orders have been passed for the recovery of cost, at the rate of 8 annas an acre, in those areas in the Hajipur and Bettiah subdivisions of the districts of Muzaffarpur and Champaran, respectively, where records have been finally published, $\frac{4}{16}$ths being borne by Government, $\frac{7}{16}$ths by landlords, and $\frac{5}{16}$ths by raiyats. Arrangements are being made to effect recoveries from the beginning of the current season 1895-96. The collections from the tenants will be made by a Sub-Deputy Collector going round from village to village and distributing extracts from the record to all persons concerned on payment of the sums due: all the tenants' payments will be recovered, and as much as possible from the landlords, at this stage; the balance due from the proprietors will be recovered with the land revenue. It is hoped that Rs. 75,000 will be recovered from the landlords and tenants before the end of March 1896.

Future extension of the survey-settlement.

16. The question will soon arise whether the survey-settlement, when it has completed the four districts of North Bihar, is to be extended or not into the districts of South Bihar or of the Bhagalpur Division. Sir Charles Elliott, being now on the eve of leaving the country, desires to record his opinion that it should be extended. He believes that the operations which have been conducted have to a large extent dispelled the fears and suspicions with which the work was at first regarded. The raiyats are learning to regard the security given by the record of rights as a valuable protection of their tenure. The zamindars have begun to realise that it gives them a useful lever in securing a reasonable enhancement of rent, especially where cultivation has increased. The indigo planters have always perceived the advantage they reap by obtaining accurate knowledge of the rights and position of the parties with whom they have to deal. The vague alarms as to the irruption of a great flood of litigation and as to the imposition of a heavy burden of expenditure have been to a great extent dissipated. His Honour believes that no class is now strongly opposed to a survey-settlement except those who fear loss from the decrease of law suits and the quieting of disputes about title: and he trusts that the blessings now being conveyed to the districts of North Bihar may in the course of time be extended to all Bengal.

Orissa—Survey.

17. The survey of the temporarily-settled estates in Orissa was nearly completed during the year ending 30th September 1894. The survey work of the year under report comprised chiefly (a) the completion of the small temporarily-settled area ($5\frac{1}{2}$ square miles) which remained over for survey and record-writing, and (b) the 2″=1 mile topographical survey (with village boundaries) of 1,013 square miles of the permanently-settled tracts, some of which are situated on the extreme south of the Orissa

Division on the borders of the Madras Presidency, while others are at the northernmost point touching the district of Midnapore. The total area traversed was 959 square miles, and the 1,013 square miles topographically surveyed were exclusive of 310 square miles of water of the Chilka Lake, and an overlap of 13 square miles of the Madras Presidency which had also been surveyed, in order that the lake might be fully mapped. The following table shows the progress made in each year from the commencement of the operations in 1889-90 :—

Year.	Puri.				Cuttack.				Balasore.			
	Traverse survey.	Cadastral survey.	Record-writing.	Topographical survey.	Traverse survey.	Cadastral survey.	Record-writing.	Topographical survey.	Traverse survey.	Cadastral survey.	Record-writing.	Topographical survey.

* Includes 13 square miles of overlap on Madras.

Government having decided that the resettlement of the Khurda Government estate, in the district of Puri, comprising an area of 886 square miles, of which the current settlement will expire in September 1897, should be based on the existing records revised and brought up to date through the agency of the sarbarahkars, 795 sarbarahkars went through a course of instruction in schools established for the purpose during the year, under the supervision of Mr. R. C. Ewing, the officer in charge of the survey in Orissa, in—

(1) field surveying (on plane table and by field-book);
(2) rules for the writing of record of rights;
(3) extraction of areas and mapping of fields.

The rewriting of the records by the trained sarbarahkars under Mr. Ewing's supervision will be carried out in the season 1895-96, and the re-assessment effected in 1896-97.

The total cost incurred under the head of survey from the beginning of the operations down to the 30th September 1891 in Orissa amounted to Rs. 2,21,102 (excluding all charges for Angul, Banki, Kanika, and Kujang), and the following table shows the amounts expended during the last four survey years:—

	Total sums expended.					
	Traverse survey, including demarcation and stone embedding.	Cadastral survey, including maps, areas and traces with arrears.	Record-writing with statistics and arrears.	Topographical survey.	Other heads.	Total.

Excluding Rs. 6,293, which represented cost of the revision of survey of the Puri Temple lands, the total expenditure in Orissa under the head of survey amounts approximately to—

		Rs.
Incurred up to 30th September 1891 ...	...	2,21,102
„ from 1st October 1891 to 30th September 1895	...	8,14,192
Total	...	10,35,294

The total area surveyed in Orissa, exclusive of the Puri Temple lands (105 square miles), being 5,036 square miles, the total cost per square mile is Rs. 205·6.

Cuttack and Puri.

18. Mr. W. Maude was in charge of the settlement work in the Cuttack and Puri Districts with a maximum staff of 12 Assistants during the field season under him. In Cuttack 10 officers working for varying periods, which amounted in the aggregate to 61 months, attested records and recorded existing rents and status in 1,356 villages with an area of 681·88 square miles, containing 276,138 tenants and 1,184,545 plots. The average outturn for each officer *per mensem* was therefore 19,418 plots. This is a great improvement on the rate of work in the preceding season in which each officer only attested 5,921 plots per mensem. In Puri one officer did similar work in 23 villages with an area of 18·05 square miles, and containing 3,458 tenants and 11,986 plots. The following table shows the entire progress of attestation work in Cuttack and Puri from the beginning of the work:—

	Work done.				Work remaining on 1st October 1895.		
	Number of villages.	Number of square miles.	Number of plots.	Number of tenants.	Number of villages.	Number of square miles.	Number of plots.

* These figures relate to villages belonging to the Puri Temple.

During the recess months from May to September, five officers were employed in completing the records and tabulating the statistics. Mr. James Taylor was employed on settlement of fair rents during the year. Including the work of the previous year, he has settled rents in 142 villages for 13,950 tenants, whose existing rents he has raised from Rs. 36,219 to Rs. 44,885.

Balasore.

19. Balasore was constituted a separate settlement charge with effect from 1st November 1894, and Mr. S. L. Maddox has been in charge of the settlement of the District since that date except for the period from the 17th July to the 16th October 1895, when he was on privilege leave. Mr. Maddox had a maximum staff during the field season of ten Assistants, who attested records for 1,962 villages containing an area of 1,022 square miles, 296,818 tenants, and 1,204,215 plots. The average outturn for each officer *per mensem* was about 21,000 plots. The following table shows the progress of attestation work in this District from the beginning of the work:—

	Work done.				Work remaining on 1st October 1895.		
	Number of villages.	Number of square miles.	Number of plots.	Number of tenants.	Number of villages.	Number of square miles.	Number of plots.
1	2	3	4	5	6	7	8

„ 1893-94	577	324	475,834	105,435	......	......	......
„ 1894-95	1,962	1,022	1,204,215	296,818	......	......	......
Total ...	3,050	1,474	1,888,690	451,184	686	236	232,846

Two Assistant Settlement Officers were retained for tabulation of statistics during the recess, but they have not furnished any consolidated returns of the statistics.

Mr. Maddox and two of his Assistants made experimental settlement of rents, on the basis of soil maps; in 20 villages, in 11 of which the results show the proposed assets to be 51 per cent. in excess of rents now paid and 84 per cent. in excess of the assets of the last settlement.

Principles of assessment.

20. In both these Districts the Settlement Officers have been making experimental efforts and feeling about in a not very successful way in order to establish some principles for the settlements of fair rents and the assessment of revenue, but they have hardly as yet realised that the first essential point is to obtain a firm grasp of existing facts as to rents and rent-rates. Although two Deputy Collectors were engaged on the work in Balasore, the prescribed table (such as is given in paragraph 14 above) has not been submitted for Balasore; this is perhaps due to the Settlement Officer's absence on leave. In Cuttack the figures for nearly 300,000 tenancies have been tabulated, but it has been done with excessive elaboration and such differentiation of classes and sub-classes and sub-sub-classes which need not be differentiated, that it is difficult to draw any conclusion from it. A Settlement Officer must learn that he cannot afford to concentrate his whole attention on the one branch of his work which he has in hand: he must look forward and foresee the end and prepare, as he goes along, the data which will be required to accomplish, the whole of the business he has in hand.

Expenditure.

21. The cost incurred on settlement in all the three Districts during the year ending 30th September, 1895, amounted to Rs. 1,93,392, of which Rs. 1,10,185 were for Cuttack and Puri, and Rs. 83,207 for Balasore. The amount first mentioned, distributed over 1,716 square miles, the total area attested in the three districts, gives a cost rate of about Rs. 113 per square mile, or about 2 annas 10 pies per acre against 6½ annas, the rate per acre arrived at in the previous year. The total cost of the settlement operations in Orissa down to the end of the year is reported to be Rs. 8,01,712, and the expenditure under the head of survey being Rs. 10,35,294, the total amount expended on the survey and settlement operations in Orissa down to 30th September 1895 amounts to Rs. 18,37,006.

Chittagong.

22. The only survey work remaining to be done in Chittagong was the survey of a small area of thatching-grass lands and the demarcation of the Hill Tract boundary; of the latter work 49 miles still remain to be surveyed. The number of boundary disputes disposed of during the year was 233. The settlement operations were conducted by Mr. C. G. H. Allen, and, after he went on furlough, by Mr. Stevenson-Moore, assisted by a staff consisting, during the greater part of the year, of five Assistant Settlement Officers. The progress in "mahal milan," or adjustment of lands of estates and villages, was completed in 240 villages, leaving 276 villages still in hand. There was a marked improvement in the progress of settlement of fair rents; for 80,997 tenancies in 356 villages rents were settled in the year, against 13,463 in the previous year. The total number of villages in the District is now stated to be 1,036 and of noabad tenants 212,655, but these figures are liable to correction; there are several discrepancies which are noticed in the Chittagong report, and it is feared that accuracy has not yet been attained in this District in the compilation of settlement statistics. The number of tenants whose rents remained to be settled at the end of the year was 107,252 distributed in 591 villages, and this work can hardly be quite finished in 1895-96, as hoped for in the Resolution on the report for the year 1893-94. The results of the settlement of fair rents have been, in the words of the Director of Land Records, that "rents in the aggregate payable by tenants of all degrees have been raised from Rs. 4,71,326 to Rs. 6,18,418; and revenue payable directly to Government has been raised from Rs. 2,45,617 to Rs. 3,56,415, or 45 per cent. The increase of revenue has varied in the different circles, from 12 per cent. in Kutubdia, where rents were settled only 10 years ago (and where presumably rates have not been increased and only excess lands have been assessed), to 94 per cent. in Satkania and 196 per cent. in Sangu. In Satkania rents were previously much too low, the Settlement Officer says. He has a discretion to reduce enhancements which may appear to him to have been excessive or too suddenly made. In Sangu waste lands have been broken up." Only two appeals were presented to the Special Judge against fair-rent decisions. One only was decided, and against the appellant, during the year.

The Board remark rightly that this figure, Rs. 6,18,418, is made up by adding together the rents and sub-rents which many classes of tenants pay to each other; it is not the rent issuing out of the land, nor can the rent-rate paid on the land be calculated from it. This information is given in the statement attached to the Settlement Officer's report which shows the ruling rate, that paid by settled raiyats, to be Rs. 4-9-6 per acre. The statistics given in last year's report, which led to the belief that settled raiyats pay more than Rs. 6 per acre, appear to have been incorrect.

23. The following table shows the progress of work in this District in its most important details up to the end of the year 1894-95:—

	Record-writing.		Attestation.				Mahal Milan	Settlement of fair rents.			
	Khasra-writing in the field; number of villages.	Khatian-writing and completion of records in office; number of villages.	Villages.	Square miles.	Tenants.	Plots.	Number of villages.	Number of tenants.	Former rental.	New rental.	Percentage of increase.

* The corresponding number given in the present report is 1,033.
† The total number of tenants whose rents were settled up to 1893-94 is shown in the present report to be 24,406.

Palamau Government estate.

24. The survey of the 397 villages of the Government estate in Palamau was begun in August 1893. The traverse survey of the whole area, with the exception of one village, and part of the cadastral work, had been completed before November 1894. During the period under review, the cadastral survey and record-writing of 181 villages, covering an area of 161·75 square miles, and containing 66,352 fields, were carried out by a professional party under Mr. Berkeley at a cost of Rs. 24,671. The attestation of the records of 33 villages, with an area of 21·35 square miles, had been carried out in the previous year. During the year under review, the attestation of the remaining villages, 364 in number, with an area of 260·93 square miles, was completed. The total number of tenancies has been ascertained to be 13,133. Settled and occupancy raiyats hold 7,184 tenancies, or 54·7 per cent. of the whole number; non-occupancy raiyats are in

possession of 5,579, or 42·4 per cent.; rent-free-holders and tenure-holders occupy 255 and 115 respectively. The average rate of rent per acre paid by occupancy raiyats is 14 annas 3 pies. The cost of settlement operations amounted to Rs. 15,840-14-10. The Settlement Officer proposes to raise the existing revenue of the estate from Rs. 40,842 to Rs. 79,899, or by 95 per cent., the extension of cultivation since the last settlement having amounted to 131 per cent. The report containing his proposals has not yet reached Government.

Darjeeling Terai.

25. The operations in the Darjeeling District comprise 819 jotes, covering an area of about 196 square miles, and 33 grants, covering an area of about 35 square miles, of which by far the greater portion is under tea. With regard to the grants, it is only necessary to make a boundary survey and a block survey of the interior, such as is commonly made in the Western Duars, to ascertain the area brought under cultivation. The survey and record-writing of 210 square miles were finished, leaving a small portion of the "grant" land to be completed in the current year. An Assistant Settlement Officer supervised the record-writing. Attestation and assessment will be carried out this year.

Kolhan estate, Singhbhum.

26. The settlement of the Kolhan Government estate in Singhbhum, which was made for 30 years, will expire on 31st March 1897, and measures were begun in 1894 for its resettlement. The work is placed under Mr. Craven, Deputy Magistrate and Deputy Collector, who has had much experience among the Sonthals, a race not dissimilar to the Kols, and not under the Director of Land Records. But a traverse survey has been run through the District (the forest area excepted) and skeleton maps prepared by the professional department, on which the field survey is based. The estate is said to cover an area of about 1,423 square miles, exclusive of forest reserves, and to contain 796 villages. The traverse survey of 1,175 square miles was completed during the year at a cost of Rs. 35,954.

The settlement not being under the Director of Land Records and Agriculture, no mention is made of it in his Report. It will be convenient if, as in the case of the Sonthal Parganas settlement, he embody in his future reports a short paragraph, giving the history of the work for the year. Measurement has been completed and records prepared in 182 villages, covering an area of 79,111 acres of cultivated and 34,356 acres of uncultivated land. The expenditure amounted to Rs. 28,274 up to the end of September 1895.

Mr. Craven has drawn up a report containing his proposals for assesment, and orders have recently been issued by Government.

Tippera.

27. The survey of the estates of His Highness the Maharaja of Hill Tippera in Tippera and Noakhali Districts, and the initial record-writing, were completed before the commencement of November 1894. Attestation was taken in hand in the middle of November 1894, and the work of the year consisted of attesting 327 villages with 29,119 tenants and 132,046 plots, covering 89 square miles.

Mr. J. G. Cumming, C.S., took charge of this settlement in October 1894, and had two Assistant Settlement Officers under him during the field season.

The average outturn of work per officer was 9,196 plots a month, which falls very far short of the estimated outturn of 20,000. Briefly, the causes which have brought about this result and have rendered the task of making a record of rights more difficult in Tippera than in any other part of these provinces have been the intricate system of taluks, the large number of disputes, and the obstructive attitude of the tenants. Applications for the settlement of fair rents were filed in 90 villages during the year under report and in 12 during the previous year. Sixteen cases in five villages affecting 177 tenants were disposed of during the year. The publication of draft records was made in five villages during the year; no final publication has taken place.

Statistics of rent and status have been tabulated for 29,944 tenancies (exclusive of under-raiyats' holdings), with the result that 25,555 tenancies, or 85·3 per cent., are found to have been held by settled and occupancy raiyats paying an average rent of Rs. 3-8-2 an acre, calculated on the cultivated and uncultivated area. The cost incurred on settlement during the year was Rs. 33,268, and from the beginning Rs. 68,073.

28. The traverse and cadastral survey of the Tikari estate had been well advanced in the previous year and, during 1894-95 the traverse work covered an area of 46·03 square miles and 65 scattered villages; and the cadastral work, including the revision of certain villages previously surveyed by the Irrigation Department, 18·09 square miles and 45 villages; some of the villages were situated in Gaya and some in Patna District. The record-writing was carried out for 69 square miles and 104 villages. The work of the professional party in the Raj estate, except the Belkhara mahal, was completed during the year.

Tikari estate and Government estates in Gaya.

Over three-fifths of the attestation work was carried out during the year under review. Records were attested for an area of 317·73 square miles, containing 441 villages, 27,612 tenants, and 382,837 plots. The work was done at the rate of 18,500 plots a month for each officer employed. Publication of the draft records went on *pari passu* with attestation, as few applications for settlement of fair rents were filed, and the draft records of 440 villages were published out of the 441, of which the records were attested.

Statistics have been tabulated for 27,612 tenancies; 22,655, or nearly 81 per cent., are held by settled or occupancy raiyats; 2,097, or 7 per cent., by rent-free holders; 1,137, or 4 per cent., by non-occupancy raiyats. Nearly three fourths of the rent paying area is held on produce rents, and the rate of cash rents for settled and occupancy raiyats is Rs. 4-7-3 an acre.

The total expenditure of the Survey Department during the year has amounted to Rs. 28,761, and the work of the Settlement Officer has cost Rs. 33,104 (including the cost of supervision of record writing in the Government estates). It is estimated that the whole cost of the operations, settlement and survey, will amount roughly to 7 annas 6 pie an acre.

29. The following table shows the progress of the operations and the cost incurred in the smaller surveys and settlements dealt with by the Directors of Surveys and Land Records:—

Smaller Settlements.

Estates.	Number of villages.	Area in square miles.	Survey. Traverse—During 1894-95.	Survey. Cadastral—During 1894-95.	Settlement. Attestation: number of villages—During 1894-95.	Settlement. Attestation: number of villages—To end of 1894-95.	Settlement. Settlement of fair rents to end of the year. Number of tenants.	Settlement. Settlement of fair rents to end of the year. Former rental.	Settlement. Settlement of fair rents to end of the year. New rental.	Total cost of survey and settlement to end of the year.

(a) Only Rs. 745 have been shown as expended by the Survey Department. The rest of the survey expenditure has not been reported.

30. The final publication of the khatians and record of rights of the villages in parganas Teur, Sultanabad, and Ambar, in the Sonthal Parganas, which had been measured and settled during the year ending 30th September 1894, was completed during the month of October 1894. No fresh settlements of private estates in the Sonthal Parganas were taken up during the year.

Sonthal Parganas.

31. Besides the question mentioned in paragraph 11 above as to the power of a Settlement Officer to deal with disputes between landlords *inter se* and tenants *inter se*, the following practical difficulties in the working of the Tenancy Act are mentioned by Mr. Macpherson in his Report and by the Board in their covering letter:—

The Tenancy Act.

(1) How far the Settlement Officer is bound to act on a compromise agreed to by both parties, or whether he should go behind the written compromise;

(2) What power a Settlement Officer or a Special Judge has to review and modify his own decisions, either at the petition of an aggrieved party or of his own motion;

(3) What is the meaning of the term "prevailing rate?"

On these points the Lieutenant-Governor agrees with what the Board has said or proposes to do. In the first case, the decision of the High Court, in the case of the Bettiah Raj *versus* Palti Koeri and others, lays down a ruling which disposes of the doubts raised, and which should be followed. In the second case, three Special Judges have held that the power of revision exists, and it should be exercised until these decisions are upset by higher authority—an eventuality which need not be anticipated. As to the third point, the Board's further reference to the law officers may be awaited, but His Honour has elsewhere intimated his opinion that the help of the Legislature will have to be called in to cut this knot. The Lieutenant-Governor also agrees with the remarks made by the Board (paragraph 8) on Mr. Lyon's aspiration after freedom from the trammels of Civil Code Procedure in dealing with disputes under section 106. Mr. Lyon is mistaken in thinking that no such suits are tried in Chittagong. On the contrary, the table on page xxxi of the Report shows that 1,146 suits under this section were disposed of there in the past year, and the Settlement Officer has informed the Lieutenant-Governor that Chapter VI of the new rules under the Tenancy Act has greatly simplified the procedure and facilitated progress in disposing of these cases.

32. In Chapter V of his Report the Director of Land Records has dealt with the subject of the maintenance of settlement records. Act III (B.C.) of 1895 has now been passed; it provides for the maintenance of records of rights in land in surveyed areas, to which it may be extended, by requiring all classes of privileged tenants to register all mutations of tenant-rights, whether due to succession or transfer. The registration of mutations of the rights of non-occupancy raiyats and of under-raiyats is left optional. Since the conclusion of the year, rules for the introduction and working of the Act have been published for criticism, and have recently been issued. Also measures have been taken for the establishment of offices at Hajipur in Muzaffarpur and at Bettiah in Champaran for the registration of mutations. Apart from the Act, attempts have been made in large estates belonging to Government or under the Court of Wards to improve the system of record of mutations of tenancies. Half-yearly returns of mutations of tenant-right and settlements of abandoned holdings or waste lands on large estates belonging to Government or under the Court of Wards have been required, and will result, it is hoped, in more efficient maintenance of the rent-rolls. In Khurda maps and copies of khasras have been corrected by the sarbarakars in about 867 of the 1,378 villages. In the Angul Government estates 30 out of the 417 sarbarakars have submitted returns. For the Western Duars rules have been passed, prescribing the maintenance of mutation registers, which give in abstract the principal facts for each jotedar's or chukanidar's tenancy as recorded in the settlement. The working of these rules should be carefully watched.

Maintenance of settlement records.

33. The Lieutenant-Governor has on previous occasions cordially acknowledged the excellent work done by Mr. W. C. Macpherson and Colonel J. E. Sandeman in the

Conclusion.

management of their Departments, and has commended their enthusiasm and energy in the performance of their duties. He has again to thank them for their eminently successful labours during the past year, and especially to record his obligations to Mr. Macpherson for the success with which he has grappled with the difficulties which necessarily accompany the working of a new law for the first time on so large a scale. Both the Directors have furnished lists of their subordinates who have rendered good service during the year, and Sir Charles Elliott desires that an expression of his high appreciation may be communicated to Captain R. T. Crichton of the Survey Department and to the following officers of the Settlement Department:—

Settlement Officers.	*Assistant Settlement Officers.*
Mr. C. G. H. Allen.	Mr. R. Nathan, I.C.S.
,, E. G. Colvin.	,, M. F. Gauntlett, I.C.S.
,, J. G. Cumming.	,, W. Thomson, I.C.S.
,, P. C. Lyon.	,, J. Taylor.
,, S. L. Maddox.	Munshi Nundjee.
,, C. J. Stevenson-Moore.	Maulavi Ghulam Ghous.
Babu Peari Mohun Basu.	Babu Annada Charan Gupta.

The names of the other Assistant Settlement Officers specially mentioned by the Director in paragraphs 120-121 of his Report will be noted in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Govt. of Bengal.

EXTENSION OF THE SYSTEM OF PAYMENT OF RENT BY MEANS OF POSTAL MONEY-ORDER TO THE DISTRICT OF PURI IN ORISSA, WITH EFFECT FROM THE 1ST JANUARY 1893.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 12th December 1895.

RESOLUTION—No. 5103.

READ—

Government Resolution No. 319L.R., dated the 19th March 1891.
Government Notification, dated the 10th September 1891.
Memorandum from the Government of India, No. $\frac{1773}{3-27}$, dated the 17th June 1895, an enclosure.
Memorandum from the Board of Revenue, No. 1010A., dated the 10th October 189 and enclosures.
Letter from the Postmaster-General, Bengal, No. $\frac{20703}{\text{M. O. 1 No. 3}}$, dated the 5th Novemb 1895.

In June last the Government of India forwarded to this Government fo disposal a petition, dated the 2nd idem, from certain inhabitants of the tow of Puri in Orissa, praying that the system of payment of rent by means c postal money-order might be extended to that district. The Board of Revenue who were consulted by Government, supported the recommendation of th local officers in favour of the petitioners' proposal, and the Postmaster-General Bengal, also has reported that he has no objection to the introduction of th system into the Puri district. In these circumstances, and having regard to th success of the system of paying rent by money-order, which was at fir introduced tentatively in the Burdwan, Rajshahi, Presidency and Dacc Divisions, and was afterwards, by Government Resolution No. 319L.R., date the 19th March 1891, extended to all the districts of Bengal in which th Bengal Tenancy Act was in force, the Lieutenant Governor is pleased to accede to the prayer of the petitioners, and to authorise, under section 54 (2) of th Bengal Tenancy Act, which, with certain other portions of the Act, has bee extended to Orissa by Government Notification, dated 10th September 1891 that from the 1st January 1896 the payment of rent by means of postal money order shall be allowed in the district of Puri.

ORDER—Ordered that this Resolution be published in the *Calcutt Gazette.*

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 16th December, 1895.

Burdwan.—No rain. Weather fair. Prospect of *aman* crop not good; its reaping and thrashing commenced. Sugarcane good. Water-supply sufficient. Fodder good. Condition of cattle very good. Common rice sells at an average price of 16 seers a rupee.

Midnapore.—Rainfall nil. Weather cold. Paddy is being reaped all over the district; the produce in Ghatal has improved and said to be an 8-anna crop. Indigo, sugarcane and linseed doing well. Some rain will improve prospects. Fodder and water sufficient. Common rice selling at—

	Srs	
Midnapore	18	per rupee.
Contai	22	
Tamluk	15	
Ghatal	16	

24-Parganas.—Rainfall nil. Weather bright and cool. Harvesting of *aman* continues; estimated outturn 8 annas in the north and 12 annas in the south of the district. *Rabi* crops progressing fairly. Fodder sufficient, but water insufficient in Barasat and Basirhat. No cattle-disease. Rice sells at—

	Srs.	c.	
Sadar	12 to 14	0	per rupee.
Barasat	15	0	
Basirhat	14	3	
Diamond Harbour	16	0	

Murshidabad.—No rain. Weather seasonable. State of *kalai* good. Harvesting of *aman* still continues; estimated outturn 8 annas. Prospect of *rabi* crops seems good, except wheat. Cutting of sugarcane still going on. Indigo and mulberry doing well. Fodder sufficient. Common rice sells at 14 seers a rupee.

Khulna.—Rainfall at Sadar ·03, Bagerhat ·49, Satkhira nil. Weather seasonable. Harvesting of *aman* going on. No cattle-disease. Fodder and water sufficient. Common rice sells at—

	Srs.	c.	
Sadar	16 to 21	0	per rupee.
Bagerhat	17	8	
Satkhira	14	3	

Dinajpur.—Rainfall nil. Weather cold. Condition of *rabi* crops not good Rain is wanted. Common rice selling from 13 to 16 seers per rupee. No report of any cattle-disease. Fodder and water sufficient.

Rangpur.—Rainfall nil. Harvesting of *aman* going on. Prospects generally good Common rice selling at 14 seers per rupee. Fodder sufficient.

Pabna.—Rainfall nil. Weather cool and pleasant. Harvesting of *aman* continues. Sowing of *rabi* crops nearly over. Fodder sufficient. Common rice sells at Sadar 18 seers and Sirajganj 13 seers per rupee.

Dacca.—Rainfall ·35. Weather seasonable. Harvesting of *aman* paddy going on; prospects fair. *Rabi* crops thriving. No cattle-disease. Fodder available. Common rice sells at 15 seers a rupee.

Chittagong.—Rainfall 4·26. Weather variable. *Aman* ripening and is being harvested in places. Prospects not good. Water and fodder sufficient. Common rice sells at 15 seers per rupee.

Patna.—No rain. Harvesting of paddy in progress. *Rabi* and poppy doing well. The resowings of poppy coming on well. Condition of cattle good. Fodder and water sufficient. Common rice sells from 18 to 23 seers per rupee.

Gaya.—No rain. Harvesting of paddy in progress. *Rabi* crops suffering for want of moisture. Poppy doing well. Price of common rice at Sadar 17 seers against an average of $16\frac{1}{16}$ seers per rupee. Water and fodder sufficient.

Champaran.—No rain. Harvesting of *aghani* continues. *Rabi* and poppy are being weeded. Prospects generally good. Common rice selling from 15 to 22 seers per rupee. Fodder and water for cattle sufficient.

Darbhanga.—No rain. Weather seasonable. Rice harvest continues. Rain much wanted for *rabi* crops. The later poppy sowings coming up well. Fodder for cattle plentiful. Prices stationary.

Bhagalpur.—No rain. Weather cold. Harvesting of winter paddy not finished; estimated outturn above 12 annas. Rain wanted for the *rabi* crops. Water sufficient. Fodder reported as getting scarce in Bauka. Common rice sells at an average price of 19 seers per rupee.

Purnea.—No rain. Cutting of *aghani* rice and sowing of *rabi* crops continue. Prospects good. Fodder and water sufficient. No cattle-disease. Price of common rice 18 to 25 seers per rupee.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *sarad* rice in progress. *Dalua* paddy seeds sown in places. Condition of cattle good. Fodder sufficient. Common rice sells at—

	Srs.	c.	
Cuttack	23	10	per rupee.
Jajpur	29	10	
Kendrapara	31	8	
Banki	29	8	

Hazaribagh.—No rain. Weather seasonable. Harvesting of paddy in progress; average outturn 8 to 12 annas. Rain wanted for the *rabi* crops. Poppy progressing satisfactorily. Fodder and water sufficient. Common rice selling at 13 to 16 seers rupee.

General Summary.—The principal feature of the weather during the week was a storm in the Bay, which struck the coast near Chittagong on the 12th instant and caused heavy rain in that station and rain in less quantities over other parts of Eastern Bengal. The harvesting of winter rice is in full progress, and the outturn, as previously reported, will be below the average in most districts. The *rabi* crops are doing well, but in some districts there is lack of moisture. Prospects of poppy are generally satisfactory. Indigo and sugarcane are thriving. No cattle-disease is reported. The price of common rice is still steady.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 17*th December*, 1895.

C. E. BUCKLAND,
Secretary to the Government of Bengal.
